The result of all this is very plain. It is that Mr Lowe is under peculiar difficulties in finance—that it is not a region in which his great powers can ever show to the best advantage—that on the contrary, it is a region in which they will frequently be seen at the greatest disadvantage. But there is a profound truth in the saying that "men of pre-eminent "ability are always safe;" not of course that so wide a phrase is to be taken exactly to the letter, but that there is a "reserve fund" in the highest ability which will enable it to pull through scrapes, to remedy errors, to surmount disasters, which would ruin and bury common men. Mr Lowe will certainly not have an unchequered reign at the Exchequer; but he may reign long, he may do much good, and notwithstanding many failures and defects, may leave the special stamp and impress of his mind on many great Budgets and important measures.

THE DEFINITIVE TREATY OF PEACE.

As our Paris correspondent states, the definitive Treaty of Peace has caused a painful sensation in France, in consequence of the increased severity of the terms of the conqueror, when compared with the preliminaries. No one can compare the two documents without perceiving that the German Government has made the present condition of things in Paris an occasion for demanding fresh securities. Perhaps one of the most remarkable changes is in the stipulations for the evacuation of the Paris forts—a point of no little interest, as the evacuation of these forts would be the principal step in making France once more mistress of herself instead of her being virtually under German rule. The engagements on this head in the Versailles and Frankfort treaties are worded as follows:—

PRELIMINARIES.

The evacuation of the departments situated between the right bank of the Seine and the Eastern frontier will be effected gradually after the ratification of the definitive Treaty of Peace, and the payment of the first half milliard of the indemnity, commencing with the departments nearest to Paris, and will be continued by degrees as the instalments of the indemnity are paid. After the first payment of half a milliard, the evacuation will take place in the following departments:—Somme, Oise, and the portions of the departments of the Seine Inferieure, Seine et Oise, Seine et Marne, situated upon the right bank of the Seine, as well as that part of the department of the Seine and the forts situated upon the right bank. After the payment of two milliards the German occupation will only comprise the departments of Marne, Ardennes, Haute-Marne, Meuse, Vosges, La Meurthe, as well as the fortress of Belfort with its territory, as a pledge for the remaining three milliards.

DEFINITIVE TREATY.

After the payment of the first half-milliard, and the ratification of the definitive Treaty of Peace, the departments of the Somme, Seine Inferieure, and Eure will be evacuated so far as they may be then occupied by the German troops. The evacuation of the departments of Oise, Seine et Oise, Seine et Marne, and Seine, as well as of the Paris forts, will take place as soon as the German Government will be of opinion that the restoration of order in France, as well as in Paris, is sufficient to ensure the execution of the engagements contracted by France. In any case that evacuation will only take place on the payment of the third half-milliard. The German troops, in the interest of their security, will have the disposition of the neutral zone situated between the German line of demarcation and the enceinte of Paris, on the right bank of the Seine. The stipulation of the Treaty of 26th February, relative to the occupation of French territory after the payment of two milliards, will remain in force. None of the deductions which the French Government will have a right to make will be made upon the first half-milliard.

The changes thus made are most material. Under the preliminaries the Germans were to evacuate the Paris forts—in other words, give up their pressure on the French capital—on the signature of the Treaty of Peace, and payment of 20,000,000*l*. Under the definitive Treaty, the preliminary payment is made 60,000,000*l*, and even then there is no binding engagement on the part of the Germans to proceed with the evacuation. They are only to do so if they consider the restoration of order in Paris and throughout France sufficient to ensure the fulfilment of the engagements contracted by France. The Germans are in fact bound to nothing at all. If they think they are more likely to get the indemnity by occupying the forts till the last franc is paid, there is nothing in the Treaty to restrict them from doing so.

Such changes in the Treaty are, to our mind, most significant—whether we consider the natural effect of them on France, or the probable motives of the German Government. They are exactly calculated to embitter the feeling of oppression in the French mind, and dispose the people to seek an opportunity for quarrel. When they find that, in cold blood, months after the conclusion of the war, the Germans are as exacting as in the heat of the contest, as disposed as ever to deal with France on the footing of enmity, entirely ready to push home every advantage which the unexpected weakness of France gives them,—they are sure to conclude that there is no hope of real peace with Germany. Their conviction will be that, whether in peace or war, Germany is fighting them, and that in proportion to their weakness they will be despoiled and oppressed. Nor will this disposition on the part of the French be wholly unjustified. No one can suppose that if France had been united, if only sufficiently so as to make a good fight with the prospect of ultimate defeat, Count Bismarck would have stuck out for harder terms in the Treaty than what he had already got. His one motive throughout has evidently been to get as much for Germany as he could, and he was not the man to commit an oversight in the preliminaries. He has asked more now because he knew he could get more. Whatever justification Count Bismarck may have from his point of

view in the altered circumstances, the hostile character of the act towards France is clear.

So much for the effect of the changes in France, no matter what the German motives may have been; but their probable real motives, so far as we have any indications, are equally significant. Count Bismarck really meant to be hostile to France. As a statesman he must have known thoroughly that the events in France subsequent to the preliminaries were all in favour of the security of Germany. France was no sooner out of her foreign troubles than she plunged immediately into civil war, and the effect was to weaken her for foreign attack—that is, to do for Germany what the elaborate safeguards put into the preliminaries were intended to accomplish. The German Government might not have liked to see the means out of which their indemnity would have to be paid squandered in some other way; above all other modes of weakening France, they might have preferred a huge payment to themselves; but the result was in any case obtained far beyond their expectations. To the material exhaustion which they had intended, and even more than they had intended—for the stoppage of business in France caused by the civil war will produce a greater loss than the indemnity—there was added a moral exhaustion, which was likely to suspend any new attack upon them for an indefinite period. All these were reasons for being less exacting themselves when the definitive Treaty was being settled. They could well have afforded to let much of the indemnity go, and claim credit for magnanimity on other points. The only conclusion which can be drawn therefore from their pressing more hardly than ever on France is simply the French belief that German hostility continues; that France, in their eyes, could not be brought too low; that they are very glad of the chance of exacting from a weaker France the indemnity which hardly seemed assured by the preliminary stipulations. To have exacted as much in the same way as at first proposed would in the new circumstances have been a hostile act; but they exact it in a harder way—by means of a far more oppressive occupation. There is no measure to their enmity.

Count Bismarck probably would not care to deny that his motives are correctly represented. France is the enemy of Germany, he would say, and the German Government is amply justified in increasing its securities from attack. But it is impossible to look at such hostile displays—the bitterness of French feeling, and the animosity of the German Government — without serious fears for the future of Europe. Instead of there being a temporary mitigation of hostile passions with the close of the war, every event is apparently inflaming them still more. Germany is perhaps surer of her indemnity than she was after the signature of the Versailles Treaty; she is authorised to continue a severer pressure on France till every farthing is paid; her chances of winning in a renewed contest with France are also perhaps improved; but the likelihood of such a contest is indefinitely increased.

THE FALL OF THE COLUMN IN THE PLACE VENDOME.

It seems at first sight a little absurd that all Europe should be so much interested in the fate of the column in the Place Vendôme; but there is an intellectual reason for the anxiety with which the fate of that monument has been watched. It furnished to a majority of persons a sort of test by which the political capacity of the Commune, and indeed of the people of Paris, might be judged. That test was not furnished, or not sufficiently furnished, by their more serious acts. They might, for anything the majority could tell, be in the right in suspecting M. Thiers of treachery to the Republic, or in recommending Federalism as a panacea for all the evils of France, or even in asserting in arms their own civic liberties. All those were at the worst serious political ideas, maintained in a wrong-headed manner; but the decree to destroy the column seemed to indicate something else—a reign of men without ballast, of men who could not perceive the relative importance of things, of ideologues cursed with all the impatience and much of the destructiveness of children. The column, to begin with, was a very remarkable work. It helped to beautify the city. It recorded, and was itself part of, an epoch in the history of France, which, whether famous, as most Frenchmen think, or infamous, as Parisians now seem to think, at all events *was*, and cannot therefore be obliterated. It was moreover considered by the army their memorial, and its destruction would therefore increase the bitterness prevailing between the citizens and the soldiery. It was evident therefore, that if the Commune destroyed the column, their impulse must either be one of childish impatience with a memorial which recalled the past, or an idea so vague and so fanatical as to destroy confidence in the judgment of those who entertained it. Men therefore watched with interest the discussion on the subject, most of them believing that after all the project would evaporate in talk. It was quite open to the Commune to depose the figure above the column, or to crown it with a statue of Remorse, or to express their dislike of the friezes in any other way; but it seemed incredible that they should injure their city irreparably merely to mark that they no longer approved the conquests they could no longer achieve. The general expectation was however disappointed. The agents of the Commune, after carefully arranging a dramatic spectacle, heaping dung for the statue to fall on, and loosening some of the plates, pulled the column down with ropes, and made speeches over the fractured bronzes, in which they declared, while waging civil war, that they had pulled down the splendid monument as a sacrifice to the new era of fraternity with all men. The theatricalness, as well as the childishness of the whole scene has disgusted Europe, and has weakened the moral power of the Commune abroad much more than their more serious acts. Men with real political instinct do not try to efface history, or sacrifice public buildings to an epigram, or think it worth while to spoil a grand prospect because it was made grander by a monument to a sovereign whose memory had suddenly become unpopular.

The only excuse that we see to be made for this act of Vandalism is that it has been frequently done before in France and that by men of all parties. That is true; but the repetition of such an act by the Commune shows that it has not, as it professes, risen above the temper of the old parties; that like its rivals it wishes to falsify or rather to forget history, and that it is, like them, inclined to appeal to the masses by striking theatrical displays. But that failure is of necessity fatal to a *régime* so novel and so distrusted, that unless it can prove itself to be much better than previous *régimes*, much *less* childish, much *less* theatrical, it can hardly claim a right to exist, can certainly not claim a right to force itself into existence at the price of a civil war. The execution of the decree shows that the Parisians are as liable as all other Frenchmen when collected in groups to be carried away by gusts of emotion—the main reason why Parliamentary Government in this country is so slow to take root. The individual Frenchman when not excited by passion, is usually cynically sensible, but when sitting among his fellows the histrionic element in his character gets the better of him, and the collective Assembly votes orders each individual member is willing to despise. This was true of the Constituent Assembly, of the Convention, of Louis Philippe's Parliament when not controlled by a packed majority, and is now shown to be true also of the Commune. Individuals, it is said, discredit themselves fast in France, but the process is certainly not so rapid with them as with representative bodies. At this very moment the Assembly, which represents France, is bombarding her capital rather than allow her municipal liberties, and the Commune, which represents Paris, is destroying her monuments rather than they should survive to recal an unpopular past. There is as much childishness in the Commune's detestation of a column of bronze as in the Assembly's detestation of its own principal city, perhaps more, for the column could do nothing, while the city could impede the policy preferred by France.

BUSINESS NOTES.

The Bankruptcy Act of 1869.—The first general report of the Controller in Bankruptcy, under the Bankruptcy Act of 1869, made in pursuance of Section 115 of the Act, has just been issued, but it is nothing more than a summary of statistics, which carry us a very little way. They are for one year only, viz., 1870; and as during that time only eighteen estates in bankruptcy were closed, there are few materials to throw light on several most vital parts of the Act. There is one fact which has surprised us however, and which will be found, we believe, contrary to a common belief. Very nearly

one-half of the failures, as regards the amount of liabilities, appear to be in bankruptcy instead of the large majority being liquidations or compositions. The figures are :—

	Cases.	Amount of Liabilities. £
Bankruptcies	1,551	7,932,520
Liquidation by arrangement	4,288	6,250,287
Compositions with creditors	1,616	3,293,622
	7,255	17,456,429

The inference would appear to be that it is the large failures which go into bankruptcy, while the number of cases, both of liquidation and of compositions, harmonises better with the popular impression as to how the Act works. There is great dissatisfaction with the Act in consequence, and on other grounds as well. There is another somewhat curious point. The comparison of the *assets* of bankruptcies and of liquidations apparently shows that if the amount of liability which is dealt with in bankruptcy is relatively large, it is not so with the assets. The figures as to this point are :—

	£
Assets in bankruptcies	1,965,589
— liquidation by arrangement	2,235,191
— compositions with creditors	1,180,753
	5,381,533

—showing that in bankruptcies there is little more than one-third of the assets, while there is about one-half of the liabilities. With regard to the eighteen cases closed, the dividends range in nine of them from 8s 5d to 9d, there being no dividends in the remainder—not a very brilliant result, the cost having also been 935*l.* or about 20 per cent., on 5,150 of gross receipts. These facts are however too meagre for any conclusion as to the cost of winding-up estates under the new law.

The American Rate of Interest.—Mr Wells has lately written to the New York *Nation* an interesting letter on the subject of the probable rate of interest in the United States during the next quarter of a century. His conclusion is that for that time "without such a condition of general disturbance and revolution in Europe as would endanger the safety of investments in that country, the average rate of interest for the United States as a whole will not be less than seven per cent. If the national or State Governments are able to borrow for less in their own markets, it will be because of the offer of compensating advantages, for the reduction, either in the way of security, exemption from taxation, or facility of conversion." The view, we think, will commend itself to those who look merely at the general condition of America, though they may not be disposed to assent to all Mr Wells's reasons, especially those connected with the supposed rate of interest in Europe. The United States, as a new country full of untouched resources, and of immigrants and other labourers who have little or no capital, is likely, for some time to come, to be a country in which capital will be in great demand. In other words, the current rate of interest will be seven per cent., or some such figure, which is a good deal above the standard in old countries which have much superfluous capital. The only cause of altering the effect of the native scarcity of capital would be a large importation from abroad; but this is hardly likely on a scale sufficient to make any material difference. Even to capitalists in England, notwithstanding the closeness of our business and other relations, America is a distant country, and the feeling of remoteness which attaches to investments there will long prevent the diversion of a large capital from employment nearer home. There are also some peculiar causes of distrust in lending to American corporations or public companies in the corruption of some of the State judiciaries. At a distance it is hardly possible to discriminate between States, and unfortunately the most corrupt judiciary is that which has jurisdiction over their commercial capital, through which naturally most of the foreign investments would be made. Until the judiciary is purified, there is not likely to be any such importation of capital into the United States as would otherwise take place, though we doubt even then if the importation would much lower the rate of interest.

The New Spanish Loan.—The form of the issue of Spanish 6 per Cent National Lands Mortgage Certificates," is somewhat complicated, but there appears to be little doubt as to the real nature of the security. The prospectus contains very full details, and except perhaps on one point intending purchasers of certificates will obtain from it all the information they require. What is offered to the public is a share in the Internal Debt of Spain. Certificates are to be issued in the name of the Bank of Castille, entitling the bearer to a share in a mortgage of 2,622,000*l*, bearing 6 per cent. interest, with heavy drawings, secured upon 2,622,000*l* of Spanish Treasury bonds, and 2,622,000*l* of *pagarés*, or promissory notes of the purchasers of national lands in Spain. But the transaction is a simple mortgage of the Treasury bonds and *pagarés*, the Bank of Castille merely engaging to act as trustee, and use the proceeds of the bonds and *pagarés* to meet the interest and drawings of the certificates. Looking at the price of issue and the drawings, the return to the investor is calculated at 9*l* 17s per cent.; but the investor will of course understand that half of his security is the Internal bonds of the Spanish Government, and the other half the promissory notes of land purchasers. The security is thus quite different from the ordinary security of the Spanish External Debt. The omitted point is that there is no statement of the rate of interest paid upon the Treasury bonds, which is a matter of some interest as affecting the means which the Bank of Castille will have for paying the certificates. No doubt the information may be obtainable by those who choose to inquire, but in matters of this kind essential points should be stated in the prospectus. Another matter which ought to be quite clearly understood is that, though the Bank of England holds the bonds on deposit, there appears to be no engagement by the Bank of England as trustee. We doubt whether the name of the Bank of England ought to have been used in the prospectus at all.

The American Trade.—In consequence of the change in the Board of Trade Returns, they are not so available for comparison with last year as they would otherwise be. As regards the American trade, the following figures, which we extract from the New York *Journal of Commerce*, show a remarkable increase, both of the imports and exports at New York, chiefly the former, and also a remarkable increase of the shipments of specie, up to the end of April this year :—

	1869.	1870.	1871.
	$	$	$
Imports	98,793,574	94,228,967	125,301,802
Exports (exclusive of specie)	55,590,842	57,763,096	81,339,444
Exports of specie	10,345,162	8,097,853	23,334,178

The Trust Funds Bill—Defective Reporting.—In noticing this Bill, we took occasion, while giving it our approval, to point out the very serious change in the law which it makes. Hitherto trustees have often been directed to invest in debenture bonds, because among other advantages the exact capital sum is repayable—an advantage which will be lost by investing in Debenture stock; yet as the general substitution of Debenture stock for bonds now in progress was not foreseen when these directions were given, and there is no better security, there is now a good reason for a relaxation of the directions by the authority of the Legislature. We made the remarks as they occurred to us, but we have since been informed that this is substantially the view taken by the promoter of the Bill in the Commons, Mr S. Cave. Unfortunately his explanation given on the second reading was not reported in the daily press, according to a mischievous rule which appears to be laid down not to report after a certain hour. In the present case an interesting explanation has been overlooked, and many of our readers, we are sure, will like to see the non-reported speech which has been supplied to us. Mr Cave stated in substance :—

By the Companies Act of 1863 it was enacted that companies authorised to issue Debenture stock might raise the whole of the money which they were empowered by Parliament to raise by means of such stock, that is, they were empowered to convert the whole of their debentures into Debenture stock. This enactment was rendered practically inoperative by a provision that this Debenture stock should not be issued at a higher rate than 4 per cent. This limitation was put an end to as far as railway companies were concerned by the Railway Companies Act, which it was my duty to bring into the House in 1867. Since then advantage has been taken of this provision to such an extent that almost all the principal railway companies have converted their debentures into Debenture stock as fast as they have been able to do so. By this means an effect has been produced, which did not at the time occur to myself nor, as far as I know, to any one else—namely, that considerable embarrassment and inconvenience has been caused to trustees who, being authorised to invest in debentures, which they had been in the habit of renewing from time to time as they fell due, found themselves obliged to find some other and perhaps inferior investment, the offer being made them to be paid off, or to accept

Debenture stock in place of debentures; and it having been held, though I believe high legal authorities are not unanimous, that Debenture stocks are not within the terms of their trust. Complaints having been made to me from many quarters, I thought myself to some extent bound, as the creator of the difficulty, to find some remedy, and I now propose that in all cases where trustees are allowed to invest in debentures, they should be—if not expressly forbidden by their trust deed—empowered to invest in Debenture stocks. The course which I have taken is not without precedent, as two Acts of Parliament have passed, the 22nd and 23rd Vict. c. 35 (1859), and the 30th and 31st of Vict. c. 132 (1867), by which trustees were empowered, whatever their trusts were, to invest in Bank stock and various India stocks, and I think that no danger could possibly arise from this much more limited proposition. In fact, the bar which now exists has in many cases driven investors from railways of the highest class, which are converting their debentures into stock, to those of inferior solidity, which are obliged to borrow in every way they can. It may of course be objected that the holder of stock cannot claim his capital, and if he wants it must undergo the risks and chances of the money market. This is undoubtedly the case, and trustees would have to consider it in choosing their investments; but the same inconvenience attaches to Bank stock, India stock, and even to Consols; and I believe I am not wrong in saying that in times of political crisis there is more fluctuation in all these stocks than in first-class railway Debenture stocks, and the risk of loss in this way must be set against the loss of income which is experienced when a 5 per cent. Debenture is paid off at a time perhaps when the Bank rate is at 2 per cent. That this is the feeling of the public is evinced by Debenture stock being almost invariably included in modern settlements drawn up since 1867. I may explain that Debenture stock does not make the holder a shareholder, or give him any right to interfere in the management of a company. He is as much a simple creditor as if he held the old form of debentures.

THE PUBLIC REVENUE AND EXPENDITURE.

THE receipts on account of Revenue during the week ending May 13 amounted to 930,050*l*. The total receipts of the previous week were 948,000*l*. The Exchequer issues of the week on account of expenditure were 960,720*l*. During the week the cash balances have decreased in the Bank of England and increased in the Bank of Ireland as follows:—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on May 6.....	3,989,339	850,220	4,839,559
— 13.....	3,923,669	910,520	4,834,189
Increase.....	...	60,300	...
Decrease	65,670	...	5,370

The other receipts to date were 34,000*l*, the other payments were 8,700*l*.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, May 18.

The text of the Treaty of Peace with Germany has been read with great pain by the French. It aggravates the conditions of the preliminaries in the matters of territory and military occupation, and does not abate the severity of the pecuniary stipulations. With respect to these latter, the French ever sanguine, had imagined, or at least hoped, that the Germans would allow them to pay in *rentes* part of the enormous indemnity imposed on them; but instead of that, all is to be exacted entirely in metal, or in paper of equivalent value. Nay more, though the notes of the Banks of England, Prussia, Holland, and Belgium, will be accepted, those of the Bank of France will not; and this exclusion of the paper of the great financial establishment—heretofore the most important in Europe—will not only subject them to grave inconvenience, but casts a slur on their national credit, which wounds them deeply. The five *milliards* (200,000,000*l*) indemnity exacted are to be paid—500,000,000f thirty days after the capture of Paris, 1,000,000,000f in the course of the present year, 500,000,000f before the 1st May, 1872, and the other 3,000,000,000f on 2nd March, 1874—the latter to bear interest of 5 per cent. from 2nd March, 1870, but the privilege of paying in advance to be allowed. The obligation of raising such huge sums in so short a time, joined to the reparation of the ravages of the war, will certainly strain the resources of France; but she possesses, perhaps, more than any other nation, the power of recovering from disaster. In one respect, however, the French have come off better than they expected. The sum of 325,000,000f is to be given for the portion of the Eastern Railway in the ceded territory, and a further sum of 2,000,000f for the line, stations, &c., possessed by the Eastern Company in Switzerland. With respect to the Treaty of Commerce, annulled by the war, the Peace Treaty enacts that Germany in tariff questions shall be placed on the footing of England and other "most favoured" nations. M. Pouyer-Quertier, who took part in negotiating the peace, telegraphed to Rouen, his own town, that "France had regained her commercial liberty;" and this was interpreted by the cotton industry of Normandy to mean that she could tax German products as she pleased. In point of fact, however, she can do nothing of the kind. The tariff of England and other countries she accepts is precisely the same as that which Germany enjoyed under the annulled treaty of 2nd August, 1860. Nevertheless, in virtue of it, M. Pouyer-Quertier and his *confrères* in the spinning, weaving, and printing of cotton will be freed from the competition of Alsace; and so in the midst of the national afflictions they obtain comfort.

According to Lille newspapers, the Versailles Government has resorted to the idea of establishing high duties on the import of cotton, wool, and other raw materials, giving in return "liberal" protection to manufactured products in France: and at its request delegates of the Chamber of Commerce of Lille have gone to confer with it. The necessity of raising money by all possible means is the pretext it put forward for the taxing of raw materials; but no doubt its real object is to serve the Protectionist fraternity. It should bear in mind, however, that by rendering materials dear it will make labour scarce, and that commercial treaties limit for some time to come its power of augmenting duties on foreign products.

In the Assembly of Versailles, a deputy has obtained permission to bring in a Bill for abolishing the law against usury,—that is, lending money at more than 5 per cent. in some cases, at 6 in others. In a country which has the modest pretension to march at the head of the world in all things, and which has produced men who stand in the highest rank of economic science, it is strange that such a law is still in existence. But in France there is a wide difference between pretension and reality. In the brief discussion that preceded the permission alluded to, some sapient legislators showed how much they have to learn. One, for example, of the name of Aubry said that "the unlimited rate of interest" was a disputed question between economic and socialist schools; and another, a M. Ventaion, said that at a moment at which landlords could not get their rents paid, capitalists ought not to be allowed to "render themselves masters of the country" by charging a high rate of interest. In answer to these wiseacres, it is true, M. Germain, a banker, remarked that in spite of the law the Bank of France, from the force of things, was obliged at times to charge 9 or 10 per cent.; another deputy observed that it would be better for landlords to borrow at high interest than to run the risk of being sold up from not being able to borrow at all; and a third stated that in Holland and in other countries in which usury laws did not exist, money, on an average, was cheaper than in France.

In the Commune the other day a committee reported that the clothing department of the National Guard had, from motives of economy, accepted contracts at the rate of 3f 75c and 2f 50c for certain articles of dress, instead of 6f and 3f 50c previously paid, and that in consequence contractors had reduced considerably the wages of needlewomen. It was monstrous, the committee said, that under a social revolution workpeople should actually be earning two-fifths less than they did under a Government of monopoly and oppression. The agents of the Commune, it declared, ought not to have allowed themselves to be tempted by the low prices offered by the contractors; they ought to have thought of the interests of the workwomen. In reality, however, it added, in paying good wages the Commune would not lose much, for there would be less need of expenditure in the distribution of food and other relief to the needy. A proposition was made that all the contracts at the reduced prices should be declared null and void; but as some members represented that that might cause serious inconvenience, the determination was come to that they should be revised, and that in the new ones a minimum of daily wages should be fixed, the day being of eight hours only. A motion to pay by the piece was rejected, for the reason that it would favour skilful hands to the detriment of those less able. In this affair we have a specimen of the practical application of socialist doctrines. But the Commune omitted to take into consideration that in paying to a certain number of people more for labour than it is worth, it really does an act of charity to them at the expense of the whole community, which has to find the money; and that at the same time it will render difficult the exercise of private enterprise, and will thereby deprive a considerable number of needle hands of employment, inasmuch as it cannot possibly receive all into its workshops.

The Minister of Finance of the Commune has decided that the stamp duties on assurances against fire and hail, ordered by laws of 1850 and 1862 to be paid half-yearly, shall be levied quarterly, and accordingly calls on assurance companies for the immediate payment of the quarter due. He has also ordered that, as certain companies which had obtained the concession of markets in different parts of Paris have refused to pay the arrears due to the city up to 1st April, but have nevertheless compelled market people to pay for the sites they occupy—the said markets shall be controlled by his administration.

Two very objectionable acts have been done by the Commune, or rather by bands of National Guards acting in it

name. On Friday last, one of these bands went to the Bank of France, and occupied it in military fashion. Its pretext was that it wanted to seek for arms that were secreted; but the general belief was that it desired to seize money. The authorities of the Bank sent in great haste for M. Beslay, the member of the Commune "delegated" to it, and who has managed its *relations* with the Hotel de Ville. He had to get up from a sick bed to obey the summons; and notwithstanding his great age, his long services to the democratic party, and his authority as one of the Commune, he had considerable difficulty in inducing the armed Nationals to decamp. He was so disgusted at their proceedings, that he immediately resigned his seat in the Commune; and in him that body has lost one of the three or four men who, from social position and intelligence, and from real political conviction, give a certain degree of respectability to its cause. The occupation of the Bank had no other consequences than a temporary interruption of business. The second act referred to was the invasion of the Société Générale—a joint-stock establishment, which after the Bank of France and the Comptoir d'Escompte is the most important in Paris. The invasion was effected in the latter part of Saturday, and continued to Monday morning. A report was spread that the invaders had ascertained from the books of the bank the amount of deposits held, with the name of each depositor,—had called for the production of the whole, on the ground that the depositors were enemies of the Commune, and that a state of war existing, the latter had the right to seize their property,—and not being able to get the deposits, had extorted the payment of a large sum. But it appears from a letter of the secretary of the Société that no money was paid, no security abstracted, and that the names of the depositors were not called for. What, then, was the object of the armed visit? The secretary does not state, and probably it was as purposeless and insensate as those to certain insurance companies some time ago. Such things, however, ought not on any account to be allowed. To the armed workmen who make them they may appear nothing more than a merited vexation of their traditional enemies—the *bourgeois* and the capitalist, but to banks they may have serious consequences.

In an official publication of the Commune, it is stated that under the Empire the Administration of Public Assistance spent not less than 900,000f a year in salaries for the distribution to the poor of Paris of about 5,000,000f; and, in addition, paid 150 sisters of charity 50f a month. In London, does poor relief cost at the rate of (nearly) 40,000*l* per 200,000*l*?

It may be well to note that "definitive securities" of the City of Paris loan of 1869 have been sold at Brussels; but that as the formal exchange of such titles for the original scrip has not been effected at Paris, they are not authentic. They must have been abstracted from the Hotel de Ville, and the signatures they bear are either forgeries or unauthorised.

By its statutes, the Bank of France is bound to hold an annual meeting of shareholders in January of each year; and, though in January last Paris was invested by a foreign army, and the greater part of the shareholders were away, the enactment was respected. But as the Bank had for some months been cut off from communications with its branches, its directors were unable to give a complete account of the operations of the last six months, and therefore confined their report to the first six. In the first half of 1870, the total operations of the Bank and branches amounted to 4,074,005,559f, being 20,055,268f less than in the corresponding period of the year preceding. The rate of discount stood at 2½, at which it was fixed so far back as 31st May, 1867, but in the last half of the year it was put at 3 on the 18th July, 3½ on the 20th, 4 on the 22nd, 5 on 1st August, 6 on 10th August, and it has since remained at that figure. The amount of bills discounted was 3,270,268,461f—a decline compared with the six months of 1869 of 11,580,598f. The advances on Government stock, Treasury bonds, railway shares, &c., were 231,542,000f, an increase of 18,861,790f. The metallic reserve, which at the beginning of the half-year was 1,254,000,000f to 1,296,000,000f on 17th January, and rose to 1,410,000,000f on 22nd June. "We can state," says the report, "that this reserve notably declined in the second half of the year, under the influence of the causes that led to the suspension of cash payments. On 13th September, the last date at which we could collect the total operations of Paris and the branches, the total was only 790,000,000f, and since then it must have rapidly fallen off." At the beginning of the half-year the notes in circulation amounted to 1,370,000f; on the 20th January they were 1,568,000f, the maximum, and 1,364,000f on 21st March, the minimum. "On Sept. 13th," remarks the report, "owing to the suspension of cash payments and the prorogation of the payment of commercial bills, the circulation increased to 1,774,000f. The maximum of deposits was 442,000,000f on 23rd June; the minimum, 322,000,000f on 27th January. The expenses of management were 3,791,479f; in 1869, 3,800,396f. In July, 1870, 54f were distributed on account of dividend, and on 1st January, 1871, 30f were paid. The latter was what is called a "reglementary dividend," being half-a-year's interest at the rate of 6 per cent. on the 1,000f shares fixed by the statutes; and if on the accounts being made up it should appear not to be fully earned, the deficit will be made up from the reserve.

The Company of Forges et Chantiers de la Mediterranée, not being able to hold the annual meeting, is paying 30f per share on account of dividend of 1870.

PARIS, May 11.

Although only last week a new adjournment for the payment of commercial bills was accorded by the Versailles Parliament (see ECONOMIST, May 6) a proposition for a new delay for three months has been presented not, it is true, by the Government, but by a single member. If an example were wanted of the frivolity with which the statesmen and Legislature of this country treat the most important questions, it would be presented by the manner in which commercial bills have been dealt with. Since August last at least ten or a dozen different decrees or laws (including those of the delegation at Bordeaux) have been issued respecting them, and not one has given satisfaction to the mercantile community, or been found capable of application.

A Committee of the Versailles Assembly has commenced an examination of the corrected Budget of 1871, and it already sees, we are told, that more important savings than the 119,915,582f indicated by M. Pouyer-Quertier (as stated last week) can be effected by cutting down useless places, and reducing the army and navy. No one can doubt that the Committee is in the right. France literally swarms with placemen, of whom not more than one in five is of real utility; and as it is to be presumed, after the lesson she has received, that she will not be insane enough to go to war again for years to come, a few ships and a few thousand men are all she needs.

Among the propositions submitted to the Parliament of Versailles, is one for raising 5,000,000,000f in bonds of 100f, bearing no interest, but to be paid off by annual drawings in twenty years, with lottery prizes of from 200f to 200,000f each year.

The Commune has dealt with the Mont de Piété, but in a much less sweeping manner than was proposed. The establishment is not to be liquidated, and pledges in it are to be restored gratuitously to the amount of 20f, not 50f, as demanded; and in order that really necessitous persons may exclusively profit by the restitution, it is not to comprise articles of jewellery or luxury, and is to be made to the pawners personally, not to speculators who buy up tickets. The Commune, *id est* the public, will of course have to bear the expense of this act of charity by indemnifying the Mont de Piété. The amount of the outlay is estimated at about 8,000,000f; but as the number of the articles pawned at less than 20f is about 900,000, and as from the formalities to be observed only 4,000 can be delivered daily, the restoration will occupy several months, so that the 8,000,000f will not have to be furnished in a lump.

The decree of the Commune prohibiting journeyman bakers from working in the night has been maintained. But as it attacks an old-established custom, and interferes in an unwarrantable manner with the right of employers to buy, and employed to sell, labour at any hours they please, as too many of the men themselves object to it, the expectation is that it will be withdrawn. If indeed it were to stand, night-work in other callings—the post office, newspapers, railways, &c., &c. —would logically have to be suppressed; and as has been wittily represented, lamplighters would be justified in demanding to be allowed to light lamps at twelve o'clock in the day, and put them out at four. In another matter also the Commune has gone beyond its jurisdiction: it has ordered that bread and meat shall be sold at fixed prices. In doing so it thinks it renders a service to consumers; but does it not see it runs the risk of doing wrong to butchers and bakers, and at the same time of diminishing the supplies in the markets? At a moment when Paris is threatened with a complete deprivation of provisions, as in the Prussian siege, this meddling with the two most important branches of the trade in food is peculiarly unwise.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 17th day of May, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued...	38,321,915	Government debt.....	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	23,321,915
		Silver bullion	...

Bullion	760,226	...
Rest.....	3,748	...
Reserve	900,081	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending May 17, 1871. £	Week ending May 10, 1871. £	Week ending May 18, 1870. £
Thursday	11,461,000	16,023,000	9,943,000
Friday	28,229,000	15,152,000	27,384,000
Saturday	16,377,000	13,805,000	13,036,000
Monday.....	13,970,000	12,115,000	11,143,000
Tuesday	14,587,000	12,487,000	11,820,000
Wednesday	14,329,000	13,843,000	11,977,000
Total.....	88,953,000	83,425,000	85,303,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, May 18, 1871.

The total since the 4th of January, 1871, is 1,609,746,000*l*, compared with 1,467,885,000*l* for the corresponding period last year, showing an increase of 141,861,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week.	May 22, 1861.	May 20, 1868.	May 19, 1869.	May 18, 1870.	May 17, 1871.
Circulation, including bank post bills.....	£ 20,441,404	£ 24,404,975	£ 23,794,353	£ 23,624,331	£ 24,853,779
Public deposits	6,906,189	6,041,006	4,932,228	9,182,350	8,325,512

Clearing-house return..	...	71,008,000	75,130,000	85,303,000	88,953,000

In 1861, there was comparative ease in the money market, notwithstanding the continuance of the drain of bullion to America—people having over-provided themselves. The difficulties caused to merchants by the American war were now felt to be very great.

In 1868, the period of 2 per cent. following the 1866 panic continued. The difficulty of Mr Disraeli's minority Government was keenly felt and discussed.

In 1869, an advance to 5 per cent. had been feared, but did not take place. The discount houses were becoming better supplied with money.

In 1870, money was easy, but the trade demand was believed to be increasing. The result of the plebiscite in France had been a great majority for the Emperor, except in the large towns, which mainly declared against him.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,521,534*l*; in 1868, an excess of 956,222*l*; in 1869, a deficiency of 564,331*l*; and in 1870, a deficiency of 2,547,436*l*. In 1871, there is an excess of 1,172,994*l*.

Discount and Money Market.—The abundance of money continues, and the quoted rates are the same as last week—viz., 2¼ for the best short-dated paper, and 2⅜ for two and three months' bills. During the last few days there has been a somewhat improved demand both in the open market and at the Bank, but not such as to cause any change in the quotations or in the general tendency of the market. It is stated in some quarters that foreign bankers and others are providing themselves with means in anticipation of the approaching fall of Paris; but this movement in the market is not yet generally perceived, if it be not altogether premature. The improvement in the demand, so far as it has gone, is not greater than one of those changes from day to day in the amount of transactions for which no particular reason can be given.

Until to-day there was a growing impression that the fall of Paris was imminent, but the latest news of the failure of the Versailles attacks on Fort Montrouge and the western front of Paris, has produced a feeling that the end may yet be a good while distant.

The position of the Bank has again been greatly strengthened. The addition to the bullion during the week is 760,226*l*, and to the reserve, 900,087*l*; while the private securities have diminished 700,047*l*—the Government securities being without change. The other changes are unimportant. The Bank has now a reserve of 14,774,000*l*, against 28,087,000*l* of banking liabilities—equal to 10s 6d per £.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—3 months	2¼ ⅜	per cent.
Do 4 —	2⅜	per cent.
Do 6 —	2½	per cent.
Trade bills—3 months	2⅝	per cent.
Do 4 —	3	per cent.
Do 6 —	3¼	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call.....	1½ per cent.
Discount houses at call	1½ per cent.
Do with seven days' notice	1½ per cent.
Do fourteen days	1¾ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	2½	6*	2¼	...
Vienna	5	5	5	5
Berlin	4	4	3½	3½
Frankfort	3½	3½	2⅞	3¼
Amsterdam	3½	3½	3¼	3 ¼
Turin	5	5	5	5
Brussels	2½	4	2½	3¼ ½
Madrid	5	5	5	5
Hamburg	...	...	2¼	3¼ ½
St Petersburg	6	6	4½	6

* Nominal.

The Stock Markets.—This week, as last week, there has been a good deal of animation in the markets, but the movements have been of a more varied character. Last week the upward movement was all but general and continuous during the week, but this week there have been severe fluctuations. Early in the week the aspect of things was favourable, English railways and the leading foreign securities being especially buoyant, but later there was rather a severe reaction consequent on realisations, and accompanied in the case of foreign securities by the usual unfavourable rumours. As we anticipated last week there have also been various issues this week, principally an issue of 2,642,000*l* in mortgage certificates, secured upon an equal amount in Spanish Treasury bonds, and another equal amount in *pagarés*, or promissory notes of the purchasers of national lands. This issue is understood to have been moderately successful, and the

success of most of the new enterprises will most probably still further encourage such applications. The conclusion of the contest between Paris and Versailles is still deferred, and the prospect of it has comparatively little effect on the dealings in the markets. We must still adhere to our opinion, however, that the termination of this contest is an event which must powerfully influence the markets, and ought not to be forgotten.

ENGLISH GOVERNMENT SECURITIES.—There is still no small amount of depression in this department, the high prices which have been reached not being very steadily maintained. To-day there has been rather more firmness, and Consols close at 93¼ ⅜ both for money and the account, a fall in the latter case of ⅛ for the week.

Subjoined is a list of the highest and lowest prices of Consols every day:—

CONSOLS.

	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June.
Saturday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Monday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Tuesday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Wednesday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Thursday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Friday	93⅛	93⅜	93⅛	93⅜	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Ditto 5 % red. at par July 5, 1880	111¼ 12½	112 ½	... ...

EXCHEQUER BILLS.—1s to 6s prem.

The following notice has appeared in the *Gazette*:—

Treasury Chambers, Whitehall, 16th May, 1871.

The Lords Commissioners of Her Majesty's Treasury hereby give notice to the holders of Exchequer bills issued under the authority of the Act 24 Vict. cap. 5, and dated the 11th June, 1866, that the interest thereon for the half-year ending on the 11th June, 1871, will be payable at the Bank of England, on and after the 12th day of June, 1871. The said Exchequer bills, dated the 11th June, 1866, will be paid off, either in new bills or in money, on the 12th June, 1871, when the interest will cease. Such bills will be received at the Bank of England daily, from ten till two o'clock, until the 5th day of June, 1871, inclusive. Printed forms, containing instructions for the preparation of the lists and the arrangement of the bills, may be obtained on application at the Chief Cashier's office, Bank of England. The holders must insert their names and addresses in each list; but where the names of holders are inserted in the body of the bills, the indorsement of such holders must be obtained previously to the lists and bills being left for examination. New bills, prepared in accordance with the provisions of the Act 29 Vict., cap. 25, dated 5th day of June, 1871, may be obtained in payment of the principal of the whole, or part of the Exchequer bills advertised for payment, on the claimants specifying in their lists the amount of new bills required by them. The interest of the said new bills will be payable by coupons half yearly, on the 11th December and 11th June, at the Bank of England. The rate of interest will be advertised from time to time in *The London Gazette*. Such rate for the half year to the 11th day of December, 1871, will be two pounds ten shillings per cent. per annum. The bills will be current from year to year, for a period of five years, commencing on the 11th June, 1871, at the option of the holders; and they will be payable for duties, aids, and taxes, at any time during the last six months of every year, viz., between the 11th December in each year and the 11th June following. The new bills in payment of the bills left on or before the said 5th day of June for exchange, will be issued on the 12th day of June, 1871, when the claimants must attend at the Bank of England to sign receipts for the payment of the principal. Notice will be given, yearly, of the days on which holders of the new Exchequer bills who may be desirous of being paid the principal moneys must send their bills to the Bank of England for examination and payment. Payment in money may be obtained at the Bank of England after the said 12th day of June next for the Exchequer bills hereby appointed, and which may not be brought in for exchange or payment, as above, from the claimants leaving the bills for examination three clear days previous to such payment is desired, between the hours of 10 and two.

COLONIAL GOVERNMENT SECURITIES.—The following shows the changes for the week:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	107 8	107 8	+ ¼
Ditto 5 %	101	101	... ...

Victoria 6 % (Land Bonds)	108	108	... ...
Victoria 6 % (Land Bonds) 1884-5	110	110	... ...
Victoria 6 % (Land Bonds) 1890-1	110	110	... ...
Victoria 6 %	107	107	+ ¼

FOREIGN GOVERNMENT SECURITIES.—As we have stated, this market was buoyant early in the week. After Tuesday, however partly because of selling orders from the continent, but partly also on account of home sales for realisation, the market for most descriptions was very depressed. Another cause of depression was the issue of Spanish Mortgage Certificates for upwards of 2½ millions sterling, secured upon Treasury bonds, accompanied by the report that a direct State loan for a similar sum was a portion of the new Finance Minister's projects to be carried into effect at an early date, though not immediately. Turkish securities were also unfavourably affected on Thursday by a telegram from Constantinople, to the effect that the Government contemplated a farther issue of Consolidés to a large amount—said to be about 26,000,000*l*. To-day there has been rather more firmness, and one or two of the leading securities have again advanced.

On the whole, it will be seen from the usual list which we subjoin that though the depressing influence has predominated during the week, yet the changes have been of a varied character—a rather important rise having in some cases taken place. But for the present the movements show that prices have reached a high level, and will not be very stable, much less buoyant, till more realisations have been effected. We understand, however, that there has been lately a large absorption of foreign stocks for investment, and short of a great change, such as the restoration of order in France, this influence will keep the markets steady.

The Costa Rica loan, which was at 4⅛ 5 pm. last week before the allotment, subsequently receded to 3½, being quoted to-day at 3⅜ ¼ pm.

We subjoin in our Notices and Reports an account of the issue of the Spanish Mortgage Certificates, to which we have referred. The applications, which close to-day for London, and to-morrow for the country, are stated to have been considerably in excess of the amount issued. The closing price quoted to-day is ⅞ to 1 pm., the dealings having been restricted.

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

ENGLISH RAILWAYS.—We note below the principal changes for the week in this department, the rise for the week, however, in most of the lines being less than the highest price for the week. Caledonian, Metropolitan, Metropolitan District, and North British especially advanced early in the week, and still show a considerable improvement, though the high price has not been maintained. To-day the market has been good, London and South-Western and Brighton stocks having each risen 1 per cent. in anticipation of a restoration of continental traffic on the success of the Assembly at Paris.

The rise in debenture stocks has again been very important.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	77⅛ ⅜	78⅜ ½	+ 1⅛
Great Eastern	42⅛ ⅜	42⅛ ⅜	— ⅛
Great Northern	123½ ¾	123 6	— ½

London, Chat., & Dover Arbitration 4½ %	96 7	96 8	... ...
Metropolitan District 6 %	117 19	124 7	+ ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending May 13 to 758,401*l*, being an increase of 46,617*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 12,721,635*l*, being an increase of 713,378*l* on the corresponding period of last year. The principal increases for the week are—North-Eastern, 8,972*l*; Great Western, 6,558*l*; Midland, 5,143*l*; London and North-Western, 4,883*l*; and Lancashire and Yorkshire, 4,851*l*. The following shows the details of the increase or decrease in each case for the week and for the whole period :—

Madras 5 %	105½ 6	105½ 6	... ...

Subscriptions are invited by Messrs E. F. Satterthwaite and Co. for 235,000*l* sterling First Mortgage bonds of 100*l* each of the Midland Railway Company of Canada, at an issue price of 85*l* per bond. Interest at the rate of 6 per cent. is made payable half-yearly in London, and the principal will be redeemed within thirty years by a sinking fund of 2 per cent., and yearly drawings, commencing in 1873. The instalments are distributed as follows :—5*l* on application, 15*l* on allotment, 20*l* on July 15, 20*l* on August 15, and 25*l* on September 15. These bonds form part of a total issue of 336,000*l*, authorised for the purpose of cancelling all classes of existing bonds, and paying off the floating debt incurred in constituting extensions recently opened for traffic. The 100,000*l* balance of the authorised amount is intended to be issued in respect of the further extensions of the company's line to St John's Lake and Georgian Bay (about 55 miles), and the proceeds expended *pro rata* as the works of the new line are carried on and certified to the satisfaction of the London agents of the company. The bonds will rank as a first charge upon the property of the company, subject only to annual payments in respect of advances made before the passing of the Act by municipalities through which the railway is carried, and which do not exceed 2,000*l* per annum. The Midland Railway of Canada is 90 miles in length, extending from Port Hope, on Lake Ontario, to Millbrook and Lindsay, and to Beaverton, on Lake Simcoe, and from Millbrook to Peterborough and Lakefield. The greater part of these lines has been in active work for many years. The portion between Lindsay and Beaverton (23 miles) was opened for traffic in December, 1870. The share capital of the company paid-up and expended is 175,000*l*, and in addition large sums have been from time to time paid in as bonuses or free grants by the municipalities along the line.

AMERICAN SECURITIES.—The dealings in Government bonds have been limited throughout the week, and prices are lower on the average. The leading feature in the market is the important rise which has taken place in Erie shares, which advanced to 26¾ to 27 to-day, but relapsed to 24⅞ to 25⅛ on a succession of sales. The following shows the principal changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	90¾ ¼	90¾ ¼	— ¼
Ditto 1865 Issue	90 5/16 1/16	90 1/16 1/16	— ¼
Ditto 1867 Issue	92 7/16 5/16	92¼ ⅜	— 1/16
Ditto 5 % 10/40 Bonds, exchange 4/6 ...	89¾ ¼	...	... ...

Massachussets 5 % Sterling Bon'ds, 1900...	91⅛ 2½	91⅛ 2½	... ...
Panama General Mortgage 7 % Bonds, 1897	80 4	73 8	— 6
Pennsylvania Gen. Mort. 6 % Bonds, 1910	92¼ 3¼	93 4	+ ¾
Virginia 6 % Bonds	56 7	56⅛ 7⅛	+ ⅛

JOINT STOCK BANKS.—The change in the quotations for joint stock bank shares have been somewhat numerous, but not important in extent, and the result of the week's operations is rather favourable than otherwise. The principal movement is a rise of 1½ in London Joint Stock, but there is an advance of 1 in Bank of Egypt, ½ in South Australia, Chartered of India, &c., Chartered Mercantile, Hongkong and Shanghai (new), Imperial, London and County, and Union of Australia. On the other hand, London of Mexico and Provincial of Ireland have declined 1; London and River Plate, 2; ditto new, ¼; Anglo-Hungarian, English of Rio, Imperial Ottoman, and Merchant, ¼; and Union of London, ¼.

TELEGRAPHS.—The market for telegraph shares has been much depressed, and an almost general decline has taken place in prices. Rumours were current at one period of the week of the formation of a "Telegraph Trust" on a similar principle to that of the "Foreign Government Trust," but no practical issue has yet resulted. The closing prices to-day show a decline of 3 in Anglo-American; 1 in Anglo-Mediterranean; ½ in Reuter's; ¼ in Cuba; ⅛ in British Indian Extension, British India Submarine, Falmouth and Gibraltar, Great Northern, and West Indian and Panama. The only upward movement on the week is an advance of 1 in Submarine. Hooper's Telegraph Works also show a fall of ¼.

MINES.—The mining share market has ruled somewhat quiet this week, but so far as British shares are concerned prices have shown comparative firmness. Wheal Basset have advanced 5; South Caradon, 2; Tin Croft, 1; and Wheal Basset, ½. On the other hand, a reaction of 10 is apparent in North Roskear; 1 in Van and Wheal Mary Ann. The movements in the foreign market have been for the most part unfavourable, sales having preponderated. Eberhardts show a decline of 4 on the week; Colorado of 2¼; Cape Copper, United Mexican, and Vancover's Coal of ½; and Pacific of ¼. Almado Silver, however, have advanced ⅛.

MISCELLANEOUS.—This department calls for no particular observation. There has been an average amount of business transacted during the week, and the changes have been, on the whole, not unfavourable. Scottish Australian Investment have advanced 5, but Bolckow Vaughan shares have declined to a similar extent. Anglo-Austrian Bondholders' Committee's Certificates show a rise of ½; Credit Foncier shares of ¼; London Financial, National Steamship, North-British, Australasian, and Peel River, of 1; Roumanian Government Iron Bridges Annuities, of 2. Rio City Improvements have given way ½; London Tramways and National Discount, ¼.

EXCHANGES—There is no particular change from last week.

The New York exchange continues at 110¼, and gold continues to arrive.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The Bank still continues to be the only purchaser of gold, and about 538,000*l* has been sent in since our last circular of the 11th instant. With the exception of a withdrawal of 170,000*l*, sovereigns, there is no demand whatever for export, and all immediate arrivals will also be taken thither. The Elbe has brought 25,100*l* from the West Indies; the Scotia has brought 20,000*l* from New York; the Idaho has brought 15,000*l* from New York; the Samaria has brought 40,000*l* from New York; the City of Antwerp has brought 20,000*l* from New York; the Deman has brought 180,000*l* from New York; the La Plata has brought 29,670*l* from the Brazils—total, 329,770*l*.

Silver.—During the past week we have received about 120,000*l* from the West Indies and New York; the market, however, has hardly varied, and the demand is chiefly for Holland. Prices remain as before, at 60 7/16d to 60½d per oz standard, the last quotation being for fine bars. Sycee continues to arrive from China, and this, with other Doré silver, is readily saleable, the former at 60¾d per oz standard.

Mexican dollars.—About 75,000*l* in value have been on the market during the week, and owing to the demand prices have improved again to 58 7/16d per oz for the new, and 58½d per oz for the old coinage. The Khedive has taken 45,150*l*, and the Delta 62,250*l* to China and the Straits.

Exchange on India for banks drafts at 60 days' sight is 1s 10 15/16d to 1s 11 1/16d per rupee. The India Council drafts were allotted yesterday, the maximum, as before, was 1s 10½d per rupee. Applications at 1s 10½d received 1 per cent.

Indian Government loan notes.—We quote 4 per Cents., 92¾ to 92 15/16; 5 per Cents., 100 to 100⅛; and 5½ per Cents., 107⅜ to 107⅞.

Quotations for bullion.—Gold—Bar gold, 77s 8½d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 73s 8d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0 1/16d to 5s 0⅛d per oz std; ditto containing 5 grains gold, 5s 0⅛d to 5s 0¼d per oz std; Mexican dollars, 4s 10⅞d to 4s 11⅛d per oz.

The sum of 107,000*l* in gold was sent into the Bank of England to-day, including 100,000*l*, sovereigns, for Canada. A withdrawal of 5,000*l* in sovereigns for Buenos Ayres took place.

The *Gazette* return states that the imports of the precious metals into the United Kingdom during the week ended May 17 amounted to—gold, 615,428*l*; silver, 337,300*l*. The exports were—gold, 774,324*l*; silver, 217,643*l*.

FAILURES AND EMBARRASSMENTS.—The failure is announced this week of Messrs Christopher Newton Brothers and Co. in the Australian trade. At the meeting yesterday the statement showed the nominal assets to be 213,000*l*, against 203,000*l* of liabilities; and a composition of 15s per £ payable by instalments extending over two years was unanimously accepted.

MEETINGS OF COMPANIES NEXT WEEK.

TUESDAY, May 23.

Coorg Coffee, extraordinary.

WEDNESDAY, May 24.

Zealand Railway, general, Copenhagen.

THURSDAY, May 25.

Eclipse Gold Mining, general, London Tavern.
Italian Irrigation Company (Canal Cavour), general, Turin.
Great Western Railway, special.
South Austrian Railway, adjourned, Paris.
Anglo-Egyptian Banking, general.
London, Chatham, and Dover Railway, special.

FRIDAY, May 26.

Great Indian Peninsula Railway, general, City Terminus Hotel.
Eastern Bengal Railway, general, Guildhall Tavern.

SATURDAY, May 27.

Grand Russian Railway, special general, St Petersburg.

SETTLING DAYS.

Ticket Days—May 30th, June 14th and 28th.
Account Days—May 31st, June 15th and 29th.
Consol Account—June 1st.

NOTICES AND REPORTS.

STOCKS.

Chilian 4½ per Cent. Loan.—Bonds representing 16,900*l* have been purchased on account of the redemption for 13,709½*l*.

Sierra Leone New 6 per Cent. Loan.—The Crown agents invite subscriptions for 25,000*l*, being part of 60,000*l* required for constructing docks and other works of improvement. The issue price is 100*l* per 100*l* bond; and interest accrues from the 1st June. The principal is redeemable in 25 years by a fund accumulated in this country.

Spanish 6 per Cent. National Lands Mortgage Loan.—Messrs Stern Bros. are receiving applications for 246,850,000 reals vellon, or 2,622,781*l* sterling, being a moiety of a loan secured upon the pagares, or promissory land notes given by the purchasers of national property, which are payable, some in ten, some in fourteen years. One-half the loan will be issued in Spain. The principal will be redeemable at par by annual drawings of at least 6½ per cent. per annum by the year 1888 at the latest; but this redemption may be made more rapid by the payment of the pagares. The issue price is fixed at 17*l* per 21*l* 5*s* bond, being 80 per cent, the instalments being payable over four and a-half months. Reckoning accrued interest, the actual price is about 16*l* 13*s* 4*d*, at which the minimum return to the subscribers is nearly 9¼ per cent. The security is twofold—that of the Spanish Government and that of the pagares.

Turkish 6 per Cent. Loan, 1862.—Bonds representing 128,300*l* have been drawn for redemption at par on the 1st July.

RAILWAY COMPANIES.

London Tramways, Limited.—The call due on the 31st instant has been postponed till the 31st July.

Missouri, Kansas, and Texas Railway—First Mortgage 7 per Cent. Land Grant Gold Bonds.—This "road" is to form a great central north and south line connecting the Mexican frontier with the Kansas Pacific at Junction City, and the Missouri Pacific at Sedalia. $12,257,500 of capital stock has already been paid up, and $6,145,000 in bonds, secured on the 342 miles of line in operation. Messrs Louis Cohen and Sons receive subscriptions for $3,855,000 of new bonds at the price of 173*l* 5*s* per $1,000 bond, with interest from last 1st February, at which price the return is about 8¼ per cent. A sinking fund provides for their redemption at par in 33 years, which rate may be accelerated by the land sales effected, the money to be applied to redemptions at par.

North Metropolitan Tramways.—The call due on the 30th June has been postponed to the 30th September.

South Austrian, Lombardo-Venetian, and Central Italian Railway—Issue of 15,000,000l in 3 per Cent. Obligations.—Messrs Rothschild and Sons have invited applications for 750,000 obligations of 500 francs, or 20*l* each for the purpose of discharging the debt contracted for the redemption of bonds during the past eighteen months, and to complete works under construction in

[CONTINUED ON PAGE 606.]

[CONTINUED FROM PAGE 603.]

South Austria and Italy. The issue price is 8*l* 13s per bond, the first coupon being payable on the 1st October. The whole will be redeemed in 98 years by annual drawings at par. The subscription remained open till the 19th instant, in London, Berlin, Frankfort, Brussels, Vienna, and Florence.

BANKS.

English Bank of Rio de Janeiro.—The directors recommend the declaration of a dividend of 12s per share, making, with the dividend on account of 8s per share paid in December last, a division of profits for the year equal to 10 per cent., free of income tax.

Provincial Bank of Ireland.—At the annual meeting a dividend was declared at the rate of 20 per cent., out of a net profit of 104,421*l*.

Union of Scotland.—Years' profit balance, 132,363*l*, or, adding the previous surplus, 146,166*l*. The directors applied 5,000*l* in reduction of the cost of offices; 120,000*l* in payment on the 1st of June and 1st of December next of a dividend to the proprietors, at the rate of 12 per cent. per annum, free of income tax, and 7,000*l* to the rest account, leaving a balance carried forward of 14,166*l*. The rest or surplus profit at 1st of April last stood at 307,000*l*, exclusive of the provision for dividends.

ASSURANCE COMPANIES.

Queen Insurance.—At the meeting a dividend of 10 per cent. was declared, and the fire reserve was increased to 90,000*l*.

MISCELLANEOUS COMPANIES.

Hopkins, Gilkes, and Co.—The report shows an available total of 50,979*l*, including a previous balance of 3,025*l*, and recommends a dividend of 1*l* 8s per share, and of 10s per share on the vendor's shares paid, leaving 3,559*l* to be carried forward.

Park Gate Iron.—The report exhibits an available 22,659*l*, including a previous balance of 2,092*l*, and recommends a dividend of 6*l* 10s per share, being at the rate of 10 per cent. per annum, which will leave 3,224*l* to be carried forward.

South African Gold-fields, Limited.—Capital, 30,000*l*, in 1*l* shares. The purpose is to reconstitute the South African gold-fields exploration, established in 1868, and to obtain mining grants and concessions. 10,000 paid-up deferred shares will be given to the "Exploration" Company for their rights.

MINING COMPANIES.

East Sheboygan Silver Mining, Limited.—Capital, 75,000*l*, in 37,500 shares of 2*l* each. 5,000 shares, bearing 20 per cent. interest, are offered by the Open Stock Exchange, Limited, for subscription, the balance in ordinary shares being taken entirely by the vendors. The preference shareholders appoint three directors, and their money will be applied entirely in developing the silver mine. This is situated in Nevada, United States, close to the Eberhardt, South Aurora, and Hidden Treasure mines, and the lode is supposed to be the same as is running through those productive properties.

South Aurora Silver.—Since the February dividend at the rate of 20 per cent. per annum, a further 16,064*l* profit has been made. Another 5s per share, being at the same rate, will be paid on the 1st June.

Taquaril Gold.—A call of 1s per share is payable on the 3rd June.

Wheal Kitty (St Agnes).—A dividend of 7s 6d per share declared for the past quarter.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Owing to somewhat numerous arrivals of floating cargoes off ports-of-call, the wheat market was slightly less firm to-day, though the recent advance in the quotations was supported for both English and foreign produce. The export demand has ruled rather more active, but transactions for

home consumption are still confined to the positive requirements of the trade. Flour was without change from Monday last. Spring corn of all kinds ruled quiet; oats selling at the late decline. Maize, beans, and peas were unaltered in value. Barley sold in retail parcels on former terms. This week's imports of foreign and colonial produce into London have amounted to 14,870 quarters of wheat, 2,130 barley, 31,700 oats, 920 peas, 800 maize, 160 sacks and 4,790 barrels of flour.

At Liverpool and Wakefield this morning the wheat trade ruled firm, and the tendency of prices was upwards.

At New York, on the 18th current, Middling Upland cotton was quoted at 15¾ cents per lb.

The Liverpool cotton market opened very firm on Friday last, and there has since been a very good demand, resulting in a large business at an advance of ⅛d to ¼d per lb. The total sales for the week are 166,580 bales, of which the trade have taken 64,970 bales; speculators and exporters, 41,610 bales. The imports have been 59,774 bales; the actual exports, 25,795 bales; and to-day's stock is 937,250 bales. Quotations for American descriptions have advanced ⅛d per lb; East Indian, ⅛d to ¼d per lb; and Bengals ¼d per lb since last Friday. To-day the market closes quiet, but steady; sales, 12,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended May 18, 1871:—

	Imported.		Exported.
American.....bales	23,845	.....	13,433
Brazilian	9,434	.....	4,505
East Indian	16,149	.....	9,432
Egyptian	...	.....	595
Miscellaneous	1,355	.....	203
Total.....	50,783	.....	28,168

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, April 22:—There has been an active demand for most descriptions of cotton during the week, but the unfavourable telegrams received from home have induced a feeling of dulness among holders of stocks, and prices generally are 5 rs to 7 rs per candy lower than those quoted in our last issue. The week opened with a good inquiry both for ready and distant delivery cotton at about the level of last mail's closing rates, and up to yesterday business continued very brisk. Telegrams of 20th, however, quoting 6d per lb for Dhollerah, and reporting that the American receipts are again on the increase, have had rather a chilling influence upon buyers, and as we write the general disposition is in favour of holding aloof from operations pending the receipt of further news. Upwards of 10,000 candies changed hands during the week, and they may be summarised as follows, viz.:—1,100 candies Bhownuggur, 3,000 Dhollerah, 1,200 Broach, native and machine-ginned, 2,000 Akote and Oomrawuttee, 800 new Dharwar, and the remainder consists of Veravul, Joria, and other low-class Dhollerahs. Arrivals of cotton are considerably in excess of last week's total. From Guzerat large supplies are being daily received, while Oomrawuttee and the Central Provinces continue to forward very freely. From the Northern ports we have had rather scanty supplies, owing to the adverse winds prevailing, but a large fleet of bugalows is expected early next week. The Dhollerah coming forward does not improve, we regret to say, and it is at the moment almost impossible to obtain a satisfactory selection of this description. Bhownuggur and Mowa are beginning to arrive, and show a much better though irregular sample; but the quantity available on the green is very small. Some very nice parcels of Akote are procurable at about 172 rs per candy, but the general run of Oomrawuttee grades is very poor. Small quantities of good native Broach are arriving daily, but these are mostly taken up in fulfilment of contracts. The bulk of this description, however, is still not satisfactory. Water picking and seed make selection very critical. Machine-ginned shows considerable stain, and we fear this defect is likely to increase as the season progresses. New Dharwar is not yet coming forward in any quantity, but such arrivals as are now on the green show a very poor staple. The colour is very good however. From Tinnevelly we have a telegram, dated 20th inst., quoting 6¼d per lb.

Export of Cotton from Bombay to April 21.

Actual exports since last mail left, 24,651 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated May 5:—We continue unable to note any change from the stagnant position in which the cotton market has for such a length of time remained. Satisfactory parcels in every grade fully maintain previous values, but business altogether is limited, and somewhat irregular. We again quote:—Fair, 7⅞d to 7¾d per lb, f.o.b.; good fair, 8⅛d to 8¼d per lb, ditto; fully good fair, 8½d to 8¾d per lb, ditto; Gallin, 9¼d to 11¾d per lb, ditto (nominal). Freight, $\frac{3}{16}$d per lb for steam-pressed bales.

A fair amount of business has been transacted in colonial produce. Sugar sold steadily at the opening of the week, but the market has closed with quietness for both raw and refined goods. Coffee has ruled flat, and a decline of 1s per cwt has taken place. Rice has found buyers at firm prices. In tea there is no material alteration. Spices generally remain unchanged in value.

The following report, dated April 18, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—Although the Easter holidays have intervened since the publication of our last report, the export business of the fortnight has been proceeded with almost uninterruptedly. The shipments of our staple are however somewhat below those at the corresponding period of last year. The distribution of these may be seen below:—

Plantation Coffee.

	1871. cwts.		1870. cwts.
To Great Britain.....	482,209	.....	482,253

Australia and India ...	10,847	.....	8,594
	518,163	.....	517,639

Native Coffee.

	1871. cwts.		1870. cwts.
To Great Britain	59,658	.....	48,355
Foreign ports.....	14,740	.....	31,503
Australia and India ...	1,764	.....	2,098
	76,162	.....	81,956

The receipts of parchment coffee have fallen off very sensibly, and shipments proceeding actively, stocks in Colombo godowns are considerably diminished. The continued disturbances in France tend to weaken confidence in this article, and buyers holding off the market, dealers have accepted rather lower offers for good parchment. Some parcels of clean Ouvah native have found their way in, and have been taken at 46s to 47s picked and dried.

The annexed is dated Akyab, April 13:—Nakrenzie rice—Since the issue of our last report our market has remained very steady as far as prices were concerned, whilst supplies, owing to the approaching native feasts, have gradually fallen off; and although shippers must have expected this, as every year just before these festivities commence small arrivals of grain are noticeable, the market has assumed at once a firmer tone. Exports from this port having been very large up to date, stocks in the hands of shippers are much reduced, and this circumstance in face of frequent fresh arrivals of shipping has produced rather an uneasy feeling, as in case the natives should not bring in their produce freely after the holidays are over, shippers will be forced to submit to higher prices, and then a rapid rise of the market will be unavoidable. It is, however, generally expected that our market will be well supplied a week hence. We quote still 54 rs to 55 rs per 100 baskets, 28 lbs per basket, for good three parts shipping quality, at the present lower exchange equal to 5s 7d to 5s 8d per cwt, free on board. Exports to Europe up to date:—1871, 75,132 tons; 1870, 39,936 tons; 1869, 38,585 tons. Tonnage loading:—1871, 12,500 tons capacity, 1870, 8,000 ditto; 1869, 7,800 ditto.

With reference to the silk market, Messrs Kilburn, Kershaw, and Co. report:—The silk market continues very flat, and during the last week or ten days there have been occasional forced sales at a reduction of 6d to 1s from the rates obtainable at the beginning of the month, but even at this decline buyers do not come forward at all freely, and thus we have a dragging market; consumption goes on well, however, the deliveries being exceedingly satisfactory. From the South of Europe the accounts of the progress of the crop are not unfavourable, but the moment is too early for information on this point to be of any value. The continuance of the revolution in Paris, and the consequent derangement of business with that city, seriously affects the silk trade in Lyons and other towns in the South of France, and the general absence of demand for those districts is no doubt mainly the result of this disorganisation. There is a great scarcity of Asiatic silk in Lyons, and

considerable inquiry may fairly be looked for when the through route is again opened. Canton silk shares in the general dulness at 16s for fairly good market Tsatlee. Of Japans and Bengals sales can only be forced, and quotations are very irregular and all but nominal. The deliveries from 1st to 17th instant were 1,715 bales China, 563 Canton. 393 Japan, and 218 Bengal—total, 2,889 bales, against in same period last year 2,033, 386, 355, and 248—total, 2,972 bales.

According to a circular of Messrs Arles Dufour and Co., of Lyons—

The prolongation of the crisis in France has kept the silk market in that city in a state of extreme dulness, with an incessant decline in prices. The expectation of low rates for cocoons, combined with the largeness of the stocks of old silk still unsold, has caused European silk to be more especially depressed, and owing to the exhaustion of the stock of Asiatic sorts, coupled with the want of direct and quick communication with England, business has been nearly brought to a stand. The prospects of the coming harvest are the main subject of attention. In Spain the rearing continues to progress satisfactorily, especially for original and reproduction Japan seed, native races promising but a poor out-turn. In France the worms are between the third and fourth stage, and give full satisfaction. Reproduction and native seed thus far promise as good an out-turn as the eggs' cards imported from Japan. Cocoons will be ready by the end of this month. In Italy this year's reeling is carried on on a very large scale, and has succeeded admirably up to this moment. In the Levant the worms are reaching the fourth stage, and rearers look forward to a most satisfactory harvest, and to low prices.

Messrs Willans, Overbury, and Co. remark:—The second series of colonial wool sales for the current year commenced on the 13th ultimo, and closed on Tuesday last. The catalogues have comprised the following quantities, viz.:—From New South Wales and Queensland, 20,110 bales; from Victoria, 93,353; from Tasmania, 1,920; from South Australia, 34,142; from New Zealand, 17,171; from Western Australia, 1,100; and from the Cape of Good Hope, 24,544—total, 192,340 bales. Soon after the close of the February series some demand sprung up in this market for export, both to France and Germany, and led to a belief, which the prosperous condition of trade in our own manufacturing districts tended to confirm, that the result of these auctions would be of a favourable character. This belief was rudely shaken about the middle of March by the disturbances in Paris, no one being prepared, under the circumstances, for a strong demand from France during the series just brought to a conclusion. Contrary to expectation, however, this demand has been of a full average character, and combined with heavy purchases on German, Belgian, and American account, has gradually raised prices to a point not only high as compared with the average of the past few years, but even in advance of the favourable quotations of the corresponding series of 1870. On the opening night, although the tone of the sale room was exceedingly firm, no alteration was observable beyond a slight rise on greasy and Cape wools. After the first few days, however, competition became decidedly brisker, and prices for wools suitable for the export trade improved rapidly. This partial improvement was followed after a short interval by a general advance upon all but the finer descriptions of washed fleeces, which may be quoted as follows, and which with one exception was maintained till the close of the series:—Greasy parcels and washed fleeces of ordinary character about 1½d, Australian and Cape scoured about 2d, Cape fleeces 1d, and pieces 1½d per lb. The exception referred to was in the case of lambs' wool, for which extravagant prices were paid about the middle of the sales, but which subsequently receded many pence per lb. The quantity offered from Victoria was as nearly as possible the same as in the gloomy May of 1869, when the growth of this colony was depressed almost beyond precedent. The clip showed a larger proportion of superior wool than usual, and the staple was generally good, though occasionally weak—a fault which caused some surprise, having regard to the fine season enjoyed by the Victorian squatters. The importation from Sydney and Queensland was less than that of any corresponding period since 1864, in spite of which, probably owing to the moderate operations of the home trade, no exceptional improvement has taken place in the growth of these colonies, even as regards ordinary descriptions; while not only the very fine flocks, but even medium qualities, when of an essentially clothing character, have shared but to a limited extent in the advance quoted. South Australian wools, on the other hand, were never before in such large supply, notwithstanding which, and contrary to the experience of last May, they have derived the full benefit of the general rise in values. The character of the clip, however, was excellent this year, and in condition, length, and strength of staple showed marked improvement over the previous season. A good proportion of the New Zealand clip was also in time for this series, and while perhaps the growth was somewhat shorter than usual it brought its full relative value. The quantity taken for export is estimated at about 120,000 bales. These figures demonstrate both the activity of the foreign demand, and the moderate extent of the operations for English account.

Annexed is Messrs Wm. Moran and Co.'s indigo report, dated Calcutta, April 18:—The prospects of the new crop have undergone but little change during the past week. Eastern Bengal was fortunate in having a good fall of rain on 14th instant, and manufacturing will probably commence in another week. On the same date rain also fell in Jesore, but it appears to have been only partial in that district, and did not extend to Kishnaghur, where the want of it is beginning to be somewhat severely felt. From Malda, Moorshedabad, and Bhagulpore complaints of want of rain are general. The advices from Purnea, where rain fell early in the month, are very good. From Tirhoot, Chumparun, and Chuprah we continue to receive satisfactory accounts of the growing crop.

The annexed is dated New York, May 5:—Trade in most departments has been a little duller than usual, the storm of yesterday and the day before interfering to some extent with the movement of goods. The spriug is so far advanced that an active revival of the distributive trade in manufactures and general merchandise before the latter part of summer is hardly probable. During the period under review, there has been a pretty free outward movement in certain kinds of provisions, as tallow, lard, bacon, &c., for continental account, and also in flour and grain for English account. The export trade in cotton, petroleum, and some other important staples, continues to be held in check by a lack of margins. The money market remains decidedly easy at 4 to 5 per cent. on call, with an occasional transaction at 6 per cent. on weak hypothecations. The banks and capitalists are taking commercial paper of the first class, having from two to four months to run, at from the minimum of 6 to 6½ and 7, while inferior grades and fair single names are passed outside at from 8 to 12, and upwards. Prime real estate mortgages, having from three to five years to run, are quoted at 7 and 7½, and advances on staple articles of foreign and domestic merchandise at about double interest. The gold and exchange markets present no new features, nor is there anything in the late cable advices calculated to alter the general complexion of financial affairs.

THE COTTON TRADE.

LIVERPOOL.—MAY 18.

Cotton has been in increased demand this week, and the market has been strong, with an advance in most descriptions, though closing with less animation. In Sea Island the business continues limited, but prices show no change. For American there has been a large demand, and prices have risen fully ¼d per lb. New York advices to the 18th instant quote middling Upland 15¾ cents, costing to sell in Liverpool 8⅛d per lb, by steamer. In Brazil the sales have been extensive, particularly at the beginning of the week, and prices are advanced ⅛d to ¼d per lb over last week's quotations. Egyptian has been in fair request, and prices of the current qualities have rather hardened. East Indian has been in improved demand, chiefly for export, and the lower and medium qualities are in most cases ⅛d to ¼d per lb dearer, whilst the better qualities have only improved about ⅛d per lb. The late arrivals have given a good supply of new crop Bengal, which has been freely offered and sold at ⅛d reduction from previous nominal quotations.

In cotton to arrive there has been a considerable business

with some advance. The latest quotations are—American, Gulf of middling from Mobile, not below good ordinary, at sea, 7⅛d, 7⅜d; New Orleans, not below good ordinary, ship named, not sold, 7⅛d; Bales, not below good ordinary, April-May shipment, 7⅛d; good ordinary, from New Orleans, not below ordinary, at sea, 6¾d; Broach, good fair machine-ginned, ship named, via Cape, 6¼d; Dhollerah, fair new merchants, April-May shipment, via Cape, 6¾d; Oomrawuttee, fair new merchants, ship named, via Cape, 6¼d per lb.

The sales of the week, including forwarded, amount to 106,580 bales, of which 22,180 are on speculation, and 19,420 declared for export, leaving 64,970 bales to the trade.

MAY 19.—The sales to-day will probably amount to about 12,000 bales, the market without change.

Whit-Monday, the 29th, and Whit-Tuesday, the 30th inst., will be close holidays in the cotton market.

An increase of imports compared with the same date last year of	155,877
An increase of consumption of	179,000
An increase of exports of	271,566
A decrease of stock of	76,080

In corresponding weeks there is a decrease of 53,670 bales. The imports this week have amounted to 59,774 bales, and the quantity of American cotton exported at sea for Great Britain (including cotton sent to May 12) is 260,000 bales, against 122,000 bales last year. The actual exports have been 25,795 bales.

LONDON.—MAY 18.

Annexed is a portion of the circular issued this week by the Liverpool Cotton Brokers' Association —

"There was an active demand in the early part of the week, especially for cotton to arrive, but the inquiry has since fallen off, and prices close about ¼d per lb above last Thursday's quotations.

"Sales to arrive.—1,200 bales Tinnevelly, at 6¼d to 6⅜d, May-June shipment to January sailing, for good fair; 1,200 bales Western Madras, 5¾d to 6¼d May-June to January-February shipment, for fair new and fine; 1,200 bales Cocanada 6¼d to 6¾d, May-June shipment and ship named to March sailing, for fair red; 300 bales sawginned, 6¾d, April-May shipment, for good fair; 1,400 bales Broach, machine-ginned, 6⅞d to 6¾d, April-May shipment and ship named, for good fair; 6¾d, for fully fair; 4,200 bales Dhollerah, 6d to 6⅞d, March to June shipment, for fair; 2,600 bales Oomrawuttee, 5¾d to 6¼d, March to May shipment, for fair; 6¼d, for fully fair; 2,500 bales Bengal, 5 1/16d to 7 1/16d, June to March shipment, for fair; 200 bales American, 7¼d, March-April shipment, for middling; 500 bales Texas, 7¼d, ship named, for low middling—total, 16,000 bales.

NEW YORK.—MAY 5.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, May 5. From the figures thus obtained it appears that the total receipts for the seven days have reached 51,432 bales, against 56,685 bales last week, 63,042 bales the previous week, and 64,156 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,623,373 bales, against 2,637,253 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 986,120 bales. The exports for the week ending this evening reach a total of 71,087 bales, of which 42,273 were to Great Britain, 6,532 to France, and 22,282 to rest of the continent, while the stocks as made up this evening are now 426,944 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night —

Week ending May 5.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	16,000	17,863	34,863	18,788	150,073	142,880
Mobile	7,718	350	8,068	6,430	15,747	17,208
Charleston	...	706	706	...	10,764	11,005
Savannah	9,548	3,112	8,660	3,074	49,247	47,017
Texas	...	720	720	100	6,813	11,730
New York	14,000	1,951	15,951	5,554	57,000	51,000
Other ports	25	50	75	350	17,000	17,000
Total	42,273	22,814	71,087	34,297	426,944	353,899
Total same time 1	365,871	6,395,3	26,637,253	1,720,000		...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 34,128 bales, while the stocks to-night are 73,876 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to April 21, the latest mail dates. We do not include our telegrams to-night.

as we cannot ensure the accuracy or obtain the detail necessary by telegraph :—

The market the past week has developed considerable strength. The movement during the previous week to corner the "shorts," put prices up so that at the close middling of all growths were quoted at 15½c. The next day, however (Saturday), the contracts maturing in April having been mainly covered, the market fell off, and on Monday had gone back to its natural position, with middling Uplands at 14⅝c and middling Texas at 15½c. Since then holders have shown more confidence, and the market has exhibited increased strength day by day, the result of the decided falling off in the receipts at our ports, together with a growing belief that less land has been put down to cotton this year in our southern States, and in part also the result of a disposition on the part of those having cotton to receive under May contracts to insist upon a delivery rather than a settlement. Thursday, under these influences, and with the sales at Liverpool reported at 18,000 bales, and an improvement of ½d in prices, there was an advance here to 15½c for middling Uplands and 10½c for ordinary. To-day there has been a further advance of ⅛c, and at the advance holders have been very firm, sales have been fair for both export and consumption, restricted, however, by the limited offerings. For future delivery the inquiry has been good, and the changes in prices have, in the main, followed those for spot cotton. Low middling closed to-night at 14½c for May, 14½c for June, 14½c for July, 14⅝c for August, and 14⅞c for September. The total sales of this description for the week are 48,004 bales, including 604 free on board. For immediate delivery the total sales foot up this week 21,330 bales including 12,245 for export, 4.598 for consumption, 1,962 for speculation, and 2,525 in transit. Of the above, 726 bales were to arrive. The following are the closing quotations :—

—*New York Commercial and Financial Chronicle.*

New York, May 12.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all ports have been 43,000 bales, and since the 1st of September 3,665,000 bales. Shipments to England, 49,000 bales; ditto to France, 10,000 bales; to the continent, 17,000 bales; total since the 1st of September, 2,770,000 bales. Stock at all ports, 381,000 bales. Middling Upland, 7 5/16d, cost and freight, per steamer.

New York, May 16.—The receipts of cotton at all United States' ports for the last four days have been 24,000 bales. Shipments to England, 20,000 bales; to France, 7,000 bales; and to the continent, 12,000 bales. Middling Upland, 7 5/16d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

Manchester, May 18.—There is no improvement to notice in our market yet, which remains dull and inactive in all descriptions of goods and yarns. Prices are quite unchanged, and though cotton advanced lately no improvement in prices could be obtained here, and as cotton is easier again there is more disposition to sell on the part of producers, but buyers still keep aloof from fresh operations. Consequently the daily business is limited to small lots for assortment of stocks. The engagements of producers are still considerable, and stocks are the exception, hence the comparative firmness of prices.

Bradford.—A rathe quieter tone is apparent in the wool market and, if anything a shade less business is doing. The choice of wool in the market is only small, and, in the face of of the clip, spinners refrain from buying, except for urgent requirements. Noils and brokes are still in good request at firm rates. In the yarn market there is less business offering in both single and double yarns, export merchants showing less disposition to yield the high rates.

Rochdale.—Business in flannels has been of an average character, but the buyers of low goods were the most numerous. There is no change as regards Yorkshire goods, except that prices are firmer, stocks being anything but abundant. Wool sells regularly to go into consumption, especially the inferior and medium sorts, the rates of last week being thoroughly maintained.

Dundee.—There has been rather more demand for flax on the spot, and the transactions that have taken place have been at very steady prices. Tows continue quiet, and only small transactions take place, without much change in price. For jute the demand continues of a limited nature, and prices are barely maintained. The yarn market has been active during the week, and an extensive business has been done in flax and tow kinds at firm prices. Jute yarns are very firm. For linens there has lately been a good demand, chiefly from the foreign markets, and manufacturers are well employed. Jute goods are in steady request, and prices are well maintained.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—MAY 5.

The markets for flour and grain the past week have been wholly unsettled by a serious break in the Erie canal, which occurred on Sunday night last, near Fairport, about four days' towing east of Buffalo, and nine days from New York. The break is estimated to require at least two weeks to repair, but the work has been delayed by severe rains, and yesterday a "strike" occurred among the labourers employed upon it, so that it will be nearly the 1st of June before any supplies can be received, except such as come to us from the Oswego branch of the canal and by rail from Buffalo. Flour has slightly improved. The receipts have been small, and stocks are light, but buyers do not operate beyond their immediate wants. The most considerable business has been about 6,000 barrels old and low extras for London at $6.10 to $6.20. It is considered somewhat remarkable that while flour has declined 50c per barrel in the last month, wheat is little, if any, lower. At to-day's market holders were disposed to ask an advance, but it could not be readily obtained, and with a severe rain storm prevailing there was not much done. Wheat sold for the break at $1.48 to $1.50 for new spring afloat, $1.45 to arrive by canal, and $1.52 for amber winter; but since that event, favoured by a decline of 2d in ocean freights, and a recovery of last week's decline at Liverpool, prices are fully 8c higher. Receipts have been liberal by rail, but they were sold previous to arrival, and had freight engaged for them. To-day the first boat-load of No. 2 spring, through by canal from Oswego, sold to a city miller for $1.57½, and amber winter brought $1.60, but the tone of the market is very unsettled. Corn advanced 5c on the combined influence of the interruption of canal navigation, an advance abroad, and a decline in ocean freights, closing quiet at 80c to 81c for Western mixed; other descriptions being nearly nominal. The movement of breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

There has been considerable firmness in the grain trade during the past week, though there was a tendency towards reaction to-day in consequence of further arrivals of grain-laden vessels at ports of call. In most of the country markets an advance of 1s per quarter has been obtained on all dry parcels of wheat, but factors have not been able to realise any improvement in the London market. Nevertheless, the recent rise in the quotations has been well supported. Supplies of English wheat on offer have been small, but the condition of the samples has continued good. While the export demand has been on the increase, the inquiry for home consumption has been restricted within narrow limits, and the uncertain state of politics has checked speculation. White English wheat may now be quoted at 62s per quarter, but more money has occasionally been obtained. The weather during the past fortnight has been favourable for the resumption of out-door work, but the accounts respecting the growing wheat crops are less favourable than hitherto. The damage resulting so far, however, is not serious, and it is too early in the season to form a correct opinion as to the probable results of the harvest. The flour trade has ruled firm, and an occasional advance has been obtained on country sacks.

The spring corn trade has ruled quiet, and oats have sold slowly at the late decline of 1s per quarter. Beans and peas have ruled dull, but are without change in value. Maize has been inquired after on former terms. Barley has sold in retail at late rates.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 28 grain and seed-laden vessels have arrived at ports-of-call, viz.:—17 wheat, 8 maize, 1 barley, 1 beans, and 1 valonea. The floating grain trade continued early this week inactive in arrived cargoes, there being none offering till within the last few days. Wheat has been firm in tone, and for good cargoes last week's prices have been maintained. Maize has been inquired after at fully last week's prices. Barley—Only 1 arrived cargo, and Kustendje has been sold at 27s per 400 lbs. In rye no business has taken place, prices asked being above buyers' views. The reported sales are as follows:—Wheat—1 arrived cargo Oregon and Portland at 65s per 500 lbs. On passage, 1 cargo New Coast Ghirka at 53s per 492 lbs. Shipping, 3 cargoes: Berdianski, 51s 10½d; and New Coast Ghirka, 53s per 492 lbs. Maize—2 arrived cargoes: Odessa, 36s 6d; Danubian, 36s per 492 lbs. On passage, 5 cargoes: Galatz, 34s and 34s 6d; Ibrail, 35s; Bulgarian, 36s per 492 lbs; Danubian, 34s per 480 lbs. Wheat and maize—1 cargo Odessa arrived in London: wheat, 48s per 492 lbs; maize, 30s per 480 lbs. Barley—1 arrived cargo Dabritza and Kustendje, 27s per 400 lbs. On passage, 2 cargoes: Marianopoli, 28s 6d; Danubian, 26s 10d per 400 lbs. Linseed scarce on the spot and steady. Rapeseed 6d to 1s cheaper. On passage, 900 tons ryeseed, from Calcutta, at 62s; and 100 tons yellow mixed at 71s 9d per 416 lbs, A.T. Shipped or to be shipped, 950 tons ordinary brown Calcutta, 64s 6d per 416 lbs, A.T.; and 12,000 quarters Danubian at 66s 6d per 424 lbs. Cotton-seed quiet, and rather cheaper. To be shipped, 3,000 tons Egyptian, 7l 15s per ton, f.o.b. 260 tons on passage sold at 9l 2s 6d, A,T.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT"

MINCING LANE, FRIDAY MORNING.

SUGAR.—The demand has continued active, and a very large business has again been done. Prices of West India and most other descriptions have again advanced 6d per cwt. The market has been nearly cleared of West India, 3,010 casks being sold to yesterday evening. Barbadoes by auction realised 28s to 30s; crystalised Berbice and Demerara, 34s to 36s 6d; strops, 25s to 30s; St Lucia, 22s to 30s per cwt. In Manilla Jaggary and other low brown sorts, the sales have again been large. Deliveries here have somewhat improved, and the stock on the 13th inst. was 61,557 tons, against 77,157 tons in 1870.

Mauritius.—About 1,000 bags brown have sold at 23s 6d per cwt.

Bengal.—1,250 bags Date sold at 19s to 26s per cwt.

Madras.—5,000 bags Jaggery are reported at 19s 6d per cwt.

Penang.—800 baskets realised 20s to 22s per cwt.

Manila.—Fully 60,000 bags have changed hands: Taal and Zebu at 21s to 22s; Ilo Ilo at 23s: and fair to good clayed at 25s 3d to 26s 6d per cwt. A parcel of sun dried in auction was bought in at 22s 6d to 25s 6d.

Other Foreign.—180 hhds Surinam are reported at 27s 6d to 30s 6d per cwt. A cargo of new crop Porto Rico sold at 30s to 39s 6d for low to superior, being high prices.

Floating Cargoes.—Three of Cuba have been sold at 26s 9d to 27s; three of British West India at 25s 6d; one of Java at 32s 6d; and two of brown Bahia at 22s to 23s 9d, all for out ports.

Refined.—More business has been doing, and prices of all descriptions are dearer.

Molasses.—About 200 puncheons of West India have been sold at 10s to 13s for low to fine. 602 barrels American treacle, partly sold, at 15s to 15s 6d; and part of 407 casks Australian, at 15s 6d per cwt.

Rum.—Market flat, and without buyers on previous terms. A few Leewards sold at 1s 6d proof, and some fair Jamaica at 3s 6d per gallon.

Cocoa.—The supply of common quality is in excess of the demand, and to effect sales of colonial a fresh decline of 1s to 2s has been accepted. 3,146 bags Grenada part sold at 42s 6d to 67s 6d for ordinary grey to superior red. 1,242 bags Trinidad part sold at 50s to 79s for low grey to fine red. The foreign parcels offered were all withdrawn.

Coffee.—The improving tendency of this market observable last week has been checked by the heavy qualities declared for sale. Prices of plantation Ceylon in many cases show a decline of 1s per cwt. Foreign descriptions sell slowly. The stock at this port is now nearly on a par with that at this date last year, being 18,811 tons, against 18,834 tons in 1870. The auctions of plantation Ceylon comprised 1,886 casks 419 tierces and barrels 1,064 bags, most of which found buyers at 59s to 66s for low middling small to middling colory, and 67s to 82s for good middling to fine bright. 1,589 bags native chiefly sold at 47s 6d to 51s 6d for small to low good ordinary. 48 bales and half-bales Mocha brought 91s to 110s. 685 bags East India sold: Wynaad, 55s to 60s; Courtallum, 59s 6d to 64s. 1,007 bags Singapore sold: Bally, 51s 6d; Bontyne, 56s to 61s 6d per cwt. In foreign the transactions have been confined to a small cargo Rio afloat, on secret terms, and about 2,000 bags on the spot.

Tea.—The markets is well supplied, and prices of inferior qualities still have a downward tendency. The transactions privately have been small, but of 11,924 packages offered by auction, about 8,000 packages found buyers, chiefly parcels offered without reserve.

Rice.—In white Bengal a fair amount of business has been concluded at extreme rates, but for other sorts the inquiry remains limited. About 30,000 bags of all kinds have been sold: Rangoon at 9s 6d; Madras, 9s 6d to 10s; good cargo Bengal at 9s 3d, ex quay; and common to good white at 9s 10½d to 11s 10½d per cwt. For arrival, a cargo of Necrancie at 9s 9d; and 600 tons white Bengal at 10s 1½d to 11s 6d per cwt, ex quay.

Imports and Deliveries of Rice to May 13, with Stocks on hand.

Deliveries.....	47076 ...	22948 ...	22327 ...	21274
Stock.....	37324 ...	38196 ...	42363 ..	15912

Sago is in better demand, and 509 bags small mostly sold at 15s 6d to 16s for good.

Sago Flour is held at 15s to 15s 6d for Singapore.

Tapioca is also more in request, and both flake and pearl have sold dearer. 361 bags good Penang went at 2d, and 360 bags fine Singapore at 2¼d per lb. Of pearl, 423 bags realised 17s 6d to 19s for dull bold to very fine small.

Black Pepper.—Demand dull, and importers being sellers, prices are again easier. At auction, 2,492 bags Singapore part sold: ordinary grey to good, 5d to 5¼d. A parcel of Trang was bought in at 5¼d per lb.

White Pepper.—The speculative operations have not been continued, but prices remain firm, good fair Penang selling at 7½d per lb.

Other Spices.—At the public sales on Wednesday, 234 bags pimento sold at 1¾d to 1¼d. Of mace, 4 boxes West India sold at 2s 10d to 3s 4d per lb. 31 cases Penang nutmegs partly sold at 2s 4d and 3s 1d; and 33 boxes West India at 1s 11d and 2s 6d per lb. 417 cases Cochin ginger about half sold; small rough, 42s to 45s; middling to good scraped, 53s to 78s. 63 barrels Jamaica obtained 39s to 60s per cwt. In cloves a small business has been done in Zanzibar at 2⅞d. 180 packages Amboyna in auction were taken out at 5d to 11d per lb. 560 boxes China cinnamon were bought in at 10d to 1s 2d per lb. A few bales Ceylon realised previous rates.

Saltpetre.—A good demand has been experienced, and prices are firmer. On the spot about 3,500 bags have been sold at 25s 9d to 29s 6d, refraction, 20 to 3¾; and for arrival 350 tons February-March sailing at 27s to 27s 6d; May-July at 26s 6d per cwt.

Imports and Deliveries of Saltpetre to May 13, with Stocks on hand.

Delivered last week, 291 tons.

Indigo.—The periodical sales closed on the 16th instant without any improvement in the demand occurring. Of the quantity put up, 13,147 chests, about 4,500 chests sold as follows:—Bengal—Good and fine about par to 3d decline, middling par to 3d advance, ordinary and good ordinary par to 3d decline, low and undesirable sorts 3d to 5d decline. Oudes and plant Oudes have realised about par for good colory kinds, ordinary sorts selling at 3d to 4d decline. Kurpahs suitable for export sold at from par to 3d advance for European marks, and par for native. Ordinary sorts have been neglected at par to 2d decline for colory kinds, and 2d to 4d decline for the pale sorts. Dry leaf Madras sold readily at full February rates for good, par to 3d decline for ordinary, and about 4d decline for very ordinary and low.

Drysalltery Goods.—Cutch has been sold at a decline, some good Penang being sold at 19s to 19s 3d. Fine Pegue realised 21s. Gambier quiet, sales on the spot at 15s 9d, and for arrival at 16s 1½d, ex ship, all faults. Turmeric is firm, a parcel of Madras sold at 19s to 20s 6d. Bengal quoted at 18s 6d to 19s. Shellac is more in request. In auction 200 cases sold: button, 5*l* 2s 6d to 6*l*; native livery orange, 5*l* 2s 6d to 5*l* 5s; good second orange, 5*l* 15s per cwt.

Metals.—These markets are without much activity, but tin has risen quite 3s per cwt, sales of Straits being made at 126*l* 10s to 127*l*, and Banca at 129*l* 10s. Business afloat in Straits at 126*l* to 126*l* 10s per ton. Scotch pig iron has advanced to 56s 9d to 57s cash for mixed numbers. Lead remains dull. In spelter a fair business done at 17 to 18*l* per ton. Transactions in copper have been small, Australian at 73*l* 10s cash, and Chili 64*l* to 65*l* 10s per ton.

Jute.—A brisk demand has prevailed, and a very large business done, chiefly for arrival, in some cases at lower rates. On the spot the sales are under 4,000 bales, at 19*l* to 25*l* 15s for common to good but for arrival they are estimated to reach over 20,000 bales, at 20*l* to 23*l* per ton.

Hemp remains quite neglected, and only a few small lots have changed hands, at about previous rates.

Linseed.—Market quiet, at 63s to 63s 6d for ordinary brown Calcutta. For arrival no sales have transpired; nominal value of Calcutta, 61s 6d per quarter. Rapeseed has been in good request, and for arrival a large business done; rye sort at 68s 6d to 62s; ordinary brown, 65s 6d per quarter.

Oils.—Linseed is flat, and rather lower; present spot value being 31s 9d to 32s. Rape oil has fluctuated somewhat. English brown oil selling to some extent at 42s 6d to 42s 9d on the spot, and 43s 6d to 44s for forward delivery; but the market closes quiet. Olive is flat, and saleable only at lower rates. Cocoa-nut is more offered, and Sydney and Ceylon are both cheaper; fair quality of the latter can be bought at 43s per cwt. Fine palm oil quiet, at 37s for Lagos.

Petroleum has met a more active inquiry, and a fair amount of business has been done at 1s 6¼d to 1s 6½d, which shows some improvement in price. Two cargoes have also been sold afloat for the continent on secret terms.

Tallow.—The market remains dull, and owing to the continued heavy shipments from Australia prices are again cheaper. P.Y.C on the spot being quoted at 43s 3d, and for delivery last four months, at 45s 3d per cwt.

Particulars of Tallow—Monday, May 15, 1871.

POSTSCRIPT.

Sugar.—The demand continues good, and prices are fully 6d dearer than this day week. At auction, 1,546 bags crystalised Barbadoes sold at 34s to 36s 6d. The sales of West India were 458 casks, making 3,468 casks for the week. Privately, 400 bags Natal at 23s to 29s; 500 bags Date Bengal at 23s to 26s; 5,500 bags Madras Jaggery, 19s 9d; and Date, 21s 9d to 23s; and a floating cargo of Porto Rico at 28s per cwt.

Coffee.—1,323 casks 278 tierces and barrels 372 bags plantation Ceylon went off heavily, and a large portion was bought in. 1,647 bags Guatemala sold at 52s to 67s per cwt.

Rice.—Business has been done in Askoolie at 10s 6d ex quay, for arrival.

Safflower.—123 bales Bengal were bought in, at 3*l* 15s to 12*l* 10s per ton for low to good.

Metals.—Tin quiet, at 126s to 126s 6d for Straits.

Tallow.—P.Y.C. dull at 43s 3d spot, and 45s 3d last three months. The auctions of Australian went off steadily.

ADDITIONAL NOTICES.

Refined Sugar.—The home market continues to improve, with a good inquiry, at 6d to 1s advance. Dutch crushed meets with a better demand, 34s 3d to 34s 6d being paid for ready sugars of first 3 marks No. 1, f.o.b., Amsterdam.

Tobacco.—The market for North American tobacco continues without alteration; sales have been upon a limited scale, buyers only operating as in need. Prices continue without alteration.

Metals.—We report rather a sluggish week. Copper has been heavy, and the few transactions reported have been at lower prices. Iron is steady. Tin has rallied in price, but no considerable quantity has changed hands. Spelter and lead are steady at quotations, but are not much inquired for. Tin plates are in good demand.

METROPOLITAN CATTLE MARKET.

Monday, May 15.—The total imports of foreign stock into London last week amounted to 18,416 head. In the corresponding week in 1870, we received 9,888; in 1869, 17,243; in 1868, 6,446; and in 1867, 10,746 head.

Firmness has been the feature of the cattle trade to-day. The receipts of stock have been good, but a healthy inquiry has been experienced, and prices have had an upward tendency. The supply of beasts has been about the average, and the quality of the home stock has been satisfactory, owing to the abundance of grass in the pastures. Sales have progressed steadily, and 2d per 8lbs more money has been obtained. For the best Scots and crosses 5s 6d to 5s 8d per 8lbs has been paid, but the latter quotation has been exceptional. There has been a good show of sheep in the pens as regards number, and the quality of the English breeds has been satisfactory. The market has

been firm, and prices have been well maintained. The best Downs and mad-wools have been disposed of at 6s 2d to 6s 4d per 8 lbs. Lambs have sold quietly at previous currencies. For calves the inquiry has been to a moderate extent at late rates. Pigs have been dull, but unaltered in value.

SUPPLIES ON SALE.

	May 18, 1870.	May 16, 1871.
Beasts	3,800	3,390
Sheep and lambs	26,800	32,100

Lamb, 6s 4d to 7s 4d.

HOP MARKET.

Borough, Friday, May 19.—A fair amount of firmness has been noticeable in this market. Transactions have been concluded steadily, and for fine English hops advanced rates have been realised. Mid and East Kents, 2/ 5s to 7/; Weald of Kents, 2/ to 3/ 15s; Sussex, 1/ 15s to 3/ 10s; Farnham and country, 3/ 15s to 5/ 12s; and olds, 15s to 1/ 10s per cwt.

POTATO MARKETS.

Borough and Spitalfields, Friday, May 19.—The supplies of potatoes have been good. Sales have progressed quietly, at late rates. English Regents, 45s to 70s; Scotch Regents, 45s to 70s; and Rocks, 40s to 55s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

Friday, May 19.—The inquiry continues active, and prices fully maintain their improved range. The third series of East India wool sales will be held here during next week, from the 23rd to the 27th inst., and comprise between 15,000 and 16,000 bales.

COTTON.

(FROM OUR OWN CORRESPONDENT.)

Friday, May 19.—There was a fair attendance at this market to-day. A good business was done in wheat at Tuesday's rates. Flour met with a fair demand for export. Maize in limited request. Barley, oats, and oatmeal were firm. **Peas were very scarce.**

The Gazette.

Tuesday, May 16.

BANKRUPTS.

John Parker, Southampton row, Bloomsbury, watchmaker.
Samuel Brock, Saint Mellion, Cornwall, farmer.
George Clemans, Westerham, Kent, butcher.
Alfred Edwards, Wellington, Somersetshire, draper.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the mouth extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN.

THE VOYSEY JUDGMENT.

FREEDOM IN THE CHURCH OF ENGLAND.
Six Sermons, by the Rev. STOPFORD A. BROOKE.
In One Volume. Crown 8vo. 3s 6d.

Henry S. King and Co., 65 Cornhill.

LONDON LIBRARY,
12 ST JAMES'S SQUARE.
The 30th Annual General Meeting of the Members will be held in the Reading Room, on Saturday, the 27th May, at 3 o'clock in the afternoon.—By order of the Committee,
ROBT. HARRISON, Secretary and Librarian.

LIFE ANNUITIES.—MANCHESTER CORPORATION WATER-WORKS.—The Waterworks Committee of the Corporation of the City of Manchester is prepared to issue, free from all official charges, ANNUITIES for LIVES, jointly or separately, in such amounts as may suit investors, on security of the borough rates of the city, and the rates, rents, and other waterworks property.—Applications, personally or in writing, may be made or sent to the City Treasurer; or to Mr Berrey, Waterworks Offices, Town Hall, Manchester.—By order,
JOSEPH HERON, Town Clerk.
Town Hall, Manchester, May 17, 1871.

MARTELL'S BRANDY.

CAUTION.

All persons are hereby cautioned against manufacturing, making, engraving, or printing, or in any manner using any labels, capsules, brands, or marks, in imitation of or only colourably differing from the labels, capsules, brands, and marks used by Messrs MARTELL and CO., of Cognac, in the course of their business as Exporters of Brandy.

And notice is hereby given, that the High Court of Chancery in England has granted (amongst Injunctions against other persons) a perpetual Injunction against Alfred Drury, of King street, Liverpool, in the County of Lancaster, Printer and Engraver, and also his workmen, servants, and agents, under the penalty of £5,000, to be levied on his and their lands, goods, and chattels, from printing, manufacturing, or selling, without the sanction of the said Messrs MARTELL and CO., any lables similar to, or only colourably differing from the labels used by the said Messrs MARTELL and CO., as aforesaid. And also a perpetual Injunction against Thomas Hutchins and Joshua Cox, of 49 South John street, Liverpool, aforesaid, Ship Store Merchants, Wine and Spirit Merchants, Sail Makers, and Ship Chandlers, and also against George Pickering, of Stone, in the County of Stafford, Lime and Coal Merchant, and each of them, and each of their agents, servants, and workmen, under the penalty of £5,000, to be levied upon their, and each and every of their lands, goods, and chattels, from affixing, or causing to be affixed, to any bottles of Brandy, any label made in imitation of, or only colourably differing from that used by the said Messrs MARTELL and CO., and from using, or causing to be used, in any bottles of Brandy, not bottled by the Plaintiffs, either Corks with the Brand used by the said Messrs MARTELL and CO., or with any Brand only colourably differing therefrom, or capsules similar to, or only colourably differing from those used by the said Messrs MARTELL and CO., and from packing and selling such bottles of Brandy in cases having stamped thereon a fac simile of the Trade Mark of the said Messrs MARTELL and CO., or any mark or stamp only colourably differing therefrom, and from selling, exporting or otherwise disposing of any bottle of Brandy so labelled, corked, or capsuled, or packed or placed in such cases, not being Brandy bottled by the said Messrs MARTELL and CO.

And notice is hereby further given, that proceedings will be taken by the said Messrs MARTELL and CO., against any person or persons who shall or may manufacture, make, engrave, or print, any labels made in imitation of, or only colourably differing from the labels so used by the said Messrs MARTELL and CO. And also that proceedings will be taken by them against any persons who shall make, use, affix, or apply, or cause to be made, used, affixed or applied to any bottle, or bottles, of Brandy, or to any corks, or to any cases containing bottles of Brandy, any labels, capsules, brands, or marks, made in imitation of, or only colourably differing from the labels, capsules, brands, or marks, so used by the said Messrs MARTELL and CO.

Dated this 29th day of April, 1871.
W. and H. P. SHARP,
92 Gresham House, Old Broad street, London, E.C.,
Solicitors for the said
Messrs MARTELL and CO.
MATTHEW CLARK and SONS,
72 Great Tower street, London, E.C.,
Agents for the said
Messrs MARTELL and CO.

OXYGENATED WATER HOLDS IN Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.
Laboratory, 36 Long Acre, and all Druggists.

HOLLOWAY'S OINTMENT AND PILLS.—Chest Complaints.—It is a source of the highest satisfaction that an easy and expeditious mode of checking and conquering these constantly-recurring affections has been discovered. The propriety of disturbing the nervous and vascular system in pulmonary maladies, by administering internal medicines, was long questioned before Professor Holloway was enabled to prove the practicability of relieving over-gorged lungs, and restoring their natural action by external means. His ointment, thoroughly rubbed upon the walls of the chest twice a-day, gives the utmost security and comfort in influenza, acute and chronic coughs, bronchitis, pleurisy, stitches in the side, shortness of breath, and palpitation, with other allied and dangerous diseases.

AGENTS WANTED, BY A DUTCH House, for Rice, Sugars, &c. Only those holding first-class positions, able to give the highest references, and those calling on the exclusively wholesale houses need apply.—Address to B. G., care of Messrs Hooper and Cull, 1 George street, Mansion House.

WANTED, IN LONDON AND THE principal Cities in the United Kingdom, active Agents, for the Sale of Flour, from the Steam Mills at Pest. Those who are already connected with Brazilian export houses will be preferred. Apply (with references) to T. S., 468, care of Messrs Haasenstein and Vogler, Advertising Agency, Vienna.

PARTNERSHIP.—£5,000 TO £7,000 required. An opportunity that seldom occurs is now open to a Young Gentleman of joining the Advertiser in a bona fide business, bearing the strictest, scrutiny, and connected with the most important trade of this country. He will require to take charge of the London department, and no previous knowledge of the business is requisite.—Address C. F. D., care of Abbott, Barton, and Co, Advertising Contractors, 269 Strand, London.

ST SAVIOUR'S UNION, SURREY.—£12,500 Wanted, on the security of the Common Fund of the said Union. £6,000 will be required immediately, £5,000 on the 1st October next, and the remaining £1,500 as required. Full particulars, with rate of interest, to be forwarded to me, the undersigned.
—By order, JAMES J. BLAKE, Clerk.
Union Offices, John street West,
Blackfriars road, 11th May, 1871.

CIENFUEGOS AND VILLA CLARA (CUBA) RAILROAD.—SEVEN PER CENT. LOAN FOR £90,000 STERLING.
The Half-Yearly Interest on the above Bonds, due on the 1st June, will be PAID on that day, and any succeeding day, at the Counting-house of Messrs J. Henry Schröder and Co., 145 Leadenhall street, between the hours of Ten and Two o'clock.
The Coupons must be left for examination two clear days before applying for payment.
London, May 16th, 1871.

CIENFUEGOS AND VILLA CLARA (CUBA) RAILROAD.—SEVEN PER CENT. LOAN FOR £90,000 STERLING.
Notice is hereby given, that in carrying out the operation of the Sinking Fund of the above Loan, whereby £7,000 is to be provided annually for the redemption of the Bonds, the following SEVENTY BONDS of £100 have been DRAWN by lot:—

5	184	300	378	473	579	656
12	185	311	383	488	581	670
24	194	312	384	501	588	698
53	195	342	385	515	589	703
56	202	359	392	519	595	710
61	227	362	393	523	596	721
71	237	367	431	525	608	722
145	247	368	432	568	622	773
154	282	371	453	576	624	826
182	291	372	463	578	633	827

The holders are requested to present the same for payment on the 1st June next, at the Counting-house of Messrs J. Henry Schroder and Co., 145 Leadenhall street, as all interest upon them will cease and determine from that day.
The Bonds must be left two clear days for examination. J. HENRY SCHRODER AND CO.
London, May 16th, 1871.

H. J. NICOLL, MERCHANT Clothier to the Queen, the Royal Family, and the Courts of Europe, Army, Navy, and Civil Outfitter.
LONDON ..... 114, 116, 118, 120 Regent street, W.; 41, 44, and 45 Warwick street, W.; 22 Cornhill, E.C.

FOR THE RACES.—H. J. NICOLL'S Light Half-guinea LLAMA DUST COATS; also Indian Silk, 25s; Poplin Coats, 52s 6d.

FOR THE RACES.—H. J. NICOLL'S Allied Waterproof TWEED OVERCOATS, for Dust or Rain, One Sovereign; if with silk lapels, One Guinea each.

FOR THE RACES.—H. J. NICOLL'S SUMMER OVERCOATS, of fine Melton cloths, from Two to Three Guineas each.

ICE SAFES AND WENHAM LAKE ICE.—The Wenham Lake Ice Company's celebrated Prize Medal REFRIGERATORS, and new Duplex REFRIGERATOR, Registered 1869, fitted with water tanks and filters, combine every real improvement and are unequalled for simplicity, efficiency, durability, and economy. The New Double Wall Ice Water Pitchers, American Ice Butter Dishes, Ice Cream Machines, Seltzogenes, Champagne Frappé Pails, for use with the Improved Freezing Powders, and everything connected with freezing of the best, cheapest, most modern, and reliable character. Wenham Lake Ice delivered in town for less than 1d per lb; or packages of 2s 6d, 5s, 9s, and upwards, forwarded into the country by "goods train" without perceptible waste. Illustrated price list free at the sole office, WENHAM LAKE ICE COMPANY, 125 Strand, London, W.C. (Corner of Savoy street.)

UNPRECEDENTED EASTER Novelties at the Royal Polytechnic—"Snow, Ice and Glaciers," with Wondrous and Experimental Illustrations, introduced in Professor Pepper's New Entertainment.—Musical Combinations produced from Sixteen Drums, played by Herr Julius Weiffenbach (in German military costume) unaided, and showing his command over these instruments.—A Life-like Figure à la "Lulu," springs thirty feet high; and Signor Valentine performs his evolutions on the Slack Wire, illustrative of Mr J. L. King's discourse on the "Art of Balancing."—Humorous and Facial Entertainment, by George Grossmith, Esq., jun.—Madame Boushela's Life-like Illustrations of Collins' Ode to the Passions, with the other Entertainments.—One Shilling.

LONDON AND ST KATHARIN DOCKS COMPANY.
The Directors are prepared to issue, under the provisions of the Company's Act, a limited amount of 4½ per cent. Preferential Stock, to be applied to the reduction of the Debenture debt.
The net income of the Company, after payment of all working expenses, exceeds £325,000 per annum, being nearly thrice the amount of the Debenture interest. There is also an accumulating reserve fund which now exceeds £165,000.—Application to be made at the Dock House, 109 Leadenhall street.
Dock House, 16th May, 1871.

GREAT WESTERN RAILWAY O CANADA.
ISSUE OF SIX PER CENT. BONDS, REDEEMABLE 1st DECEMBER, 1890.
Notice is hereby given, that under the terms of the prospectus, dated 26th October, 1870, the FIN. INSTALMENT of 21 per cent. on the above Bonds will become due and PAYABLE at the London Joint Stock Bank, Princes street, London, on the 1st day of June next.
The Bonds are ready to be exchanged for fully-paid provisional certificates or bankers' receipts.—By order,
BRACKSTONE BAKER, Secretary
126 Gresham House, Old Broad street,
London May 15, 1871.

EBERHARDT AND AURORA SILVER MINE.
I advised my friends and clients to buy these shares when they were £14 per share. They are now £38-£39, and will go much higher. The tramway for ores is now complete, and the new mill commenced running about 12th May. Great quantities of silver may now be expected, and an early dividend.
T. G. TAYLOR,
Sworn Broker for Stocks and Shares,
3 Pinner's court, Old Broad street
London, 16th May, 1871.
My circulars respecting the prospects of the above Mine can be had on application.

SOUTH AURORA SILVER MINING COMPANY (Limited).
The Second Quarterly Dividend, at the rate of 20 per cent. per annum, has been declared this day, payable on 1st June. Shares are quoted £10½ to £11, but the ore is growing richer in depth they may rise to £15. The mill recommenced crushing on 1st May, and consignments of bar silver will be reported in the papers as before. A great portion of the Third Quarter Dividend, due 1st September, is already in hand. I consider safe to buy at any price under £15. 20 per cent. may be considered the minimum Dividend.
T. G. TAYLOR,
Sworn Brokers for Stocks and Shares,
3 Pinner's court, Old Broad street
London, 16th May, 1871.
My circulars respecting the prospects of the above Mine can be had on application.

EBERHARDT AND AURORA A. SOUTH AURORA SILVER MINING COMPANIES (Limited).—Full and interesting information respecting these magnificent properties can only be obtained by sending addressed envelope to the undersigned.
Orders must be accompanied by cheques, crossed Alliance Bank. Provincial brokers and bank managers will find it advantageous to deal direct with
T. G. TAYLOR,
Sworn Broker for Stocks and Shares,
3 Pinner's court, Old Broad street
London, 18th May, 1871.
This day.—Eberhardt Shares are £38 to £39.
South Aurora — £10½ to £11

NECESSARY CAUTION to all who use the VOLTA-ELECTRIC PEN-HOLDERS.—It having come to my knowledge that other pens than those I have received Letters Patent for (November 12, 1870, No. 2978) are used with the Volta-Electric Penholders I take this method of caution all who use these holders that no other nibs should be used in them but those patented in connection with the Volta-Electric Penholder (each pen is stamped "Patented November 12, 1870"), for the simple reason that steel, of which ordinary pens are made, coming in contact with the metals of the Volta-Electric Penholder, will interfere with their voltaic electric action. A quill or gold pen, however, may be used without incurring any risk of destroying the electric current.
ISAAC JACOBS,
Sole Inventor and Patentee of the Volta-Electric Penholder, 153 Fleet street, London, E.C.

SAUCE.—LEA & PERRINS' THE "WORCESTERSHIRE."
Pronounced by Connoisseurs,
"THE ONLY GOOD SAUCE."
Improves the appetite, and aids digestion.
Unrivalled for piquancy and flavour
Ask for LEA & PERRINS' SAUCE.
BEWARE OF IMITATIONS
And see the names,
LEA & PERRINS, on all bottles and labels.
Agents—CROSSE & BLACKWELL, London, and sold by all Dealers in Sauces throughout the World.

MILNERS' STRONG HOLDFAST AND FIRE-RESISTING SAFES (of Surpassing Progressive Qualities and Prices, suitable for all amounts of risk), CHESTS, STRONG ROOMS AND DOORS with all the Latest Improvements. Effectually guarding against the novel modes of attack, as used by the Chubb gang in the Cornhill and other robberies, (against which no safe made before 1865 is secure), but which action to Milners' succession of improvements during the last half-century constitutes their safes the strongest and (quality considered) the cheapest safe-guard against fire and the modern burglar. Milners' Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street City, near the Bank of England. Circulars free by post.

THE DESTRUCTION IN PARIS OF WHAT THE WORLD GOES TO SEE AT PARIS.

Scarcely any event, even in the extraordinary history of the last twelve months, has been more extraordinary than the wanton destruction of the public buildings in Paris by the remnant of the Commune. It at first sight seems as if the Parisians had wished to destroy what was best worth seeing at Paris, because it was so; as if the Commune, which was in theory only the Municipal Government of Paris, and which said it was above all things anxious for the special independence and peculiar interest of Paris, had set itself to destroy Paris, and as if this had been done without a rational motive, without a probability of gaining anything which could be wished, or averting the loss of anything which could be valued. As to the details of the destruction, there is still indeed some hope that the worst rumours have been in part exaggerations. But unhappily in the very worst aspect there is no doubt. Indisputably the Commune, or the last remaining members of it in Paris, or some of them, must have formed a settled design to destroy the Tuileries, the Louvre, the Palais Royal, and other great public buildings of Paris, and have arranged careful business-like and partially effectual means for carrying out their plan. They for some reason wished to destroy at Paris what Europe goes to see at Paris, and what could have been their reason?

The defenders of the *Commune* in England have told us that their great advantage was that they were not men of culture, that they were artizans and working men, that they suffered no harm from a misleading education. Probably these defenders will go on to argue that the Commune was right—that as culture is mischievous, it is a sacred duty to destroy the means of culture—that their policy was "preservative principally of legitimate ends, and destructive mainly "of hurtful influences." But this argument, though not worse than many other arguments of the defenders of the Commune in England, is not at all like that which has influenced any one in Paris. We can hardly be sure what sort of persons the remnant of the Commune were, but we may be quite sure that they were wholly different from the literary advocates of the policy of the Commune in England.

We can only offer three suggestions to enable our readers to account for this awful and strange act. First. Every civil war causes an intensity of feeling which no other kind of war, and which, indeed, no other kind of event causes. There is a kind of rage and anger in being beaten in your own place by people you know, and for objects you comprehend, which infinitely surpasses similar feelings on a defeat perhaps at a distant place, perhaps for an unknown object, by a foreigner, whose language you do not know, and whose mind you cannot imagine. Just as in a family quarrel, members of a family have been eager to detroy the position of the family rather than the hated members should be chief in it—so at Paris, the Commune, worked on by hatred of the Versailles party—hating them certainly because they were victorious and perhaps because they were cruel—had determined that they should find in Paris after their victory as little as possible of what they expected to find and as little of what they had been used to value.

Secondly. No doubt there has been here much of the envy which at all times and in all countries the desperate poor man feels of the happy rich man. Some members at least of the Commune were angry working men, who had made a bold venture for wealth and power, who had lost that venture, and who were mad with rage that others (and those others rich and prosperous men) should win the game which they had lost, and enjoy the prize which they would never share. The malignant motive plainly presided over the attempt to destroy the Tuileries and the Louvre. "Our enemies shall not "have these fine things any how."

Thirdly. We must remember that all the Commune were not Frenchmen. A principal part of its leading spirits were able outcasts from miscellaneous Europe. These then would not have the same reluctance to injure Paris that every Frenchman must be thought to have. On the contrary, they may fairly be supposed to be rather desirous of injuring it than

otherwise. Whatever else is doubtful as to the fate of France, it is certain that France will long be the seat and Paris long be the capital of an intensely Conservative, or rather reactionary, Government. Whatever the *rouge* party most expect to see and fear, that they are sure to see and fear in Paris, and at the head of Paris. Naturally therefore the revolutionary party hate the future seat of the anti-revolutionary power; and so far from wishing that their hated adversaries shall fully enjoy the "capital of pleasure," are wild with a desire that as much as possible of its charms and beauty shall be spoiled and marred before those adversaries reach it.

We only offer these suggestions as helps to the imagination in the attempt to conceive an almost unimaginable state of mind. In crises of revolutions transports of wild rage seize upon the beaten party, and this great outrage comes from one of them. We may assign partial motives and analyse influential feelings; but as in madness so in this revolutionary frenzy, which is near to madness, however much we reason, we shall never feel that in cool blood and calm thought we can really grasp or imagine the wild phenomenon as it is in itself and in the minds of those who feel it.

THE RAPIDITY WITH WHICH WE ARE REDUCING OUR NATIONAL DEBT.

Mr Lowe rather astonished the House of Commons not long ago by telling them that we are paying off our debt much more quickly than is commonly believed, and that, as a proof of it, we paid off as much as 10,000,000*l* since so short a time ago as 1st April, 1868. An account showing this to be so has now been laid on the table of the House, and it is well worth studying, for there are several peculiarities in it.

The general account stands—

	£
Total of funded and unfunded debt, 1st April, 1868	806,572,883
Ditto ditto 31st March, 1871	796,104,155
Diminution	10,468,728

But these figures do not tell us that since 1868 we have increased our debt 7,300,000*l* to pay for the telegraphs. And this happily is a debt of a peculiar nature. It is a debt counterbalanced by a *property*. The telegraphs have already begun to yield a large income. After paying the interest on the money borrowed to buy them, and after providing a sinking fund for paying off that money, they still yield a revenue to the Exchequer. It is not fair to reckon a debt of the sort as if it were part of the National Debt, spent on old wars and for other purposes now yielding no income. We ought to deduct the productive asset which we have purchased if we add the liability created to purchase it; or the better way will be to make up the account of our ordinary National Debt without reckoning this peculiar debt. If we do this, the account will stand :—

	£
Total of debt funded and unfunded, 1st April, 1868.....	806,572,883
— — 31st March, 1871.....	788,804,155
Debt paid off	17,768,728

—and it has been paid thus :—

Statement of Debt Reduced from April 1, 1868, to March 31, 1871.

	£	£
I. Extinguished by sinking fund		2,692,113
II. Extinguished by creation of annuities		7,720,984
III. Extinguished by alienation of revenue—Capital transferred for redemption of land tax		255,649
IV. Transferred from Courts of Law		5,879,882
V. Extinguished by payments from balances :—		
Exchequer bonds paid off *(Abyssinia)*	£1,000,000	
Exchequer bills paid off	220,100	
		1,220,100
		17,768,728

But in this account there is one peculiar item, and that is the funds transferred from the Courts of Law. These are partly unclaimed balances, but to a larger extent the "floating cash" of the Courts of Law. These have been invested in stock and turned into a book debt. But it is only to the extent of the balances which will never be claimed that this change is a reduction of liabilities; all the rest of the money we should have to pay if, so to speak, the State "went out" of the judicial business and wound up the Courts of Law. All the rest is a real liability as much as ever, though not a liability of the same kind. Formerly the State was liable on Consols and *interest-bearing debt;* now it is liable on a debt in the ledger, on which it pays no interest. The annual charge is diminished; but, except so far as the unclaimed balances go, the liability to repay the principal sum, or the equivalent to it, remains just where it was.

If we deduct this peculiar item in the account, we have really paid off 11,888,846*l* in four years, which is at the rate of 2,972,212*l* a year, an amount of repayment which is very satisfactory, especially considering that our expenditure has in these years been very large, and which under all probable circumstances ought, as a matter of national policy, to be at least maintained, if not increased.

THE HOUSE OF LORDS AND THE AMERICAN TREATY.

Lord Russell and Lord Salisbury appear to think that Parliament ought to be allowed the opportunity of putting a veto on treaties negotiated by the Government, and they particularly desire that the House of Lords should have the privilege of discussing and, if need be, disapproving the Treaty which has just been negotiated at Washington, and already ratified by the American Senate, for the settlement of the differences between England and America.

Now, we are not concerned to deny that there are very obvious arguments in favour of asking the previous opinion of Parliament on matters so important as our foreign engagements, nor yet that the House of Lords frequently shows, in relation to foreign politics, a wider knowledge and a calmer political judgment than the House of Commons; but we do think there is one consideration quite fatal to the desire of Lord Russell and Lord Salisbury to establish a precedent in favour of any previous revision—at all events by the Lords—of the treaties entered into by the Administration, and this consideration is the fact that the Governments which usually command a majority in the Commons never possess the confidence of the House of Lords. To render our foreign engagements dependent on the sanction of a body which, in nine cases out of ten, is utterly out of sympathy with the Government which enters into them, would be in effect to withdraw altogether our treaties with foreign countries from the hands of the responsible Administration. In America the Senate no doubt is somewhat more Conservative in tone than the House of Representatives, but still the Senate can probably never be—certainly never for any long time—in strong opposition to the general feeling of the country. If the Administration has the confidence of the American people, it will in all probability also have the confidence of the American Senate; and if not, not. But of the House of Lords almost the very opposite may be said. Any Administration that has the confidence of the House of Lords is pretty sure to be actively distrusted by the people, and therefore no better device for frittering away the responsibility of the Foreign Secretary for international engagements could well be conceived than to compel him in entering into them to have regard to the probable wishes and opinions of the House of Lords. Granted that the Lords discuss foreign policy with more command of the subject and more interest in it than the Commons, yet they also discuss it with a permanent bias unfavourable to the Governments which command most heartily the sympathy of the people. Let their consent be requisite, and it would be simply impossible for any Liberal Government to act on its own honest judgment; and if it blundered, it would always have the excuse for blundering that, under the circumstances, our treaties could only be compromises between the judgment of the Government and the judgment of a dissatisfied House of Peers. If, on the contrary, the consent of the Lords is *not* to be requisite to a Treaty, then it is clearly undesirable to give that House the chance of previously discussing and discrediting a Treaty which it has no power to prevent. It is a much graver responsibility to condemn a completed act than to disapprove an incomplete; and the House of Lords accordingly are very rarely willing to weaken the hands of the Administration by formally condemning its international acts. But if they were encouraged to debate the proposals of the Government before these proposals have taken the form of acts, it is pretty certain that the political bias of the Peers would work more dangerously, and lead them into passing censures which could take no practical effect in the way of altering the course of the Government except by hampering most mischievously the discretion of the responsible authority, but would take plenty of practical effect abroad in the way of representing us as much more divided amongst ourselves and much less certain to accept the responsibility of the acts of

our Governments than we really are. So long as the House of Lords are divided in proportions very different indeed from those of the country at large, it becomes simply impossible to take them into council before deciding on the foreign engagements we are to undertake or refuse.

Take for instance, as an example, the consequences which might ensue from allowing the Lords to discuss and pass Lord Russell's proposed resolution in relation to the Treaty of Washington, begging Her Majesty to refuse her assent to any agreement with the United States containing any rules "by "which the arbitrator or arbitrators will be bound, other "than the law of nations and the municipal law of the "United Kingdom existing and in force at the time of the "late Civil War in the United States." Such a resolution might have particular charms for the House of Lords. The resolution takes its stand on the existing law. Its tendency is to assert the national pride, and to repudiate all regrets for actions which it was legally in our strict competence to perform. It snubs the somewhat arrogant claims so often put forward by the United States, and it justifies, as it were, the old sympathy with the Confederate Government felt by the House of Lords during the Civil War, and very little disguised. It might very likely be carried, for the concession of allowing our actions to be judged by principles, the legal validity of which at the time we did not and still do not admit, cannot be denied to be a very rare and grave one, from which so conservative a body as the House of Lords would be likely enough to shrink. But suppose it carried, and what would be result? Why, either (first) the Government would be obliged to accept the decision of the House and cancel their whole policy in the matter—a policy closely bound up no doubt with the rest of their foreign policy and even with their naval and military policy too, for it will be quite one thing to make the country strong with a friendly America, and quite another to make it strong with an America constantly on the watch to thwart us, whether in Ireland or Canada; or else (secondly) the Government might resign; or again (thirdly), the Government might simply disregard the vote and ratify the Treaty, just as if no such resolution had been carried. Now any one of these three courses would be most mischievous. The first course—the cancelling of all that the Ministry have achieved towards the healing of our differences with America—would simply mean that the Government must recast its whole policy on these subjects without any change of conviction, and without believing in its new policy itself. Nothing could weaken Government more seriously than that. The second course, that of resignation, would be absurd; for the opposite party, though it would carry the House of Lords with it, could not carry the Commons. The third course, that of simply neglecting the resolution arrived at by the House of Peers, would be the best, but would also involve serious mischiefs. The confidence of America in a Treaty formally condemned by one branch of the British Legislature before its conclusion would be seriously shaken. The prestige of the House of Lords itself, after it had launched a *brutum fulmen* to which no regard was paid by the Government, would also be seriously shaken. And the country would feel more keenly than ever,—though that perhaps might be an advantage instead of a disadvantage,—that a co-ordinate branch of the British Legislature, giving solemn advice, of which it may be said that the less notice that is taken of it the better for the country, is an elaborate anomaly which it must be almost time to remove.

We hold very strongly, then, that whatever functions in relation to a foreign policy might be wisely accorded to a reformed House of Lords—a House of Lords as much in harmony with the majority of the British people as the American Senate is in harmony with the majority of the American people—it would be simply fatal to accord such functions to the present House of Lords, composed, as it is, of notables who do not usually sympathise either with the Government or the nation.

SPANISH FINANCE.

The financial position of Spain, notwithstanding the somewhat anxious tone of the new Finance Minister, has apparently improved since the beginning of the revolution, which has for the present been closed by the accession of King Amadeus. A Finance Minister, in most instances, is quite right to be anxious and gloomy; finance will not come straight unless the responsible Minister is careful and calculates the future chances against him. No doubt too the condition of the finances in Spain is far from the best, and really justifies anxiety. Still, when we compare matters as they are now with the state in which they were left by the old Government, we see that there has been some improvement, and that there is some chance of financial soundness being attainable with a tolerably settled Government.

There are two points which have always to be looked at in judging the finances of a country—the cash balances of the Treasury, and the balance between the annual revenue and expenditure. The Finance Minister should have ample means to meet current engagements, or many of the evils of real bankruptcy will be felt; and besides ample means to pay his way, the current revenue of a year should suffice for the year's expenditure. Unless these conditions are both fulfilled there is something wrong, and the one evil will soon breed the other.

Now on the *first* point at least, the situation in Spain is very much better than it was on the eve of the revolution. The floating debt in November, 1868, when the new men came into power, was found to be 25,000,000*l*, with an apprehended deficit of 6,000,000*l* or 7,000,000*l* for the current year, and of this floating debt no less an amount than 21,000,000*l* was considered urgent. Now, however, the floating debt is put by Senor Moret at 17,600,000*l*, reducible by sales of Treasury bonds, &c., to 13,280,000*l*, while the apprehended deficit of the year is put at 1,600,000*l*. So far then the position of Spain has decidedly improved since the revolution. The actual floating debt has been reduced one-half, and there is no prospect of such an immediate increase to it as was then apprehended.

Of course the floating debt of Spain, even at 13,000,000*l*, is at much too high a figure as compared with the resources of the Treasury. It is a good deal more than half the year's revenue, and amply justifies the Minister in his alarm. Still there is a considerable margin between 13,000,000*l* and 25,000,000*l*, and the Finance Minister must have many expedients to resort to before his Government is reduced to the embarrassments which helped to precipitate the insurrection of 1868.

What has been said too will show that the situation has improved as regards the *second* point—the balance between revenue and expenditure. Instead of an anticipated deficit of 6,000,000*l* or 7,000,000*l*, the Budget estimate shows a deficiency of 1,600,000*l*—a large enough amount certainly upon the total expenditure of the State, but not nearly so formidable as the old deficiency. We must look a little more narrowly however to see what the improvement has been during the last four years.

For this purpose we may compare the estimates of revenue and expenditure for 1867-68, the year *before* the revolution,* with the similar estimates for 1871-72. This cannot well be done in detail, as the classification of the Budget has been changed, but one or two points are clear. 1. The revenue is only one-tenth less than it was, which of itself would not be unsatisfactory after years of disturbance and anarchy.

	£
The amount in 1867-68 was	25,708,000
It is now	23,547,000
Falling off	2,161,000

In the actual circumstances however the apparent falling off indicates a real improvement. It is caused in part by the omission from the Budget from the sales of national property. Besides the effect of the revolution, it will be recollected, was peculiarly fatal to the revenue. It became impossible for the moment to collect it, and the habit of paying taxes, as financiers know, is not easily learnt or re-acquired. But besides this, not only the central Legislature, but the various provincial authorities, ran a race in abolishing objectionable imposts. Perhaps some four millions of taxes were taken off, which it has not been possible to put on again. That the falling off after all is only 2,000,000*l* shows that by degrees the old sources of revenue have become more productive, or that new and less objectionable taxes have become practicable. New taxation of some sort has at any rate been tried, and the direct taxes have been increased.

2. Some real and most considerable economies have been introduced into the expenditure of the State. In the Budget

* See Economist of 7th Nov., 1868.

of 1867-68, the expenditure, inclusive of interest on the debt,

	£
Amounted to	19,611,000
In the new Budget it is	14,895,000
Reduction	4,716,000

The reduction is really only about half this amount, being due partly to the omission of the expense connected with the sales of national property, consequent on the omission of the receipts from the other side; but a reduction of about 2,500,000*l* is still most creditable to the new Spanish Government, especially as it is the tendency of revolutions to increase expenditure in consequence of the multiplication of new wants. It proves too, better than all other evidence, the sincerity of the effort which is being made to bring back a financial equilibrium.

Unfortunately, as in Italy, the difficulty is to make the reductions of the optional expenditure keep pace with the increase of the irreducible expenditure. The deficits of the revolution and of the years preceding have enormously aggravated the difficulties of Spanish financiers.

	£
The annual debt charge now is	10,200,000
In 1867-68 it was	6,763,000
Increase	3,437,000

But for this enormous increase, the great reduction of the optional expenditure, coupled with the real improvement of the revenue, would have given the Minister a surplus.

The financial prospect in Spain on these figures may be thus summed up. The increase of debt is a formidable charge, and with an estimated deficit of nearly 2,000,000*l*, which may in fact be increased, threatens to swallow up the corresponding increase of revenue. Because of the greatness of past reductions, we may also assume that nothing very material is now practicable in reducing the optional expenses of Government. This is the unfavourable side of Spanish finance, and it is a very unfavourable side indeed. *Per contra*, however, the revenue has been brought closely up to the point it reached before the revolution, and there is probably some unexhausted tax-paying power, seeing that all the old taxes have not been re-imposed. Even if the revenue is not very elastic, as we cannot suppose it to be, there is an opportunity for a resolute financier to make his income exceed his expenditure. We can express no opinion as to whether the opportunity is likely to be seized or not, but it is fair to recognise that financially King Amadeus has a chance.

The following is a summary of the Budget of 1871-72 :—

Revenue.	£	£
Direct taxes	8,273,000	
Ditto temporary	1,652,000	
Indirect taxes	3,545,000	
Monopolies, &c.	6,259,000	
National property	1,398,000	
Receipts from Ultramar	200,000	
Treasury profits	2,200,000	
		23,547,000
Expenditure.		
Royal household	300,000	
Legislative bodies	33,000	
Public debt	10,206,000	
Pensions, &c.	1,678,000	
Council of Ministers	29,000	
Ministry of State	136,000	
— Justice	2,069,000	
— War	3,721,000	
— Marine	952,000	
— Interior	897,000	
— Public Works	1,082,000	
— Finance	4,050,000	
		25,154,000
Deficit		1,607,000

THE SINKING FUND AND MR LOWE

So considerable a change as the collection of almost all our direct taxes in one quarter of the year is evidently likely to entail many other changes. For many years before Mr Lowe's time it had been the aim of successive Chancellors of the Exchequer to equalise as much as possible the receipts and the expenditure of each quarter, and all our financial system assumes that attempt at equality, and is based on it. When therefore Mr Lowe in his first Budget altogether changed that policy, and began to collect a much larger part of our taxes in one quarter of the year than in the other quarter, it was almost certain that other changes would be necessary too.

One of these—perhaps the most important of them—is a change in the mode in which we pay off debt out of surplus income. By an Act forty years old, and recently re-enacted, at the end of every quarter an account is made up showing the surplus of income over expenditure for the year ending that quarter; *one-fourth* of that surplus is applied during the next quarter to the payment of the National Debt, and notice that it is to be so applied is given to the public in the *Gazette* — the object being to pay the same amount out of the Treasury quarterly, and to invest the same sum in the funds quarterly; to make the demand on the national funds equal, and the operation in the market equal. But the effect of the new system is to make the expenditure even in the four quarters, and the revenue not even; and occasionally this will throw everything out of gear.

Mr Crawford, the late Governor of the Bank, in his able evidence before the Committee of Public Accounts, illustrated this by supposing an expenditure of 68,000,000*l*, equally distributed over the four quarters, and a revenue of 72,000,000*l*, all received in the first quarter. And the result of that, he justly says, would be a real surplus of 4,000,000*l*, and a theoretical surplus—a "sinking fund" surplus applicable to the liquidation of debt—of 31,000,000*l*. The following table shows this :—

Mr Crawford's Figures.

	Receipts.	Expenditure.	Deficiency.	Surplus.	Sinking Fund.
	£	£	£	£	£
1st Year:					
1st Quarter	18,000,000	17,000,000	...	1,000,000	...
2nd —	18,000,000	17,000,000	...	1,000,000	...
3rd —	18,000,000	17,000,000	...	1,000,000	...
4th —	18,000,000	17,000,000	...	1,000,000	...
2nd Year:					
1st Quarter	72,000,000	17,000,000	...	55,000,000	1,000,000
2nd —	...	17,000,000	17,000,000	...	14,500,000
3rd —	...	17,000,000	17,000,000	...	10,000,000
4th —	...	17,000,000	17,000,000	...	5,500,000
3rd Year:					
1st Quarter	72,000,000	17,000,000	...	55,000,000	1,000,000

Of course this is only intended as a startling illustration, and an extreme case. But still on the mere figures it is true and possible.

It is to be observed, however, that the imaginary case does not exactly correspond with what Mr Lowe has in fact done. Mr Crawford supposes all the revenue to be received in the *first* quarter, but Mr Lowe has made the larger part of it be collected in the *last* quarter. Mr Crawford anticipates, Mr Lowe postpones; and this makes a curiously great difference, as the following table proves :—

Mr Crawford's Figures (but making the Deficiency in the First Quarters and the Surplus in the Last Quarter of the Financial Year).

	Receipts.	Expenditure.	Deficiency.	Surplus.	Sinking Fund.
	£	£	£	£	£
1st Year:					
1st Quarter	18,000,000	17,000,000	...	1,000,000	...
2nd —	18,000,000	17,000,000	...	1,000,000	...
3rd —	18,000,000	17,000,000	...	1,000,000	...
4th —	18,000,000	17,000,000	...	1,000,000	...
2nd Year:					
1st Quarter	...	17,000,000	17,000,000	...	1,000,000
2nd —	...	17,000,000	17,000,000	...	...
3rd —	...	17,000,000	17,000,000	...	...
4th —	72,000,000	17,000,000	...	55,000,000	...
3rd Year:					
1st Quarter	...	17,000,000	17,000,000	...	1,000,000
2nd —	...	17,000,000	17,000,000	...	1,000,000
3rd —	...	17,000,000	17,000,000	...	1,000,000
4th —	72,000,000	17,000,000	...	55,000,000	1,000,000

There is not in the actual case any such difference as in Mr Crawford's supposed case.

The evils which really happen are these—First. That at the outset of the system a large sum may, as in our last table, have to be expended by the working of the sinking fund system in the reduction of the National Debt at the time when the Treasury, from the the non-receipt of taxes, may be poor.

Secondly. That at the outset of the system a deficiency is created on three quarters which would not otherwise have occurred, and this diminishes the sum applicable to the payment of the debt.

Thirdly. That both the evils that occur at the outset of the system will happen in a proportionate degree at all great changes in the income tax, or any part of our once-collected taxes; and as the income tax is the changing and shifting element in our system, the displacement of our sinking fund system will, more or less, be sure to happen constantly.

The necessity of expending money on the payment of debt in the autumn, when the Treasury is poor, might easily be very important. To its full extent this can only happen at the introduction of a new system. Generally there will be always one "big quarter" in the four quarters of the sinking fund

average. And generally, when taxation is not changed, there will be no difficulty. But if the income tax, or any other of the taxes collected in one quarter only, be much raised, the difficulty will recur: you will have a gain one quarter much greater than the four preceding it, and the sinking fund surplus consequently in confusion.

If the *Gazette* notice, in its ordinary acceptation, were adhered to, this might constantly be so. That notice is generally understood to mean that the "surplus" notified by it is to be invested in the ordinary national debt of the Stock Exchange, in stock or Exchequer bills if there dealt in. Supposing this notice were so acted on, the Government would have to borrow of the Bank of England (the only source from which it can borrow by law, unless authorised by special enactment) a temporary supply, in order to meet the deficiency in the first three quarters of the year; but it could not apply the surplus in the fourth quarter to repay to the Bank that temporary loan. Such surplus would, according to that view of the "notice," be specifically appropriated to redeem some portion or portions of the "open market" debt. And this would plainly be very absurd.

Mr Lowe this year avoided that absurdity. He was obliged, as his system of receiving the revenue made certain, to borrow of the Bank during the autumn; but as we showed at the time, he used the power which the Treasury consider to be vested in him to repay to the Bank that temporary advance. Whether he has that power or not is a question which, if the matter were in dispute between two railway companies, would be solemnly argued before the House of Lords. Most people who study the subject will, we think, agree with Mr Crawford that the Government did "the only thing they could" under the circumstances, but that the law is in a generally unsatisfactory state, and that it is especially ill-adapted to a state of finance receipts wholly different from that which its authors designed. They contemplated an equable, and Mr Lowe has introduced an unequable, system of collecting the taxes. They, in scientific language, were "uniformitarians." Mr Lowe is a catastrophist.

The whole subject is in an unsatisfactory state. It is most misleading that a notice should be inserted in the *Gazette* which misleads everyone, and the Treasury claim a power of "suspending the operation of the Sinking Fund Act," which they are not generally known to possess, and which might be used so as to defeat its whole policy. There are arguments for peremptory legislation on the use of the surplus on the financial year, and there are arguments for leaving it to the discretion of the Finance Minister; but there are no arguments for legislation, apparently peremptory, which by an obscure clause confers a latent discretion. But that is our present system.

To escape this difficulty it has been suggested that the system of quarterly accounts should be abandoned; that at the end of each financial year a balance sheet for the year should be presented; and that the annual surplus shown in such balance sheet should then be invested, either immediately or at fixed postponed periods. But to this scheme Sir G. Anderson, who was so long at the head of this department of the Treasury, and who is the first authority on the subject, altogether objects. He says it would oblige the Chancellor of the Exchequer to keep a large unused balance till the end of each financial year, and then to invest it possibly at once to the disturbance of the market. We should escape the difficulty of uncertain quarterly accounts, but might have instead the evil of an incalculable annual account, which would be an annual subject of disturbing anticipation and speculation in the money market.

We, for ourselves, are disposed to go further. We would give more freedom to the Finance Minister. We think that he should be bound by a resolution of the House if necessary—at any rate by a known and fixed financial understanding—to invest in a reduction of the permanent public debt as large a part of the surplus of each financial year as can be spared from more necessary occasions; and we would require him to lay an account before Parliament, showing how he had used that surplus. But we would not fetter his discretion. We believe that these refined rules compelling the Finance Minister to do this and that, date from an obsolete period, when Ministers were really appointed by and responsible to an independent authority, when they were really the "servants of the Crown," and not the servants of the Parliament, and when, therefore, it was practically necessary to tie them down to observe the regulations which Parliament considered to be the best. But now that the supremacy of Parliament is complete, now that the penalty of removal if Parliament thinks fit hangs close over the head of every Finance Minister, it is absurd to retain fixed rules, which cannot be adapted to all cases, which are very likely to hamper a wise Minister, and which are no check on an unwise one so long as he retains his present latent power of suspension. "Turn out the Chancellor of the "Exchequer if he does wrong, but do not pester him with "rules while he is doing his best," would be our maxim in this case, and in many cases.

BUSINESS NOTES.

THE INCOME TAX DEBATE.—The Government were quite right last week in resisting a new inquiry into the incidence of the income tax. As Mr Lowe explained with great clearness, the subject has been most exhaustively inquired into on two separate occasions, and every sort of theoretical suggestion for a perfect tax heard and discussed. On the last inquiry, in 1862, we may add, Mr Lowe's own cross-examination of the witnesses contributed not a little to the elucidation of the subject. It would be a great waste of time to go through the form of a new inquiry, when all the materials for forming an opinion exist in Parliamentary papers. There is one grievance, however, which appears to be undeniable, and not based upon any of the refined and disputed theories as to the incidence of the tax. An income tax of *varying* annual rate must be unequal in its pressure upon industrial, compared with more permanent incomes. When the question is of a steady income tax, an objection often urged against the equal taxation of industrial incomes—that they are more short-lived and precarious than other incomes—is met by the fact that they are actually taxed for a fewer number of years, and so pay less. But this is no answer when the tax is only imposed for one year, or when its rate is increased in a particular year. The short-lived income, so far as the variation of rate is concerned, has then to pay more in proportion to its real value than the permanent income. A grievance like this ought certainly to be taken into consideration, upon our present plan of annually varying the tax. In some rough practical fashion it would be expedient to give some relief, so as to relieve the overdue pressure on some kinds of income when a change in the rate is made. The point is of little practical interest at present, when the permanent rate of the tax is low, and the variations are a penny or twopence in the pound; but the income tax is kept for emergencies, in which it may be expedient to raise it to 1s or 1s 4d per pound, and when such extreme variations take place there is no doubt that it will press most unequally and severely upon industrial and precarious incomes. A permanent tax may itself be unequal, but we are not entering on that question. What we wish to point out is that the usual and strongest defence of a permanent tax does not cover the case of a temporary tax, or of a tax with frequently varying rates, and that there is here a substantial and undeniable grievance.

AMERICAN GOLD.—The arrival in this country of "small "and worn coin" from the United States is a curious incident in the present extensive movement of bullion from America to England. It is noticed here as making the bullion remittances from America less favourable than would otherwise be the case; but the true way of stating the explanation appears rather to be that an unexpected difficulty in obtaining gold for export has been temporarily experienced at New York—the difficulty giving rise to serious complaints against Mr Boutwell. The reserve of bullion at New York, as our readers know, is kept in the Government Sub-Treasury, bankers and others holding gold notes against it, and when bullion is wanted for remittance, the process is to present the gold notes at the Sub-Treasury for payment. We learn from the New York *Commercial Chronicle* however that Mr Boutwell, finding his stock of double eagles decreasing, and to retard, it is supposed, the drain of gold, which must be rather annoying to him, has chosen to pay these notes in the small and worn coin, which it seems he possesses, instead of in the double eagles, which are like our sovereigns of equal value with bullion. The consequence is that intending remitters get less gold for their notes than they expected, and have been somewhat suddenly caught. Mr Boutwell, it is supposed, is strictly within his legal right; but the grievance

is a serious one for the monetary community of New York, who are thus deprived of their usual means of obtaining good bullion for export. It is just as if the Bank of England were to pay light coin over the counter instead of pieces which are equivalent to bullion. The original error is apparently in the United States Government not keeping all its coin up to the standard of bullion, or in not making its gold notes apply to such coin only. Mr Boutwell must very soon find out that a drain of gold is not to be met by such means. Apropos of this incident, the *Chronicle* gives the following interesting account of the different currencies of America:—"Our laws authorise "four different kinds of money, each of which is a legal "tender; first, gold coin, which is the standard currency of "the country; secondly, silver coin, which is worth 4 or 5 per "cent. less than gold; thirdly, greenbacks, which are worth "less still; and lastly, national bank notes, which are often at "a discount below greenbacks. The confusion hence arising "is surely enough, as established by law, without any gra- "tuitous embarrassment of the trouble by Mr Boutwell's "double eagle arrangement, which, if it were not opposed by "the law, would perplex us with a fifth sort of currency, and "divide our gold coinage into two parts, one of which would "be at a permanent variable discount, while both would be "legal tenders."

THE RATING OF GOVERNMENT PROPERTY.—We are glad to see from Mr Goschen's answers to questions put to him last week that Government have no intention of dealing separately with the rating of Government property, now that the Bills on local government and local rating have been postponed for the Session. The question is in such a state that only comprehensive treatment will answer, and it would be a pity to prejudge any particular point. On this particular question moreover we doubt whether the particular solution always suggested is so defensible as it is assumed to be. The rating of Government property is no doubt earnestly desired, because in the particular districts to which it can be applied there are numerous ratepayers or owners of property who will get relieved of rates which they now pay; but as the rates which Government will pay will come out of the general taxpayer's pocket, we do not see that the result would be one on which he ought to be congratulated. His interest is in fact opposed to that of the people whose grievances we hear so much of, and who claim to speak as the sufferers from an evil which everyone feels. And the whole question of rating property now exempt raises the same difficulty. To the extent that it is of any material value, it will relieve existing property of rates which it has always paid, which have not for many years increased, except for town improvements, and which are by no means excessive considering the peculiar nature of the property charged, and its wonderful growth in value. There is no cause therefore for relieving existing property, yet the incidental effect of abolishing exemptions will be to give that relief. Any relief to be thus given should be very carefully considered, and none more so than what would be furnished by charging Government property in particular localities at the expense of the general taxpayer. Very often too the other property in these localities derives all its value from the Government expenditure in them, and there would be a double unfairness in making Government pay the rates.

THE CHATHAM AND DOVER AWARD.—An attempt has been made in equity to impeach the award of Lord Salisbury and Lord Cairns on the ground that it was *ultra vires*. The case was that of the Credit Foncier and Mobilier of England *v.* Lord Sondes and others, and came before the new Vice-Chancellor Wickens this week. The argument was that the object of the suit was to make the defendants—the former directors, contractors, and solicitors for the railway—*personally* liable for the depreciation in value of debentures to the amount of 324,000*l*, which had been raised on the eastern section of the line, and that the order of the arbitrators staying the suit was *ultra vires*. The defendants demurred to the bill, and the Vice-Chancellor, without hearing any arguments in favour of the demurrer, decided in favour of it. An appeal may of course be taken, but so far the only attempt to raise new litigation out of the award has been very summarily disposed of.

THE FUNCTIONS OF THE POST OFFICE.—The case of Wadham *v.* the Postmaster-General, which involved a question as to what are to be strictly considered the functions of a Post Office, and to which we referred at the trial, has now come before the Court of Queen's Bench upon a question as to the Judge's direction. The case, it will be recollected, was a dispute as to the forfeiture of a lease of premises at Clifton to the Postmaster-General, one of the conditions of which was that the premises should be used as a Post Office, and for no other purpose. It was contended that the use of the premises as a place for granting dog licences under the recent Act was a breach of the agreement, and amounted to a forfeiture. The Court, however, has upheld the ruling of the Judge that the business was to be considered part of the business of the Post Office. The Lord Chief Justice said it would not "be competent to the Government to cause a business entirely "new and independent of the functions and duties of the "Postmaster-General to be carried on upon these premises; "but, on the other hand, it could not be contended that the "business to be carried on must be confined strictly to the "sending of letters, for there were several other branches of "business carried on at the Post Office which could not be "regarded as a breach of the covenant—the sale of stamps, "for instance, or issuing money orders. And so in the pre- "sent case, although the business in question was not exactly "the same, yet it was analogous to the others, and it was "within the legal functions of the Post Office." This is in effect a judgment that the business of a Post Office means the discharge of such duties as may be imposed on the department by the Legislature. It is difficult to see what other definition could be given, though the notion in the minds of the parties who made the lease was probably something much more limited, if not very capable of definition. Suppose the Post Office should undertake the entire business of a parcel carrier, would not the real use of their premises be something entirely different from what was formerly understood as the business of a Post Office?

THE LONDON LIBRARY AND FOREIGN VISITORS.—The 30th annual report of the Committee of the London Library, which we are glad to see is a very favourable one, contains a suggestion that other societies would do well to adopt. It is to the effect that the Committee shall have power to invite distinguished foreigners on a visit to England to be readers in the library. As the number of such visitors is to be limited to five, and the period of invitation, though renewable, to one month, there is no opportunity given for an abuse of the privilege. With regard to the progress of this library, which, from the character of the books it contains, occupies a special place among such institutions in the Metropolis, it appears, from a table appended to the report, that since 1860

The members have increased from	839 to 1,125
The receipts have increased from	£1,556 to £2,387
Annual sums expended on books have increased from	£339 to £642
Annual addition to volumes in library from	1,290 to 2,020
Annual circulation of books from	27,945 to 44,618

These figures are highly creditable to the recent management of the institution, and particularly to the librarian, Mr Robert Harrison, who has necessarily the detailed direction of the business. Mr Carlyle is elected President of the Society in place of the late Earl of Clarendon.

THE FORFEITURE OF SHARES.—The case of the Dagenham Thames Dock Company (Evans's case), which involves a point as to the completeness of a forfeiture of shares, came before the Lords Justices of Appeal in Chancery this week. The facts were that the shares in question were part of a number allotted to nominees of Messrs Rigby, the contractors, "in order to obtain a settling day." A part of the contract price was to be paid in shares, and the shares were held and dealt with by Messrs Rigby, pending the completion of the contract, notices of calls being sent to them. But Mr Evans and others, who had now been put on the list of contributories, had gone through the form of applying for shares, and the allotment in the books was to them. This was in 1864, and afterwards, in 1866, Mr Evans, learning that he was on the register, endeavoured to get his name struck off, and at his instance the directors declared the shares forfeited; but this was never confirmed, as required by the Acts, at a general meeting of the company. In these circumstances the Lords Justices, affirming the judgment of the Master of the Rolls, held that Mr Evans and shareholders in the same circumstances were liable as contributories. They were of opinion

"that the arrangement between Messrs Rigby and the company that the shares should be forfeited was *ultra vires*, inasmuch as it was in substance entered into for the purpose of releasing a shareholder from his liability."

RECENT PROGRESS IN STEAM ENGINES.—We have before made the remark that in the present advanced state of invention and the use of machinery, a slight improvement may often add more absolutely to the mechanical powers in use than much more important inventions in a less advanced condition of industry. The *relative* increase of power in the latter case might be much greater, but the absolute increase would be less. A new illustration of this remark may be found in the account of the conversion of the steamship Syria from a paddle-wheel into a screw steamer, with "compound inverted" engines, which appears in the *Times* of this week. The substance of the narrative is that a combination of improvements, altogether slight compared with the introduction of the novel principle of the steam engine itself, has more than doubled the economic power of steam in navigation within the last few years. The Syria was built for the Peninsular and Oriental Company in 1863 as a paddle-wheel steamer, of 1,998 tons, with engines of 450 nominal horse power. In this character it had a speed of 13.038 knots per hour, with a consumption of 45 tons of coal per diem. Lately it has been purchased by the Union Steamship Company, and converted into a screw steamer with "compound inverted" engines of 300 nominal horse power. In this character it has a speed of 12.687 knots, hardly an appreciable diminution from its former speed, but upon a consumption of 18 instead of 45 tons of coal per diem—that is, with less than half the former consumption of coal. At the same time the carrying capacity of the vessel has been increased from 500 to 1,200 tons of cargo. It is an understatement therefore to say that the economic power of steam in navigation has been doubled by the substitution of the screw for paddles, and a variety of improvements in the engines. Not only is the same speed attained at half the cost, but the carrying capacity of the ships is immensely increased. A case like this explains very well the enormous development of the use of steam in navigation during recent years. The competition of sailing ships is not with the old class of steamers, but with a new class, as superior to the old as a Martini-Henry is to a muzzle-loading rifle. But for this new class of steamers, we believe, the extensive use of the Suez Canal so soon after its completion would have been an impossibility, and this is not the only instance in which steam has recently displaced sailing ships in trades where such competition had previously been quite impracticable.

THE NATIONAL DEBT.—The notice which Mr Goldney has given respecting the National Debt will do something to fix attention on a point of view which is too often forgotten. It is to the effect that he will "call the attention of the House "to the amount of the public debt and the revenue and resources of the country at the commencement and at the "termination of the first quarter of the present century, and to the amount of the existing resources and revenue of the country." There may be differences of opinion as to the particular resolution with which Mr Goldney is to follow up his speech, but the notice points to the true view of the country's capacity for the task proposed. It is undoubtedly the case that as compared with former periods, when the payment of debt progressed at almost as rapid a rate as it does now, the country possesses twice or thrice as much tax-paying capacity, although in fact the amount of taxation levied has hardly increased. If Mr Goldney can show this effectively he will have made out a strong case, not only for defraying exceptional expenditure like that of the present year out of ordinary revenue but for doing something in addition to reduce the debt. We hope, however, that he will not, as some do, depreciate what is actually being done, but rather keep in mind that his real object is to strengthen the hands of leading politicians on both sides who are well disposed to go as far as the country will carry them in reducing debt.

VOLUNTARY WINDING-UP.—In the case of Southall v. the British Mutual Life Assurance Society, the Lords Justices of Appeal have decided that a registration of the company under the Companies' Act for the purpose of going into voluntary liquidation, so as to render possible a transfer of the business, which would not previously have been lawful, was perfectly legitimate. The society was a Mutual Assurance Company, and the proceedings referred to were taken in order that the business might be taken over by the Prudential Assurance Company. The Lords Justices held that as the deed of settlement contained a power to dissolve the society, and a resolution to that effect had been properly come to, and as the resolution to wind-up under the Companies' Act was also legitimate—all that the plaintiff had a right to was to be paid in cash the value of his share of the assets of the dissolved company, should he refuse the equivalent offered him in the shape of a policy in the new company. Lord Justice Mellish said that the transaction was "in substance, a sale of the business "and assets of the company on the terms that each policy-"holder should receive a policy in the other company on paying "his premium as before, and every policyholder had the choice "whether he would come in under the agreement or have "the value of his interest paid to him, just as he must have "had if the company had been dissolved and wound-up under "the provisions of the deed of settlement."

THE DEFINITIVE TREATY OF PEACE.—In describing this Treaty last week, besides pointing out the increased pressure upon France caused by the stipulation that the Parisian forts might be held by the Prussians till the payment of 60,000,000*l* of the indemnity, instead of 20,000,000*l*, which was the stipulation in the preliminaries, we assumed that the German Government was not very strictly bound to evacuate the forts, even on the payment of the 60,000,000*l*. We interpreted the general clause, stipulating that the forts were not to be evacuated till the Germans were of opinion that the state of affairs in France afforded sufficient guarantees for the fulfilment of the Treaty, applied to the period subsequent to the payment of the 60,000,000*l* as well as to the period preceding it. It appears, however, that this general clause only applies to the period preceding the payment of the 60,000,000*l*, the obligation to evacuate the forts on that payment taking place being unconditional. As it stands, however, the definitive Treaty is stringent enough, when compared with the preliminaries, to justify our observations, the severity of the German negotiators being manifest in the minor clauses as well as in the main stipulations of the Treaty.

SAVINGS' BANKS RETURN.

THE following Return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Saturday, May 13, 1871:—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	51,995 7 5	87,74[illegible] 1 11
To transfer certificates from Post Office Savings' Banks to Savings' Banks	264 16 6	...
By transfer certificates from Savings' Banks to Post Office Savings Banks	...	1,960 1 6
Total	52,260 3 11	89,705 3 5
POST OFFICE SAVINGS' BANKS:—		
In money and interest credited	100,680 0 0	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	1,960 1 6	...
By transfer certificates from Post Office Savings' Banks to Savings' banks	...	264 16 6
Total	101,940 1 6	264 16 6

	£ s d
Total amount on May 13, 1871, at the credit of—	
The fund for the Banks for Savings	37,704,818 17 8
The Post Office Savings Banks fund	15,803,323 8 10
Total	53,510,162 6 6
Ditto—by last monthly account	54,443,972 1 0

THE WASTE OF THE WAR

A CORRESPONDENT at Lyons, who writes us on the subject of a letter from "N," which appeared in the ECONOMIST of May 6, and whose communication we regret not being able to publish in full, makes the following interesting observation on the extent of the waste caused by the war in France:—

"Allow me in conclusion to advert to a fact which must "have been pressed upon the notice of every one residing in "France, namely, the extent to which the waste of the war "had been condoned (as it were) already by privation. The "frugality of the bulk of the French population is something "wonderful at all times; but during the war it has acquired "the systematic conditions of a science. If one million of "combatants has been wasteful and non-productive, forty

"millions have, by increased frugality and absolute hunger, "maintained in a great measure the ordinary conditions of "supply and demand. Especially in the quasi-necessities of "clothing and the extensive field of luxury has this been "the case, for it must not be forgotten that when a man "wears his coat three months longer than usual, it is not the "*postponement* but the *annihilation* of a demand equal to a three "months' production as far as he is concerned; and if every "class does the same that annihilation is absolute. My own "opinion is strong that the question of 'waste' is very much "one of how far the next harvest has been interfered with; "and that the effect will not be found to be so disastrous as "might be supposed. "C. L.

"Lyons, May 19."

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and May 20, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	Total Exchequer Receipts			
		To May 20, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1871—					
Bank of England	...	5,678,915		7,633,761	
Bank of Ireland	...	1,344,520		972,887	
			7,023,435		8,606,648
REVENUE.					
Customs	20,100,000	2,417,000		2,744,000	
Excise	22,420,000	2,665,000		2,643,000	
Stamps	8,750,000	1,388,000		1,329,000	
Taxes	2,330,000	208,000		605,000	
Income Tax	8,820,000	607,000		633,000	
Post Office	4,670,000	50,000		120,000	
Telegraph Service	750,000	...		50,000	
Crown Lands	375,000	25,000		...	
Miscellaneous	4,100,000	342,970		274,050	
Revenue	72,315,000		7,702,970		8,399,050
OTHER RECEIPTS.					
Advances, under various Acts, repaid		365,300		483,887	
Money raised for fortifications		...		...	
Money raised by Exchequer Bonds		...		...	
Temporary advances not repaid		...		...	
			365,300		483,887
Totals			15,091,705		17,488,585

EXPENDITURE AND OTHER PAYMENTS.

	Budget Estimate for 1871-72.	Total Exchequer Issues			
		To May 20, 1871.		Same time last year.	
	£	£	£	£	£
EXPENDITURE.					
Interest of Debt	26,910,000	6,000,257		6,267,653	
Other charges on Consolidated F'nd	1,920,000	362,536		296,931	
Supply Services voted by Parliament	43,158,000	3,234,921		3,005,299	
Telegraph Service	420,000	70,000		...	
Expenditure	72,308,000		9,667,714		9,569,883
OTHER PAYMENTS.					
Advances under various Acts		313,511		236,175	
Expenses of fortifications		...		...	
Exchequer Bonds and Bills, &c., paid off		...		...	
Surplus Income, to reduce Debt		600,000		63,746	
			913,511		299,921
Balances on May 20th, 1871—					
Bank of England		3,540,355		6,668,862	
Bank of Ireland		970,125		949,919	
			4,510,480		7,618,781
Totals			15,091,705		17,488,585

The following are the Receipts on account of Revenue during the week ending May 20 :—

	Receipts of Week Ending May 20.
	£
Customs	326,000
Excise	194,000
Stamps	176,000
Taxes	20,000
Income tax	48,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	nil.
Total	764,000

The total receipts of the previous week were 930,050*l.*

The Exchequer issues of the week on account of expenditure were 701,214*l*, viz. :—

	£
Interest of debt	100,000
Other charges on Consolidated fund	900
Supply services	600,314
Telegraph services	nil.
	701,214

During the week the cash balances have decreased in the Bank of England and increased in the Bank of Ireland as follows :—

	Bank of England.		Bank of Ireland.		Total.
	£		£		£
Balances on May 13	3,923,669	...	910,520	...	4,834,189
— 20	3,540,355	...	970,125	...	4,510,480
Increase	...	...	59,605	...	...
Decrease	383,314	...	...	...	323,709

The other receipts to date were 64,405*l*, the other payments were 450,900*l*.

Foreign Correspondence.

[Up to the time of going to press our Paris letter had not arrived.]

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Hon. the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs a translation of a Portuguese Law, dated the 27th ult., imposing increased import duties on tobacco. A translation of a decree of the Venezuelan Government has likewise been received, dated the 15th ult., relating to the abolition of transit duties at Ciudad Bolivar.

The various British steamship lines between England and America have made important alterations in their form of bills of lading, which were brought into operation at New York on the 1st instant, and have excited much discussion. The effect, among other results, is to relieve the companies from liability for any damage to any goods which is capable of being covered by insurance, while it is likewise stipulated that freight payable by shippers is to be paid whether the ship be lost or not lost; also that in case the whole or any part of the goods specified in the bill of lading be prevented by any cause from going in the next steamer, the shipowner is only bound to forward them by succeeding steamers of the line.

A small experiment in cheap railway construction is mentioned from America, which seems to surpass previous similar attempts in that country. The line in progress is a length of 30 miles, in the State of Missouri, of which one mile is finished. The cost of this mile, laid with T rail, has been 1,300*l*, and the cost of the entire 30 miles is estimated at 53,000*l*, allowing 3,300*l* for culverts, bridges, &c. The road bed is six feet wide on the top, following the rise and fall of the ground where it does not exceed 70 feet to the mile, and winding round high hills and steep grades in curves of 200 feet radius, less than one-third of those required for the ordinary gauge.

According to the official accounts just published the value of the importations into Belgium during the past year showed an increase of 4 per cent. over 1869, while in the exports from that country the increase was only 1 per cent. The linen and leather trades seem to have been most active, the importations of flax and hides having been large. Among the exportations there was a large increase in that of flour to France, but this was met by a corresponding diminution in the shipments to England. Of beet-root sugar, on the other hand, there was a heavy increase in the shipments to England, and a still heavier diminution in those to France. Of eggs the total exportation was only 18,386,513, against 23,607,438 in 1869.

According to the *New York Tribune*, the strong temptation to which Governments that have commenced the issue of irredeemable currency are subjected, to continue the inflation until the bubble bursts, finds its counterpart in the expansion by the New York Corporation of the funded debt of that city. "The corporation (or Tammany Ring)," it is said, "care as little for the debts of New York city as Fisk does for those of the Erie Railway, and it will shortly be a question which is the better entitled to the confidence of capitalists." During the current Session the corporation have been authorised to raise 2,500,000*l* by the sale of bonds, and the total outlay for the year, including the sums to be obtained by taxation, will, it is affirmed, reach a total of 9,600,000*l*, representing a burden of 10*l* per head for each inhabitant. The present debt of the city is supposed to be between 16,000,000*l* and 20,000,000*l*, and under these circumstances the *Tribune* suggests the question, "whether it be desirable that the credit of the city should stand high, or in correspondence with the character of those who are so industriously adding to the burden?" Until lately it has been customary for the Legislature to enact that the 7 per cent. bonds should not be sold at less than par by the Controller; but this year no such restriction has been

imposed. "Men now living," it is added, "and of ripe age too, may yet see the 7 per cent. bonds of the City of New York quoted on the stock lists at 80 or indefinitely less."

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the second week of May, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	Corresponding Total in 1870.
	Adults and Children	Adults.	Children under 16	2nd week May, 1871.	
West district	5 214	7.353	5.075	17.642*	18.997
North district	6.959	11.024	8.364	26.347	27 385
Central district	6.466	7.028	5.402	18.896	20.687
East district	6.815	10.185	8.886	25.916	30.094
South district	8.301	17.404	14.793	40.098*	41.593
Total of the Metropolis	33.755	52.604	42.540	128.899	139.636

* No return has been received this week from Fulham (West district) and St Olave's (South district).

TOTAL PAUPERISM OF METROPOLIS.—Population in 1861, 2,802,000

	Number of Paupers.		
	Indoor.	Outdoor.	Total.
Second week of May, 1871	33,755	95,144	128,899
— — 1870	34,163	105,473	139,636
— — 1869	33,756	99,854	133,610

Vagrants relieved in the Metropolis on the last day of the second week of May, 1871.

Men.	Women.	Children under 16.	Total.
861	346	99	1,306

"It is difficult to know" says the Melbourne correspondent of the *Times*, writing on March 28, "what is to be done about our mail route via California. The contract between Mr Hall, the American Consul here, and the New Zealand Government is drawing to a close. As yet we have borne no part of the expense with New Zealand, and the Government of New Zealand have consequently favoured the American shipholders, represented by Mr M'Cann. We are informed that Congress has voted a subsidy of half-a-million dollars per annum for a 12 years' contract, of 13 services per year, on condition that an equal subsidy is raised outside America, which is not a condition likely to be agreed to. Mr Hall has offered to the New South Wales Government to run a four-weekly service from Sydney to San Francisco for a sum of 45,000*l* a year, and the continuity of the service seems to depend on the acceptation of this offer. Queensland has promised 10,000*l* to it; but help from Victoria is doubtful, the Cape route traversed by ocean steamers occupying all their thoughts at present. If this contract should be made, the line will be via Fiji, and the monthly service will occupy 45 days between Sydney and London, 28 days between this and 'Frisco,' as the capital of California is familiarly called, seven days across the continent, and 10 days across the Atlantic."

From the same source we gather the following:—Our bank returns for the quarter ending December 31 show a slight decrease in the reserves of bullion and coin. The amount held was 1,377,920*l*, against a note circulation of 695,365*l*. Heavy remittances in bullion and coin have been made during the period. Since that time large exports of wool have dictated the necessity of shipping gold. Money is plentiful, and the capital in private hands awaiting suitable investment is large. Dividend-paying stocks are in great request. The City Bank shares are now realised to 4½ to 6¾. I have informed you of the articles in our free list, and may as well, in concluding, indicate what goods are chargeable, and with what duties. The specific duties are now being collected under the amended list, which is as follows:—"On all kinds of spirits imported into the colony, the strength of which can be ascertained by Sykes's hydrometer, the proof gallon, 10s; on all spirits and spirituous compounds imported into the colony, the strength of which cannot be ascertained by Sykes's hydrometer, per imperial gallon, 10s; methylated spirits, ditto, 2s; wines, sparkling, ditto, 6s; other kinds, ditto, 4s; beer, ale, porter, spruce, or other beers, cider and perry, in bottle, ditto, 3d; cigars, per lb, 5s; snuff, ditto, 2s; tobacco manufactured, ditto, 2s; unmanufactured, ditto, 1s; sheepwash, ditto, 5d; tea, coffee (including all goods, wares, and merchandise, mixed or compounded with tea, coffee, or with any preparation or substitute thereof, or chicory), spices, 10s; coffee, chicory, cocoa, chocolate, ditto 5d; sugar, raw, per cwt, 5s; refined, ditto, 6s 8d; molasses and treacle, ditto, 5s 4d; grain and pulse of every kind, not otherwise enumerated, 1 ditto, 3d; grain and pulse of every kind, not otherwise enumerated, when ground, or in any way prepared or manufactured, whether flour excepted, ditto, 1s; comfits, confectionery, preserves, per lb, 1s; alkali soda ash, caustic soda, per ton, 20s; tobacco leaf pipes or steel, tools and utensils, packets, galvanized iron or tin, buckets or chamber utensils, ditto, 10s; soda crystals, soda, vinegar (the vinegar specially exempted per gallon, 6d; preparations, other, 1s; vermicelli, ditto, 2s; arrowroot, sago, tapioca, pickles, including pickled fish and dried fish, marzena, corn flour, jams, canning, meats of all kinds (except canned meats), starch, blue, dates, candied peel, preserves, preserved meats, fish and vegetables, per lb, 1d; starch, per cwt, 5s; bags and sacks, per dozen, 1s; gunny bags, ditto, 6d; butter, cheese, dried fruits, currants, sultanas, pepper, spices, bacon, hams, per lb, 2d; candles, per lb, 1d; cement, per barrel, 2s; bottled fruits, quarts, per dozen, 2s; other pickles and canned packages, ditto, 1s; coal, per ton, 60s; whiting, chalk, pig iron, and pipes, clay, bricks, and hoop iron, ditto, 10s; iron wire iron pipes, tongue iron, castings, chains, salt, saltpetre, steel, ditto, 20s; nails, per hundred, 6d; hops, per lb, 3d; soap, common, per ton, 40s; ditto fancy, ditto, 120s; timber, dressed, per 100 feet superficial, 2s; ditto, rough and undressed, ditto, 1s; ditto palings, per 100, 1s; ditto, shingles, laths, per 1,000, 1s; ditto, sashes, doors, shutters, each, 1s; spades, shovels, picks, axes, per dozen, 2s; oilmen's stores—sauces and pickles, quarts, 1s; ditto, pints, and smaller quantities, ditto, 6d; iron tanks, each, 5s; galvanized manufactures, per cwt, 3s; zinc, ditto, ditto 4s; zinc, in sheets or rolls, ditto, 2s; woolpacks, each, 3d; paper, writing and fancy, per lb, 1d; ditto, brown and wrapping, per cwt, 3s 4d. On the several articles, goods, wares, and merchandise, imported into the colony, not included in the foregoing lists, nor enumerated in the appended schedule of exemptions, 5 per cent. ad valorem."

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 24th day of May, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	38,793,505	Government debt	11,015,100
		Other securities	8,984,900
		Gold coin and bullion	23,793,505
		Silver bullion	...
	38,793,505		38,793,505

BANKING DEPARTMENT.

	£		£
Proprietors' capital	14,553,000	Government securities	12,958,741
Rest	3,134,653	Other securities	17,102,789
Public deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and dividend accounts	8,989,026	Notes	14,852,520
		Gold and silver coin	754,204
Other deposits	18,478,783		
Seven-day and other bills	512,792		
	45,668,254		45,668,254

GEO. FORBES, Chief Cashier.

Dated the 25th May, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

LIABILITIES.	£	ASSETS.	£
Circulation (including Bank post bills)	24,453,777	Securities	30,508,530
Public deposits	8,989,026	Coin and bullion	24,547,709
Private deposits	18,478,783		
	51,921,586		55,056,239

The balance of Assets above Liabilities being 3,134,653*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase.	Decrease.
	£	£
Circulation	...	400,002
Public deposits	663,514	...
Other deposits	...	731 364
Government securities	...	...
Other securities	...	934,364
Bullion	470,672	...
Rest	4,160	...
Reserve	832,347	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending May 24, 1871.	Week ending May 17, 1871.	Week ending May 25, 1870.
	£	£	£
Thursday	14,151,000	11,461,000	11,548,000
Friday	13,439,000	28,722,000	11,444,000
Saturday	13,849,000	16,377,000	13,122,000
Monday	10,154,000	13,970,000	9,581,000
Tuesday	12,732,000	14,587,000	10,121,000
Wednesday	12,090,000	14,429,000	9,059,000
Total	76,415,000	88,953,000	65,175,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, May 25, 1871.

The total since the 4th of January, 1871, is 1,686,161,000*l*, compared with 1,533,360,000*l* for the corresponding period last year, showing an increase of 152,801,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during

a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week	May 29, 1861.	May 27, 1868.	May 26, 1869.	May 25, 1870.	May 24, 1871.
Circulation, including bank post bills.....	£ 19,905,270	£ 24,147,874	£ 23,457,081	£ 23,183,867	£ 24,453,777
Public deposits	6,873,823	6,195,503	5,647,148	9,519,607	8,989,026
Other deposits	11,643,565	20,847,589	17,593,326	16,024,315	18,478,783
Government securities..	9,916,605	13,294,557	14,070,798	12,976,001	12,958,741
Other securities	19,636,908	19,272,316	17,966,960	18,059,969	17,102,789
Reserve of notes & coin	7,273,598	12,609,957	9,334,051	12,601,793	15,606,724
Coin and bullion.....	12,168,268	21,290,652	17,381,231	20,406,898	24,547,709

Clearing-house return..	...	53,951,000	55,814,000	65,475,000	76,415,000

In 1861, money continued easy, notwithstanding the renewed export of gold to America. The means of keeping out of the American contest, now that naval hostilities between the two belligerents were affecting our commerce, were being anxiously discussed.

In 1868, the 2 per cent. period, following the reaction of 1866, continued.

In 1869, the tendency of money was downwards, the recent advance in the Bank rate having taken effect. The Liberal minority in France had been largely increased at the recent elections.

In 1870, money was for the moment easier, but it was not anticipated that the cheapness would long continue—trade being once more active, and there being an increasing tendency to invest in foreign securities.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 7,993,343*l*; in 1868, an excess of 1,575,273*l*; in 1869, a deficiency of 373,634*l*; and in 1870, a deficiency of 2,035,654*l*. In 1871, there is an excess of 1,375,994*l*.

Discount and Money Market.—The market remains substantially without change from last week, the rates for short-dated paper being, if anything, a shade easier, and business having been comparatively limited. Some impression was produced early in the week by the news of the capture of Paris by the Versailles troops, and there has since been a good deal of speculation as to the effect of this event on the money market; but as yet there has been hardly an appreciable movement. The rates for long-dated paper hardened a little at first, and they are still a shade higher than they were last week; but the disposition to charge higher rates has not been firmly adhered to. There is an impression that the atrocities committed by the Communists in the midst of their final overthrow will throw new discredit on France, and so retard and weaken the natural effect of the restoration of order; but the distrust is more likely to create a feeling of insecurity, which will be injurious to the trade of Paris and of France, than to prevent the actual Government of the day borrowing largely for its needs, though it may possibly have to pay rather more than it otherwise would. We should expect therefore that, unless some new difficulty arises, the payment of the indemnity, which will forthwith begin, according to the report of Prince Bismarck's speech, will very shortly have an appreciable effect on the demand for money.

Count Bismarck's statement as to the indemnity is telegraphed as follows :—

It was chiefly out of consideration for Alsace that he had obtained earlier dates for the payment of the war indemnity when he accepted a portion of the payment in French bank notes, which stand at par in Alsace and Lorraine. This day week (next Thursday) the first payment of 40,000,000f would be made; a week later another 40,000,000f would be due, and a further 45,000,000f on the 15th of July. Of the instalments of the indemnity due in the second half of the current year, 125,000,000f would have to be paid 60 days after the capture of Paris by the Versailles troops.

The demand at the Bank has been rather limited this week, but to-day there has been more activity.

The Bank return shows farther changes in the direction of those noted last week. The addition to the bullion is 470,672*l*; and to the reserve 832,347*l*; while the private securities have diminished by 934,364*l*. The changes in the deposits are an increase of 663,514*l* in the public deposits, and a decrease of 731,364*l* in the private deposits. The circulation has also decreased 400,002*l*. The sum of these changes shows a great addition to the resources of the Bank during the week. The amount of the reserve is now 15,606,724*l*, against 27,980,601*l* of banking liabilities, or in the proportion of 11s 2d per £. But for the close of the insurrection in Paris a fall in the rate would have been unavoidable; but in spite of that event having yet had little effect in the open market, it is clearly necessary to look forward to some changes, and to have reduced the rate only to put it up more quickly in a day or two would have been inexpedient.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—3 months	2¼	per cent.
Do 4 —	2⅜ 5/8	per cent.
Do 6 —	2⅞ 3	per cent.
Trade bills—3 months	2⅜ ⅛	per cent.
Do 4 —	2¾ 3	per cent.
Do 6 —	3¼ ½	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call.....	1½ per cent.
Discount houses at call	1¼ per cent.
Do with seven days' notice	1¾ per cent.
Do fourteen days	1⅝ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	2½	6*	2¼	...
Vienna	5	5	5	5
Berlin	4	4	3½	3½
Frankfort	3½	3½	2⅝	3¼
Amsterdam	3½	3½	3¼	3 ¼
Turin	5	5	5	5
Brussels	2½	4	2½	3¼ ½
Madrid	5	5	5	5
Hamburg	...	...	2¼	3¼ ½
St Petersburg	6	8	4½	6

* Nominal.

The Stock Markets.—Compared with the activity lately manifest, there has been very little business doing this week. The occurrence of the Derby, and the approach of the fortnightly settlement, and of the Whitsuntide holidays, have combined to restrict operations. The remarkable crisis in Paris has also produced a feeling of suspense which has really perhaps been the most influential cause of all. The course of the markets in consequence of the suspense has also been uncertain and fluctuating. The certainty that the payment of the indemnity will now begin, and probably cause money to be dearer, strengthened the bears in the leading departments, and there have been numerous sales both for realisation and to strengthen the hands of dealers for more active operations. On the whole, prices have been weaker, but there is no material fall. This weak tendency has also been counteracted in some of the miscellaneous stocks by the prospect of improved dividends, especially in banks, which would profit from more activity in the money market. The depression in English railways has also been kept within the very narrowest limits by the continuously favourable traffic returns.

English Government Securities.—The first effect of the Paris news was a decided fall in Consols, which declined ¼ on Tuesday on its becoming apparent that Paris had really been captured by the Versailles troops, and that the insurrection could not live more than one or two days longer. Sales were pressed to close bull accounts, and the reaction would probably have been greater but for the previous fluctuation by which the downfall of the Commune was anticipated. The market has thus been comparatively well prepared for any change in the money market consequent on the restoration of order in France—the accumulation of money here being moreover, such that it will require a far heavier demand for France to produce the anticipated effect on the money market than at any previous period since the suspense began. On Thursday there was a reaction from the low price of Government securities, owing to some belief that the effect on the money market of the payment of the indemnity had been fully discounted, and Consols rose to 93⅜ ⅛. To-day the market has again been firm, and Thursday's price maintained the quotation for the July account, ex dividend, being 92 ⅜.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	93⅛	93⅛	93⅛	93⅛	par to 5s pm
Monday	93⅛	93⅛	93⅛	93⅛	par to 5s pm
Tuesday	93	93⅛	93	93⅛	par to 5s pm
Wednesday	93	93⅛	93⅛	93⅛	par to 5s pm
Thursday	93⅛	93⅛	93⅛	93⅛	par to 5s pm
Friday	93⅛	93⅛	93⅛	93⅛	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.	
Consols for money	93⅛	⅛	93⅛	⅛	+	⅛
Ditto account	93⅛	⅛	93⅛	⅛	+	⅛
Reduced 4 %	91⅛	⅛	91⅛	⅛	+	⅛
New 3 %	91⅛	⅛	91⅛	⅛	+	⅛
Bank Stock (last dividend 12 %)	296	7	296	7	...	...
India Stock, 10½ %, red. at par Apl. 30, 1874	206	8	206	8	...	...
Ditto 5 % red. at par, Jul. 5, 1880	112	¼	112	¼	...	...

Exchequer Bills.—Par to 5s prem.

Colonial Government Securities.—The following shows the changes for the week :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.	
Canada 6 %	107	8	107	8	...	...
Ditto 5 %	100	1	100	1	...	...
New Zealand 5 % Consolidated Bonds	98	9	97½	8½	−	½
New South Wales 5 % Bonds, 1885 to 1886	102	3	102	3	...	...
New South Wales 6 % Bonds, 1875	104	5	104	5	...	...

Victoria 6 %	110	11	110	11	...	...
Ditto New 5 %	104	5	104	5	...	...

Foreign Government Securities.—There is hardly any feature in this department which has specially suffered from the general want of animation. Early in the week French stocks were in request, in anticipation of the triumph of the Versailles Government; but afterwards, on the news of the atrocities committed by the Communists indicating the existence of serious difficulties yet in store for the Versailles Government, the market both for Rentes and for the National Defence loan became flat. On Monday too there was some purchasing in foreign stocks generally, chiefly, it was said, on account of buying orders from the continent. But on Tuesday the certainty of the complete and immediate defeat of the insurrection had its effect, and almost every stock was weaker—though not very much so—in anticipation of some pressure in the money market. Since Tuesday foreign stocks, with the exception of French, have been steadier. To day the market has fluctuated a little, but little business has been done.

The quotation of French Rentes is now 52½ ⅝, or 1 lower than last week. The National Defence loan is at 94⅞ ⅜, or nearly the same as last week.

The quotation of the Spanish 6 per cent. National Mortgage Certificates improved on Thursday to 1½ prem. To-day the price is 1¼ ⅛ pm.

The scrip of the Costa Rica loan is 3⅞ 4⅛ pm.; a special settling day has been appointed.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.	
Argentine 6 %	94	¼	94	¼	...	...
Buenos Ayres 6 %	94	¼	94	¼	...	...
Chilian 6 %	91	2½	87	2½	...	...
Ditto 6 %	1	1 pm	1	1 pm	+	¼
Egyptian 7 %	98	8	98	8	...	...
Ditto 6 %	87	½	87	½	...	...
Ditto 7 %	78	80	78	80	...	...
Ditto 6 %	89	91	89	91	...	...
French 5 %	52	¼	52	¼	...	...
Ditto 3 %	34	¼	34	¼	...	...
Ditto Nat. Def. Loan	94	⅞	94	⅞	...	...
Ditto Obligations	102	3	102	3	...	...
Ditto Bons	102	3	102	3

FOREIGN AND COLONIAL RAILWAYS.—The following shows the changes for the week in this department :—

FOREIGN.	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.	
Antwerp and Rotterdam	12⅝	⅜	12⅝	15/16	+	3/16
Bahia and San Francisco	19	½	19¼	½	+	¼
Belgian Eastern Junction	2¼	¼	1 15/16	2 1/16	−	3/16
Dutch-Rhenish	2⅜	⅞	2⅜	⅞	...	...
Ditto New	2¼	⅜ xm	2¼	⅜ om	...	...
Great Luxembourg	11⅜	⅞	11 13/16	15/16	+	1/16

Madras 5 %	105½	6	105½	6	...	...

AMERICAN SECURITIES.—This department has presented no feature of interest during the week. The demand for Government bonds has continued steady, but State issues have attracted little attention. Erie shares close lower on the week, and the principal changes are as follows :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.	
United States 6 % 5/20 Bonds, exchng. 4/6	90½	⅜	90½	½	...	...
Ditto 1865 Issue	90 1/16	3/16	90¼	¼	+	1/16

Erie Shares	24½	5⅛	24½	¾	−	▓
Illinois Central Shares	109½	¾	109	½	−	¼
Massachussets 5 % Sterling Bonds, 1900	91¼	2½	93 4		+	1½
Panama General Mortgage 7 % Bonds, 1897	73 8		70 5		−	3
Pennsylvania Gen. Mort. 6 % Bonds, 1910	93 4		93 4		...	...
Virginia 6 % Bonds	56¾	7⅛	56 7		−	¼

JOINT STOCK BANKS.—The tendency of prices in this department has been favourable, and the purchases have been more numerous than for some weeks past. There is an advance of 1 in Anglo-Austrian; ½ in New Zealand, Chartered of India, Chartered Mercantile of India, Imperial, London and County, London and Westminster, and Union of London. London and Brazilian show a decline of 2, and Anglo-Egyptian of ¼.

BANK HOLIDAYS ACT.—The following are the clauses and schedule of the new Act, which has now received the Royal assent :—

1. After the passing of this Act, the several days in the schedule to this Act mentioned (and which days are in this Act hereinafter referred to as bank holidays) shall be kept as close holidays in all banks in England, and Ireland, and Scotland respectively, and all bills of exchange and promissory notes which are due and payable on any such bank holiday shall be payable and in case of non-payment may be noted and protested, on the next following day, and not on such bank holiday; and any such noting or protest shall be as valid as if made on the day on which the bill or note was made due and payable; and for all the purposes of this Act the day next following a bank holiday shall mean the next following day on which a bill of exchange may be lawfully noted or protested.

2. When the day on which any notice of dishonour of an unpaid bill of exchange or promissory note should be given, or when the day on which a bill of exchange or promissory note should be presented or received for acceptance, or accepted or forwarded to any referees, is a bank holiday, such notice of dishonour shall be given, and such bill of exchange or promissory note shall be presented or forwarded on the day next following such bank holiday.

3. No person shall be compellable to make any payment or to do any act upon such bank holidays which he would not be compellable to do or make on Christmas day or Good Friday.

4. It shall be lawful for Her Majesty, from time to time, as to Her Majesty may seem fit, by proclamation, in the manner in which solemn fasts or days of public thanksgiving may be appointed, to appoint a special day to be observed as a bank holiday, either throughout the United Kingdom or in any part thereof, or in any county, city, borough, or district therein, and any day so appointed shall be kept as a close holiday in all banks within the locality mentioned in such proclamation, and shall, as regards bills of exchange and promissory notes payable, in such locality, be deemed to be a bank holiday for all the purposes of this Act.

5. It shall be lawful for Her Majesty, in like manner, from time to time, when it is made to appear to Her Majesty in Council, in any special case, that in any year it is inexpedient that a day by this Act appointed for a bank holiday should be a bank holiday, to declare that such day shall not, in such year be a bank holiday, and to appoint such other day as to Her Majesty in Council may seem fit to be a bank holiday, instead of such day, and thereupon the day so appointed shall in such year be substituted for the day so appointed by this Act.

6. The powers conferred by sections three and four of this Act on Her Majesty may be exercised in Ireland, as far as relates to that part of the United Kingdom, by the Lord-Lieutenant of Ireland in Council.

7. This Act may be cited for all purposes as "The Bank Holidays Act, 1871."

SCHEDULE.

BANK HOLIDAYS IN ENGLAND AND IRELAND.—Easter Monday, the Monday in Whitsun week, the first Monday in August, the 26th day of December, if a week day.

BANK HOLIDAYS IN SCOTLAND.—New Year's day, Christmas day (if either of these days falls on a Sunday, the next following Monday shall be a bank holiday), Good Friday, the first Monday of May, and the first Monday of August.

TELEGRAPHS.—We note several alterations for the better in the quotations for telegraph companies, the most prominent being a rise of 2½ in Anglo-American. China, Submarine, and French Cable shares have advanced ⅜; and British Indian Extension, ½; Telegraph Construction shares closed ½; and Hooper's Telegraph Works ¼ better on the week.

MINES.—The changes in the British market have been somewhat important. Devon Great Consols have advanced 5; South Wheal Frances, 2½; Assheton, 1; and Great Wheal Vor, ½. On the other hand, there is a reduction of 10 in South Caradon; 1 in East Lovell and Providence, Uny Lelant; ½ in Caegynor, East Caradon, Marke Valley, and North Wheal Crofty. In the foreign market South Aurora shares have advanced to 11 to 11½. Eberhardts are 2 better, and Sweetland Creek ¼. Cape Copper shares have declined 1, and Vancover Coal ½.

The subscription list of the South Aurora Silver Mining Company, Limited, will close on Tuesday next for London, and on Wednesday for the country.

MISCELLANEOUS.—The transactions in miscellaneous securities have been neither numerous or extensive. The most important movements in prices on the week are a decline of 2 in Royal Mail Steam, and of 1 in Liebig's Extract of Meat. Rhymney Iron (new shares) and Rio City Improvements show a decline of ½ and ¼ respectively. Madras Irrigation have advanced 1; Ceylon A shares and Credit Foncier, ¼.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold continues to flow into the Bank, 604,000*l* having been sent in since our circular of the 18th inst. We have to report the following arrivals:—100,000*l* per Thuringia, from New York; 36,000*l* per Java, from New York; 15,000*l* per Abyssinia, from New York; 82,000*l* per Bremen, from New York; 200,000*l* per Hermann, from New York; 358,000*l* per Poonah, from Australia; 2,400*l* per Volta, from Africa—total, 793,400*l*. The Flamsteed has taken 165,000*l* to Brazils, consisting of sovereigns withdrawn from the Bank.

Silver.—The quotation for fine bars remains at 60¼d per oz standard, the demand being for the continent. We have received about 72,000*l* during the week, from the West Indies and New York; and 106,000*l*, Sycee, from China. The Nubia has taken 5,000*l* to Aden.

Mexican dollars continue firm, old coinage at 59⅜d per oz, and the new at 58⅞d per oz. We have received about 62,000*l*, during the past few days, from New York.

Exchange on India for Banks' drafts at 60 days' sight is 1s 10⅝d per rupee.

India Government loan notes are firmer in price. We quote the 4 per Cents., 93; the 5 per Cents., 100¼; and the 5½ per Cents., 107⅜.

Quotations for bullion.—Gold—Bar gold, 77s 8¾d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 73s 8d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0¼d per oz std; ditto containing 5 grains gold, 5s 0⅝d to 5s 0⅞d per oz std; Mexican dollars, 4s 10⅞d to 4s 11⅛d per oz.

According to the *Gazette* return, the imports of the precious metals were—Gold, 767,113*l*; silver, 228,407*l*. The exports were—Gold, 565,985*l*; silver, 257,260*l*.

The sum of 170,000*l* was withdrawn from the Bank to-day, while 39,000*l*, was sent in.

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, May 29.

Cork, Blackrock, and Passage Railway, general, Cork.
Roman Railway, general, Florence.

TUESDAY, May 30.

Imperial Continental Gas Association, general, City Terminus Hotel.
Ionian Bank, general, 31 Finsbury circus.
Madras Irrigation and Canal, general, Queen street place.
Great Southern of India Railway, general, London Tavern.
Raynham Railway, special general, Wood's Hotel.
Royal Swedish Railway, general, London Tavern.
Waterford and Central Ireland Railway, general, London Tavern.

WEDNESDAY, May 31.

Anglo-Austrian Bank, general, Vienna.
Trust and Loan Company of Upper Canada, general, City Terminus Hotel.
English Bank of Rio de Janeiro, general, 13 St Helen's place.
North London Railway, special general, Euston Station.

THURSDAY, June 1.

Bristol and North Somerset Railway, special general, Inns of Court Hotel.
Imperial Ottoman Mining, general, 46 Moorgate street.
Waterlow Bridge, general, 8 Beaufort buildings.
Stourbridge Railway, special.

FRIDAY, June 2.

London Chartered Bank of Australia, general, City Terminus Hotel.
Malta and Mediterranean Gas, general, London Tavern.
Victoria Docks Gas, extraordinary.

SETTLING DAYS.

Ticket Days—May 30th, June 14th and 28th.
Account Days—May 31st, June 15th and 29th.
Consol Account—June 1st.

NOTICES AND REPORTS.

STOCKS.

New Granada Bonds.—Messrs Baring Brothers and Co. notify that 4,062*l* has been set apart for the redemption of New Granada Active Debt, and 2,013*l* for Deferred, and that tenders, expressing the rate per cent., will be received for the said redemption until the 1st of June.

Sierra Leone 6 per Cent. Loan.—The Crown agents notify that this has all been disposed of.

Spanish Five per Cent. Loan, 1851.—400 bonds representing 14,000*l* have been purchased and cancelled.

RAILWAY COMPANIES.

Atlantic and Great Western Railway—7 per Cent. Reorganisation Stock.—Messrs Bischoffsheim and Goldschmidt are authorised by the directors to offer a second and final issue of 400,000 of the above stock for subscription to the holders of the first[*l* issue of 1,000,000 stock, who will be entitled to claim an allotment equal in amount to their holdings in the first issue. The price has been fixed at 80 per cent., being 75 per cent. and 5 per cent. premium, and the stock when paid up will be identical with that already quoted on the market. 45 per cent. is payable by the 1st June, 20 per cent. on the 1st July, and 15 per cent. on the 1st August.

Buckingham and Glyn Bonds.—Bonds representing 26,400*l* have been drawn for redemption at par.

Eastern Bengal.—The gross receipts for the half-year amounted to 12[illegible], the working expenses to 66,824*l*, and the net receipts to [illegible],445*l*, against 100,0[illegible] gross receipts, 59,754*l* working expenses, and 41,1[illegible]*l* net receipts in the corresponding half of 1870, showing an increase in the gross receipts of 2[illegible],870*l*, in the working expenses of 7,070*l*, and in the net receipts of 14,[illegible]*l*. The net profits of the past half-year amounted to 6 per cent. per annum on 1,987,200*l*, which might fairly be taken as the amount of the expenditure on capital account up to the 30th June. On the 31st of December last the extension line from near Kamptee to Gealundo was opened by the Governor General of India. The gross receipts of the first fourteen weeks of the current half year showed an increase over those of the corresponding period of 13,300*l*.

Great Indian Peninsula.—During the half year a further 73½ miles were opened on the South-East line, and since that date the whole line to Raichoor, where the junction with the Madras line has been effected, has been completed, with the exception of the Kistna Viaduct. During the previous half the junction with the East Indian was effected. The gross revenue amounted to 596,580*l*, as contrasted with 548,801*l* in the second half of 1869, and the ordinary working expenses to 410,335*l*, against 422,268*l*, savings having been made in maintenance of way and by use of Nerbudda coal. But additional expenditures of about 53,000*l*, against 11,000*l*, including 25,510*l* for a permanent way renewal fund, and 13,780*l* for income tax, have raised the total outlay to 463,579*l*, against 433,299*l*; and the balance handed over to the Government in reduction of the guarantee is 133,001*l*, as compared with 115,503*l* in the corresponding six months. Trade was depressed, and there was a falling off in the receipts from the carriage of cotton. Capital received, 23,760,061*l*; expended, 20,610,242*l*, besides 1,661,232*l* on the stores account.

Great Southern of India.—The net revenue for the year 1870 was 28,315*l*, showing 2,671*l* increase. The working plan and sections for the extensions have been submitted to Government, but sanction had not yet been obtained to commence the works.

Midland Railway of Canada—6 per Cent. Sterling Bonds.—Messrs E. F. Satterthwaite and Co., offer for subscription 235,000*l* of these 6 per Cent. First Mortgage Bonds, repayable in 30 years at par by a sinking fund of 2 per cent. per annum, to commence in 1873. These bonds form part of an issue of 335,000*l*, required for the purpose of cancelling all classes of existing bonds, paying off the floating debt, incurred in constructing extensions recently opened for traffic, and for the construction of an important extension to Georgian Bay. The present earnings are much more than sufficient to cover the interest and sinking fund. The issue price is 85*l* per 100*l* bond.

Philadelphia and Reading Railroad—6 per Cent. Consolidated Mortgage Bonds.—This old-established railroad is issuing here, through the agency of Messrs McCalmont Brothers, a portion of its general mortgage bonds. These bonds for $25,000,000 form almost the entire liability of the undertaking, and the present issue of $7,000,000, or 1,400,000*l*, is made in sums of 200*l* each, at the price of 180*l* per bond, the instalments being spread over 4½ months. The net revenue has given the ordinary shareholders 10 per cent. dividends for some years past, and the money now raised will be expended in the purchase of additional property, and in the extension of the business. "The principal will fall due and be payable on the 1st June, 1911, but an accumulating sinking fund of 1 per cent. per annum will be applied yearly to the repurchase of the bonds at or under par. If such purchases cannot be effected, the sinking fund is to be invested and accumulated until the maturity of the bonds. Principal and interest will be payable at the holder's option, either in London, at the office of Messrs McClamont Brothers and Co., in sterling money, or in Philadelphia, in gold, at the rate of $5 per £ sterling, free of all Federal or State taxes in the United States."

Royal Swedish.—The gross traffic receipts during the year from all sources amounted to 26,343*l*, against 23,463*l* for the previous year, showing an increase of 2,880*l*, or nearly 12½ per cent. Notwithstanding the fact that the continued heavy renewals of the line and rolling stock had been absolutely necessary, the revenue account showed an available balance of 5,081*l*, and the directors made an addition to the usual payment on account of the arrears of interest due to the obligation-holders by proposing the payment of 3s per obligation.

BANKS.

Anglo-Egyptian.—At the meeting a 10 per cent. per annum dividend was declared, free of income tax.

Imperial Anglo-German Bank.—Capital, 450,000*l*, in 15,000 shares of 20*l* (200 thalers) each. One-half has already been subscribed for in Germany, and the balance is offered here by Messrs Holderness, Nott, and Co. The business will comprise banking, agency, and the negotiation of loans, and the principal office will be in Berlin. The development of trade with our Eastern possessions and with China will be a feature of the establishment. The board is of a high character.

London Chartered Bank of Australia.—The amount at the credit of profit and loss is 48,376*l*, out of which the directors recommend a dividend for the half-year at the rate of 8 per cent. per annum, free of income tax, leaving 8,376*l*.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Otago and Southland Investment.—A dividend at the rate of 10 per cent. per annum has been paid.

Scottish Australian Investment.—The adopted half-yearly report showed that after paying 11,115*l* in debenture and preference interest, the revenue balance was 8,474*l*. Out of this amount it was proposed to pay a dividend at the rate of 4 per cent. per annum, free of income tax; to carry 1,000*l* to the credit of the reserve fund, which would be thereby raised to 16,000*l*, and to carry forward to the next account 1,474*l*.

Trust and Loan of Upper Canada.—The half-year's report shows a balance at credit of revenue, including 2,340*l* brought forward, of 18,484*l*, and recommends a dividend at the rate of 8 per cent. per annum, and a bonus of 1 per cent., less income tax. It is also proposed to add 5,258*l* to the reserve fund, and to carry forward 726*l*.

[CONTINUED FROM PAGE 633.]

ASSURANCE COMPANIES.

Great Britain Mutual Life Assurance Society.—The report presented at the annual meeting held this week stated that the new assurances granted in the past year amounted to 221,200*l*, giving a new premium income of 7,763*l* 0s 10d.

Scottish Widows' Fund.—The report for the year 1870, read at the annual meeting on the 26th inst., states that during the year 1,700 new policies were issued, amounting to 965,627*l* 15s 1d. The new premiums of the year were 38,183*l* 2s 6d. 285 deaths took place during the year, giving rise to the following claims:—1. Original sums assured under bonus policies, 315,811*l* 17s 6d. 2. Bonus additions, 150,339*l* 0s 6d. 3. Sums assured under non-bonus policies, 15,538*l* 8s 5d—total, 481,689*l* 6s 5d. The total funds as at 31st December, 1870, exceed 5,150,000*l*. The annual revenue at 31st December, 1870, 641,086*l* 7s 11d.

MISCELLANEOUS COMPANIES.

Anglo-Argentine Company, Limited.—The directors invite applications for debentures to the extent of 20,000*l*, bearing interest at the rate of 10 per cent. In addition, each 10*l* debenture will entitle the subscriber to a 1*l* fully paid-up share as a bonus.

British and Foreign Tramways, Limited.—Capital, 500,000*l*, in 10*l* shares; first issue, 30,000 shares. The prospectus states:—"The intention of the company is generally to invest its own capital in the construction and development of the tramways selected by it, and to dispose of the same from time to time when tested by the experience of actual working, in which way the public will be protected against unsound and merely speculative projects. Arrangements have already been made for acquiring, on very favourable terms, the Brussels and Madrid Tramways (the former having been in successful operation for more than two years, while the latter has been nearly completed, and the principal portion will be open for traffic in a few days), and several valuable tramway enterprises in this country, for which Acts or Provisional Orders have already been obtained."

Madras Irrigation and Canal.—The section between Soonkasala and Cuddapah will be completed during June.

Société du Cable Transatlantic Français.—The directors have declared an interim dividend of 2 per cent., or 8s per share, on and after the 1st June, for the quarter ended March 31st last. The annual general meeting to approve the accounts and declare a final dividend for 1870, postponed in consequence of the continental war, will be held in June next.

MINING COMPANIES.

Great Western Silver Mining, Limited.—Capital, 30,000*l*, in 6*l* shares. The property immediately adjoins the celebrated Eberhardt mine, and forms a portion of the great metalliferous belt in which the best mines of this district are found. Of the capital, 20,000*l* will be paid for the purchase of the property, leaving 10,000*l* as working capital, a sum considered amply sufficient.

South Aurora Silver Mining, Limited.—Messrs Barclay Bros. are disposing of the 20,000 shares which the vendors received for their interest in the property. No increase of capital will be effected by this transference of interest. The price of issue, including the benefit of the quarterly dividend payable on the 1st of June at the rate of 20 per cent. per annum, declared by the directors of the undertaking on the 16th inst., is 10*l*, viz., 5*l* per share and 5*l* prem. Reports from the mine continue most promising. The prospectus states:—"By the last report of the company, issued 16th May, a quarterly dividend at the rate of 20 per cent. per annum, payable 1st June next. has been declared, and after such payment, according to the same report, there will remain in the hands of the company a balance of about 6,000*l*, which will be available towards the next quarterly dividend, due in September next. During the thirty-two days' working of the mill in the quarter ending 31st March last, the amount of ore treated was 1,706 tons. The bullion realised the large figure of 56,202.47 dols. The manager reports that, if it had not been for the interruption of the work at the mill by the non-completion of the Eberhardt tramway (since completed), the net result of the quarter would not have been less than 100,000*l*." With regard to the foregoing, the directors state that they do not constitute any fresh issue by the Company. The operation is entirely on the part of the vendors of the mines, and the directors were not cognisant of their intention to make the issue. The capital of the company remains at 60,000 shares fully paid up.

Vancouver Coal Mining and Land.—The balance of profit on the operations of the half-year amounts to 2,073*l*, and the sales of coal have exceeded those of the previous six months by 5,265 tons. Owing, however, to the exceptionally low prices which have ruled at San Francisco and the reduction of rates at the mine the profit is considerably less than that of the former half-year. The directors recommend a dividend of 5s per share on the paid-up shares, and of 3s on the ordinary shares, free of income tax, making, with the amount paid in November last, 7½ per cent. for the year.

The Commercial Times.

POST OFFICE ANNOUNCEMENT.

Commencing on the 1st June next, and thenceforward until the end of October, the mails for Bahamas, *viz* New York, will be despatched once in four weeks only, instead of every fortnight, as at present. The dates of departure from London will be on the evenings of Thursday, 1st June, 29th June, 27th July, 24th August, 21st September, 19th October, and supplementary mails will be forwarded on each succeeding Saturday evening, on the chance of their arriving at New York in time for the Bahamas packet, which is appointed to leave New York every fourth Thursday. From Liverpool the despatch of the mails will take place on the same days as from London, and from Dublin on the following days.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Owing to the comparatively short arrivals of grain there was some little firmness in the corn trade at Mark Lane to day, notwithstanding the very favorable weather for the growing crops. Sales of all kinds of produce were very limited, but values generally remain as quoted on Monday last. Inferior foreign wheats were occasionally cheaper, but English commanded late rates. Flour ruled steady in value and demand. Sound oats were firm in price, and there was no change to notice in the value of beans and peas. This week's imports into London have consisted of 14,000 qrs of wheat, 11,570 barley, 54,430 oats, 1,750 beans, 520 peas, 3,320 sacks and 7,340 barrels of flour.

At Liverpool and Wakefield this morning the tendency of the quotations for wheat was rather in favour of buyers.

The Liverpool cotton market opened quiet, and continued without change until Tuesday, when a brisk demand set in, and a large business has since been done at an advance of ¼d to ⅜d per lb. The total sales for the week have been 99,160 bales; of which the trade have taken 62,290 bales; speculators and exporters, 36,870 bales; the imports are 53,797; the actual exports 15,529 bales; and to-day's stock is 913,450 bales. Quotations for American descriptions have advanced ¼d to ⅜d per lb, East Indian and Bengals ¼d per lb since last Friday. To-day the market closes steady; sales 12,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended May 25, 1871:—

	Imported.		Exported.
American bales	45,385	.....	10,968
Brazilian	7,928	.....	1,036
East Indian	3,471	.....	9,541
Egyptian	3,938	.....	283
Miscellaneous	164	.....	157
Total	60,886	.....	22,585

At New York, on May 25, middling Upland cotton was quoted at 18½ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, April 29:—Shortly after our last report was written, telegrams were received from Liverpool advising a dull and drooping market and a fall in Surats of ¼d per lb, fair Dhollerah being quoted at 5¾d per lb. The effect upon rates here was soon apparent in a decline of 3 rs to 4 rs per candy and the tendency downward would doubtless have been developed more fully had it not been for the number of orders which became practicable at the slight reduction causing a rush of buyers to operate and check for the time the influence of home news. Prices remained very steady during the first three days of business, and the large operations being entered upon naturally encouraged holders of stocks to foster the belief that better rates were to be obtained by abstaining from selling freely. The past week has been by far the busiest of the season, more than 27,000 bales have changed hands, and the inquiry has been spread over almost every description. Dhollerah and Bhownuggur combine for a total of about 12,000 bales, partly ready, but the greater portion for one month's delivery, and a fair amount of business has also been done in Oomrawuttee and Broach, native machine-ginned. The quality of Dhollerah is improving, but there is still the same degree of harshness to be found in it, although the staple is, generally speaking, good. Bhownuggur and Mowa are arriving freely, and we think are very much better in value relatively, but they do not compare favourably with last year's growth, nor, so far as we can learn, are they likely to improve in this respect. The Bhownuggur is rather irregular in staple, and Mowa, whilst, so far as we have seen, very long and hardy in fibre, does not quite approach the previous season in cleanliness. Native Broach is falling off rapidly in value. Water packing and seed admixtures detract very much from its price, and a good selection is difficult to obtain. Machine-ginned also is failing, and with the utmost care anything over "fair" is difficult to find. Recent arrivals of Dharwar show an improvement upon early samples; the staple is longer and less cut, but there is still a good deal of broken seed and leaf to be found in the docras. From Tinnevelly we have a telegram dated 27th inst., quoting 5¾d per lb.

Export of Cotton from Bombay to April 28.

	1871.		1870.

Total, Great Britain	253,578	.....	241,300
Channel for orders	28,463	.....	2,463
Continent	108,385	.....	82,752
China	19,378	.....	18,745
Grand total	409,804	.....	345,260

Actual exports since last mail left, 55,903 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following cotton report, dated May 12:—We have had another week of the dulness and stagnation so long prevailing. Prices still continue unchanged from the figures which have been repeated for upwards of a month, excepting, however, that as the difficulty of meeting with satisfactory quality makes itself every day increasingly felt, desirable parcels in each description are held with great firmness, and command something over quoted values. Actual quotations we give as under:—Fair, 7¼d to 7¾d per lb, f.o.b.; good fair, 8¼d to 8¼d per lb, ditto; fully good fair, 8¾d to 8¾d per lb, ditto; Gallin, 9½d to 11¾d per lb, ditto (nominal). Freight, ¼d per lb for steam-pressed bales.

There has been an improved demand for sugar, and the tendency of prices has been upwards. The stock at this port is about 61,000 tons, against 81,000 last year. Coffee has ruled less active, but a fair business has been done at a decline of 1s per cwt. Rice and cocoa are unaltered in value.

The annexed is dated Havana, May 6:—The activity noticed in our last report of the 8th ult. has continued to increase, owing to the encouraging advices from the United States, under the influence of which the market, soon after Easter holidays, became much excited at constantly advancing prices. Although the demand bore chiefly on Muscovadoes and Centrifugals, being the most suitable for the United States' markets, clayed sugars also participated in the rise, as local speculators, encouraged by the favourable news and the short yield of the crop, began to operate on a more extensive scale. Planters being, on the other hand, very reluctant sellers, prices advanced to 10¼ rs to 10¾ rs for No. 12 for common clayed and Dorosne descriptions, which latter class is getting scarce in the market. Bright yellow clayed of common process and the higher grades of Dorosne sugars from Nos. 16 to 18, and the low grades of commmon process, Nos. 9 to 10, are also scarce, and command from ¼ rl to ½ rl above these figures. Shippers to Europe have continued to act with caution, limiting their operations to the most pressing wants. We place our general quotations, based upon the last transactions, as follows:—Nos. 7 to 10, 25s 6¼d to 27s 9d; Nos. 11 to 12, 28s 3¼d to 28s 10d; Nos. 13 to 14, 29s 5d to 30s 6d; Nos. 15 to 17, 31s 0¼d to 32s 2d; Nos. 18 to 20, 33s 3d to 34s 4¼d; white, inferior to superior, 34s 4½d to 38s 9½d, at 18½ per cent. premium, f.o.b., per cwt. The stock here and at Matanzas amounts to 454,569 boxes, against 572,681 boxes in 1870. Muscovado sugars have enjoyed a very brisk demand throughout the month now under review. The favourable advices from the near continent, in conjunction with the small disposable stock at this period of the season, produced much excitement here as well as at outports, and prices were driven up to 9¼ rs to 10½ rs for fair to good refining grades, equal to 24s 9½d to 26s 5½d, at which quotations the market closes very firm, and almost

without stocks in first hands. The exports from here, Matanzas, Cardenas, and Sagua la Grande, during the last month, were as follows:—To the United States, 49,796 boxes 8,258 hhds; to Great Britain and a market, 36,132 boxes 4,059 hhds; to Belgium, 1,335 boxes; to Spain, 24,275 boxes 6 hhds; to Italy, 1,200 boxes; to Central and South America and other parts, 312 boxes 202 hhds—total, 113,050 boxes 12,525 hhds, against 200,663 boxes 58,406 hhds same month last year; and the aggregate of exports from the above-mentioned ports sum up to 382,185 boxes 98,819 hhds, against 644,461 boxes 192,347 hhds in 1870. The crop is nearly finished. In the districts of Matanzas, Cardenas, Remedios, and Cienfuegos the greater part of the estates have finished grinding, the yield showing a deficiency of from 10 to 40 per cent. as compared to that of last year. In other districts the result may prove less unfavourable, but there will probably result a deficiency of 25 per cent. of the whole crop. Abundant showers of rain have lately repaired the injury done to the growing cane by protracted drought.

Messrs Mohr Brothers and Co., of Rangoon, writing on April 17, remark:—Natsain rice—With but a moderate amount of tonnage in our harbour, buyers have been able to establish a decline of prices, and the same have gradually given way to 142 rs to 144 rs for 100 baskets, 5 to 6 parts Natsain rice, equal to 6s 1½d to 6s 2d per cwt, free on board. Supplies are, however, falling off, and should the demand for our staple suddenly increase, prices would probably rise again rapidly. There are at present 18,000 tons shipping in our harbour, which have to load rice for Europe, but about half of these vessels have full cargoes of either coal or salt on board, and they will therefore not be ready to take in their rice cargoes before, say, a fortnight hence. Exports to Europe since 1st January aggregate 110,326 tons rice. Supplies of soft kinds have been very fair throughout the fortnight under review, and as the demand for the Straits and China has been but moderate, prices for 5 to 6 parts Ngakyouk rice have declined to 133 rs to 140 rs for 100 baskets of 68 lbs.

According to Messrs Arles Dufour and Co., of Lyons, no material change has occurred in the silk market of that city during the past week, the general belief in the impending defeat of the insurgents in Paris having been counterbalanced by the fears entertained respecting the intention of the French Government, under M. Thiers, to impose a heavy import duty upon all foreign raw silk—a proposal which would be so fatal to one of the most flourishing branches of the national industry that it was still hoped it would be withdrawn. The progress of the crop continued to attract attention. In Spain it appears to be equal to that of last year, with the difference that the proportion of native cocoons is much less, while the amount of Japanese is considerably increased. In France the silkworms are passing through their last and most critical stage, apparently with fair prospects. From Italy also the accounts seem satisfactory, and in Syria, according to a telegram of the 14th inst., the symptoms are excellent as regards Japanese sorts, while the native are rather backward.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on April 23, thus refer to the Cape wool trade:—There is no change to report in wool since the date of our last report. The arrivals have somewhat increased, but consists chiefly of grease wool, which has found ready purchasers at our last quotations. The few parcels of fleecewashed and country scoured wool that have come in have been taken by continental buyers at the advance named in our last report. We repeat our last quotations:—Grease—Full-grown, superior, 6d to 6½d; fine, light, for scouring, 5¼d to 5¾d; heavy and inferior, 4½d to 5d. Fleecewashed—Superior, clean, 9½d to 10d; good average, 8½d to 9d; inferior and seedy, 7½d to 7¾d. Snow-white—Prime Uitenhage scoured, 15½d to 16½d; second quality ditto, 14¾d to 15½d; superior country scoured, machine washed, 14d to 15d; superior country scoured, 13½d to 14d; inferior to good country scoured, 11d to 13d.

The annexed is dated New York, May 13:—The state of the trade has been somewhat variable during the last part of the week, influenced mainly by the tenor of cable despatches, or speculations connected therewith. The growing ease in the money market affords increased opportunities for speculative ventures, but they have not been embraced to any marked extent. The ruling rates for money are 3 to 5 per cent. on call, with exceptions on still easier terms. The speculative movement in cotton is unchecked as yet, and prices have been further advanced. The breadstuffs market has been irregular. Wheat was in good request on Wednesday and Thursday, when the purchases for the European marts were quite large, and at decidedly higher prices. The demand was checked yesterday by unfavourable cable advices, and prices fell off 3 to 4 cents per bushel. Provisions have been dull and prices are lower, though the market closed yesterday with more buoyancy. Foreign exchange has ruled steady, but closed dull. The subscriptions to the new loan are slow, amounting in the aggregate to but $64,000,000. The export movement in breadstuffs has been fair, though checked by a further material advance in the rates of freight, as high as 8d the bushel having been paid for grain to Liverpool. The variations in the price of gold have been immaterial, nearly all the transactions having been on the basis of 111¼.]

THE COTTON TRADE.

LIVERPOOL.—May 25.

The cotton market was heavy in the early part of the week, the demand, though fair, being freely supplied, and rather lower prices were submitted to. On Tuesday afternoon considerable purchases were made on speculation, and holders showed more firmness. On Wednesday and to-day, with a large and general demand, prices have hardened, and quotations are generally raised ⅛d to ¼d per lb. For Sea Island there has again been only a moderate demand, without change in prices. American, which was only in moderate demand in the early part of the week, has since Tuesday attracted the principal attention of buyers, and is now rather sparingly offered at an advance of ¼d to ¼d per lb on last week's quotations. New York advices to the 25th inst. quote middling Upland 16⅞ cents, costing to sell in Liverpool 8¾d per lb, by steamer. Brazil continues in increased request, and is dearer in some instances. Egyptian has been in good demand, and since Tuesday prices have been fully supported. In East Indian a good business has again been done, at an average advance of ⅛d per lb.

In cotton to arrive the transactions have been both numerous and on an extensive scale. The following quotations show an advance of nearly ¼d per lb in the week:—American, basis of middling, from Charleston, at sea, 7⅝d; Savannah, ship named, not sailed, not below good ordinary, 7¾d; Mobile, not below good ordinary, due, 7¾d; New Orleans, ship named, not sailed, not below good ordinary, 8d; Texas, not below good ordinary, ship named, not sailed, 7 15/16d; low middling, Charleston, ship named, 7½d; Texas, due, 7½d; good ordinary, New Orleans, ship named, not below strict ordinary, 7 15/16d; Maceio, fair, with mutual allowances, ship named, 7½d; Dhollerah, fair new merchants, Cape, April-May shipment, 6½d; May-June shipment, 6½d; Oomrawuttee, fair new merchants, Cape, ship named, 6½d; April-May shipment, 6½d; Canal, steamer named, 6½d per lb.

The sales of the week, including forwarded, amount to 99,160 bales, of which 17,160 are on speculation, and 19,710 declared for export, leaving 62,290 bales to the trade.

May 26.—The sales to-day will probably amount to about 12,000 bales, with a steady market.

Whit-Monday, the 29th, and Whit-Tuesday, the 30th instant, will be close holidays in the cotton market; and Monday, being now, by Act of Parliament, a bank holiday, will be treated as Sunday in respect of cash and payments for cotton.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	637,500
An increase of quantity taken for consumption of	149,310
An increase of actual exports of	219,160
An increase of stock of	307,070

In speculation there is a decrease of 42,830 bales. The imports this week have amounted to 53,795 bales, and the quantity of American cotton reported at sea for Great Britain (according cable advices to May 19 is 250,000 bales, against 120,000 bales last year. The actual exports have been 15,529 bales.

LONDON.—MAY 25.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market continued without alteration up to Tuesday; there has since been an active inquiry, especially for arrival, prices closing in most instances ¼d per lb higher for cotton on the spot, and ⅛d arrival.

N B.—Monday next will be a close holiday, and there will be no circular issued until Wednesday, the 31st instant.

NEW YORK.—MAY 12.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, May 12. From the figures thus obtained it appears that the total receipts for the seven days have reached 46,849 bales, against 51,432 bales last week, 56,685 bales the previous week, and 63,042 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,669,659 bales, against 2,674,933 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 994,726 bales. The exports for the week ending this evening reach a total of 76,620 bales, of which 49,497 were to Great Britain, 9,872 to France, and 17,251 to rest of the continent, while the stocks as made up this evening are now 380,346 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending May 12.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	18291	16167	34458	24093	141138	130135
Mobile	8843	1200	10043	7513	25204	43005
Charleston	2377	300	2677	1103	18404	10455

Texas	3327	1339	4666	5879	63184	31920
New York	11583	1047	12630	8192	78000	45000
Other ports	1165	...	1165	859	24000	17000
Total	49497	27123	76620	51240	380346	322399
Total since Sept. 1	2107493	655646	2763139	1842240	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 25,380 bales, while the stocks to-night are 57,947 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to May 5, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph:—

We have had a firm though rather quiet market the past week. During the early days of the week there was no change in prices, and the sales were moderate, but later, with the receipts at the South rapidly falling off, and the reports with regard to the new crop not construed favourably, while at the same time Liverpool showed new strength, prices here rallied, the grades below low middling advancing ⅛c to ¼c, and low middling and grades above ¼c. To-day this upward movement has been continued, middling closing to-night at 15⅜c against 15⅛c last Friday, and ordinary at 11⅝c against 10⅞c a week ago. There appears to be an under-current of strength to the market, based on the idea that cotton compared with other commodities is now relatively cheap, and that, therefore, with consumption at its present high rate, the smallest disaster to our crop, would result in some recovery in prices. Hence, although the offerings continue fair, holders are by no means free sellers, and prices are easily turned upwards. For forward delivery there has been a good business doing at an advance corresponding to the advance for spot cotton. Low middling closed to-night at 15⅛c for May, 15⅛c for June, 15⅛c for July, 15⅛c for August, and 15⅛c for September. The total sales of this description for the week are 88,129 bales, including 1,479, free on board. For immediate delivery the total sales foot up this week 19,153 bales, including 10,243 for export, 6,067 for consumption, 1,418 for speculation, 1,455 in transit. Of the above 730 bales were to arrive. The following are the closing quotations:—

	Uplands and Florida.	Mobile	New Orleans	Texas.

	7913	15749	49786	8290	14514	63339

* A count of stock at Nashville this week shows 1,000 bales less than the running count called for.

These totals show that the interior stocks have decreased during the week 8,846 bales (being now 13,553 bales less than for the same period of last year), while the aggregate receipts are 377 bales more, and the shipments 1,235 bales more than for the corresponding period of 1870.

The exports of cotton this week from New York show a decrease since last week, the total reaching 17,844 bales, against 13,297 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, May 23.—According to Messrs Moffatt, Davidis, and Co.'s report, the receipts of cotton for the last four days have been 22,000 bales. Shipments to England, 22,000 bales; to France, none; and to the continent, 8,000 bales. Middling Upland, 7⅞c, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, MAY 25.—The market has continued dull and dragging throughout the week, very fewn inquiries have been made of an extensive character, and the actual business of the week has been again very circumscribed. Prices, however, are generally well sustained owing to the current engagements of producers; but, as these are running out daily and are not being renewed, more pressure to sell will shortly take place. Meantime stocks are light and the cotton market is reported rather dearer, both of which circumstances give stability to prices. The latest Calcutta telegrams are again unfavourable, and the China advices show no improvement, hence there is little doing for these markets. The home trade continues quiet, especially in goods; the demand for yarn is still to a fair extent at slightly easier rates until to-day, when spinners have shown more firmness. The market closes inactive, the improvement in the cotton market having produced no perceptible effect here as yet.

Messrs Alexander Collie and Co. received the following telegram from Manchester, dated May 26, 1871:—Producers to-day are asking an advance upon Tuesday's quotations, but merchants are not disposed to operate, and prices in consequence are not tested by actual business.

BRADFORD.—There is a slight lull in the wool market. Spinners are not anxious to increase their stocks, and most are holding off buying in anticipation of the coming clip, knowing that they will then find a better choice than is the case at present. Prices are firmly maintained. In the yarn market there is still an active demand for genappe and two-fold yarns, but there is less doing in single demi sorts, both 30's and 40's. In the piece market there is a fair business doing. Prices are extremly firm.

BIRMINGHAM.—Trade, though still far from brisk, is improving, and the number of firms making full time is on the increase. Locally, there is a rather active consumption of nail rods, gas strip for tubing, and rolling stock ironwork, most of these branches being exceedingly busy. Prices though not quotably higher, ar firmer for most varieties of finished iron, and second-class makers find less difficulty in obtaining their demands. Bars, however, are rather easier and though 8*l* per ton is the list price, large quantities are changing hands at little over 7*l*. Pig iron continues steady at the old rates.

LEEDS.—The woollen market has been thronged by inquirers, but there were only few actual buyers. It is evident that the majority of our merchants think that the old low prices have completely passed away, and that when the fall trade gets into full operation values will tend still further upwards. Not only is wool, mungo, &c., dearer, but the wages of the mill-hands have been advaced.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—MAY 12.

The market for breadstuffs the past week has shown very little variation in prices, closing feverish and unsettled. It is believed that the supplies from the break in the Erie canal may be expected about the 22nd inst. The receipts of flour have been more liberal, but the demand has been fairly active and general; in fact, sellers have at times been able to obtain some advance. The good trade brands have been especially wanted, and family flours have sold very well. The common shipping extras, however, close rather slow at $6.10 to $6.15, delivered. with good to choice, $6.20 to $6.40. The export movement shows some falling off from last year, while the receipts are fully as large. Wheat has been variable. The receipts by rail and canal have been larger than expected, but the foreign advices have been favourable to sellers, and with a good export demand, prices ruled buoyant until to-day, when, with dull accounts from Liverpool, increased offerings on sale, and an advance of a half-penny asked for ocean freights—making 2½d advance for the week—prices of new spring fell off 2 cents, selling at $1.55 afloat, closing with not more than $1.54 freely bid, but choice amber winter brought $1.62, with good line saleable at $1.60. A feature this week has been the considerable quantities of old winter wheat offering. New spring has sold to some extent for June at $1.50. Corn has been fairly active and firm. The supply has been barely sufficient for the home trade, and shippers have not been able to do much. To-day, with limited supplies, and a competition between dealers and shippers, prices advanced 2c, Western mixed selling 80c to 82c, and prime yellow 82½c. The movement in breadstuffs in this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The weather having recently been more favourable for the growing crops there was less firmness in the grain trade to-day; nevertheless, the accounts received from the agricultural districts are not altogether promising. The wheat plant is backward, and on light lands appearances are not so good as could be desired. Still the indications of a favourable change in the weather has had the effect of weakening the market, and to-day there was little disposition shown by millers to operate. Some qualities of foreign wheat were to-day a trifle easier to purchase. The hopes of an improved export demand have again been disappointed by the terrible events that have occurred in Paris, but the fact that France will probably require large supplies of breadstuffs tends to strengthen the hands of factors. It must be observed, however, that the time for reaping the harvest in the south of France is not very far distant, and the demand will probably not extend over that event. Flour closed quietly, but was steady in price to-day.

There has been little doing in spring corn. Light oats were the turn cheaper, but sound, heavy corn supported late rates. There has been little maize offering, and prices have ruled firm. Beans and peas are unchanged in value.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 46 grain and seed-laden vessels have arrived at ports-of-call, viz.:—26 wheat, 5 maize, 5 barley, 3 rye, 3 oats, 2 linseed, 3 cotton-seed, 1 colza, 1 canary-seed, 1 beans, 1 palm-nut kernels, and 1 valonea. The floating grain trade has at first been active, but later the tone became dull. Wheat has been in demand for the continent at about last week's prices; the market closes quiet. Maize. The few sales made have been at last week's currency prices. Barley in limited demand at late rates. Rye wanted has been in demand at full prices. The reported sales are as follows:—Wheat, 19 arrived cargoes Ghirka Odessa, 5s 6d to 5s; and Theodosia, 56s 6d per 492 lbs; Polish Odessa, 55s; Dunaburg, 55s; Wallachian, 49s 6d to 50s; American spring, 57s 6d per 480 lbs. Maize—5 arrived cargoes Odessa, 35s 6d to 36s 6d per 492 lbs. On passage: old Galatz, 35s per 492 lbs; Danubian, 33s; American, New York, 32s per 480 lbs; and 1 cargo maize and barley—maize, 33s per 480 lbs and barley, 27s per 400 lbs. To be shipped, 1 cargo mixed Philadelphia, 33s per 480 lbs. Barley—1 arrived cargo Wallachian at 27s 6d per 400 lbs. Rye—2 arrived cargoes Nikoleieff, 37s 3d and 38s per 480 lbs. Linseed quiet. Shipped or to be shipped, 200 tons ordinary brown Calcutta have been sold at 61s per 410 lbs; and 3,000 quarters Azoff, on passage, at 62s 6d per 424 lbs. Rapeseed—A fair amount of business has been done at unchanged prices. On passage, 550 tons ordinary brown Calcutta, 63s 9d to 64s 6d. Shipped or to be shipped, 700 tons ordinary brown Calcutta, 62s 3d to 63s 6d; 100 tons yellow mixed Calcutta at 63s per 410 lbs; and 2,000 quarters Dunabian at 67s 3d per 424 lbs. Cotton seed is quiet and prices have been tending downwards. On passage, nine tons Egyptian, from Alexandria, have been sold at 9l to 9l 2s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

[The races at Epsom during this week, and the Whitsun holidays to be observed during the following one, have tended to restrict transactions in the various markets, but a steady tone now prevails.]

SUGAR.—The market has continued very firm, higher rates being demanded, and generally obtained, for the reduced supplies brought forward. A continuance of easterly winds has delayed arrivals, therefore the stock shows some further diminution. Several parcels of Manila have changed hands at further enhanced rates. Other low qualities are held for an advance, which has been paid for Jaggery. Floating cargoes are rather dearer, several selling for the United Kingdom, including four of West Indian at 26s to 26s 3d per cwt. Refining qualities of West Indian are 6d per cwt higher. Transactions to yesterday amounted to 1,033 casks. Barbadoes by auction 30s to 35s 6d, 1,200 bags grainy at 32s to 36s per cwt. The Dutch sale of Java sugar held this week has gone off at full prices. Deliveries here continue satisfactory, and the stock is now 20,000 tons less than at the same date last year.

Mauritius.—There have not been any public sales; but a few parcels, chiefly low qualities, sold privately. The stock has fallen to an unusually low point, owing to the great decrease in the imports.

Bengal.—About 2,500 bags low brown are reported privately, chiefly Dullaah, at 20s with low brown at 19s 3d per cwt.

Madras.—1,450 bags Jaggery are reported at 19s 9d to 20s.

Penang.—550 bags brown and yellow, by auction, obtained 28s 6d to 31s. Privately, 700 baskets at 20s 6d to 22s.

Manila.—About 25,000 bags are reported sold. Clayed, 25s to 27s; Tasl and Zeta, 21s 6d to 22s; Ilo Ilo, 23s per cwt.

Foreign.—200 bags Guatemala, by auction, brought 29s to 31s. 330 bags strong dry grainy Egyptian, 37s to 38s. 311 casks Porto Rico of the new crop, part sold at 34s 6d to 35s for middling to good yellow.

Floating Cargoes.—Two of Cuba have sold for the United Kingdom at 27s to 27s 7½d, and one superior at 28s 3d. One of Porto Rico at 27s 9d; two of Bahia at 24s and 25s; one Maceio at 24s, all for the United Kingdom.

Refined.—The market is firm, and higher in some cases for dry goods. Common to middling qualities, 41s 6d to 43s 6d. Fine pieces also rather dearer.

RUM.—Transactions in West India have again been upon a limited scale, and prices are about the same as last quoted. Business during the week has been chiefly in Demerara, at 1s 8½d to 1s 9d, and 1d more

for hogsheads. Leewards, good, 1s 8d per proof gallon. A few sales of Jamaica at about the previous value. Stocks are still in excess of the previous seasons.

Cocoa.—The public sales of colonial have been smaller than for some time past. 270 bags Trinidad found buyers at previous quotations, ranging from 56s to 95s for grey to superior quality, with a few lots fine at 120s to 128s. 2,000 bags Guayaquil were chiefly bought in at 48s per cwt. Fine quality maintains its former value. A few parcels of Grenada and Trinidad are reported privately.

Tea.—There has been a limited demand from the trade, and the lower grades of congou, which are still plentiful, remain dull. Good common to medium steady. The public sales of Indian tea on Tuesday amounted to 5,770 packages. 2,000 packages sold previously; subsequently the remainder. Strong teas without material change. Inferior qualities depressed.

Coffee.—The market may be quoted steady at the recent reduction. Of plantation Ceylon some of the parcels bought in last week have sold, and the moderate quantity by auction during the present one has found buyers, viz., 570 casks 550 barrels and bags, the latest prices being as follows:—Pale and grey, 57s 6d to 66s; low middling dull to middling colory, 60s to 69s; good middling to bold, 70s to 79s. The better qualities were most in demand. 10 casks 800 bags native sold, including good ordinary at 52s to 53s. Business has been done privately at 53s 6d to 54s 6d for very good ordinary to good. 356 bags Singapore sold: Bontyne, 53s; ordinary sorts, 48s 6d to 50s. 496 bags Rio chiefly sold at 51s 6d to 53s 6d. 262 bags washed bought in. A floating cargo of Rio has sold at 48s 6d, for the Mediterranean; and one of St Domingo, for the same destination, at 54s. One of Bahia and one of Santos, no particulars. The export deliveries now show an increase of nearly 5,200 tons upon last season. Those for home use are larger by 600 tons, and the stock is nearly the same.

Rice.—White Bengal is firmer, the stock being much reduced. Further business has been done privately. For arrival 10s 3d to 11s 9d paid, and Askoolie 10s 3d to 10s 10½d. A cargo of Rangoon March sailing at 10s 3d. On the spot the sales include 23,000 bags Rangoon at 9s 3d to 9s 6d, a few parcels of white Bengal 10s 3d to 13s 6d; Ballam 9s 3d to 9s 6d.

Imports and Deliveries of Rice to May 20, with Stocks on hand.

	1871.	1870.	1869.	1868.
Imports.....tons	31440	11800	33460	21700
Deliveries	48650	24300	22950	22300
Stock	35900	36900	43150	16000

Sago.—A parcel of small grain afloat, but near at hand, has sold at 15s 9d per cwt.

Spices.—The usual sales were not held this week, and the transactions are rather limited by private contract. Singapore black pepper has sold by private contract at 5⅛d. Penang at 4⅜d to 4⅛d per lb. The shipment of large quantities by steamer have caused a material increase in supplies, but the extended deliveries leave the stock moderate. Further arrivals have taken place. White pepper remains without further alteration. Singapore has realised 7⅝d per lb privately.

Cinnamon.—The quarterly sales held on Monday comprised 1,876 bales Ceylon, of which about three-fourths sold; low ordinary qualities went irregularly, being occasionally rather cheaper, but the better sorts met with increased competition at 1d to 3d above last sales quotations: 1st sort, 2s 8d to 3s 8d; low, 1s 9d; 2nd sort, 1s 7d to 3s 4d; 3rd sort, 2s 1d to 3s 1d; 4th sort, 1s 9d to 2s 9d; ordinary and mixed 4d to 6d. 127 bales Tellicherry met a good demand: 1st sort, 2s 10d to 3s; 2nd, 2s 9d; 3rd, 2s 7d to 2s 8d; and broken, 1s 6d.

Cinnamon Chips.—2,400 bags part sold at 3d to 5⅜d, and bark at 2¼d to 3d per lb.

Saltpetre.—Fine qualities of Bengal have obtained rather higher rates, including a small parcel, refraction 2½, at 30s; refraction 6¾, 27s; 9, 26s 6d; 14½, 26s. 1,500 bags by auction were bought in, and afterwards sold at rather uneven prices: refraction, 12¼ to 6¾, 26s 3d to 26s 9d; 5¼, 27s 9d per cwt.

Imports and Deliveries of Saltpetre to May 20, with Stocks on hand.

	1871.	1870.	1869.	1868.
Imported.....tons	4850	4110	2040	2580
Total delivered	4750	6390	3800	4390
Stock	2480	2550	3320	6320

Drysaltery Goods.—The principal feature in these markets has been the business done in Bengal turmeric afloat, at 18s 6d. Low qualities of Bengal safflower have been in demand, chiefly at 4*l* to 5*l*, and sales have recently been made for arrival. A few bales of middling quality by auction sold at 9*l* 10s to 10*l* 5s. 900 boxes Pegue cutch, by auction, sold at 19s to 19s 6d. Good quality has realised 20s to 21s by private contract. Gambier is unaltered. 150 tons sold afloat at 16s per cwt ex ship.

Shellac has met with some inquiry, and business done by private contract chiefly in garnet.

Metals.—The business of the week has been moderate in extent, and rather a quiet tone pervades the markets. A few sales have been made in tin, the latest at 126*l* to 126*l* 10s for Straits; Banca quoted at 129*l*; common qualities of English, 127*l* to 128*l*. Lead has been quiet. Spelter continues firm: Silesian 17*l* 15s to 18*l*, a fine mark sold at 19*l*; business done for arrival at 17*l* 12s 6d. Scotch pig iron maintains the late advance, the latest sales were at 57s 3d for cash, and shipments during the past few weeks have been very heavy. The copper market is steady with more doing in foreign: Lota, 64*l* 5s to 64*l* 10s; Urmenita, 65*l* to 65*l* 10s; the last sales of Burra and Walaroo were at 73*l* 10s to 73*l* 15s.

Jute.—Several parcels have sold chiefly for arrival, and the market is steady. The prices paid afloat have been chiefly 20*l* to 24*l* per ton.

Hemp.—Manila and Petersburg remain quiet. 200 bales Sisal by auction were taken in.

Oils.—The sales in sperm and other fish oils have been generally upon a small scale, also in olive on the spot. Two cargoes of Candia have sold for the United Kingdom at 48*l* and 43*l* 7s 6d per tun. Cocoanut has been quiet. Ceylon, 40*l* to 41*l*. Cochin, 47*l* to 50*l*. Palm remains as last quoted. A firmer market for linseed oil, at 31*l* 15s to 32*l*. Sales of English house rape at 43*l* to 43*l* 5s, and for the last four months at 43*l* 10s per ton. No change in refined.

Linseed.—Bombay has sold to arrive at 62s. A cargo of Azow at 60s 6d for the UnitedKingdom. The market is quiet. Calcutta seed afloat quoted 61s to 61s 6d. On the spot 63s 6d per quarter obtained owing to the diminished quantity offering.

Petroleum is again higher, with increased transactions; refined, 1s 5d to 1s 5½d. For delivery in the last four months, 1s 6¼d to 1s 6½d per gallon paid.

Spirits Turpentine.—American, 37s to 37s 6d per cwt.

Tallow.—There has been a moderate demand during the week, and prices of foreign are a little higher than on Friday last New Petersburg, 43s 6d to 43s 9d; October to December, 45s 6d to 45s 9d.

Particulars of Tallow—Monday, May 22 1871.

	1868. casks.	1869. casks.	1870. casks.	1871. casks.

POSTSCRIPT.

Sugar.—The market continues strong. 14,700 bags clayed Manila have sold at 25s 6d to 27s 3d. 700 baskets brown Penang at 21s. Sales of West India 928 casks, making for the week 2,581 casks.

Metals.—No change of interest occurred.

Tallow.—Petersburg firm at previous quotations. Town remains at 43s 6d. 1,928 casks Australian by auction sold rather above last week's quotations: mutton, 41s 6d to 42s 9d; beef at 37s to 41s 6d per cwt, being quite 1s per cwt higher.

ADDITIONAL NOTICES.

Green Fruit.—The market for oranges good, supply short, and prices well maintained. Lemons in character. Barcelona nuts further advanced; black Spanish nearly finished. West India cocoa-nuts in demand. Lisbon new potatoes lower in consequence of large arrivals.

English Wool.—A good demand for deep-grown wools; all prices very steady.

Colonial Wool.—The market very firm, and fair inquiry.

Flax.—Market firm.

Hemp.—Market for Russian very dull. Manila steadier on receipt of the news of a firmer market abroad, an advance being established there of 2*l* per ton

Silk.—Market very quiet at previous prices.

Seeds.—Nothing doing in seeds, all values unaltered.

Tobacco.—There has been no business of importance done in North American tobacco during the past week; buyers have been very exacting in their transactions, and show no disposition to take quantities. Prices for all descriptions are firm. For some other growths termed substitutes there has been a good inquiry, and holders are firm at full rates. In segar tobacco there has been but little done.

Leather.—The trade in leather since our last report has been of about an average character, and at Leadenhall on Tuesday a fair amount of business was transacted at former rates. Light English butts, light shoulders, East India kips of good quality, calf skins of all weights and horse hides, English and Spanish are scarce and in request at full prices. The supply of fresh goods is moderate.

Metals.—The business of the week has been very small. Copper quiet in demand, but steady in quotations. Iron in moderate request. Tin has fallen again rather quieter, and price of Straits easier by 20s a ton. Spelter is still inactive, and lead participates in the general quiet. Tin plates unchanged.

Tallow.—Official market letter issued this evening:—

	s	d
Town tallow	43	6
Fat by ditto	2	0
Yellow Russian ditto	45	0
Melted stuff	32	0
Rough stuff	16	0
Greaves	19	0
Good dregs	6	0

Imports for the week, 1,122 casks.

METROPOLITAN CATTLE MARKET.

Monday, May 22.—The total imports of foreign stock into London last week amounted to 21,223 head. In the corresponding week in 1870, we received 8,961; in 1869, 19,246; in 1868, 6,166; and in 1867, 12,491 head.

There has been want of animation in the cattle trade to-day, and prices have had a drooping tendency, owing to the warm weather and to increased supplies. A fair number of beasts has come to hand from our own grazing districts, but the receipts from abroad have been hardly so extensive. The inquiry has been limited, and last Monday's prices have been with difficulty maintained. For the best Scots and crosses the extreme quotation has been 5s 8d, the general being 5s 6d per 8 lbs. With sheep the market has been heavily supplied. Business has progressed heavily, and a decline of 4d per 8 lbs has taken place. The best Downs and half-breds have been disposed of at 5s 10d to 6s per 8 lbs. For lambs the demand has been inactive, at from 6s to 7s 6d per 8 lbs. Transactions in calves have been on a limited scale, at drooping prices. Pigs have been dull on former terms.

Supplies on Sale.

	May 23, 1870.	May 22, 1871.
Beasts	2,790	2,970
Sheep and lambs	26,880	33,500
Calves	145	135
Pigs	120	200

From a statement recently presented to the Corporation by the Chamberlain of London, it appears that during the last year the receipts in respect of the Metropolitan Cattle Market amounted to 31,460*l*. Of this sum 13,458*l* was received on account of lairage; 3,813*l* of tolls on the animals, 8,436*l* of dues for pens and rails, 3,692*l* of rents in the market, and 1,082*l* of rents in the improved dwellings for the labouring poor. The expenditure was 37,365*l* in all, leaving a balance against

the City of 5,995*l*. The principal items were—20,662*l* for interest on loans and mortgages, 7,799*l* for hay, straw, and forage purchased for the use of the latter; 3,087*l* for salaries and weekly wages, 1,120*l* for alterations and repairs, 2,054*l* for rates, taxes, insurance, and police charges, 1,026*l* for gas and water, and 315*l* being the expense of the model dwellings. No works other than general repairs had been executed there during the last year.

METROPOLITAN MEAT MARKET.

Per 8 lbs by the carcase.

	s	d		s	d		s	d		s	d

Middling ditto	4	0		4	8	Middling ditto	4	6		5	2
Prime large ditto	4	8		4	10	Prime ditto	5	4		5	6
Prime small ditto	4	10		5	0	Large pork	3	4		4	4
Veal	5	0		5	4	Small pork	4	8		5	0

Lambs 6s 8d to 7s 6d.

HOP MARKET.

Borough, Friday, May 26.—The unsatisfactory appearance of the late-last imported must continue to check business in this market. Business has been transacted freely, and prices have continued in an upward direction. Mid and East Kents, 2*l* 5s to 7*l* 7s; Weald of Kents, 2*l* 5s to 3*l* 15s; Sussex, 2 to 3*l* 10s; Farnham and country, 3*l* 15s to 5*l* 12s; and olds, 1*l* to 1*l* 15s per cwt.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT)

Friday, May 26.—The East India wool sales in progress since the 23rd inst. go well through. So far 11,800 bales have been catalogued and all with the exception of about 600 bales passed the hammer. Competition has been very active, and advanced rates on last market prices have been realised in all descriptions, ranging from ½d for low up to 2½d for best clean white kinds.

CORN.

(FROM OUR OWN CORRESPONDENT)

Friday, May 26.—There was a meagre attendance at this market. Wheat was dull, nominally at 1d to 2d per cental reduction; flour 6d cheaper; barley quiet; Indian corn 6d lower; beans, old, 36s; new, 30s and 37s; peas scarce; oatmeal 32s and 34s; oats 3s 9d to 4s.

Wakefield, Friday, May 26.—The weather is very genial, and vegetation has made rapid strides within the last three days. Of course, as is usual, the trade is influenced by it, and traders to a man hold off buying, but holders are no reason to press sales, and the market is therefore pretty much the same.

The Gazette.

Tuesday, May 23.

BANKRUPTS.

Frances Sophia Bayley, Conduit-street, Regent street, spinster.
Edward Astbury, Birmingham, retail brewer.
Charles Barron, Liverpool, broker.
James Feeney, Middlesborough, Yorkshire, jeweller.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public gardens and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

BANK OF CALIFORNIA.—THE ORIENTAL BANK CORPORATION are prepared to issue Drafts at sight on the Bank of California San Francisco, the terms for which may be ascertained at their office.

Threadneedle street, 1871.

BANK OF ROUMANIA.

Notice is hereby given, that the Annual General Meeting of the Shareholders will be held on Monday, the 26th June next, at the Offices of the London Agency, 13 King's Arms yard, Moorgate street, at One o'clock, to receive a Report from the Committee, with the Accounts for the Year ending 31st December, 1870, and to declare a Dividend.

By Article 47 of the Statutes, the General Meeting is constituted of proprietors holding not less than five shares, each shareholder being entitled to one vote for every five shares held by him.

Shareholders desirous of being present or represented at the meeting must deposit their share certificates either at the Bank of Roumania, Bucharest, at the London Agency of the said Bank, 13 King's Arms yard, or with the Agents of the Bank at Paris, or Vienna, on or before the 12th of June proximo, in exchange for which a voucher will be given, entitling the holder to admission to the meeting.

BENJAMIN D. CHRISTIAN, Secretary.

May 16, 1871.

ANGLO-HUNGARIAN BANK.

At the General Meeting of Shareholders, held at Pesth, on the 17th of this month, the annual report of the Directors for the year 1870 was adopted, and a final dividend declared of fl 1 in silver, or 2s per share, making, with the interim dividend of fl 4 in silver, or 8s already paid, a total distribution of 10s per share, or 6¼ per cent. on the paid-up capital of the Bank.

According to the subjoined balance sheet the net profits for the year 1870 amount to fl 319,349.07, which, in pursuance of Art. 54 of the Statutes, is accounted for as follows, viz.:—

	Florins Currency.
Dividend already paid, £20,000, at 125	250.000.00
Carried to reserve fund	1.943.31
Tantième	1.741.42
Final dividend, £5,000, at 125	62.500.00
Carried to profit and loss new account	3.172.74
	319.349.07

As provided by the Statutes, the term of office of the Directors expired with the date of this meeting. All the Directors, with the exception of Prince Leo Sapieha, having offered themselves and being eligible, were re-elected, and J. Gerstenberg, Esq., was also elected a member of the Board of Directors.

It was announced that the London establishment is now taking an active part in the business of the Bank.

Copies of the report may be had on application. By order of the Directors, E. LENTZ, Manager.

46 Lombard street, London, 23rd May, 1871.

PROSPECTUS.

This Company has been formed, under specially favourable auspices, to purchase and work two mineral properties known as the Great Western Silver Mine, situate in the White Pine District, State of Nevada, United States of America. The property, which is 1,000 lineal feet in extent, is upon the southern slope of Treasure Hill, immediately adjoining the celebrated Eberhardt Mine, forming a portion of the great mineral-bearing belt in which the best mines of this district are found.

White Pine is undoubtedly the richest mining district ever discovered. The ores are found at a very shallow depth, are easily reduced, and give high average results. Official returns show that, during the year 1870, the value of the silver exported from the State of Nevada amounted to seventeen and a-half millions sterling.

Mr George B. Ellery, a mining engineer of great experience, well acquainted with the mines of the White Pine district, states that the Great Western Ledge is expected to be equally as rich as any mine in the district, and that a large quantity of ore of much less intrinsic value than will be raised will be [illegible] profitably, little or no machinery being required. A profit of at least £40,000 may be anticipated as the result of the first year's operations, and [illegible] of dividends may be met with this [illegible] be realised in a few weeks.

The following report has been made by Professor [illegible] upon specimens of the ore in which the Company [illegible] Mining Journal, one of the highest authorities on the mineral [illegible] the district:—

"Hamilton, Nevada, November 1st 1870.

"I have examined the property known as the Great Western Mine, situated upon the southern slope of Treasure Hill, White Pine District, joining the location of the celebrated Eberhardt Mine, and forming a portion of the same mineral belt.

"The principal development of any great extent upon the Great Western Ledge is a shaft about 85 feet in depth, sunk upon the vein, which at this point is nearly five feet in width and stands nearly vertical, having a slight dip to the south. The direction of the vein is nearly east and west. To the south the 500 feet level has been driven from which a tunnel has been run to strike the deposit at a depth of several hundred feet, and therefore more economically taken out than by hoisting.

"The ore in the shaft and in the drift appears to be a well-defined wall of the vein, extending to the bottom of the shaft, as seen in the open workings of the Eberhardt Mine, about 150 yards to the east. Going [illegible] feet, a vein of ore is exposed on either side, [illegible] and showing a good amount body of [illegible] from which I brought out several samples for [illegible] from the vein at various points [illegible] and at the bottom. These gave results as follows:—

	dols.
"Assay No. 1 gave 72 oz. of silver per ton of 2,000 lbs, value	92·50
Assay No. 2 gave 331 oz. 14 dwts. ditto	426·98
Assay No. 3 gave 708 oz. 12 dwts. ditto	976.12

The [illegible] ore is mixed principally of Silicate of [illegible] of the same general character and appearance as the ore [illegible] of the district.

"From the favourable location near and on the direction of other valuable mines already developed, the [illegible] and value of the ore exposed by the comparatively [illegible] development, and the convenient position for working the ores, the Great Western Ledge shows a [illegible] for the investment of capital, with a warrant [illegible] in addition to numerous in the district [illegible] that I have seen.—S. C. EATON."

The following report is extracted from a report made by Mr C. K. Hoover, Mining Engineer of Treasure City, Nevada:—

"I have made a minute examination of the Great Western property. I find the Mine situated on the [illegible] slope of Treasure Hill and immediately west of the celebrated Eberhardt Mine, to which it is a due south parallel. The Mine I have no hesitation in [illegible] possessing precisely the same character of ore as [illegible] in quantity and with a small amount exposed [illegible] development, will take rank among the first-class [illegible] of this east and west belt.

"The [illegible] of the Eberhardt and Aurora Companies [illegible] stated to be £5,000 per month, and [illegible] are now £40 per share, or 800 per cent. premium.

The Gold Hunter Mine in the same district, is now [illegible] at the rate of £20 per cent. on a capital of £50,000, and the shares are quoted at more than [illegible] per cent. premium.

The Champion and Champion Mines, in the Eureka district, are [illegible] to be yielding a profit of £11,000 per month, and the Mammoth Mining Company's Mines, [illegible] £6 per month.

[illegible] these mines many other mines of a [illegible] and when it is remembered that the [illegible] to which these mines are situated is as yet quite in its infancy, a short time only having elapsed since the first discovery, it will be readily understood that there is a very advantageous field for the judicious outlay of capital.

The mines of the White Pine District are free from water; pumping machinery will not therefore be required. There are no royalties or rent.

Of the capital proposed to be raised, £20,000 will be paid for the purchase of the property, leaving £10,000 as working capital, a sum deemed amply sufficient for that purpose. The contract for the purchase is dated the 17th day of May, 1871, and the parties thereto are George Brigham Ellery of the one part, and the Company of the other part.

The vendors and friends have subscribed for a considerable number of shares, and Mr Ellery has consented to superintend the operations of the Mine as Consulting Engineer.

The deeds of the property, duly authenticated, the articles of association of the Company, and the originals of the reports, may be inspected at the Offices of the Solicitors to the Company.

In cases where no allotment is made, the deposits will be returned in full.

The preliminary expenses will be defrayed by the vendors.

Prospectuses, forms of application for shares, and every information, may be obtained at the Offices of the Company, and from the Broker, Coleridge Anson, Esq., 76 Old Broad street, London, E.C.

GREAT WESTERN SILVER MINING COMPANY (Limited).

NOTICE.

Applications for Shares will not be received after TUESDAY next for London, and WEDNESDAY next from the Country.—By order,

25 Old Jewry, E.C.

EBERHARDT AND AURORA SILVER MINE.

I advised my friends and clients to buy these shares when they were £14 per share. They are now £30 to £41, and will go much higher. The tramway for the ores is now complete, and the new mill commenced running about the 12th May. Great quantities of silver may now be expected, and an early dividend.

T. G. TAYLOR,
Sworn Broker for Stocks and Shares,
3 Pinner's court, Old Broad street.

London, 25th May, 1871.

My circulars respecting the prospects of the above Mines can be had on application.

SOUTH AURORA SILVER MINING COMPANY (Limited).

The Second Quarterly Dividend, at the rate of 20 per cent. per annum, has been declared payable on 1st June. Shares are quoted £11 to £11½, but as the ore is growing richer in depth they may rise to £25. The mill recommenced crushing on 1st May, and consignments of bar silver will be reported in the papers as before. A great portion of the Third Quarterly Dividend, due 1st September, is already in hand. It is safe to buy at any price under £15. 20 per cent. may be considered the minimum Dividend.

T. G. TAYLOR,
Sworn Broker for Stocks and Shares,
3 Pinner's court, Old Broad street.

London, 25th May, 1871.

My circulars respecting the prospects of the above Mines can be had on application.

EBERHARDT AND AURORA AND SOUTH AURORA SILVER MINING COMPANIES (Limited).

Full and interesting information respecting these magnificent properties can only be obtained by sending addressed envelope to the undersigned.

Orders must be accompanied by cheques crossed Alliance Bank. Provincial brokers and bank managers will find it advantageous to deal direct with

This Company is now opening out some extensive Gold Mines in the Argentine Republic. Copies of the Directors' last report, and also reports from the Government Inspector-general of Mines to the Argentine Republic, Mr William Parcell and Captain Joseph Vivian, the Company's Manager, may be obtained on application at the Company's office.

The Directors, for the purpose of immediately providing additional machinery, &c., have resolved to issue the £20,000 of debentures which they were authorised to do by the shareholders.

These debentures will be issued with provisions for repayment of the principal as follows, viz.:—

One-fifth	repayable	in three years.
One-fifth	—	in four —
One-fifth	—	in five —
One-fifth	—	in six —
One-fifth	—	in seven —

or at such early dates as the Board shall appoint by giving six months' notice of repayment to the holders.

The debentures will bear interest at the rate of 10 per cent. from the 1st of July next, and each £10 debenture will entitle the subscriber to a £1 fully paid-up share as a bonus.

£1 for each £10 debenture must be paid on application, and £9 on or before the 25th day of June.

Applications from shareholders and scripholders will have priority of allotment, provided their applications are made accompanied by a deposit of £1 for each £10 debenture on or before Monday, the 5th day of June.

THE SEASIDE CONVALESCENT HOSPITAL, Seaford, near Newhaven, Sussex.

PATRONESSES.

Her Royal Highness the Duchess of Cambridge.
Her Royal Highness the Princess Mary of Teck.

PRESIDENT—The Lord Archbishop of Canterbury.

VICE-PRESIDENT.

Sir James Ranald Martin, K.C.B., F.R.S.

COMMITTEE.

The Rev. Harvey Brooks, M.A.	Edward Johnson, Esq., M.D.
Edward S. Carr, Esq.	W. H. Maitland, Esq.
E. H. Chandler, Esq.	Alexander Ross, Esq.
William Chappell, Esq. F.S.A.	J. Bell Sedgwick, Esq.
Herbert Fry, Esq.	A. Nowell Sherson, Esq.
Lieut.-Colonel the Hon. H. E. H. Gage.	E. H. Sieveking, Esq., M.D.
William Goslett, Esq.	W. Tyler Smith, Esq., M.D.
	J. C. Whitehorne, Esq.

This Charity has administered to more than 3,500 poor convalescents, for one month each, the benefits of sea air, bathing, rest, medical treatment, and home comforts. At the close of the financial year, on the 31st March, there was brought forward, after paying every liability, £350 for the service of the year then commencing. The Committee, therefore, are not seeking deliverance from a load of debt, but HELP to continue their labours with spirit, and to enlarge the operation of a recognised public benefit. The number of monthly tickets issued in 1870-1871 was 446, and the hope is to exceed that figure in 1871-1872. To secure this £2,000 is required, and contributions are urgently solicited. Bankers—Messrs Coutts and Co., Strand.—By order. H. GREEN, Secretary.

Office, 8 Charing cross, S.W.

THE BRITISH AND FOREIGN TRAMWAYS COMPANY (Limited).

Subscribed Capital, 300,000*l.*, in 30,000 Shares of £10 each.

DIRECTORS.

John M. Dunlop, Esq.	Philip Rose, Esq.
H. G. Erichsen, Esq.	William Sheldon, Esq.
L. Floersheim, Esq.	Lieutenant-Colonel C. Napier Sturt, M.P.
William Morris, Esq.	

BANKERS—Messrs Glyn, Mills, Currie, and Co.

SOLICITORS.

Messrs Baxter, Rose, Norton, and Co., 6 Victoria street, Westminster.
Messrs Ashurst, Morris and Co., 6 Old Jewry.

SECRETARY (pro tem.)—J. B. Glenn.

OFFICES—70 and 71 Palmerston buildings.

This Company is prepared to entertain proposals for Tramways, either in the United Kingdom or elsewhere, Address, with full particulars, to the Secretary (pro tem.), as above.

EXTRACTS FROM THE COMPANY'S PROSPECTUS.

This Company have been formed to carry out Tramway enterprise in connection with the parties who have been mainly instrumental in the introduction of Tramways into this country and the principal cities on the continent, and who will therefore bring to the business great practical experience.

The intention of the Company is generally to invest its own capital in the construction and development of the Tramways selected by it, and to dispose of the same from time to time when tested by the experience of actual working, in which way the public will be protected against unsound and merely speculative projects.

The Company is entirely free from any engagements, direct or indirect, with contractors, and will therefore carry out such works as it may undertake, on the best possible terms for cash.

The position of the founders of this Company will enable them to secure, on the most favourable terms, concessions from the principal cities on the continent and elsewhere open to Tramway enterprise.—By order of the Board,

J. B. GLENN, Secretary (pro tem.)

OTTOMAN SIX PER CENT. LOAN OF 1865.

OTTOMAN LOANS OF 1860-1863-64.

LA DIRECTION GENERALE.

Florence, le 15 Mai, 1871.

NECESSARY CAUTION

to all who use the VOLTA-ELECTRIC PENHOLDERS.—It having come to my knowledge that other pens than those I have received Letters Patent for (November 12, 1870, No. 2978) are used with the Volta-Electric Penholders I take this method to caution all who use these holders that no other pens should be used in them but those patented in combination with the Volta-Electric Penholder (each pen is stamped "Patented November 12, 1870"), for the simple reason that steel, of which ordinary pens are made, coming in contact with the metals of the Volta-Electric Penholder, will interfere with their voltaic or electric action. A quill or gold pen, however, may be used without incurring any risk of destroying the electric current.

ISAAC JACOBS,
Sole Inventor and Patentee of the Volta-Electric Penholder, 153 Fleet street, London, E.C.

LONDON AND ST KATHARINE DOCKS COMPANY

The Directors are prepared to issue, under the provisions of the Company's Act, a limited amount of 4½ per cent. Preferential Stock, to be applied to the reduction of the Debenture debt.

The net income of the Company, after payment of all working expenses, exceeds £325,000 per annum, being nearly thrice the amount of the Debenture interest. There is also an accumulating reserve fund, which now exceeds £165,000.—Application to be made at the Docks House, 109 Leadenhall street.

Dock House, 16th May, 1871.

MARTELL'S BRANDY.

CAUTION.

All persons are hereby cautioned against manufacturing, making, engraving or printing, or in any manner using any labels, capsules, brands, or marks, in imitation of or only colourably differing from the labels, capsules, brands, and marks used by Messrs MARTELL and CO., of Cognac in the course of their business as Exporters of Brandy.

And notice is hereby given, that the High Court of Chancery in England has granted (amongst Injunctions against other persons) a perpetual Injunction against Alfred Drury, of King street, Liverpool in the County of Lancaster, Printer and Engraver, and also his workmen, servants, and agents, under the penalty of £5,000, to be levied on his and their lands, goods, and chattels, from printing, manufacturing, or selling, without the sanction of the said Messrs MARTELL and CO., any labels similar to, or only colourably differing from the labels used by the said Messrs MARTELL and CO., aforesaid. And also a perpetual Injunction against Thomas Hutchins and Joshua Cox, of 49 South John street, Liverpool, aforesaid, Ship Store Merchants, Wine and Spirit Merchants, Sail Makers, and Ship Chandlers, and also against George Pickering, of Stone, in the County of Stafford, Lime and Coal Merchant, and each of them, and each of their agents, servants, and workmen, under the penalty of £5,000, to be levied upon their and each and every of their lands, goods, and chattels, from affixing, or causing to be affixed, to any bottles of Brandy any label made in imitation of, or only colourably differing from that used by the said Messrs MARTELL and CO., and from using, or causing to be used, in any bottles of Brandy, not bottled by the Plaintiffs either Corks with the **Brand used by theasaid Messrs MARTELL and CO.**, or with any brand only colourably differing therefrom, or capsules similar to, or only colourably differing from those used by the said Messrs MARTELL and CO., and from packing and selling such bottles of Brandy in cases having stamped thereon a fac simile of the Trade Mark of the said Messrs MARTELL and CO., or any mark or stamp only colourably differing therefrom, **and from selling, exporting or otherwise disposing of** any bottle of Brandy so labelled, corked, or capsuled, or packed or passed in such cases not being Brandy bottled by the said Messrs MARTELL and CO.

And notice is hereby further given, that proceedings will be taken by the said Messrs MARTELL and CO., against any person or persons who shall or may manufacture, make, engrave, or print, any labels made in imitation of, or only colourably differing from the labels so used by the said Messrs MARTELL and CO. And also that proceedings will be taken by them against any persons who shall make, use, affix, or apply, or **cause to be made, used, affixed or applied to** any bottle, or bottles, of Brandy, or to any corks, or to any cases containing bottles of Brandy, any labels, capsules, brands, or marks made in imitation of, or only colourably differing from the labels, capsules, brands, or marks, so used by the said Messrs MARTELL and CO.

Dated this 29th day of April, 1871.

King, Esq., on Views and Manufacture of Paper, illustrated by Hand Work, the wonderful Conjuring and Ventriloquism of Mr Buckland, the engagement of E. D. Davies, the Fantastic Vocalist, &c.—The Glass and other Entertainments as usual.—Admission One Shilling. Open from 12 to 5 and 7 to 10.

Messrs HOLDERNESS, NOTT, and CO., have been duly authorised to invite subscriptions for 7,500 Shares of £30 each, or £225,000 nominal capital of the IMPERIAL ANGLO-GERMAN BANK, which have been reserved for issue in London. They beg to inform the public that they have carefully examined the documents referred to in the Prospectus, and they would especially draw the attention of intending Subscribers to the great advantages and protection offered by the Law of June, 1870, of the North German Confederation.

1. The entire capital must be subscribed, and Ten per Cent. paid thereon before the Company can be incorporated.

2. Before incorporation, applicants for Shares cannot be made liable, and their money, therefore, must be returned in full if the undertaking be not proceeded with.

3. Incorporation cannot be affected until the Statutes have been approved by the shareholders (either personally or by proxy) at the requisite General Meetings in Berlin, and confirmed by the Judge.

THE IMPERIAL ANGLO-GERMAN BANK,

To be established under the provisions of the German Code of Commerce and the North German Companies Law of 1870, under the provisions of which the liability of shareholders is limited to the amount of their shares.

CAPITAL, £450,000 (or 3,000,000 Thalers), in 15,000 SHARES of £30 (200 Thalers) EACH.
With power to increase.

Shares to bearer will be issued upon the full amount being paid up.

7,500 Shares have already been subscribed for, and 10 per cent. paid thereon in Germany.

Deposit £1 payable on application, and £2 payable on allotment. Calls can only be made by the Board after incorporation.

GENERAL COUNCIL OF DIRECTORS.

His Serene Highness the Duke of Ratibor.
Herr C. Adickes, Hanover, President of the Hanover Altenbecken Railway, and Member of the North German Parliament.
Herr O. von Ambronn, Member of the Prussian Parliament, and Royal Privy Councillor of the Ministry of Finance, Berlin.
Seth A. Apcar, Esq. (Messrs Apcar and Co., Calcutta), 74 Lancaster gate, London.
Robert W. Barker, Esq. (Messrs Geo. S. King and Co.), Liverpool and Bombay.
J. Hermann Becker, Esq. (Messrs Andorsen, Becker, and Co., late Salvesens and Co.), London.
Maximilian Behrend, Esq. (Messrs M. Behrend and Co.), London.
Count de Besenval, 124 Pall Mall, London.
David Gaussen, Esq., Northcourt House, Abingdon, Berks.
Charles Morris, Esq., Director of the Bank of Australasia.
John Edward Morrison, Esq., London.
Herr L. Wrede, Royal Councillor of Commerce, and Alderman of Berlin.

BANKERS.

The London and County Banking Company, London. | Herr Joseph Jacques, Berlin.

BROKERS.

LONDON.....Messrs Holderness, Nott, and Co., St Michael's alley, Cornhill, E.C.
LIVERPOOL .....Messrs Hobbs and Stubbs.
MANCHESTER.....Messrs Fielder and Son.
BIRMINGHAM.....Messrs John Perry and Son.
LEICESTER.....Messrs J. H. Williams, Esq.

SOLICITORS—Messrs Argles and Rawlins, 85 Gracechurch street, E.C., London.

SECRETARY—George Armstrong, Esq.

TEMPORARY OFFICES—Berlin: 22 Jaeger strasse; London: 33 Cornhill, E.C.

The Imperial Anglo-German Bank is established with a view of taking advantage of the extensive Banking business now developing between Germany, England, and the East.

The principal seat of the Bank will be in Berlin, with an establishment in London. Branches will be established in such other cities as may hereafter be deemed desirable.

The business of the Bank will comprise banking and agency transactions generally, and the negotiation of State and other Loans.

The vast extent of commerce now developing in Germany, the great impetus given to trade with Russia and Austria by the railway systems, in part constructed and in the course of construction, justify the conclusion that the new German Empire, and above all Berlin as its representative capital, must afford more than ample scope for legitimate banking operations.

Official returns from the Imperial and Royal Statistical Department show the aggregate total of £53,000,000 for the imports and exports between Germany and England in 1870.

The German trade with China, Japan, and the English possessions in Asia, amounted last year to 8,600,000*l.*

As illustrative of the increase of banking, the returns of the Bank of Prussia exhibit total transactions for the sum of 3,950 millions of thalers in 1868, against 4,373 millions of thalers in 1869, giving an increase in one year of 422 millions of thalers, or upwards of 60 millions sterling.

The net profits of the Anglo-Austrian Bank (a kindred institution) for the year 1869, with a paid-up capital of 12,000,000 florins, amounted to 7,192,614 florins, or nearly 60 per cent., and its shares are now quoted at 95 per cent. premium upon the different markets of Europe.

The prosperity, moreover, of the banking establishments of Germany will be evident from a glance at the present quotations of the following banking institutions on the Berlin Bourse.

	Dividend for 1869.	Premium per cent.
Berliner Kassen-Verein	11½	79
Berliner Handels-Gesellschaft	10	38
Diskonto Kommandit	9½	60
Leipziger Kredit	8⅔	22¾
Meininger Kredit	10	30
Norddeutsche Bank	9 7/10	60
Austrian Kredit	16⅔	52
Prussian Bank	9½	59½
Rostock Bank	6⅔	17⅔
Saxon Bank	9	33½
Vereins Bank of Hamburg	10 8/10	16

As regards the trade of Germany, however prosperous it may be, it is yearly on the increase. The United States alone, absorbing as they do, nearly 200,000 German emigrants annually, present a large field for banking operations.

The Railway system in Germany and Austria has greatly developed itself within the last ten years: no doubt, however, can be entertained but that within a few years more the present mileage will be doubled; whilst Russia, intimately connected through her network of railways with every part of the German frontiers, is making rapid strides towards finishing the first 10,000 miles of road, of which the greater part is already open for traffic.

The establishment of rail communication with Italy by the tunnel of Mount Cenis; the great impulse given to trade with the Mediterranean and the East by the opening of the Suez Canal, all prove that a large commercial enterprise must necessarily spring up now that the war has terminated.

In every branch of trade and of commerce in Germany the want of adequate banking means is severely felt.

These facts, coupled with the conviction of what the commercial future has in store for United Germany, has induced powerful interests in that country to participate in the establishment of this Bank.

One-half of the capital has already been subscribed, and £3 per share, being 10 per cent. of the nominal value required to be paid by the law of the North German Confederation, have been deposited at the Bankers in Berlin.

A notarial translation of the Statutes, accompanied by Counsel's Certificate and Opinion, lies for inspection at the Offices of the Bank, and of the Solicitors, and also notarial certificate of payments upon the shares subscribed in Germany into Bankers' account.

Prospectuses, with forms of application for shares, may be obtained at the Offices of the Company, from its respective Bankers, and also from the Brokers and Solicitors.

One-half of the capital having been already subscribed for and paid upon in Germany, applications for the remaining moiety may be made to the Directors, and left with the Bankers of the Company, as stated in the Prospectus, accompanied by a deposit of £1 per share.

Where no allotment is made, the deposits will be returned in full.

THE IMPERIAL ANGLO-GERMAN BANK.

Notice is hereby given, that NO APPLICATIONS for SHARES in this Company will be received after THIS DAY, SATURDAY, the 27th instant.

By order,

London Offices, 33 Cornhill, E.C. GEO. ARMSTRONG, Secretary.

THE POLITICS OF FRANCE AS THEY SHOULD AFFECT HER CREDIT.

There are plainly two great preliminaries of which the money market should be assured before they again trust France as easily and as readily as they used to trust her. First, how soon will France possess a reasonably firm and decently substantial Government? Next, how will that Government be likely to use its power? Will it be a peaceful Government? or will, or may, it rush into wild schemes of repairing the certain calamities of the past war by possible victories in the next? To lenders—and many lenders there must be if France is to go on—both these questions are critically important.

The awful events that have just occurred at Paris have made the first of these questions easier to answer. After the peace, the first problem has been, as we said it would be—Is France to be governed according to the ideas of the peasantry in the provinces, or according to the ideas of the Red Republicans in the large towns? It was an awful dilemma, but that dilemma is the difficulty of France. Of first-rate political forces, there are in the country only these two; and with neither can an educated and rational politician at heart sympathise. The peasantry of France are ignorant, and narrow-minded; they have not the knowledge to guide the country, and they do not hear—they would not heed or regard—any sort of discussion which will fit them to guide the country. They love their property—their scrap of land and their money savings—so passionately that in politics they almost think of nothing else. Their one inquiry as to a ruler is—Will he save society? that is, will he save my *terre* and my money for me and my children? In utter opposition to these are the Red Republicans of the Communist type, whom we at the moment know only too well. The plans and ideas of the sincere part of these men are various. They almost all wish to change society and property vitally and in some great respect. On this they are agreed, for it is their uniting bond; but what that change exactly should be, or how it should be brought about, they are not agreed. And round these sincere though discordant fanatics in the Red factions there have gathered the able miscreants and the clever outcasts not of France only, but of the world. The great primary question which the fall of the Empire and the making of peace raised in France at once and distinctly was this—"Is France to be governed by the Red party or by the "Rural party?"

That question we hope and believe is now settled. And it is settled by the victory of the better side. No one can have a lower estimate of the political capacity of the French peasant or of his political knowledge than we have. His ideas of government and policy are narrow-minded, selfish, *borné* ideas, but still they are possible ideas. Human life can be regulated by them; civil society can be worked by them; political government can be guided by them. But the ideas of the Red Republic we believe to be in the essence impossible. They want to make of civil society, of Government, of property, that which they never can be; they can destroy what we have, but they cannot give us what we hope; and to what wild excesses of desperation and destruction they may at the critical minute be carried Paris now knows only too well. The victory of rural France over the Republican and city Reds is the first preliminary to a decent Government.

Judging from past experience we should hope that victory would be final. After each French revolution there has been a great struggle. After each the Red Republic has had to be destroyed by force and bloodshed; but after no revolution have the bloodshed and the violence been so great as now. What Cavaignac did in the days of June, and what Louis Napoleon did on the 2nd of December, do not together equally or probably approach the losses now. If the Anti-Red party are firm, compact, and prudent, they may probably, without great difficulty, coerce and hold under the Red faction for an entire generation. It is twenty years since Napoleon's *coup d'état*, and it, with prudence, may be twenty years till the next eruption of the ever burning volcano.

But will the victorious party be prudent? or will it be united? It is difficult to imagine that for some time it can be either. The present aspect is evidently temporary. The Republic may not long endure M. Thiers, and France almost certainly will not long endure the Republic. There is in the towns of France a great, a calamitous enthusiasm for a socialistic Republic. But the towns are defeated, and socialism is rejected. And in no part of France is there any strong liking for a *political* Republic. The socialists hate it, because they know it is not socialist; the peasantry hate it, because they fear it may be socialist. It excites the same antipathy as the "Red spectre," but without winning the same frantic attachment as the "Red spectre." A polity without many warm friends and with many eager enemies is doomed.

But if the Republic falls what Monarch shall succeed? The only Monarch whom the peasantry—the present real victors—have ever known is the Emperor; the only sort of political feeling they ever used to have was an attachment to the Emperor as *their* Emperor, as the coercer of the towns, as the maintainer of the social equality which they prize, and the social security which they love. And as Macaulay beautifully taught, a people is often mistaken, but is always faithful. It has indeed hardly the temptation to inconstancy, for it takes it so long to acquire new ideas that a new competitor is dead and passes off the scene before he begins to rival the old one. That, in spite of "Sedan," the name of Napoleon is profoundly cherished in France every one allows.

We do not believe that the same can be said for the Bourbons of either branch. We wish it could be said of the Orleans family. They represent everything we wish to see represented—secure property, rational freedom, Parliamentary Government. But France does not care for Parliamentary Government, or for what we call rational liberty. It *does* care for property, and is not sure that Parliaments and parties confirm it, even if they are consistent with it. Intelligent adherents, "meet though few," the Orleans dynasty can count, but the gross common mass do not care for them.

The legitimist Bourbons no doubt represent a principle, but then it is the *ancien régime* principle, and whatever else a French peasant may doubt, it is bred in his bone and fixed in his brain that he will not go back to his life before 1789. He knows indeed little in detail about it. But he knows that now he has his land to himself, and then he had not got it to himself. And he cares for nothing further. The Comte de Chambord has also dangerous friends. The *Ducs* who may aid him in the present Assembly hurt him outside with the French people. One thing which they do believe, and from which nothing will change them, is that they will not bow down before a *noblesse;* that they are as good as or better than any privileged class, and that they will be treated as if they were so.

The great risk is therefore that, though the Anti-Red party has conquered its enemy, it will not be united; that it may not agree on a chief; that the Emperor, though probably the strongest of competitors, may not be strong enough to come back, or that even if he is strong enough to come back he may be only *just* strong enough, and may be excessively weak when he is there; that the Bourbons may be strong enough to keep out the Empire, but not strong enough to return themselves; or if by some strange destiny or freak of fortune they did return, that they would be daily conscious they had no root, and that on the occurrence of the least difficulty they would fade away.

And a weak Government in France now would not only have the usual evils of a weak Government, but also an additional and worse evil. It could only with difficulty be a peaceful Government. That before the German indemnity is fully paid there will be a new war, if possible, to revenge the present war, and to prevent its being paid, is often said, though in such a case only bold prophets—much bolder than we are—can say so. But if anything could accomplish the fearful prophecy, it would be a weak French Government. To maintain itself, to excite an enthusiasm for the moment, to please the many who hate the taxes to pay the Germans, and who still believe that if well handled they could beat the Germans—such a Government may *dash* at anything.

The first instalment of the German indemnity France will no doubt easily borrow; but her power of borrowing the after parts will depend on the sort of Government she can make, and the slow unfolding of the complex influences which we have enumerated.

THE STATE BANK IN ITS RELATIONS WITH THE BANK OF ENGLAND.

We have lately been reminded very frequently that the English Government is the greatest banker in England: Mr Lowe has already under his control a greater deposit of other people's money than any other person, or body of persons, in the country; and if we recall the discussions on his first Budget this raises a rather curious question. It was then said that our system of banking was peculiar; that—putting currency out of the question—the only reserve of actual cash we, as a nation, hold against our banking liabilities was the reserve in the banking department of the Bank of England; that London bankers kept all their reserve, except what was wanted for the daily till, at the Bank of England; that they diminished this reserve at the Bank to the minimum necessary to work with; that they deposited the rest at the bill-brokers for profit, or invested it in interest-bearing securities; that the country bankers acted similarly, except that in most cases, and except at the vicinity of the branch banks, they had no deposit at the Bank of England at all. From this it followed that if by a sudden accident the banking community should be large borrowers, there would be no one to borrow from, if not the Bank of England. No one else would have spare unoccupied cash—a large sum in actual money not needed for its own wants, but ready and available for the wants of others. In matter of fact, just after the collapse of Overends, when many bankers in town and country were large borrowers, there was no one from whom any large sum could be borrowed except the Bank of England.

We are not now about to defend this system, or to comment on it. We have often explained that if we had a clear stage, we would prefer to have many equal or approximately equal banks holding their own reserve, and not a single dominant bank, which keeps the final cash of all, and on which all to some degree are dependent. Nor on the abstract principle have we anything now to say—nothing that we have not very frequently said before. But the present discussions—discussions which the "Chancery Funds Bill" will almost revive—raise a new and practical point. It being now conceded and proclaimed that the State is the greatest banker in England, to what extent does it as a banker adopt this peculiar system? what reserve does it keep? does it keep it itself? In a panic, if its credit were endangered, would it be obliged to borrow of the Bank like other bankers who fear for their credit? or could it stand alone and survive the storm, borrowing of no one?

The answer is that the State adopts fully the common system of English bankers. It does not keep a shilling in its own till that it can help; it reduces its balance at the Bank of England to the smallest sixpence it can. That account is kept in the name of the Commissioners of the National Debt, and as soon as those Commissioners (who act under the Finance Minister) see an accumulation beyond what will be required for daily demands, they immediately invest it. And they could do no otherwise. They pay a considerable interest for all the money which they receive. They are like a joint stock bank, which should give interest on every penny it receives, or like a bill broker. The loss on the Savings' banks to the nation has been very considerable as it is, but it would have been much more considerable if the State had paid interest on all which the poor deposited with it, and had also itself kept unemployed a large reserve yielding it nothing.

In fact in a panic the credit of the State bank of the Government has not been affected. But if in 1866 its credit had been affected, it would have been just like other banks, who then fancied their credit might be affected, or who found it was. If by rare mischance there had been a run on the Savings' banks just when Overends failed, the pressure on the Bank of England would have been fearfully augmented. The Commissioners for the Reduction of the National Debt would have been obliged to sell stock to meet the demand, and there was no buyer of stock and no lender on it at the critical moments of 1866 but the Bank of England. The Savings' banks, and consequently the Government, would be as dependent on the aid of the Bank of England as any bank was or could be.

The money which the Chancery Funds Bill proposes to lodge with the Government is much pleasanter money than that of

the poor. There can be no run on it. It is put into the Court of Chancery to wait the decision of the Court, and not even a panic will quicken that Court. But the proposal of a plan for greatly augmenting the present huge State bank presents a good opportunity for discussing the way in which that bank is managed. Mr Lowe has on several occasions said that the Bank of England is only a joint stock bank like any other; that if merchants or bankers choose to think it more, and act as if it were more, they must face the consequences; that he is not bound to support it, and does not mean to do so; that the "money market must take care of "itself." And this may be right—at least it is arguable that it may be right—for Mr Lowe as a Finance Minister. But look at Mr Lowe as a banker. He might be obliged just when other bankers were rushing to the Bank of England for aid, to rush there too for aid himself. He holds 50,000,000*l* at short notice. That enormous sum belongs to the poorest and most ignorant part of the community—the part most likely to be frightened; if it were well frightened, if great sums had to be paid by the National Debt Commissioners in a panic week,—happily an improbable, but still not an imaginary supposition,—he would fail as a banker without the aid of the Bank of England; he would have to realise securities which he could sell only to the Bank. Even if he should have on the non-banking accounts of Government a large balance, and if he should be bold enough to divert it to meet the banking liability of the State (which we believe would be illegal), still he could not get that balance unless the Bank of England could pay him. He would be, like every other banker, dependent on its solvency. As a banker he would find that if he did not take care of the money market, the money market would take care of him too.

THE EXTRADITION QUESTION.

A very serious question seems likely to arise in England as to whether we ought or ought not to give up Communist refugees charged with those kinds of crimes—such as complicity in the murder of the Archbishop of Paris and the other "hostages," or the destruction of the public buildings of Paris for purposes of mere malignant revenge,—which seem to all decent people quite beyond the range of "political" crimes. M. Jules Favre has formally demanded of all foreign Governments that Communist refugees from Paris should be regarded as common criminals, and has justified this demand by reference to the barbarous and certainly very unmilitary measures taken at the end of the revolt to wreak on innocent people, and on France herself, the vengeance which could not be wreaked on the triumphant enemy at Versailles. But before we accede to any such demand, we must remember that we can never decide a case of this kind without being kept to the logic of our decision on future occasions when we may be much less inclined to act on the same principles. Because England happens to be very justly disgusted with the horrible atrocities of the Commune's last acts, we must not deal by Communists in any other way than we should feel bound, if the Commune had won and the party of order been beaten, to deal by Versailles. Now the Extradition Act refuses the surrender of any fugitive when the crime "in respect of which his "surrender is demanded is one of a political character." Can we rightly and safely interpret this exception so that it shall not include the crimes committed by the Communists in the last days of the revolt? What the Home Secretary himself has as yet said on the subject does not throw much light upon it. Mr Bruce, interrogated by Lord Elcho, who put to him a very strong leading question evidently intended to elicit a reply to the effect that Communist refugees could not be regarded as political criminals whose surrender we can refuse, replied yesterday week that whatever the Belgian Government would do, our Government had no power whatever to prevent any of the Communist leaders from coming to England, but that if they came, the offences with which they might happen to be charged by the Government of Versailles would have to be carefully considered, and in case they should seem to fall under the head of ordinary crimes, they would be delivered up to it. Of course if they happened to be offences included in the Extradition Act. That, we need hardly say, is not even an attempt to solve the question whether complicity in the burning of the Hotel de Ville, or the murder of the hostages, is properly a "political" or an "ordinary" crime. But it was to be gathered, we think, from Mr Bruce's tone, that he thought the intention of the Act tolerably clear that crimes, however wicked, which could properly be called political, were not within the purview of the Extradition clauses.

It will be desirable, we think, considering the extreme and just horror felt amongst us of the crimes of the Communists, to try the meaning of the Act by parallel cases rather than by the cases at present most vividly before us. We know that the Germans took innocent hostages like the Commune, and declared, as the Commune declared, that if the lives of German soldiers or officers were taken by persons who were not in regular uniform—by Francs-tireurs and others—these innocent hostages should be executed; and in some cases the threat was certainly carried out. Now is it not clear that an act committed for military reasons by a German in ordinary war, must, if committed by a Frenchman in civil war, be regarded as falling under the category of political crimes? For what is a political crime, if any act sufficiently coloured by public feeling to be regarded as warranted by the usages of warfare, if it had been directed against an open enemy, is not to be included in that category? Could a crime be called an ordinary crime—a crime, that is, of private and personal passion—which for military motives one State might without universal scandal adopt against an armed foe? Surely in civil war we expect not less but more violence than in foreign war, and should admit, therefore, as the typical crimes of civil war outrages even worse than the measures usually adopted in ordinary war. Yet the seizing and execution of hostages in retaliation for acts considered by either party unlawful is unfortunately one of the regular incidents of even ordinary war. We know that executions of this kind, though not on so great a scale, or so outraging to the feelings of the nation, repeatedly took place during the great Civil War in America. Now, suppose we had been asked to surrender to the United States any Confederate leader of irregular troops escaped to this country, who had strung up a hostage or two in revenge for the shooting of some of his own relatives or friends by a drum-head court martial? Should we have even considered the demand for a moment? Yet if we surrender any of these Communist leaders because they were implicated in the atrocity committed on the Archbishop of Paris, we shall make a precedent for ourselves that it will not be easy to get over in any case of the kind in future. No doubt the policy of taking hostages and putting them to the sword in case the course threatened is pursued by the enemy, is a horribly barbarous one, which cannot be too severely condemned. But it is one of the harsh expedients of war which it is not likely that, while war lasts, we shall ever see entirely put a stop to. And much as we may regret the necessity, we cannot deny to those who have applied the usage under circumstances more barbarous than usual, the protection we should certainly have given to persons who had committed acts the same in principle though less atrocious in degree.

And then as to the burning of Paris. It is said, and very truly said, that there could have been no adequate military reason for such a step. But are we to make ourselves the judges of "adequacy" in such a case as this? The Communists will say that it retarded the advance of the troops, and enabled many of their soldiers to escape who could not otherwise have escaped. Is it for us to judge whether that is or is not a sufficient reason? We of course condemn it as utterly unworthy, because we in our hearts believe such buildings to be of infinitely more importance to France and to the world than the lives of a good many Communists. But can we expect the Communists to accept such a reason as that? If we make ourselves the judges of the military adequacy of the reasons offered for such acts as these, we might have been called upon to surrender, as a criminal, to the Communists had they triumphed, the commander of Fort Valerien for throwing shells into Paris,—many of which, doubtless, did a vast deal of mischief without securing any military advantage.

If we are to maintain the right of asylum at all, we must clearly construe "offences of a political character" very generally indeed, and not attempt to draw a line between different shades of guilt of precisely the same kind. If the execution of hostages taken to secure the treatment of your prisoners as prisoners of war, and the burning of public and private buildings in the front of advancing troops, be not offences of a political character, we greatly fear that the asylum for offences of a political character will very soon disappear altogether. We feel nothing but horror of the offences them-

selves; but it can hardly be questioned for a moment, we think, that they do come under the head of offences which it was expressly desired should be excepted from the operation of the Extradition Act.

THE AMPLE BUT UNEXPLORED FUNDS IN LONDON AVAILABLE FOR EDUCATIONAL PURPOSES.

THE LONDON SCHOOL BOARD.

It is gratifying to us to find that the two papers on the above subject which appeared a few months ago (see ECONOMIST, Dec. 17, 1870, and Jan. 14, 1871) have drawn attention to a subject capable of being worked out to a practical purpose. At the meeting of the 23 May of the London School Board, Mr Freeman, the Chairman of the Finance Committee, moved, and Mr E. H. Currie seconded, a resolution as follows:—

"That a Deputation from this Board wait upon the Prime "Minister to request that the Government will advise Her "Majesty to issue a Royal Commission for inquiring and "collecting evidence regarding the existing circumstances "and present extent of Endowments and Bequests held by "parishes, corporations, and parties within the area under the "control of this Board, and available for purposes of the "general and technical education of the people."

A fortnight previously Professor Huxley had carried a general resolution, declaring that it was the duty of the Board to obtain, as far as possible, the proper application, according to modern wants, of funds left for education by former generations, and generally that the intention of "pious founders," however laudable in their own time, should be now revised for the general good.

Mr Freeman's motion was of course opposed by Alderman Cotton and Mr Sutton Gower on behalf of the vested interests, who moved an amendment to the effect that it be first ascertained by a Committee of the Board "to what extent the "information required already exists in reports of Royal "Commissions and other public documents;" and also how far the School Board "have authority to deal with funds held "by parishes, corporations, and other parties, and in excess of "the powers already given by Acts of Parliament to the "Endowed Schools and Charity Commissioners." This amendment obtained only three votes, and the end of the discussion was the adoption of a resolution substantially the same as Mr Freeman's, but with modifications introduced by Professor Huxley to the effect that before going to the Government the Board will instruct a Committee to "ascertain "what is already known" regarding the class of funds and endowments in question.

The case, therefore, is in a fair state of progress. The School Board, almost without exception, admit the necessity of vigorous attack on the large masses of annual income existing in the Metropolis intended for general and technical education, and at present either improperly, or extravagantly, or foolishly administered.

Mr Alderman Cotton will find that his special ground of resistance to the motion, viz., that the information already exists and is available, cannot be maintained. He will find that for over two hundred years there has been no systematic inquiry into the endowments and administration of the Livery Companies. He knows perfectly well that so far the Corporation of London and the Livery Companies have succeeded in averting from themselves the Royal and other Commissions, which not once but several times during the last fifty years have dealt exhaustively with certain kinds of Charities, with the Cathedral Chapters and Endowments, with the whole revenues of the Church of England from the Primacy down to the humblest Chorister, with the two Universities, with the great Public Schools, and in the latest instance with the Endowed Schools. The time has come at last when the public are unable to find any reason whatever for excepting from the policy and the treatment which has answered so well in this large class of cases, the Corporation of London and the Corporations of the Livery Companies. These bodies hold their property precisely on the same conditions as the Cathedrals, the Universities, the Public Schools, or the Trustees of Charities. It is not a case of private property in the smallest degree. It is wholly a case of the good, or bad, or negligent, or intelligent discharge of a trust given for public purposes, and tenable only so far as these public purposes are promoted and discharged in the most effective manner.

Mr Freeman will find at an early stage of the progress of the Committee he has obtained, that while the information about the Livery Companies is meagre and scattered, it is also far behind the present time; and it is precisely because *the facts of the present time* are wanted that nothing short of a Royal Commission will suffice. During the last fifteen or twenty years such has been the advance in the revenue and value of large masses of the House and Landed Property held by the Livery Companies, that it may be asserted without hesitation that the increase of rental, either actually in hand or on the point of being secured, represents a very high percentage on the figures of 1851 or even 1861.

The inhabitants of the Metropolis insist upon knowing the facts. They are willing to pay any reasonable cost of the education provided by the School Board; but as a prior condition to their assent to new taxation, they require that Alderman Cotton's clients shall satisfy a competent authority that the public funds administered by them are applied to educational purposes, as the founders virtually intended, and according to the latest lights.

A WORD FOR LONDON.

No part of our system of government is so constantly attacked as the administration of London, and there is no doubt that it might be considerably improved. The system lacks dignity, symmetry, and completeness, and the task of maintaining it is divided in a very rude way between local bodies, most of which are obscure and some incompetent, and the over-worked and inattentive House of Commons. The consequence is that the best class of inhabitants take little interest in the capital, do not boast of it, and give themselves little trouble to improve or even to carry out its organisation. At the same time it must be allowed that the case for the municipal Conservatives has never been fairly stated, and it may be interesting to our readers, just as the census has been published, to look at London for once from the appreciative point of view, to hear what can be said in favour of the apparently unscientific system through which the Metropolis is administered.

In the first place, then, there cannot be a doubt that this unintelligent and disorderly system, with its medley of authorities, areas, and local laws, does possess the merit of almost unlimited expansiveness. The brief report of the Registrar-General upon the census of the capital (that is, of the area included in a circle drawn round Charing cross at a distance of six miles in all directions), shows that London acquires every year a new population of 44,000—that is, is increased every twelve months by a new and considerable town. We all think Liverpool, the second town in England, a very considerable place, a city almost fit to be a capital, but a city as great as Liverpool adds itself to London with every ten years, and the addition is only felt when the decennial census is taken. The addition, enormous as it is, is absorbed without any perceptible strain upon the machinery of government. The new town is built and fitted, the gas pipes are extended, the water is laid on, the police walk out a little farther, the parish spends a little more and receives a rather larger income, and in a year or two the new district is a constituent part of the old organisation. No strain is felt, and no complaint made. The entire process is silent, and judging from the rarity of serious remonstrance, from the popularity of new suburbs, and from the ease with which new squares, terraces, streets, and "towns" are filled is perfectly successful. Expansiveness of that kind and on that unprecedented scale is a very rare merit, one scarcely possessed by any system of government except that of the United States, and it becomes still more conspicuous when London is compared with any other great city. New York, for instance, is politically almost ruined and quite demoralised by the crowds of new residents who flock to it from all quarters of the world. A new population nearly half that of New York, and including many thousands of foreigners, flocks to London every ten years, and their influence in politics is almost unfelt. Government does not tremble in the presence of the increase; the local Boards take no notice; the possessors of property feel no additional alarm; there is rarely ever a word said as to the supply of food

With that supply indeed no authority concerns himself, except to prohibit the sale of deleterious substances; yet ten armies, each of 300,000 persons, are kept fully supplied, and the addition of 400,000 more, that is, of six or seven times the home army of the kingdom, scarcely excites a passing remark. No one interferes, and consequently each new town receives the necessary distributors, purveyors, horses, carts, and what not, and the "provision difficulty," so serious a one in Paris, is met without an apparent effort. The despised local guardians provide for their new poor. The much criticised police watch over their new beats. Nobody dreads or thinks of any additional probabilities of disorder. The machinery of social life acts, so to speak, of itself; and there is no evidence that, rough, and rude, and unphilosophical as it is, any conceivable addition to its duties would break it down. A system which possesses such a power of absorption as this, which with the machinery of a parish can govern a state as populous as Scotland under the most complicated and difficult conditions, must have merits somewhere of its own.

Nor can it be said that this result is attained either by vast sacrifices or by lowering very much the standard of civilised life. The taxation of London is only apparently heavy because it is almost all direct. We all complain of the rates, but judged by the modern standard, London is very cheaply governed. Its entire local taxation is less than four millions a year—half that of New York or Paris—and it obtains in return for it some very important advantages. There is probably no city where the inhabitants feel more secure alike in life and property; no city approaching it in size where the death-rate is so low, and yet no city where the people enjoy so large a measure of freedom. It is difficult to imagine indeed how, in this last respect, the management of London could be improved, or how men could under any conservative system be left more completely to do as they please. A decent person of any class who pays his taxes may live, and constantly does live, his whole life in London, and never once be addressed by a policeman, a soldier, or any other agent of authority, may hold and defend the most extreme opinions, may enter into any project he pleases, and may make or lose a fortune in any way he deems advisable without the smallest restriction, or indeed notice, from any employé in any government or municipal department. The right, of which so many philosophers have dreamed, to do as you like provided that in doing it you trespass on the rights of no one else, is completely established in London, and, so far as it is possible to perceive, her rulers have solved the vexed problem of controlling huge and concentrated masses of population without severe discipline, of preserving health without tyranny, and of regulating public morals without incessant interference or collision. When we see how difficult it is on the continent to obtain these ends, how impossible the masters of Berlin and Paris find it to reconcile individualism with order, when we read of the almost military discipline which controls Berlin, and the incessant watchfulness necessary in Paris, and the immunity which reigns in New York and Naples, and contrast them with the condition of affairs in London, we are tempted constantly to agree with an American diplomatist who many years lived in half the great cities of the earth, deliberately declared in our hearing that "London was a miracle of good government, and nothing should tempt him, if he were a Londoner, to allow of radical change." For it should be noted, as perhaps the greatest of all the peculiarities of London as a capital that if its government excites no enthusiasm, it excites also no resentment. No population exists in the world which manifests so little ill-temper against its rulers, is so little disposed to riot, is so free from the bitterness admitted to exist in Berlin, Paris, and sometimes Milan. The soldiers have not shot anyone in London for a hundred years, and the controlling force of a city twice the size of Paris, and full to excess of moveable and visible wealth, is less than 10,000 unarmed men. The people no doubt suffer in some ways from the absence of discipline, are rough, and even brutal; but they are also kindly, helpful of each other, industrious, and as a rule disposed to support authority. The system in fact works so well that a kingdom full of rough people exists on a space eleven miles square in freedom, industry, amity, and content, or at least without any serious discontent against authority. These are very great results, and should make us pause before we risk endangering them by any change which may make authority too strong, too restless, or too visible.

For—and this is the grand speciality of London—this is the only city in which authority is practically invisible, is exempt from that destructive criticism which in our days brings every kind of power successively into contempt. Except the Police Commissioner there is nobody to abuse, for nobody possesses more than a minute modicum of power. This irresponsibility is undoubtedly an evil, and in some ways a great evil; but one at least of its compensations is that there is no centre upon which hatred can fix, no person to detest, no institution to scorn. Authority in London is, for good or evil, almost impalpable; no more provokes hate where it fails than a drought does, and can no more be censured than a crowd can; and although that immunity is one cause of its failures, it is also one cause of its freedom from local acerbities or resistance. We think it was Mr Charles Buxton who said that he had paid heavy rates all his life, and could never discover to whom they were paid, or by whom or for what they were expended. That is quite true and very pungent, but then it is also true that if he did know all those things the expending authority would have a very much heavier task to perform, very much more dislike from its subjects, and a very much greater chance of being paralysed by resistance. Our vestries cannot do many things which a Commune could, but they are at least exempt, as a Commune would not be, from the pressure of angry crowds raging against the latest increase in the assessment.

THE BALANCE SHEET.

An account of the gross public income of the United Kingdom of Great Britain and Ireland in the year ended the 31st day of March, 1871, and of the actual issues within the same period, exclusive of sums applied to the redemption of funded or paying off unfunded debt, and of the advances and repayments for local works, &c. :—

INCOME.			£	s	d
Customs			20,191,000	0	0
Excise			22,788,000	0	0
Stamps			9,007,000	0	0
Taxes (land and assessed)			2,725,000	0	0
Property tax			6,350,000	0	0
Post Office			4,770,000	0	0
Telegraph service			500,000	0	0
Crown lands (net)			385,000	0	0
Miscellaneous—					
Military and naval extra receipts and proceeds of old stores sold	£1,081,705	0 11			
Amount received from the revenues of India on account of the effective and non-effective charges of British troops serving in that country	687,782	0 0			
Allowance out of profits of issue received from the Bank of England, per Act 24 Vict., c. 3	138,578	0 0			
Other miscellaneous receipts	1,321,155	9 9			
			3,229,220	10	8

W. E. BAXTER.

Treasury chambers, Whitehall, 12th April, 1871.

BUSINESS NOTES.

INCOME TAX.—The great differences in the wealth of the various counties of England are frequently shown from the returns of income upon which duty is charged. A Parliamentary paper just issued gives the same information in a striking manner, by contrasting the amounts of duty charged in 1868-69 when the tax was 6d in the £. The amounts then charged in England and Wales were:—

		£
Under Schedule	A	2,701,753
—	B	379,959
—	C	841,664
—	D	3,490,308
—	E	489,601
		7,903,285

But of this total by far the largest amount was contributed by one or two counties, as the following comparison of the two principal Schedules, A and D, will show:—

	Schedule A.	Schedule D.	Total.
	£	£	£
Middlesex	443,080	1,270,036	1,713,116
Lancashire	282,825	576,590	859,415
Yorkshire	244,796	338,495	583,291
Surrey	132,701	162,953	295,654
Kent	108,577	65,881	174,458
	1,211,979	2,413,955	3,625,934
Total of England and Wales	2,701,753	3,490,308	6,192,061

Thus of Schedule A very nearly one-half—1,212,000*l* out of 2,701,000*l*—is charged upon property in the five counties named; and of Schedule D rather more than two-thirds—2,414,000*l* out of 3,490,000*l*—is charged upon incomes in these five counties. Of course it is well known that much income will be charged in business centres, which is not really earned there. Banks and other companies which have their head offices in London will pay duty there, though the owners may be scattered over the country, and the profit may be earned by loans which are employed outside of these centres. The objection however does not apply to Schedule A, and making all deductions, we are still justified in inferring from these figures an immense concentration of wealth and property in the few counties named, compared with the rest of the country.

BANKRUPTCY AND THE MORTGAGE OF SHARES.—The question of the effect of a mortgage of shares as against a trustee in bankruptcy has come before the Chief Judge in Bankruptcy this week—*ex parte* the Union Bank of Manchester, *re* Jackson. The bankrupt had deposited certain shares in the Middlewick Gaslight Company with the Union Bank of Manchester as security for advances, but upon the bankruptcy these were claimed by the trustee as "within the "order and disposition of the bankrupt." The bank on the other hand claimed as equitable mortgagee. The Chief Judge, affirming the decision of the County Court Judge, has now ruled that the trustee was entitled to the shares, notwithstanding the deposit of them with the bank, inasmuch as no notice of the deposit had been given to the company by the bank. Replying to another plea of the bank, he held that shares in a joint stock company were not "things in action," and therefore passed to the trustee. This decision is of obvious importance to bankers, the effect being to increase distrust already felt towards "shares" in companies as a security. The Judge's reason is that no notice of deposit was given; but there are some companies which expressly by their articles decline to be bound by such notice, so that an equitable mortgage of such shares would in these cases be impossible. Generally the requirement that a person making an advance should give notice to the company whose shares are deposited appears to be rather stringent. The bank runs a certain risk by not giving notice since the debtor may sell and transfer to a third party, but if it is willing to run the risk that is its own affair. No harm is done to unsecured creditors by holding the deposit to be an equitable mortgage any more than by holding the deposit of the titles of other property to be an equitable mortgage.

SAMPLING SUGAR.—An interesting return relating to sugar, moved for by Mr J. B. Smith, has just been published. It contains a correspondence between the Customs authorities and representatives of the sugar trade in the principal ports on the subject of sampling sugar for the payment of duty; and the correspondence is another proof of the complexity of the trade which the sugar duty affects, and the nicety of the means which are necessary to prevent the duty from disturbing the ordinary course of trade. As is well known, there are various rates of duty according to the different qualities of sugar, or the quantity of saccharine matter contained—an international convention having been found expedient, in order that the various countries importing or exporting sugar should adjust their duties and drawbacks on the same scale. And the working of this scale is necessarily a delicate business. It is no easy matter according to what rate a given sample of sugar should be charged; but the correspondence discloses a minuter technical difficulty, which is still of great practical importance. There is often a difficulty in getting the sample from which the charge has to be made. The difficulty is thus described in a report from the Customs to the Treasury, which sums up the present correspondence:—

In the manufacture of raw sugar from the juice of the cane, the watery portion is evaporated, and the saccharine portion obtained partly in a crystalised form, and partly in a dark coloured liquid incapable of being crystalised, and called molasses. These two descriptions of sugar are allowed to separate, but that process requires a considerable time, and therefore the sugar is often packed into casks before the separation has been entirely effected. The sugar is called "muscovado," and the consequence of such packing is that the liquid portion falls down to the bottom of the cask during the voyage to this country, and the lower portion so saturated with the drainage is what is technically termed "foots" of the sugar. In proportion as the drainage of the sugar proceeds, so will the top of the cask become lighter in colour, and the bottom or "foots" darker, and, if the sugar be packed, "green," that is, when the separation of the two kinds has been but partially effected, the sugar in different parts of the cask will be of different colour and quality. The object to be obtained in drawing the sample is to show such a quality of sugar as may fairly represent the average quality of the bulk in cask.

And the drawing of the sample has been effected in different manners at different ports, and even at the same ports at different times. In London the practice is to take the sample from the *middle* of the cask—a grooved iron being forced about two-thirds through it. By this means it is supposed a quality of sugar representing the average of the whole cask is obtained. In Greenock the "iron is introduced at the top of "the circumference, immediately over the 'foots,' and being "forced to the opposite stave, brings with it a complete "sample of the whole of the sugar as it lies in the cask." The various qualities are then mixed, and the sample thus obtained is the one from which the duty is charged. Prior to 1854 there was a slight difference in the Greenock practice: about six inches from the top and bottom sections of the sample being rejected, so that the old Greenock

practice corresponds nearly with the present London one of taking a sample from the middle of the cask. But these various modes of drawing samples, which have partly arisen from the Customs merely taking the samples drawn for use in the trade, have given rise to complaints by sugar merchants and importers in different localities. The trade in London and in Liverpool, where the London practice is followed, complain that the Clyde method is more favourable than theirs to the payer of the duty, so that the Clyde refiners have an advantage; the Clyde refiners, on the other hand, make the same complaint of the rival practice. Both parties submitted memorials to the Customs in favour of a uniform system. Experiments have accordingly been made with thirty-six casks, the results as to duty from each of these modes of sampling and from taking the whole of the sugar in the cask being compared: and as the conclusion of the experiments the Commissioners have obtained the sanction of the Treasury for the universal adoption of the present Greenock practice which appears also to be the most generally favoured. It is gratifying to add that the experiments showed the various modes of sampling to yield almost exactly the same results, and that these correspond as exactly with the ascertained quality of the whole sugar in the cask. In *one* case only does the duty differ according to the method of drawing the sample, and in two cases only does the duty ascertained by sampling differ from the duty ascertained by mixing the whole sugar in the cask. In the one case moreover where the different modes of sampling disagreed, it was the *London* sample which yielded less than the others; and in the two cases where the bulk disagreed with the samples, the samples showed the higher rate of duty. The Greenock method of sampling, which is now to be followed, is thus shown to be quite favourable enough to the revenue, while it is near enough to perfect fairness to give little cause of complaint to the trade.

Insurance on Freight.—The Court of Queen's Bench, in the case of Beckett *v.* the West of England Insurance Company, had before it this week a question as to the effect of certain words introduced into the company's policies. According to the report of the case it is stated that in an ordinary policy on a ship or cargo, there being no particular mention of freight, the policy would be "at and from" a certain port, beginning the adventure from the loading thereof. But in their insurances on "charter-freight" the company have introduced the words: "It is agreed that the insurance shall commence on the freight and goods from loading and goods on board the ship." These words had not attracted attention, and were not observed at the trial, but they were now held a ground for reversing the verdict for the plaintiff given at the trial. The ship had been lost at Lagos *before* the goods were loaded, and the words in dispute were held to exempt the defendants from liability. It was remarked by Mr Justice Blackburn that it would have been well if the company had made the words in the printed form of the policy more conspicuous but agreed that there could be no question as to their effect.

Voluntary Settlements.—The circumstances of the settlement which has just been under investigation in the case of Crossley *v.* Elworthy before Vice-Chancellor Malins, amply justify the regulation in the Bankruptcy Act of 1869, to the effect that no settlement made within two years of a bankruptcy should be valid. The settlement in question was made by the defendant in June, 1866, and as he suspended payment in May, 1867, there would have been no question under the new rule as to the invalidity of such a settlement. In the actual case however, the plea is set up that the defendant was perfectly solvent when the settlement was made—a balance sheet of his affairs at the time being produced in Court; and though the decision is against the settlement, on the ground that the defendant was not solvent at its execution, it is easy to see that the inquiry was troublesome and tedious, and might possibly have involved very difficult points. The Vice-Chancellor proceeded upon several grounds in holding the defendant not to have been proved solvent. First, he was engaged in Stock Exchange speculations, and until these speculations were closed—they afterwards closing unfortunately—his true liabilities were not apparent. Next, he was surety upon bills to the extent of £60,000*l.* granted by the London and Colonial Company (Limited), of which he was managing director, and with whose affairs he was largely mixed up, and it was impossible to say in June, 1866, that many of them might not ripen into actual debts. Last of all, he had been guilty of misrepresentations as to the position of the company, which made him personally liable to the plaintiff for losses incurred in connection with the company; and though this liability had not emerged when the settlement was made, yet the defendant must be held to have known that he had incurred this liability, which was almost a debt. The Vice-Chancellor also commented on the items in the balance sheet, and held that there were glaring errors and omissions. Still these were all matters which had to be inquired into, and the questions at least as to the suretyship upon the bills, and as to the operation of a cause for damages, which had not been converted into a debt at the execution of the settlement, were of a most difficult description. Vice-Chancellor Malins has apparently decided them in a common-sense fashion, but they might easily have been settled differently. It is clearly better to have all such litigation put out of question by fixing a period near to an insolvency within which there shall be no necessity for an inquiry into the affairs of the settler at the settlement. It is possible of course that cases of hardship to innocent people—to widows and children—will arise, and it was urged that the present case was one of them, the settlement having been executed in good faith and in pursuance of a promise made to the defendant's father-in-law, made not long after his marriage; but the hardship after all arises from the acts of the people whose settlements are called in question, and is much less than the injury which would result from relaxing the present not too stringent regulations to compel people to pay their debts.

The Lord Mayor's Court.—We referred lately to a Bill which had been introduced into Parliament by the City of London, and which was unexpectedly discovered to contain clauses confirming and extending the jurisdiction of the Lord Mayor's Court. No one would be responsible for the clause in the Bill; but as the Lord Mayor's Court was a source of revenue to the Corporation we inferred that the intended clause was at least put in to benefit the Corporation, though it may have been the work of some over-zealous and obscure subordinate whom it is difficult to trace. That the extension of the jurisdiction is an object which the Corporation itself has at heart, and not merely of unknown subordinates whom it is easy to disavow, is shown by several cases which lately came before the Court of Common Pleas. In the one case, that of Magar *v.* Cannot, the Court was applied to to prohibit an attachment which had issued from the Lord Mayor's Court against goods at a wharf in Southwark, which is not even within the boundaries of the City of London. It was contended in support of the attachment that the Lord Mayor's Court had jurisdiction because the defendant had a counting-house in the City and it appears from the Judge's remarks that the Court claimed jurisdiction "in Liverpool, "and even in Australia." The defence of the attachment was overruled, the Court of Common Pleas laying down the rule that "it was essential to the jurisdiction of all inferior "Courts that the goods sought to be attached should be within "the jurisdiction;" but the surprising extent of the claim and its coincidence with the disavowed clause in the recent Bill are, to say the least, very singular. In the other class of cases reported under the title of one of them, Horwood *v.* Horwood, the claim to jurisdiction was different. The attachment here was issued against goods in the hands of a "garnishee" resident beyond the boundaries of the City—the foundation of it being that the garnishee, a trustee under a marriage settlement, had been invited by one of the plaintiffs, a *cestui qui* trust, to call at Palmerston buildings in the City, where he had no place of business, and had there been served with an attachment in this cause to attach certain trust moneys in the Bank. The Court here granted a rule *nisi* against the attachment; but it is equally apparent, as in the other case, that whatever the law may be certain parties in the City are making a desperate effort to extend and confirm an anomalous jurisdiction, which ought not to exist at all. There can obviously be no pretence that the Lord Mayor's Court distributes a superior sort of justice to that of the ordinary Courts of the country. The suspicion is unavoidable that the Court is maintained for the sake of the fees, not for the benefit of litigants, and that these attempts to extend the jurisdiction are somehow connected with a motive which has long since ceased to influence our superior Courts of Law and Equity. That such a suspicion should have any colour would be a good reason not only for limiting the aggressive Court, but for putting an end to it altogether.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and May 27, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	TOTAL EXCHEQUER RECEIPTS To May 27, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1871—					
Bank of England	...	5,678,915		7,633,761	
Bank of Ireland	...	1,344,520		972,887	
			7,023,435		8,606,648
REVENUE.					
Customs	20,100,000	2,825,000		3,088,000	
Excise	22,120,000	3,134,000		2,974,000	
Stamps	8,750,000	1,563,000		1,484,000	
Taxes	2,330,000	217,000		615,000

Totals			17,109,575		18,377,308

The following are the Receipts on account of Revenue during the week ending May 27 :—

	Receipts of Week Ending May 27.
	£
Customs	408,000
Excise	469,000
Stamps	175,000
Taxes	9,000
Income tax	48,000
Post Office	nil.
Telegraphs	nil.
Crown lands	30,000
Miscellaneous	870,342
Total	2,009,342

The total receipts of the previous week were 764,000*l.*

The Exchequer issues of the week on account of expenditure were 1,669,135*l*, viz. :—

	£
Interest of debt	300,000
Other charges on Consolidated fund	nil.
Supply services	1,369,135
Telegraph services	nil.
	1,669,135

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on May 20	3,540,355	970,125	4,510,480
— 27	3,813,690	1,045,525	4,859,215
Increase	273,335	75,400	348,735

The other receipts to date were 8,528*l*, the other payments were nil.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, May 25.

The Bank of France and the Bourse have escaped destruction, and even injury; but the Ministry of Finance is, at the moment I write, 2 p.m., a heap of smoking ruins, and the Caisse des Depots et Consignations and the Court of Accounts have nothing left but the bare walls. These five edifices may be designated the "financial establishments of France." The burning of the contents of the Finance Department and of the Consignations Bank will occasion tremendous confusion in pending affairs. That of the Court of Accounts is also a grave matter, though its papers were for the most part of retrospective interest.

The aspect of Paris this day passes human conception. Most of its palaces and public buildings are in ruins or burning, and not a few of the rest are defaced by cannonading; whilst in many streets houses are battered down, and everywhere there are barricades. In material value the damage done is immense, in moral incalculable—incalculable, because it proves that France is far more *malade* than even attentive observers had imagined.

The Bourse has not been opened this week. Railways and the Post Office too are closed, and I only write these few lines to show that I am at my post as your correspondent, but without any hope that they will reach you *en temps utile*.

PARIS, May 31.

The "bitter end" of the strife between the rival Governments of Paris and of France was far more bitter than any mortal man could have conceived. We are told, on credible authority, that not fewer that 14,000 men, who were living on Monday the 21st, are dead now, being killed either in actual fighting or after being captured; and that between 30,000 and 40,000 others are prisoners, many of them being destined to die either by gunpowder and lead, or by expatriation to a pestilential climate. And besides, many of the most splendid public buildings of Paris are in ruins. Fire has destroyed private houses and warehouses by the score, and shot and shell have carried devastation and death into hundreds of others. The result is the re-establishment of what the French call Order. But the foreign observer cannot avoid asking if Order be worth purchasing at such an appalling price? And if he happens to know anything of the past history and the present state of the political parties who have fought this tremendous battle of Paris, he cannot help asking with trepidation what will become of the Order in a few months, or at best in a few years? Shooting and bombardment do not, in French parlance, "kill ideas;" and though on the Paris side of the battle there were diabolical miscreants—smoking ruins tell that—the great majority of the combatants were working men and small shopkeepers, who risked their lives for an "idea"—the idea being that their material and moral condition ought to be improved, and that the improvement could only be effected by the establishment of an ultra-democratic form of Government. Their notion may have been erroneous, impracticable, iniquitous even; but the foreigner cannot help thinking that the Versailles Cabinet would have done well to have accepted it as a "great fact," and to treat it as all such facts in politics ought to be—that is, tenderly, and respectfully, and as a basis of negotiation and compromise, especially as by an extraordinary combination of circumstances, the Parisians *en masse* were organised militarily, were armed to the teeth, and possessed guns and projectiles in abundance, with fortresses and ramparts. Certain it is, that if Cavour, or Palmerston, or any other intelligent constitutional statesman, had had to deal with the Parisian difficulty, we should have seen it solved by concession, and coaxing, and patience. But the French think themselves wiser, and settle their political questions by brute force. And lo! by an appeal to force, the Commune is smashed, the Paris population is crushed and bleeding, Paris is in ruins, and Order prevails. But what will follow? M. Thiers will get his house rebuilt at the public expense; M. Pouyer-Quertier will denounce the Treaties of Commerce, and will increase the import duties on cotton fabrics. A good many men will make money on the Bourse, a good many more will get well-paid places, and the fierce democracy will be muzzled and oppressed. And then after a time there will come a new convulsion.

The destruction by fire of the Bank of France, like that of the Tuileries and other public buildings, was, it appears, intended by the Communal troops; but it was prevented by the energetic intervention of M. Beslay, member of the Com-

mune, and its "delegate" to the Bank. The Post Office was also marked out for burning, but it was protected. No attempt at arson was made at the Bourse, and the Credit Foncier, the Société Générale, and other "credit establishments," also all private banks, great and small, were not attacked.

COMMERCIAL AND MISCELLANEOUS NEWS.

A Post Office return shows that in the year 1870 936,375,505 unregistered letters and book packets passed through the post; it was alleged that 27,913 were lost, but it was ascertained that many of these were either never posted or were really delivered. 3,005,994 inland registered letters and packets passed through the post in the year, and only 12 were lost. In the five years 1866-70 193 persons were prosecuted by the Post Office for stealing letters—viz., 169 persons in the service of the Post Office, and 24 other persons, the latter for robbing mail bags or stealing letters from post offices and pillar boxes; 173 persons were convicted. About half the convictions were for stealing letters containing postage stamps.

A Post Office return shows the estimated number of international letters sent to and received from the United States. In the year 1863 the number was 2,461,440. In 1865 it rose to 3,367,697, an increase of 36·8 per cent. over 1863. In 1866 the number was 4,066,284, an increase of 20·7 per cent. over 1863. In 1867 it was 3,916,759, being 3·7 per cent. less than 1866; 1867 was the year following a great commercial panic and large failures. At the end of the year 1867 the postage was reduced from 1s to 6d, and the number of letters in 1868 rose to 4,873,802, an increase of 24·5 per cent. over 1867; and in 1869 to 5,265,000, an increase of 8 per cent. over 1868. At the close of 1869 the postage was reduced to 3d, and the number of letters rose in 1870 to 6,675,000, an increase of 27 per cent. over 1869. The number in 1870 was 171 per cent. more than the number in 1863, the increase being equivalent to an average yearly growth of more than 24 per cent.

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during April, 1871:—

IMPORTS.

By Sea	Ships.	Tons.	By Railway and Canal.	Tons. cwt.
Newcastle	134	[illegible]	London and North-Western...	50,750 13
[illegible]	[illegible]	[illegible]	Great Northern	79,146 0
[illegible]	87	[illegible]	Great Western	34,638 0

Wednesday	35,172,000	12,090,000	11,849,000
Total.....	87,071,000	76,415,000	85,372,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, June 1, 1871.

The total since the 4th of January, 1871, is 1,773,232,000*l*, compared with 1,618,732,000*l* for the corresponding period last year, showing an increase of 154,500,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week.	June 5, 1861.	June 3, 1868.	June 2, 1869.	June 1, 1870.	May 31, 1871.
Circulation, including bank post bills.....	£ 20,485,865	£ 24,691,039	£ 23,942,765	£ 23,423,417	£ 24,818,146

Clearing-house return..	...	69,699,000	70,678,000	85,372,000	87,071,000

In 1861, money was easy at 6 per cent., but it was not believed that it would be much cheaper, owing to the requirements of America and India. The chief cause of the temporary ease in Lombard street was the restriction of business. The death of Count Cavour had just occurred.

In 1868, the period of 2 per cent. contiuued. The proposal for amalgamation and for an increase of fares on the railways south of London had raised keen opposition.

In 1869, the supply of money in the discount market was again found to be on the increase, but there was no change in the Bank rate. The House of Lords was about to consider the Irish Church Disestablishment Bill, and there was a report that the second reading would not be agreed to.

In 1870, the demand for money had become more active at the close of the week, some apprehension being caused by the amount of foreign commitments, including a large Peruvian loan of 15,000,000*l*, which had just been subscribed. The Quicksilver Mortgage loan of Spain had also been introduced and taken up.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 9,148,575*l*; in 1868, an excess of 1,462,651*l*; in 1869, a deficiency of 778,794*l*; and in 1870, a deficiency of 2,668,902*l*. In 1871, there is an excess of 1,112,301*l*.

Discount and Money Market.—Business remains in very nearly the same state that it was last week. There is still an ample supply of short money at 2½ for the best paper, and there is little activity in any department—the disposition to charge higher rates for long-dated paper, which had been perceptible last week, not having been adhered to. Any demand that there has been, has been chiefly for speculative purposes, the Stock Exchange settlement this week having been a heavy one. The impression continues that notwithstanding the termination of the Paris insurrection, there is no immediate fear of such French demands as will immediately affect the money market. It is thought hardly possible to exaggerate the difficulties of the Versailles Assembly in settling the form and nature of the future Government, and the events of the last few months excite apprehensions of some new turn in affairs which will prevent credit from being given to any *régime* which is avowedly and obviously provisional. It seems certain, however, that some sort of Government will so far be established as to be able to pay to Germany the first instalments of the indemnity. A considerable sum, as we pointed out last week, must be already in course of payment, or immediately payable, and we should expect a most determined effort to be made to pay the first 60,000,000*l*, which will ensure the evacuation of the Paris forts. So great an effort, as is likely in the most probable case, cannot but affect our markets to some appreciable extent. Of course, as we explain elsewhere, France will have some difficulty in borrowing the remainder of the indemnity money, and supplying all its other needs without tiding over successfully the dangers attending the choice and establishment of a new Government.

The Bank remains unusually strong, though the changes, as compared with last week, are not material. Public deposits have increased 250,058*l*, and private deposits have diminished 70,587*l*, while private securities have increased 193,112*l*, and the reserve has diminished 62,308*l*. The stock of bullion is 296,687*l* more than it was last week, and the circulation is 364,369*l* more. The bullion in the Bank has now reached the large total of 24,844,396*l*. The usual comparative view of the Bank returns, which we give above, contains interesting evidence of the great change which has taken place of late years in the items of the Bank account. In 1861 the public and private deposits were 17,993,000*l*, and the reserve 6,550,000*l*, or more than one-third. Now the deposits are 28,047,000*l*, ten millions more than in 1861, but the reserve is 15,544,000*l*, or 55 per cent. of these liabilities. The liabilities have enormously increased, but the reserve has increased far more than in proportion. No doubt 1861 was a year of high rates of discount, in which probably there would be a proportionally large business done by the Bank, but the circumstances are such that the Bank must keep a proportionally larger reserve than was formerly the practice.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 and 3 months.....	2½ ⅜	per cent.
Do 4 months	2⅝ ¾	per cent.
Do 6 —	2¾ 3	per cent.
Trade bills—3 months	2½	per cent.
Do 4 —	2⅝ 3	per cent.
Do 6 —	3¼ 4	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call.....	1½ per cent.
Discount houses at call	1½ per cent.
Do with seven days' notice	1½ per cent.

* Nominal.

THE STOCK MARKETS.—As was the case in our last report, dealings this week have been comparatively limited. In addition to the stoppage of business on Whit-Monday and in anticipation of it, attention on Tuesday and Wednesday was greatly occupied by the settlement, which was rather a heavy one, and the somewhat heavier contangoes charged increased the depression and the disposition to realise which were manifest last week. Speculators, however, are nevertheless inclined to stand out for the top price, or nearly the top price, touched in the recent upward movements, and as the public are rather holding back, the transactions which take place are limited. The state of the accounts itself would perhaps not be sufficient to account for the present aspect of the markets; but the present crisis in France—though the common belief is that somehow or other the French demands will not cause the effect that was at one time anticipated—still causes a good deal of apprehension, and, coupled with other causes, induces operators and investors to wait. On the whole, there are hardly any material changes among leading stocks. Consols, after fluctuating within narrow limits, have fallen ¼ for the week, foreign stocks, except French, have slightly improved; and English railways, notwithstanding most favourable traffics, have shown comparative weakness. In miscellaneous securities there is the same continuous tendency to improvement which we noticed last week. There is no doubt a great deal of money seeking investment, and with the continued expansion of the trade of the country every kind of property connected with that trade and affected by its prosperity should steadily rise in value—apart from the momentary fluctuations of the market. The leading railways are, however, depressed on account of the advance in value having been so largely anticipated.

ENGLISH GOVERNMENT SECURITIES.—We have noticed already that the fluctuations in this department until to-day have been within the narrowest limits. There was a slight advance early in the week, the closing price of last week for the July account, viz., 92⅛, being at least firmly maintained, but subsequently there was a reaction, and the closing price of to-day, viz., 91⅞, shows a fall of ¼ for the week. Previously, it will be recollected, and up to the very close of the Paris insurrection, the price of Consols had been pressed up to a very high point, and the natural reaction is apparently assisted by the sudden termination of the Parisian difficulty. The peculiarity is that while the money market hardly as yet feels the pressure of the payments which France will probably have to make, the effect in other departments is apparently being discounted.

Subjoined is a list of the highest and lowest prices of Consols every day:—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest	Highest.	Exchequer Bills. March and June.
Saturday	92⅝	92⅝	93⅛	93⅛	par to 5s pm
Monday	.....	.....	Holiday		
Tuesday	92xd	92⅛	92xd	92⅛xd.....	par to 5s pm
Wednesday	92xd	92⅛xd.....	92xd	92⅛xd	par to 5s pm
Thursday	91⅞	92⅛	91⅞xd.....	92⅛xd.....	par to 5s pm
Friday	91⅞xd.....	91⅞xd	91⅞	91⅞xd.....	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
Consols for money	92⅛ ⅛	.....	91⅞ ⅛ xd	–	¼
Consols for account	92 ⅛ xd	.....	91⅞ ⅛ xd	–	¼

Victoria New 5 %	104 5	.....	104 5	... ...

FOREIGN GOVERNMENT SECURITIES.—As we have stated, the general tendency in this market has been towards improvement, but to-day quotations have been at about the lowest point of the week. The French loan and 3 per Cent. Rentes have especially been weak after being better earlier in the week. Among the stocks which have been most dealt in, and which have improved a little, are Spanish, Egyptian, Italian, Russian, and Brazilian; but it will be understood that the dealings have been on the whole restricted, and there are few material changes. Turkish stocks form an exception, having been largely bought partly by operators in preparation for a new loan which is reported to have been arranged, and partly from a belief that somehow, in consequence of the new loan, dividends on Turkish stocks will be secure for a good while to come, and the incidents of unpunctuality, which have been prejudicial to Turkish credit, avoided. As will be seen from our usual table, the rise in the principal Turkish stocks has been most material.

With regard to the new loan, it is positively stated in a telegram from Constantinople that "a loan of six millions sterling nominal has been concluded with the Credit-General at the price of 68 nett, bearing interest at the rate of 6 per cent., with a sinking fund of 1 per cent. The loan is guaranteed by 450,000*l* per annum of the Egyptian tribute." According to information in the market here the price of issue will be 75 not 68 per cent., but otherwise the statements in the telegram are confirmed. A statement is also added which is of some importance with reference to previous mortgages of the Egyptian tribute, that the money to be obtained is to be applied partly in redemption of the outstanding balance of the 1854 loan. The whole tribute, according to the latest Turkish Budgets, appears to amount to 750,000*l*, of which, however, upwards of 200,000*l* will be required for the guaranteed 4 per cent. loan, so that the remainder will do little more than cover the 450,000*l* annually to be required for the new loan.

The Costa Rica loan has been dealt in at 2½ to 3 prem., and closes to-day at 3⅛ ¼. The Spanish National Lands Certificates advanced to 1¼ 1½ prem. during the week, and close to-day at 1½ to 1⅝ pm.

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.

ENGLISH RAILWAYS.—There is no special feature to notice here, except the general weakness in almost all the leading stocks. Caledonian, Great Northern, Brighton, and Metropolitan have especially declined, but the weakness has extended to North-Eastern, London and North-Western, Great Western, and Great Eastern, as well as Metropolitan District. This depression, as we have stated, appears to be mainly caused by the condition of the accounts of operators. The contangoes at the heavy settlement this week were heavier than before, and the difficulties apprehended as to the closing of the accounts on good terms during the next fortnight or three weeks naturally cause operators to take alarm. There will be no opportunity for a month or two, it is believed, to realise better prices than those now obtainable. The excessively favourable traffic returns have therefore had little apparent influence, though they have perhaps assisted in preventing so complete a break-down of the market as might otherwise have occurred. As to special causes of weakness the only report in circulation affects the North-Eastern,

which it is feared may suffer from the apprehended strikes in the north; but these appear to be too contingent to have much real effect on the value of the property, though it is undoubtedly dependent on the iron trade of the north. There is also a complete absence of reports affecting other railways. The course of dealings during the week thus indicates the market opinion that prices have reached a comparatively high level, and cannot be strongly sustained, even if a material fall does not take place.

With regard to the traffic, it should perhaps be pointed out that last week gained a good deal as compared with the previous year, in consequence of its being the week before Whitsun week. It has also gained in consequence of the new law appointing a holiday for Whit-Monday, which has made this week more of a holiday week than ever, and enabled many of the middle classes to enjoy it, whose travelling would begin on the Saturday previous, and so come into the returns as to last week. The total traffic of the week is perhaps the highest of the year, and the increase is also about the highest, being very nearly 100,000*l* on the eighteen principal railways contained in our usual analysis of the traffic returns.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	93½ ⅜	92⅝ ⅞	– ⅝
Great Eastern	41⅜ 2	41⅜ ¼	– ⅛
Great Northern	126½ 7½	125½ 6½	– 1
Ditt A	136½ 7	136½ ⅝	– ⅛
Great Western...	95½ ½	94½ ½	– 1
Lancashire and Yorkshire	141 ½	141½ ⅝	– ⅛
London and Brighton	54⅛ ⅜	54 ¼	– ⅛
London, Chatham, and Dover	17⅝ ⅜	17⅞ ¼	+ ⅛

North British	42 ½	43⅜ 44½	+ 1½
North-Eastern—Consols	154½ ⅜	153½ ⅜	– 1
South-Eastern	85⅛ ⅞	86⅛ ⅝	+ ¾
Ditto Preferred	114 15	115 16	+ 1
Ditto Deferred	55⅛ 6½	56⅛ 7½	+ 1

The quotations for the leading debenture stocks compare as follows with last week:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Great Eastern A 5 %	113 15	113 15	... ...
Ditto 1867 Redeemable	111 13	111 13	... ...
Great Western 5 %	114½ 15½	114½ 15½	... ...
London and Brighton 4½ %	102 4	102 4	... ...
London, Chat., & Dover Arbitration 4½ %	96 8	97	+ 1
Metropolitan District 6 %	124 7	122 4	– 3

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending May 27 to 806,548*l*, being an increase of 95,365*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 14,287,254*l*, being an increase of 852,456*l* on the corresponding period of last year. The principal increases for the week are—London and Brighton, 13,256*l*; Great Western, 13,245*l*; London and North-Western, 12,994*l*; Midland, 10,442*l*; North-Eastern, 7,790*l*; London and South-Western, 7,948*l*; Lancashire and Yorkshire, 6,772*l*; Great Eastern, 5,756*l*; and Great Northern, 5,146*l*

AMERICAN SECURITIES.—A steady demand has prevailed for Government bonds, and a further advance in prices has taken place. Atlantic and Great Western bonds have ruled firm, but Erie shares are lower. A feature in the market is the inquiry for Panama General Mortgage, which ruled active to-day. The following statement shows the principal movements on the week:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	90⅛ ⅜	90⅜ ⅝	+ ¼
Ditto 1865 Issue	90⅛ ⅜	90⅜ ⅝	+ ¼
Ditto 1867 Issue	92⅛ ⅜	92⅜ ⅝	+ ¼
Ditto 5 % 10/40 Bonds, exchange 4/6	88⅛ 9½	89 ½	+ ⅛
Atlantic and Great Western Consol. Bonds	41½ 2½	42½ ⅜	+ ¼
Erie Shares	24½ ⅜	24½ ½	– ⅛
Illinois Central Shares	109 ⅜	109½ 10	+ ¼
Massachussets 5 % Sterling Bonds, 1900	93 4	93 4	... ...
Panama General Mortgage 7 % Bonds, 1897	70 5	80 2	– 10
Pennsylvania Gen. Mort. 6 % Bonds, 1910	93 4	93 4	... ...
Virginia 6 % Bonds	56 7	56 7	... ...

JOINT STOCK BANKS.—The dealings in bank shares have been somewhat restricted; nevertheless the results of the week's operations have been favourable, most of the changes having been in an upward direction. British North American, Land Mortgage of India (debentures), and London Joint Stock have advanced 1; Union of London, ½; and Imperial Ottoman, ⅛.

TELEGRAPHS.—The demand for cable shares has continued strong, and the upward movement in the quotations has made further progress. In some cases the advance established has been important. Submarine, for example, having risen 5; Anglo-Mediterranean, 3; and Anglo-American, 2. British Australian show an improvement of ½ on the week; British Indian Extension and China Submarine, ⅜; British Indian Submarine, Falmouth and Gibraltar, Great Northern, and Marseilles and Algiers, ¼; Great Northern Extension, French Cable, and West India, of ⅛. Silver's Telegraph Works were in active demand to-day, and advanced 3½.

MINES.—There has been little activity in the market for British mining shares, and the changes in the quotations have not been important. Tankerville, however, have risen 1½; Bronfloyd, ¼. Wheal Mary Ann and Wheal Grenville show a decline of 1 and ¼ respectively. The most important changes in the foreign market are a rise of 1 in Eberhardts and General Mining; and a decline of ½ in United Mexican and Colorado.

MISCELLANEOUS.—The changes in this market have not been numerous, and there is no feature of particular interest to notice. The chief fluctuations for the week are a rise of ½ in Australian Agricultural and City of Milan Improvements; 1 in Hudson's Bay, Madras Irrigation, and Royal Mail Steam; ¼ in London Tramways and North Metropolitan Tramways. Anglo-Mexican Mint and Ebbw Vale have given way ½.

EXCHANGES.—With regard to the American exchanges, Messrs Jay Cook, McCulloch, and Co., in their last weekly circular, state:—

> The extraordinary rates for bills of exchange are still maintained, prime bankers' 60 days' sterling bills being held at 110½. The remittances are larger than usual owing to the collections of May interest on Government bonds in behalf of foreign bondholders; and yet there is no special supply of bills to meet the exigency beyond some moderate amounts made against exports of securities. The shipments of produce at this port have declined partially within the last few weeks, though still somewhat ahead of those of 1870, the exports for last week being $3,846,000, against $3,419,000 last year. The imports, however, still keep largely in advance of those of last year, the receipts of merchandise New York last week being $6,560,000 compared with $5,250,000 in

1870. We cannot, therefore, congratulate ourselves upon a continuance of the increase in exports corresponding to the gain in the imports which we have been able regularly to note since the opening of the year; a feature in our foreign trade which it is important to keep in view.

The main cause of the extraordinary quotations for bills of exchange is the worn condition of much of our gold coin. The supply of "double eagles"—the only coin which is well up to the standard of weight—is limited, and as the Treasury has declined to pay out at present more of that denomination, shippers have to accept the smaller coins, which average ¼ to ½ per cent. below the standard weight. This inconvenience is generally experienced at periods of free shipments of specie, and it is to be hoped that the evil may be soon remedied by a recoinage of the more abraded coins; the present effect, however, is to cause an advance in the rates of exchange corresponding to the depreciation of the coin. The new form of Liverpool bill of lading, alluded to in our last, by increasing the shippers risks, also help to put up the rates for sterling bills. The export for specie to London has doubtless been materially checked for the last two weeks by this extraordinary course of the Liverpool steamship companies.

We noticed last week the fact of the issue of worn coin from the American Treasury, and the probable motive of Mr Boutwell's order. The rise in the rate of exchange is a natural result, and there is no appreciable diminution in the current of gold from America. American merchants have only to pay rather more for their imports.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—There is no demand for exportation, and all arrivals continue to flow into the Bank. 611,000*l* having been purchased since our last circular of the 24th ult. The amounts to hand during the week comprise 341,000*l* from New York; 80,000*l* from the West Indies; 12,000*l* from Valparaiso—total, 441,000*l*. The Nyanza has taken 14,000*l* to India, and the Patagonia 172,000*l* in sovereigns to the Brazils; this latter amount being withdrawn from the Bank.

Silver, being in demand, has become dearer, the price being now quoted 59¾d per oz standard. We have received during the week 154,000*l* bonds from India; 112,000*l* from New York; 100,000*l* from West Indies; 80,000*l* from Valparaiso—total, 406,000*l*.

Mexican dollars are in demand—the old coinage for China, and the new for the Straits. The Nyanza has taken 105,410*l* to the East, and the demand is still good. The quantity now on the market from the West Indies and New York is about 80,000*l*.

Exchange on India for Bank drafts at 60 days' sight is unaltered at 1s 10¾d per rupee.

India Government Loan Notes.—Our quotations are nearly the same as last week, the 4 per Cents. are 98; the 5 per Cents., 100⅝; and the 5½ per Cents., 107½.

Quotations for bullion.—Gold—Bar gold, 77s 8½d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 74s 0d per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 4¾d per oz std; ditto containing 5 grains gold, 5s 6¼d per oz std; Mexican dollars, 4s 10½d to 4s 11¼d per oz last price.

NOTICES AND REPORTS.

RAILWAY COMPANIES.

Bombay, Baroda, and Central India.—The first section of the Wadwan Extension, 15½ miles, was opened on the 24th ultimo.

Glasgow and Cape Breton Coal and Railway.—Advices state that the railway works were commenced on the 15th May, that possession of the reserve coalfield has been obtained, and that road-making is being rapidly pushed forward.

Midland Railway of Canada Bonds.—The whole of this new issue has been taken up.

Philadelphia and Reading Railway—New Mortgage Bonds.—Messrs McCalmont Brothers announce with regard to this new issue that 600,000*l* sterling has been withdrawn from this market for the purpose of being issued in America in the form of the United States' currency dollar bonds, and that the remaining 800,000*l* has been allotted to subscribers in England.

Waterford and Central Ireland.—The traffic showed an increase, and the directors recommend a dividend at the rate of 4 per cent. per annum, being an increase of 1 per cent. on that of last year, on the preference stock for the past half-year, leaving 760*l*.

BANKS.

Anglo-Hungarian.—At the annual meeting of the proprietors, held at Pesth, on the 17th ultimo, a dividend of 2s per share was declared, making, with the interim dividend of 8s already paid, a total distribution of 10s per share, or 6¼ per cent. for the year 1870.

Bank of British North America.—A dividend at the rate of 6 per cent. per annum, and a bonus of 1½ per cent., are announced.

Ionian.—The net profits during 1870 amounted to 24,517*l*, from which dividends and a bonus were declared, together equal to 8 per cent. The Kingdom of Greece appears to be getting more settled.

ASSURANCE COMPANIES.

General Life and Fire Assurance.—During 1870 there were issued 789 new policies for 319,896*l* in aggregate, yielding 11,494*l* in new premiums.

Ocean Marine.—The directors announce a payment of 5s per share by way of interest to be made on the 1st July next. The transfer books will be closed on the 17th inst., and reopened on the 1st proximo.

Scottish Widows' Fund.—Year's new premiums, 38,183*l*; annual revenue, 641,086*l*. The total funds in hand amount to 5,150,000*l*.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Hungarian General Land Credit (Ungarische Allgemeine Boden Credit Gesellschaft).—First issue of capital 20,000,000 florins

silver, in 100,000 shares of 200 florins (20*l*) each. Out of which Messrs R. Raphael and Sons invited subscriptions in England yesterday for 10,000 shares at the price of 2*l* 10s per share premium. As the paid-up capital has been fixed at 40 per cent. or 8*l* per share, the subscription price here is 10*l* 10s. The undertaking has been formed under a most influential council of administration to acquire or sell real property, to form or carry on industrial or mineral undertakings, to grant mortgages, and to promote the development of landed and house property generally.

Finance Company.—A dividend of 7s in the pound, making 12s, has been paid to the creditors by the official liquidator.

MISCELLANEOUS COMPANIES.

City of London Real Property.—The report notifies a dividend of 2½ per cent. (making a total of 4½ for the year), which will absorb 4,730*l*, and leave 387*l* to be carried forward. The paid-up capital is 209,709*l*; the mortgage and debenture liabilities, &c., are 325,885*l*; and the net rental is 25,309*l*.

Imperial Continental Gas.—A half-year's dividend of 2*l* per share has been declared.

London and County Land and Building.—A call of 1*l* per share has been made.

Malta and Mediterranean Gas.—A dividend of 5 per cent. for the year has been recommended.

Peninsular and Oriental Steam Navigation.—The directors recommend a dividend at the rate of 3 per cent., free of income tax, for the half-year ending March 31.

Waterloo Bridge.—After paying the annuitants a half-year's dividend of 4s in the pound, there remained a surplus of 1,375*l*.

West India and Panama Telegraph.—The company's cable from St Thomas to St Kitts has been successfully laid.

MINING COMPANIES.

Almada and Tirito Silver.—The report shows an available total of 4,751*l*, and recommends a dividend at the rate of 7½ per cent. per annum, which will leave 168*l* to be carried forward.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Owing to the return of cold weather the grain trade ruled dull to-day, and there was a firmer tone in regard to prices. The total imports of wheat this season have amounted to 23,781,644 cwts, against 3,048,875 during the corresponding period of last year. Stocks on hand have been much diminished, but the number of grain-laden vessels reported at sea for the United Kingdom is large. The show of English wheat on the stands to-day was limited, but there was a good supply of foreign. Sales progressed quietly at prices equal to those current on Monday last. Flour was in little demand, but values were supported. Beans and peas were rather cheaper, while inferior oats again tended downwards. This week's imports of foreign and colonial produce into London have amounted to 18,980 qrs of wheat, 3,920 barley, 39,910 oats, 14,310 maize, 2,750 sacks and 21,280 barrels of flour.

The Liverpool market ruled firm this morning for all descriptions of grain, but at Wakefield there was little doing.

The Liverpool cotton market has been very active during the past week, and in spite of the holidays a large business has been done at an advance of ⅛d to $\frac{3}{16}$d per lb since this day week. The total sales for the week (of four days only) have been 82,660 bales, of which the trade have taken 45,700 bales; speculators and exporters, 36,960 bales. The imports have been 118,397 bales; the actual exports, 18,672 bales; and to-day's stock is 967,490 bales. Quotations for American descriptions have advanced $\frac{3}{16}$d per lb; East Indian, ⅛d to $\frac{3}{16}$d per lb, and Bengals ⅛d per lb since last Friday. To-day the market closes very strong. Sales, 20,000 bales; prices hardening.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended June 1, 1871:—

	Imported.	Exported.
American bales	90,366	7,236
Brazilian	8,031	1,516
East Indian	17,788	13,863
Egyptian	2,682	436
Miscellaneous	1,159	23
Total	120,026	23,073

At New York, on June 1, middling Upland cotton was quoted at 17¾ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, May 6:—We have again to report a large business in cotton at prices which show little variation from those current when our last advices were written. In the early part of the week the dull accounts received from Liverpool proved very discouraging to holders of stocks, and produced an eager desire to sell. Generally a slight decline was apparent in the prices of the transactions reported, but the tendency to easier rates was almost entirely neutralised by the active inquiry which sprang up, and the fall did not extend beyond 2 rs to 3 rs per candy. Up to Thursday evening purchasers were able to operate freely at about a level of 165 rs per candy for Dhollerah, and 167 rs for Bhownugger, but the receipt yesterday morning of Reuter's message, dated 1st instant, and advising an advancing market in Liverpool, made dealers more stiff in their demands, and such transactions as took place exhibited some recovery upon the previous day's rates. At the close there is less business doing, but we believe there are many orders to buy in the market which only require a small concession from current quotations to become practicable. The total sales aggregate about 22,000 bales, of which nearly 9,000 consist of Dhollerah and Bhownugger, 5,000 of new sawginned Dharwar, 3,000 Comra descriptions, and the remainder of Broach, Verneal, &c. We have no change to notice regarding the quality of the Dhollerah, Bhownugger, and Mow, now coming forward. The average of the season's cut-turn will, from all accounts, prove much inferior to last year's growth. New sawginned Dharwar is beginning to arrive in quantity, and is attracting a good deal of attention at the moment. The colour is very good, but a great deal of broken seed and leaf continues to come forward, and it is almost impossible to procure a selection entirely free from these drawbacks. The staple is irregular, some docras showing a long silky fibre, while in others the cotton is nearly ginned into "fluff." New Vingorla is also arriving, and shows a fair staple, but the samples we have seen contain a good deal of stain. From Tuticorin we have a telegram dated 4th inst., quoting 5¾d per lb.

EXPORT of COTTON from BOMBAY to May 5.

China	19,378	.....	18,745
Grand total	459,269	.....	385,130

Actual exports since last mail left, 49,465 bales.

The following report, dated Alexandria, May 20, has been supplied by the Imperial Ottoman Bank:—More favourable accounts from Liverpool have caused a better tone in our market, and induced buyers to operate more freely during the past week, the demand being principally for short cotton, of which cotton, which appears to be in great favour [illegible] operations at present. We quote:—Fair open, with staple, 7¾ per lb. fob.; good fair ditto, 8¼d ditto, fully good fair [illegible] ditto. Shipments from 12th to 17th May—England, 4,650; Italy, 291; Austria, 143—total, 5,294 bales.

The [illegible] have continued with business in colonial produce, but on most of the markets has been firm. Prices of sugar have shown a hardening tendency, and most useful [illegible] per cwt. higher on the week. Coffee has been [illegible] but prices are unchanged. In cocoa, rice, and spices there was no material alteration to notice.

The annexed is dated Akyab, April 27:—Supplies of [illegible] in our market have been very small throughout the [illegible] under review, and only during the last days [illegible] was noticeable, but as all reports from the [illegible] agree in stating that notwithstanding this [illegible] there are still considerable stocks of [illegible] available for export, and buyers remain [illegible] upon the [illegible] demands for higher prices. We [illegible] have [illegible] prevailed again in the course of last month. [illegible] has been at our last quotations of [illegible] per ton for [illegible] parts showing parity, while at the present [illegible] exchange is equal to 5s 7½d to [illegible] per rupee. Freights to Europe up to date [illegible] Steam [illegible] tons, [illegible] tons in capacity; 1870, 24,000 [illegible] tons.

Annexed is Messrs Duncan and Co's circular:—We have [illegible] a good market to-day, [illegible] to report the [illegible] of this season, but the long period of rest that has prevailed [illegible] exceptionally favourable. The reports as to crop in Europe have in [illegible] been more favourable, but [illegible] there have been almost [illegible] and the expectation is that the [illegible] will be at least equal to previous [illegible] although the quantity of [illegible] will be considerably less. Cotton also, according to the latest telegram as likely to send additional quantities. Hence several holders have been pressing sellers, and although within the last few days some orders have been received from the continent for China silk, they have not sufficed to prevent further reduction in prices. The deliveries are good—larger with one exception than in any month since last July. In Japan silk there have been some forced sales of old silk at very low prices, but at present they have failed to induce any general business. Canton silk continues in large consumption, but even this class has suffered somewhat in price. Bengal silk forms no exception to the general depression—the stock is very large and the deliveries unsatisfactory. The next periodical public sales are fixed to commence on the 21st instant.

Mr Helmuth Swartze advises:—The third series of Liverpool sales of East India wool, which commenced on the 23rd inst., closed on the 27th, the catalogues having comprised 15,294 bales. There was a good attendance of home buyers, but scarcely any foreigners. The competition was very spirited, and prices, as compared with March quotations, show an advance of 2d to 2¼d per lb for the best white true-bred descriptions, and of about 1d to 1½d for medium kinds. Good gray were in active request, and a full 1d dearer. The inquiry for inferior and heavy sorts, on the other hand, was less brisk, and the rise in their case is only ½d to ¾d per lb. Of Persian a fair assortment was offered; but they were well competed for and sold at an advance of 1½d per lb, white up to 12½d, coloured up to 10¾d. For the third series of London sales of colonial wool, which is to commence on the 22nd of June, the following quantity has arrived up to date:—43,395 bales Port Phillip; 36,640 Sydney; 29,007 New Zealand; 7,303 Adelaide 6,387 Van Diemen's Land; 2,330 Swan River; 18,874 Cape—total, 143,396 bales. There is no change in the market; the demand for wool continues active, and a fair amount of business is being done at rates which are always fully up to, and sometimes even above, the level of last sales quotations.

Annexed is Messrs William Moran and Co's indigo report, dated Calcutta May 2:—There is but little change to report in the prospects of the new crop. Manufacturing has commenced in Eastern Bengal but to a small extent only, the rivers being still to low to allow of the same becoming general. We have not seen any return showing the yield of the plant. From Lower Bengal reports on the whole are fair, although there are still complaints of want of rain in parts of Kishnaghur, Malda, Moorshedabad, and Bhagulpore. From Tirhoot, Chumparun, and Chuprah the advices continue favourable, and the same may be said of the little we hear from the Benares Provinces. Exports of indigo from November 1, 1870, to April 28, 1871:—To Great Britain, 16,533 chests; to France, 513; to Trieste, 2,700; to foreign Europe, 250; America, 2,369; to Gulphs and Leverto, 1,753—total, 24,208 chests.

The annexed is dated New York, May 19:—In trade circles there have been greater irregularity and wider fluctuations in commercial values than for some time past. Breadstuffs, which had steadily appreciated on Wednesday, Thursday, and yesterday morning, became dull, and prices were very generally lower. This was particularly the case with wheat and corn, which were still further depressed by the receipt of unfavourable cable news. Cotton has been less active, and prices have favoured the purchaser, the closing quotations showing a decline as compared with Tuesday. The stock market has been active under the plethora of money and the low rates which have been obtained for it, and transactions from day to day have been on an extensive scale. Government securities, sympathising with gold, have fluctuated considerably. The freight and chartering business has been pretty lively, the engagements of grain for Great Britain having been large, and at steadily enhancing rates. The aggregate tonnage taken under charter for Great Britain and Continental Europe since our last is large, which a fair proportion of tonnage has found employment in other branches of trade. Foreign exchange has been somewhat irregular.

Mr L. Th. van Houten, of Rotterdam, thus reviews the state of the Dutch cocoa trade:—During May under review our tin market has remained in a very quiet position, with only a limited

business doing, and with hardly any fluctuation in the value of the article. Banca tin was quiet, at 76 fl, but towards the end of the month, upon the falling due of the last sales' prompt, several parties were compelled to buy, as previously sold parcels were being called up; but holders met this demand very freely, and several transactions took place from 76½ fl to 76 fl, at which price the market closes without change. A few lots of Billiton tin have been sold ex ship arrived at 75 fl, at which price there are still sellers. Parcels afloat we can buy somewhat lower, at 74 fl. The delivery of Banca and Billiton tin during the month has again been very satisfactory, amounting together to 608 tons. The following statement shows the position of Banca tin in Holland on the 31st May from the official returns published by the Dutch Trading Company:—

	1871.	1870.	1869.
Import in May.....slabs	4,322	15,220	7,039
Previously this year	45,528	74,432	31,202
Total 5 months	49,850	89,652	38,241
Deliveries in May	15,693	12,300	3,400
Previously this year	53,456	48,590	41,051
Total 5 months	69,149	60,890	44,451
Stock second hand	82,542	78,821	101,069
Unsold stock	49,138	73,594	33,994
Total stock	131,680	152,415	135,063
Stock of Billiton	6,651	6,800	7,232
Import in May	3,000	4,200	2,860
Delivered and shipped in May	3,771	6,091	1,300
Quotation May 31 ... Banca	76fl	78½fl	84fl
Quotation May 31 ... Billiton	75fl	77⅝fl	82fl

The quantity of Banca tin now afloat for the Dutch Trading Company is 17,300 peculs, equal to 1,081 tons, against 20,700 peculs, equal to 1,294 tons, last year We estimate the quantity of Billiton tin now afloat at 10,320 peculs, equal to 645 tons, against 6,576 peculs, equal to 411 tons, last year.

THE COTTON TRADE.

LIVERPOOL.—June 1.

The cotton market closed firmly on Saturday, and re-opened on Wednesday, after the holidays, with animation, the business being very large, particularly for arrival, at advanced rates. To-day the sales have again been extensive, at full prices, the quotations generally showing an advance of ⅛d to ¼d per lb. Sea Island continues in but moderate demand; the better grades command full prices, while for the medium kinds of Florida rather easier rates have been accepted. American continues in general request, and has risen nearly ¼d per lb. New York advices to the 1st instant quote middling Upland 17¼ cents, costing to sell in Liverpool 9⅛d per lb by steamer. Brazil, participating in the general improvement, and with a large inquiry, has advanced ⅛d per lb. Egyptian has again been in good request, and clean cotton is rather dearer. In East Indian a good business has been done, at an advance of fully ⅛d per lb.

The transactions in cotton to arrive have again been very extensive; and for large quantities, at a further advance. The latest quotations are:—American, basis of middling, from any port, delivery June-July, not below good ordinary, 7 1/16d; not below low middling, 7⅞d; Savannah, at sea, not below good ordinary, 7⅞d; April shipment, not below good ordinary 7⅞d; Charleston of Savannah, April-May shipment, not below good ordinary, 7⅞d; Mobile, May sailing, not below low middling, 7 1/16d; low mideling, Texas, ship named, not below good ordinary, 7⅞d; Savannah, stained, at sea, 7 5/16d; New Orleans, May-June shipment, not below strict ordinary, 7⅞d; ordinary, Texas, loading, 6⅞d; Broach, machine-ginned, good fair, Cape, May shipment, 7d; Dhollerah, fair new merchants, Cape, April-May shipment, 6⅞d; May-June, 6⅞d; ship-named, at sea, 6⅞d; Oomrawuttee, fair new merchants, Cape, April shipment, 6⅞d per lb.

The sales of the week (four days), including forwarded, amount to 82,660 bales, of which 17,660 are on speculation, and 19,300 declared for export, leaving 45,700 bales to the trade.

June 2.—The sales to-day will probably amount to about 15,000 bales, with a firm market.

Imports, Exports, Consumption, &c.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	702,830
An increase of quantity taken for consumption of	152,540
An increase of actual exports of	229,790
An increase of stock of	358,320

In speculation there is a decrease of 29,860 bales. The imports this week have amounted to 118,397 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to May 26) is 188,000 bales, against 136,000 bales last year. The actual exports have been 18,672 bales.

NEW YORK.—MAY 19.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, May 19. From the figures thus obtained it appears that the total receipts for the seven days have reached 46,087 bales, against 46,849 bales last week, 51,432 bales the previous week, and 56,685 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,715,454 bales, against 2,719,023 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 996,431 bales. The exports for the week ending this evening reach a total of 77,784 bales, of which 37,728 were to Great Britain, 20,806 to France and 18,850 to rest of the continent, while the stocks as made up this evening are now 335,792 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending May 19.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	17071	3994	47075	22384	106834	125005
Mobile	3225	...	3225	...	22985	44230

Savannah	2772	2822	5594	[illegible]	29246	45450
Texas	686	1418	2104	6289	67015	28402
New York	8611	579	9190	7972	73850	48000
Other ports	668	...	668	548	20000	18000
Total	37728	18850	77784	45867	335792	317549
Total same Sept. 1	2146296	672224	2818520	1887031	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 31,597 bales, while the stocks to-night are 18,243 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to May 12, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph:—

Total last year	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]

The market the past week has fluctuated considerably. On Saturday last there was an improvement of ½c chiefly under the influence of the upward turn at Liverpool. This advance was continued on Monday, middling Uplands at the close being quoted at 16c here and at 7¾d at Liverpool. Tuesday, although Liverpool was quoted at 7¾d to 7¾d, prices here gave way ⅛c, and the next day there was a further decline of ⅛c, middling Uplands closing that day at 15¾c. Thursday, there was no change, but to-day the quotations returned to 15¾c, with moderate demand, closing steady. The offerings during the week have been sufficient to meet the demand, though there has been no pressure to sell. For future delivery the movement in prices has in the main corresponded with the fluctuations in spot cotton. Low middling closed to-night at 15⅛c for May, 15⅛c for June, 15¼c for July, 15⅜c for August, and 15⅜c for September. The total sales of this description for the week are 84,600 bales, including 1,000 bales free on board. For immediate delivery the total sales foot up this week 19,645 bales, including 8,230 bales for export, 6,030 bales for consumption, 1,365 bales for speculation, and 4,020 bales in transit. Of the above, 41 bales were to arrive. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb	11¼ @ ...	11¼ @ ...	12 @ ...	12¼ @ ...
Good ordinary	13¼ ...	14 ...	14¼ ...	14¼ ...
Low middling	15 ...	15¼ ...	15¼ ...	15¼ ...
Middling	15¾ ...	16 ...	16⅛ ...	16⅛ ...
Good middling	16¼ ...	17 ...	17⅛ ...	17⅛ ...

For forward delivery the sales (including 1,000 bales free on board) have reached during the week 84,600 bales (all low middling or on the basis of low middling.

In view of the unfavourable reports with regard to the growing crop which have up to this week been received, it becomes of special interest to know what is the balance of last year's growth we still have for export. We gave some figures on this point several weeks since, but a fuller statement will show the following result:—

	bales.	bales.
Estimated crop, as per CHRONICLE of April 29		4,185,000
Stock on hand, Sept. 1, 1870		59,747
Total supply		4,244,747
Consumed by spinners, North, estimated for year	806,000	
Consumed by spinners, South	95,000	
Exported to May 13, 1871	2,763,236	
Foreign engagements May 13	275,000	
		3,939,236
Total surplus for export and stocks at end of year		305,511

We see here that there remains for export and stocks at the end of the year only 300,511 bales, in case the crop reaches 4,185,000 bales. The consumption of northern spinners we have estimated at the same figure as last year. Should they see any reason for stocking up towards the close of the season, there would be just so much less left for export. These figures would not appear to afford much encouragement to those who are operating for a decline.

Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending May 19, 1871.			Week ending May 19, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	845	1673	13880	941	2917	13432
Columbus	179	1215	3597	373	1367	7031
Macon	250	813	3020	639	1057	8055
Montgomery	434	656	4500	398	763	5885
Selma	213	450	1811	341	506	4100
Memphis	3282	8941	10541	3840	4526	15854
Nashville	995	1752	1563	1703	1456	4935
	6108	15499	38911	8325	11952	59328

These totals show that the interior stocks have decreased during the week 10,875 bales (being now 20,415 bales less than for the same period of last year), while the aggregate receipts are 2,157 bales less, and the shipments 3,547 bales more than for the corresponding period of 1870.

The exports of cotton this week from New York show an increase since last week, the total reaching 13,095 bales, against 17,844 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, May 26.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all ports have been 40,000 bales, and since the 1st of September 3,755,000 bales. Shipments to England, 32,000 bales; ditto to France, 10,000 bales; to the continent, 14,000 bales; total since the 1st of September, 2,900,000 bales. Stock at all ports, 302,000 bales. Middling Upland, 7⅞d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, June 1.—The past week has been one of extreme dulness, and the Whitsuntide holidays have contributed much to the prevailing inactivity. The fine weather has induced many to go out of town, consequently the majority of warehouses are closed, and the attendance on 'Change has been very scant. There is no demand in any department of business, so we cannot give any detailed report. Prices are nominally unchanged, and will likely continue so when business is actively resumed. Meantime, cotton is becoming dearer, owing to reports from America of bad weather for the growing crop. The advices from all our large consuming markets in the East are still unfavourable, consequently there is nothing yet doing for these quarters.

BRADFORD.—There is less animation and less firmness in the wool market. Buyers, who are evidently well supplied, are holding off, waiting the arrival of the fresh clip. Very little business has been effected in the yarn market to-day. The demand is still most apparent in two-fold 36's and 40's, genappe, and certain spinnings of lustre yarns. Prices are very firm. In the piece market business has been quiet during the whole of the week, and to-day there is no tendency to animation.

DUNDEE.—The flax market for spot goods continues very firm, and considerable transactions have taken place, at rather higher prices. Stocks are now very light, and holders demand an advance on late prices, while buyers have shown rather more disposition for business. Tows are without alteration, and only in limited demand. For jute the market continues without much change. The activity in the yarn market has been maintained during the week, and an extensive business doing at the late advance. The linen trade has to some extent participated in the improvement of the other branches, and business has been pretty active. Jute goods are steadily inquired for, and prices very firm.

BELFAST.—Flax—Supplies for the present season are now very nearly exhausted. Yarns—A large business has been transacted. Stocks are decreasing. Prices are very firm, and show a tendency to advance. Linens, brown (handloom)—Light and heavy linens have been in active request at full prices. Powerloom—Light linens have been in fair request, and for heavy goods a steady demand existed, as also for cloth for dyeing and hollands. Bleached and finished linens—Home trade is in a satisfactory condition. Stocks are not extensive, and prices rule decidedly firm.

NOTTINGHAM.—There is no material change to report in the condition of the trade generally. The demand for cotton trimmings continues active, and there is a healthy inquiry for curtains. Lace yarns remain at about their previous value, with a firm tone in the trade. The hosiery trade has also been interfered with by the holidays. Hosiery yarns are without quotable change in value.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—MAY 19.

The market has shown a slight upward tendency in flour and wheat, but in the coarser stuffs prices have been irregular, the whole closing unsettled. Flour has come forward freely by rail, and there is an unusually large quantity on the canal, destined for tide-water, but prices have been ruling for some time below the relative value of wheat, and this induced some speculation, which, together with an improved demand for Great Britain and the British Provinces, causes an advance in the low grades of State and Western brands. In the course of Tuesday, Wednesday, and Thursday, the sales of common shipping extras alone reached about 30,000 bbls, commencing at $6 to $6.20, and closing at $6.30 to $6.50, with better grades at $6.60 to $6.65. Some of the medium grades experienced a partial advance. Superfine flours have been in brisk request, and family flours have done better; so that the whole range of quotations advanced. Southern flours have remained quiet. Rye flour dull. Corn meal, at some decline, has sold freely, including 1,500 bbls Southern and brandywine at $4.10 to $4.20. To-day the demand was less active, but prices ruled very firm. Wheat has arrived but moderately by rail or by canal, while the impatience or necessity of shippers has induced them to buy more freely, paying daily a slight advance; No. 2 spring selling from $1.54 on Tuesday, up to $1.58 at the opening to-day, on the spot, and $1.52½ to $1.54 for June arrivals. Holders have been favoured by an advance abroad and a high gold premium, which have been offset by an advance to 9d for freight to Liverpool by steamer. At the close of to-day's market the tone was less buoyant, under a partial decline abroad, and increased receipts at Chicago and Milwaukee, and leading shippers bid only $1.56 for No. 2 spring, and three boat loads sold, for early arrival, at $1.55. Corn has been dull, and in the past few days prices have declined 4c, closing at 75c to 76c for mixed, and 76c to 77c for yellow Western, at which there is some revival of export demand. Rye has remained without essential change. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The holidays have interfered with business in the corn trade, and on Monday last the Exchange was closed. Demand for wheat has ruled inactive until to-day, when the reappearance of sun imparted a firmer tone to the trade. On Wednesday it was difficult to effect sales of English wheat, except at some slight concession in prices, but to-day a fair quantity of produce, both English and Foreign, changed hands at values fully equal to those current when we last wrote. The provincial markets held to-day also showed more firmness. Stocks of wheat on hand are now small, but there is a large number of grain-laden vessels on passage, the estimated number of cargoes afloat, being 320 against 260 at the corresponding period last year, of which 162 are wheat against 120. The imports have recently fallen off. The following statement shows the imports and exports of cereal produce since the commencement of the season to date:—

	Imports. 1870-71. Cwt.		Exports. 1870-71. Cwt.		Imports. 1869-70. Cwt.		Exports. 1869-70. Cwt.
Wheat	2 ,1	.....	2 ,2	.....	3 ,6 ,5	.....	2 ,2
Barley	1,0 ,6	.....	1 ,0	.....	1,1 ,5	.....	1 ,7
Oats	1,0 ,2	.....	1 ,2	.....	7,1 ,6	.....	9 ,2
Peas	2 ,1	.....	2 ,7	.....	1 ,6	.....	1 ,1
Beans	1,2 ,6	.....	1 ,6	.....	1,6 ,6	.....	2 ,3
Indian Corn	10,0 ,1	.....	6 ,9	.....	11 ,2 ,9	.....	1 ,1
Flour	4,0 ,6	.....	1,1 ,0	.....	4 ,8 ,2	.....	1 ,0

There is no feature of interest to notice in the spring corn trade. Beans, peas, and inferior oats are rather cheaper, but other articles are unchanged in value. Flour has ruled dull.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the **last eight days 14 grain** and seed-laden vessels have been reported arrived at ports of call viz., 7 wheat, 1 oats, 1 beans, 2 cotton-seed, 1 oilcake, 1 cotton-seed and beans, 1 palm-nut kernels, and 1 valonea. The floating grain trade has been quiet, the tendency of prices being in buyers' favour. Wheat has been in slow demand at late decline on the week. Maize—Only 1 arrived cargo, partially imperfect, has been sold at about late prices. Barley has been limited, the few cargoes offering being out of condition. Rice—Only one sale is reported at 30s per cwt. The shipping trade is as follows:—Wheat—7 arrived cargoes (Black Sea Odessa, 5,2 , duty Azow 32s per 492 lbs.; White Sea, Pleasant, 56s and 54s; and Black Sea, 54s and Galatz, 53s per 480 lbs. Oats—1 cargo Cadiz at 6s per 312 lbs. To be shipped, 1 cargo Cadiz at 6s per 312 lbs. Wheat—1 cargo No. 1 spring and Manitoba at 44s 6d per 480 lbs. Maize—1 arrived cargo Odessa at 32s 6d. To be shipped, 1 cargo Galatz, 41s per 492 lbs. and 20,000 quarters Danubian at 32s 6d per 480 lbs. Barley—1 arrived cargo Waterford at 28s per 400 lbs. Rye—1 cargo, arrived at Rotterdam, at 30s per 424 lbs. Linseed steady. 1 arrived cargo Odessa has been sold at 60s (cost and freight per 423 lbs. A.T.; and 2,000 quarters Indian from Calcutta at 62s 6d to 63s 6d. Shipped to be shipped, 4,0 0 tons East Indian, long Calcutta, 61s 6d to 62s per 510 lbs. Linseed quiet. Arrived 300 tons ordinary Calcutta at 60s 6d; 200 tons Bombay, very fine, at 61s 6d; 200 tons Bombay, fine, at 61s 6d per 424 lbs. To be shipped, 2,000 tons ordinary Calcutta, at 60s 6d per 424 lbs. Cottonseed quiet. Arrived 700 tons Alexandrian at 8s 3d to 8s 6d per bush.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—Business was fully resumed on Wednesday, when the market showed an improving tendency, and prices are generally 6d per cwt higher than last week. The total stock in the Kingdom is now about 36,000 tons less than at the same date last year. Landings are very moderate, and the continuance of adverse winds has again delayed arrivals. There were 1,961 casks West India sold on Wednesday and yesterday at the above advance, including brown Jamaica by auction at 29s to 33s 6d. Low brown descriptions are dearer in some instances. Floating cargoes **continue in demand for the United Kingdom. The public sales of** sugar held this week have been comparatively small. Most of the Porto **Rico offered was taken in at high rates.**

Jaggery.—6,400 bags have changed hands: common, 20s; good, 20s 6d, and yesterday at 21s.

Manila.—About 9,000 bags have changed hands privately: Clayed at 25s 6d to 26s 6d; Tail, 21s 3d. At auction, 32,700 bags were only partly sold, at 26s for clayed, at 4s duty.

Other Foreign.—At auction 260 casks **Porto Rico were chiefly taken** in, a few lots selling at 33s 6d to 36s for middling to fine yellow. Privately, 130 casks Surinam sold at 31s to 32s per cwt.

Floating Cargoes.—Two of Porto Rico have sold for the United Kingdom at 29s and 28s 6d; one of composite, price not given; one of Havana No 13, at 32s; one of Trinidad (West India), at 29s 6d.

Refined.—The market is rather lifeless for dry goods and Clyde crystals. Supply of the former very moderate.

MOLASSES.—These are not any more reported in West India. 274 casks Antigua recently by auction were taken in at 16s. 199 barrels Azemboa at 16s to 17s per cwt.

RUM.—**The market is steady, but rather quiet. Demerara, 1s 9d to** 1s 9½d paid. A few sales are reported in Jamaica, chiefly at 1s 6d to 1s 7d per gallon. The stock of common kinds is rather above the **usual average of Jamaica.**

MINCING LANE.—There was not any public sales on Wednesday, but the demand is steady. Further business has been done in Trinidad by private treaties, and 3,000 bags Guayra sold at 14s to 18s per cwt, chiefly on spot. The quotations of ordinary to fine now keep very tempting, and for such a good deal more business could be done than has transpired recently if any of importance.

COFFEE.—At the sales held by the Netherland Trading Company on Wednesday the moderate quantity brought for sale went without material change. Good ordinary Java sold 33s to 34 cents, and 14,000 bags sold readily. The result, the prospect of reduced importations to Europe, and the continued large deliveries, has not led to any alteration in the market here. Only 215 casks 169

barrels and bags plantation Ceylon have been offered by auction, which sold as follows: grey and pale, 57s 6d to 66s; colory, 64s to 78s. 65 bags bold native, 54s 6d. 320 cases 123 bags East India only partly sold: Wynaad middling, 64s to 64s 6d; bold, 74s 6d to 75s. Of Nadoobatum a few lots realised 71s to 78s. 41 casks 71 barrels and bags Jamaica at 53s to 66s for good ordinary to middling. 28 bales inferior mixed Mocha, 88s to 89s. 400 bags African, 56s 6d. Of 5,147 bags foreign a considerable portion sold: washed Rio, 53s 6d to 60s; low Bahia, 46s 6d to 47s; Guatemala, 54s to 64s 6d; Costa Rica, 57s to 60s 6d; and a small parcel of La Guayra at 65s per cwt. There was 1,538 tons delivered last week, making an increase for export since the beginning of the year 5,400 tons. The home clearances are 740 tons in excess. As arrivals are delayed the stock is now 1,700 tons less, but the quantity afloat is very large.

TEA.—The stock in the United Kingdom is 11,500,000 lbs less than last season, and the home deliveries at this port have increased nearly 5,000,000 lbs as compared with last year. Business has been rather contracted owing to the holidays; but the market keeps firm. For good common black leaf congou there has been some export demand at rather higher rates, which is at present the only new feature to notice. 613 packages common green by auction yesterday sold rather cheaply.

RICE.—There is a steady inquiry. By private contract several parcels of white Bengal have changed hands at from 10s 9d to 12s 6d. 8,000 bags Rangoon at 9s 6d, and about 10,000 bags other kinds: Ballam, 9s 6d to 9s 9d; Field Siam, at 9s 1½d; and Madras at 9s 9d. 1,200 bags by auction were bought in at 10s 9d for Askoolie. The deliveries show 100 per cent. increase upon last year's to this date, and the stocks have lately experienced a material diminution. Of Bengal the stock is 6,600 tons, against 7,380 tons last year, and 16,430 tons in 1869 at the same period.

IMPORTS and DELIVERIES of RICE to May 27, with STOCKS on hand.

Stock	34230	...	36500	...	44140	...	17000

BLACK PEPPER is firmer. Privately Singapore has sold at 5⅛d to 5¼d; Penang, 4⅞d to 4 15/16d, according to terms. To arrive, 4¾d. 1,890 bags Singapore by auction were chiefly taken in above the value, but since sold at 5⅛d to 5¼d. 192 bags Aleppy kind sold at 5¾d to 5 7/8d per lb.

WHITE PEPPER is rather dearer, the stock being much reduced. 255 bags Singapore were bought in at 8d. By private contract small sales reported at that price.

OTHER SPICES.—76 cases nutmegs were bought in. 7 cases Batavia mace were sold at 3s 3d to 3s 7d. 199 bales Zanzibar cloves realised 2⅝d; one lot 3d. 1,460 bags cinnamon chips part sold at 3½d to 4⅝d, and bark, 1¾d to 2½d. 160 bags pimento, 1¾d to 1 7/8d per lb. 700 cases Cochin ginger only partly sold, low and ordinary, 39s to 45s, middling to good, 56s to 75s; bold scraped, 95s to 108s. Nearly 500 cases were bought in. 583 barrels Jamaica sold speedily; ordinary to good, 34s to 76s, and fine, 92s to 127s. 14 cases cassia buds were taken in at 7l. Small sales of cassia lignea from second hands at 105s to 120s per cwt.

TAPIOCA.—1,046 bags part sold at 2d to 2¼d for good, and 1¾d to 2d for Penang.

TAPIOCA FLOUR.—720 bags went at 1¼d to 1⅜d per lb.

SAGO.—1,288 bags chiefly sold at barely former rates for small grain, viz., 15s 6d; dingy, 14s 6d. Some common rough large grain brought 16s to 17s per cwt.

SALTPETRE is steady, but rather quiet. Sales amount to 1,000 bags at 26s 9d to 27s, refraction 7/8 to 5/4 per cent.

IMPORTS and DELIVERIES of SALTPETRE to May 27, with STOCKS on hand.

Stock	2270	...	2510	...	3390	...	6220

Deliveries last week, 214 tons.

INDIGO.—The sales of Guatemala, &c., held this week have comprised 3,741 serons, &c., and went off flatly at 3d to 9d reduction; and for good to fine at par to 3d decline. About 900 packages only sold.

OTHER DRYSALTERY GOODS.—Cutch is quiet. 1,000 boxes good Pegue by auction part sold at 19s 9d. 750 packages Gambier were taken in. Further business has been done in Bengal turmeric to arrive at 18s 6d per cwt.

SHELLAC.—133 cases by auction sold at rather higher rates, including native reddish orange, 125s to 127s 6d. Good to fine orange has sold at 6l 5s to 6l 12s 6d per cwt, with a speculative demand privately.

METALS.—The markets have shown rather more steadiness, with some improvement in prices. There is a better demand for tin. Straits has sold at 126l, and yesterday at 126l 10s to 127l. Banca firmer, at 130l. The official quotations of English remain unchanged. Lead quiet. A steady inquiry prevails for copper. Lota bars, 64l 10s to 65l; Armenita 65l 10s to 66l; Burra and Walaroo, 78l 15s to 74l. Spelter firm. Silesian quoted 17l 15s. Scotch pig iron is again higher, viz., 57s 9d cash. Rails support the late advance, and there is likely to be a very extensive export demand.

JUTE.—Several sales have been made for arrival at firmer prices, chiefly ranging from 19l 10s to 24l 10s. 2,930 bales by auction rather more than half sold at 20l to 26l 10s for low to fine, being 5s to 10s dearer, and fine quantities showed the greatest advance.

HEMP.—Some inquiry has prevailed for good roping Manila, but there are few sellers upon former terms.

OILS.—There has been some business done in common qualities of olive on the spot. A floating cargo of Candia sold at 42l 10s per tun for London. Linseed oil has advanced fully 10s, with a steady demand. Present value on the spot 32l 15s. English brown rape is rather dearer, viz., 43l 10s to 43l 15s spot, and about 5s more for the last four months' delivery. Refined, 45l 10s to 46l; foreign, 47l. No change in cocoa-nut. Cochin, 47l to 50l; Ceylon, 40l to 41l. Palm steady. Fine Lagos, 37l per ton.

LINSEED.—The market remains quiet. Calcutta, 63s 6d; ditto afloat, 61s to 61s 6d. A cargo of Odessa off the coast has sold at 60s 10½d per quarter for the continent.

PETROLEUM.—Speculative sales have been made at 1s 5¾d to 1s 6d; to the end of the year, 1s 6¾d per gallon.

TALLOW.—The market has been firm and the deliveries are very large. Old Petersburg, 43s; new, 43s 6d to 43s 9d. October to December, 45s 9d to 46s per cwt, being in the latter position rather dearer.

PARTICULARS OF TALLOW—Monday, May 29 1871.

HIDES.—At the public sales of East India held yesterday 86,818 hides, &c., about two-thirds sold. Good qualities went rather dearer. Common dull and easier.

POSTSCRIPT.

SUGAR.—The market steady although less active. Sales of West India, 440 casks. For the week, 1,501 casks. By auction, 1,732 bags Mauritius were chiefly taken in; also 1,630 bags brown Bengal, and 781 baskets white Java, at 41s. 550 mats, &c., Siam, sold; 25s for soft brown. Privately, 1,500 bags Madras jaggery sold at 20s 6d, and 11,000 bags Manila at 25s to 25s 6d for fine Ilo Ilo. A floating cargo of Havana for the United Kingdom, No. 11, at 31s; one Bahia at 26s; two Porto Rico at 28s 6d to 28s 7½d per cwt.

COFFEE.—60 casks plantation Ceylon sold without change in prices. 1,073 bags native went rather cheaper: good ordinary to bold, 51s 6d to 53s 6d. 65 casks 456 cases Neilgherry, 64s 6d to 82s. 1,140 bags Guatemala, 55s 6d to 67s 6d.

SPICE.—Singapore white pepper sold at 8d per lb.

SALTPETRE.—100 tons sold to arrive at 26s 6d per cwt.

COCHINEAL.—1,550 bags, about half sold: Teneriffe silver, 2s 3d to 2s 5d; black, 2s 3d to 3s 4d; Honduras silver, 2s 6d to 2s 7d; black, 2s 6d to 3s 2d per lb (for new crop). No material change in prices.

TIN.—Sales of Straits to arrive at 127l per ton.

OIL.—225 casks palm by auction sold at 32s to 35s 6d for common kinds, being rather dearer. 187 casks Sydney cocoa-nut sold at 33s 6d to 39s per cwt.

TALLOW.—1,077 casks Australian by auction went steadily, and all found buyers: mutton, 41s 6d to 42s 9d; beef, 39s to 41s 6d; inferior down to 35s per cwt.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that in consequence of the Whitsuntide holidays, public sales have been few, but the prices of oranges are well maintained. Lemons of good quality have improved in value. Barcelona and black Spanish nuts in good demand. West India cocoa-nuts have a good sale. Arrivals of West India pineapples, quality inferior, from being shipped too early.

COLONIAL WOOL.—The market is quiet, prices unchanged.

FLAX.—Market firm.

HEMP.—Market for Russian is dull. Manila very steady, and a considerable business done on secret terms.

SILK.—Market quiet. No change; prices nominally the same.

TOBACCO.—The market for American tobacco continues very quiet; some few sales have been effected of fine classes of stripe, at full market rates. For exportation there are numerous inquiries for low-class leaf possessing quality; the stock of such is very limited. In substitutes and cigar tobacco there has been a good business done at an advance on previous prices.

LEATHER.—It being Whitsuntide there was no market at Leadenhall on Tuesday; but there has been more inquiry for English butts of middle and heavy weights; and the demand for light English butts, calf skins of middle and heavy weights, kips and horse hides, continues good.

METALS.—A small steady business has been doing during the week. Copper has found buyers to a moderate extent in foreign kinds. Iron is in rather improved demand, with more firmness in rates. Tin fell a little flat early in the week, but closes with more firmness. Lead is a shade lower in value. Spelter is very quiet. Tin plates are in request and rather dearer.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	6
Fat by ditto	2	0
Yellow Russian ditto	45	0
Melted stuff	32	0
Rough stuff	16	0
Greaves	19	0
Good fregs.....	6	0

Imports for the week, 2,077 casks.

METROPOLITAN CATTLE MARKET.

MONDAY, May 29.—The total imports of foreign stock into London last week amounted to 23,959 head. In the corresponding week in 1870, we received 12,220; in 1869, 13,727; in 1868, 3,838; and in 1867, 14,857 head.

Considerable firmness has been apparent in the cattle trade to-day. Full average supplies of beasts have been on sale. The demand has been steady for all breeds, and 2d per 8lbs more money has been obtained. For best Scots and crosses 5s 8d to 5s 10d per 8 lbs has been paid. The market has been well supplied with sheep. There has been a healthy inquiry, and prices have risen 2d per 8 lbs. The best Downs and half-breds have sold at from 6s to 6s 2d per 8 lbs. Lambs have changed hands quietly at about late rates. Calves have been in moderate request, but pigs have sold slowly.

SUPPLIES ON SALE.

	May 30, 1870.	May 29, 1871.
Beasts.....	3,280	3,510
Sheep and lambs	30,890	31,380

Veal	5	0	5	4	Small pork	4	8	5	4

Lamb, 6s 8d to 7s 4d.

HOP MARKET.

BOROUGH, Friday, June 2.—Influenced by the unhealthy appearance of the bine this market has shown considerable firmness. Business has been transacted freely, and prices had an upward tendency. Mid and East Kents 2l to 7l 7s; Weald of Kents, 2l 5s to 3l 15s; Sussex, 2l to 3l 10s. Farnham and country, 3l 15s to 5l 12s; and olds, 1l to 1l 15s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, June 2.—The supply of potatoes are good. The trade has been steady, at late rates. Flukes (old), 70s to 90s; Regents, 40s to 60s; Rocks, 40s to 50s per ton. Kidneys (new), 12s to 16s; Round, 8s to 14s per cwt.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 2.—Only a limited business has been done this week, as the East India sales have just closed, and those of the miscellaneous kinds are to be held on Tuesday and Wednesday next, when about 2,000 bales Peru, 1,000 bales River Plate wool, and several parcels of Georgian, Egyptian, Portugal, &c., will be brought forward.

CORN.

(FROM OUR OWN CORRESPONDENT.)

WAKEFIELD Friday, June 2.—The Whitsuntide holidays have interfered with business, and the demand for wheat was of a retail character, and prices were rather lower than last Friday.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 2.—A large business has been done in wheat at Tuesday's prices. Flour remains quiet, without change. Maize was in good request at Tuesday's prices. Barley, 4s 1d; Old beans, 35s; New beans, 35s 6d. Peas, 44s 6d; Oats, 3s 9d to 4s; Oatmeal, 30s to 31s.

The Gazette.

TUESDAY, May 30.

BANKRUPTS.

George Beamish, Gray's inn square, retired captain in her Majesty's military service.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN.

Is extensively used for all kinds of

OUT-DOOR WORK.

It is especially applicable to

SOLICITORS.

Messrs Baxter, Rose, Norton, and Co., 6 Victoria street, Westminster.

Messrs Ashurst, Morris, and Co., 6 Old Jewry.

SECRETARY (pro tem.)—J. B. Glenn.

OFFICES—70 and 71 Palmerston buildings.

This Company is prepared to enter into proposals for Tramways, either in the United Kingdom or elsewhere. Address, with full particulars, to the Secretary (pro tem.), as above.

EXTRACTS FROM THE COMPANY'S PROSPECTUS.

This Company has been formed to carry out Tramway enterprise in connection with the parties who have been mainly instrumental in the introduction of Tramways into this country and the principal cities on the continent and who will therefore bring to the business great practical experience.

The intention of the Company is generally to invest its own capital in the construction and development of the Tramways selected by it, and to dispose of the same from time to time when tested by the experience of actual working, in which way the public will be protected against unsound and merely speculative projects.

The Company is entirely free from any engagements, direct or indirect, with contractors, and will therefore carry out such works as it may undertake, on the best possible terms for cash.

The position of the founders of this Company will enable them to secure, on the most favourable terms, concessions from the principal cities on the continent and elsewhere open to Tramway enterprise.—By order of the Board,

J. B. GLENN, Secretary (pro tem.).

On May 27th was Published, No. V., New Series,
Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for May, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend on each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Financial, Insurance and Miscellaneous Companies; New Companies and New Capital. Prices made up to May 24.

Advertisements for next Number, to be published on July 1, must be sent in for insertion on or before June 29.

OFFICE—340 Strand.

WHY IT IS INEXPEDIENT THAT FRANCE SHOULD CHOOSE ITS GOVERNMENT AT THIS MOMENT.

It is always difficult to choose a Government: but in France at this moment it is peculiarly difficult. France has a bad choosing apparatus. The Assembly now sitting at Versailles is the only source of Government and of order in France, but it in no respect represents France. It was elected at the end of the war, the only thought of the persons who elected it was how to close the war; they only wished to end a struggle in which they felt they were defeated. In consequence they chose persons who were the safest on that point — who were the surest to make peace. And these were necessarily in large proportion Royalist. The Imperialists were unpopular because the Emperor had begun the war; the Republicans were unpopular because, with Jules Favre, they had repudiated any peace which did not retain "every inch of their territories "and every stone of their fortresses;" because, under Gambetta, the most active and characteristic of them had been intent on continuing the war. The Royalist candidates were elected in many districts, because they were the only ones who could stand without identifying themselves with the one crime not then to be pardoned—a share in the war. A peace Assembly elected then must be Royalist, because all the competitors were in public estimation anti-pacific.

Such a body cannot assume to represent France as a constituent Assembly, as a body selected to choose its Government. It was not selected as such. It was selected at a time and under circumstances which prevent its being such. It was chosen at an instant when the parties usually powerful were for an instant powerless; when a party usually powerless was for an instant powerful. Such an Assembly cannot be justified in choosing a Government for France, and will only begin new misery if it attempts to choose one. For the moment no doubt the usurping Assembly might secure obedience. At present France is too exhausted to resist any imposed Government, or rise in behalf of any favourite Government. France only wants to be at peace and to be let alone. There is no longer any insurrectionary force in her. But momentary acquiescence is no token of permanent attachment. If the Government now chosen is not of a kind suitable to France, if it is of a kind very unsuitable to her, she will not long retain it, though for the instant she may not have the life and heart to struggle against it.

There is much to be said for a Bourbon restoration, if only it were the free choice of the French people. But is it likely to be that choice? For many years there have been only two first-rate forces in French politics—the love of the Empire and the love of the Republic; the former in the country, the latter in the towns. Can we now be sure that both these forces are extinct; that a new passion, the passion for Royalty, has absorbed them both? That the Versailles Assembly may be attached to the Bourbons is easy of belief, because of the time at which it was chosen; but that all France is fixed in that attachment is incredible.

If it be practicable, the prolongation of the Provisional Government of M. Thiers is the best expedient. Not that it is free from difficulties—all Provisional Governments have peculiar difficulties. Their being provisional of itself lessens their vigour and weakens their prestige. M. Thiers has no particular claim on the confidence of France. In his long career he has often shown much oratorical skill and much diplomatic dexterity, but he has shown little else. On his own merits we would not wish to maintain him for an hour; but still *there he is*. He is the present power—the only possible temporary and provisional power. Everything else must be an attempt at permanence when the conditions of permanence do not exist—must be a choice of a government for the people by a Chamber which was chosen for no such task, and which disagrees with the people. To give time for a choice under happier circumstances—to enable France to select a better choosing Assembly,—we wish the power of M. Thiers to be prolonged, and for no other reason.

THE GOVERNMENT AND THE ARMY BILL.

THERE is a general, and we believe a very mistaken notion abroad, that the Government is not unlikely to suffer a great defeat upon the Army Bill—such a defeat as may bring on a political crisis. Now, undoubtedly, it is quite certain that the support which the Government receive upon it is extremely lukewarm and reluctant. There is a section of sincere Liberals which feels towards all military measures a sort of conventional shyness, not to say prudishness, as if there were a certain degree of impropriety in being connected with them at all—such prudishness as a strict Evangelist would feel in being discovered at the opera or at a game of whist. These Liberals may vote with the Government when it is needful, but they much prefer to wash their hands altogether of a division on a military reform. They are rather proud of their indifference to these hotly contested questions, and they are rather ashamed of a Government which rests its claims on the gratitude of the country (for this Session) on an effort to make the army stronger and more equal to the task of shedding blood effectually if blood should need to be shed. That is one reason of the lukewarm support the Government receives. Some of their most enthusiastic supporters in former Sessions do not like the reputation of army reformers, and do like the reputation of indifference to all army questions. On *that* subject they have a half feeling that they should let "the dead bury their "dead,"—let people who are not ashamed of close acquaintance with the details of war determine for the future what the details of military arrangements should be. Then, again, there is a large section of Liberals which is lukewarm for a very different reason. They *have* relations with the army, and know perhaps a dozen men who are lamenting the exchange of the purchase system for one of promotion by selection, just as the old boroughmongers lamented the exchange of the nomination system for the system of popular election. They are constantly hearing that "the regimental system" will soon be at an end; that the army will be full of "cads," who have had enough cramming to obtain a commission; that those officers of the existing army who have bought their commissions are being very ill treated, not to say cheated of what they purchased; and that the proposed army reform will come to no good. All this they hear continually, with pointed illustrations which make a certain amount of impression upon their imagination; and, on the other hand, they only hear from Mr Cardwell and his supporters somewhat monotonous, and not always intelligible, appeals for confidence in the official authorities, reiterated illustrations of the difficulty of the subject, and sometimes rather unsatisfactory replies to the allegations of special grievances. Certainly they do not hear what is at all calculated to give them implicit confidence in the commanding ability of the Minister who is making this great change; and the natural result is a very considerable apathy as to the discharge of their duty in supporting the Administration. Add to these causes of languor the general discontents of the various discontented parties—discontents, of course, which multiply with every Session added to the age of the Ministry—and there is no great difficulty in understanding why, at the time when the Whitsuntide holidays were just at hand, the Ministerial majorities were allowed to dwindle down to 16, even without supposing any sort of intention to allow the defeat of the Ministry on this measure.

And in point of fact that defeat is not at all probable. There is in every English Parliament a very healthy disposition to trust the Administration on matters of administrative reform. No one can really follow all the windings of these questions. No one can for a moment suffer from such reforms more severely than the administrators who introduce them, and who have to bear the brunt of all the alarm and displeasure they excite, and to determine all the innumerable questions of right and grievance which spring out of their changes. All this is known to our Members of Parliament, and it very naturally decides them, when a principle is once fairly agreed upon, to interfere as little as possible with the wish and intention of the Administration as to the mode of carrying that principle out. To change a Government, or to cause a dissolution, on a matter of detail which very few Members of Parliament really understand, and on which the Administration will have a very great advantage in their appeal to the people, is, we may be quite sure, as far as possible from the minds of the Liberals. They will by no means object to see the Government majority at times very low, to see the Cabinet squeezed, if so it may be, into granting the officers better terms, to see anything short of a critical defeat, but the last they certainly will not allow. Since Whitsuntide the majorities of the Government have grown to something nearer their proper number, and we feel no doubt at all that if the Government hold out, and hold on steadily, they will carry their Army Bill with extremely little substantial alteration.

At the same time we cannot help suggesting that it might be well to facilitate progress by some sort of reasonable concession to the army interests. Would there be any thing really unreasonable in allowing the junior officers to receive at once the present value of the purchase money to which they will be ultimately entitled on leaving the service—in other words, to receive that purchase money now, with a deduction by way of discount for immediate payment? We say the *junior* officers, because it is quite clear that as regards the Majors and Colonels there is no case at all for immediate repayment. They have received the full equivalent, the full advantage, of their purchase money *already*, and they cannot be entitled to anything more than repayment of that purchase money whenever they retire. But this is not so in relation to Captains and the officers lower in rank. *They* have got hardly any advantage which those who enter the service without paying a penny will not have also, and yet they are compelled to wait for their money to the same time to which they would have been compelled to wait if they had had all for their money which, hitherto, money has been able to buy. We cannot help thinking it would be wise in the Government to allay irritation, and smooth the course of a good and necessary Bill by making a not unreasonable concession of this nature.

MR LOWE ON THE POLICY OF REPAYING THE DEBT.

MR LOWE made a brilliant speech on Friday week on the policy of paying off the debt; but one reason why it should have been necessary to make the speech, and why it should be felt to be so able and well-timed, is perhaps more important than the speech itself. The necessity of a formal vindication of the policy of repaying the debt, and of demonstrating the great ability of the country to do so, is an indication of the deficient financial training of the present generation. Twenty or thirty years ago there would have been no question of the wisdom of paying off debt, even at some considerable cost to the taxpayer. And the causes of this deficiency of training are very important. It is due in part to the excessive lightness of taxation, which has been the fruit of free-trade policy and the growth of the country, as well as of past care in finance. The shoe has not pinched for many years, and consequently financial questions are not considered with that eager attention which was formerly given to them. Mr Gladstone did much by his marvellous budgets to excite an artificial interest, and Mr Lowe has also attracted a special interest to the affairs of his office by his literary force of statement, and the intellectual necessity under which he lies of setting crooked things straight; but the questions have not been discussed with the kind of interest which belonged to them when everyone felt that taxes were pressing on the "springs of industry," and that it was a most vital matter—a matter perhaps of utter ruin or the reverse—to meddle with them. The result is that the tone about finance among important sections of public men is rather relaxed. The relative urgency of questions is misjudged, and there is not a little confusion, especially from the continuance of the opinion that taxes must always be spoken of as oppressive because it was the fashion so to speak of them, and then the correct fashion, not very many years ago. Hence the cry that we must not reduce debt, but reduce the "oppressive" taxes. But anyone who has really considered the burdensomeness of taxation, would see at once the ludicrous unfitness of the language of thirty years since regarding the taxation of the present day. And to this cause of deficient training must be added the change in the constituencies effected by the last Reform Act. It is a new electoral body, which has to decide on financial matters in circumstances which are so much changed from what they were. Naturally there is a little awkwardness among members in adjusting their language upon a subject which they have not studied, and on which prepossessions are

abundant, for constituencies they are not acquainted with. The traditional language which was once correct enough has the look of being likely to be popular with the new body, and it is readily resorted to without much thought of the real needs of the country, or of the capacity of the electoral body for understanding and taking up a different view.

Much will obviously require to be done to adapt financial knowledge and theories to our new position, and it is in this view we would look at Mr Lowe's speech. It is a lesson in finance to a generation which has much need of it, restating some old and common-sense notions on the subject of national debts, pointing out the great facts as to the resources of the country which are too often forgotten, and showing the way in which the general notions about the debt apply. On all points what he had to say was admirable; it will command the assent of all public men; and we do not fear that it will be unpopular with the new constituencies.

First, as respects the wisdom of the general policy of paying off debts, Mr Lowe's vindication was complete. To repay debt improved national credit, and prepared a nation better than it otherwise would be prepared for that adversity which is always possible. No doubt the burden of debt was being constantly diminished in a country like England by the natural growth of population and wealth; but because the burden was being diminished in one way which cost the taxpayer nothing that was no reason why he should not sensibly contribute to the same end, if it was a beneficial one at all. If he did so contribute, the nation would simply obtain so much more of the good to be derived from reducing the burden. That it is a beneficial end Mr Lowe's reference to the warning given by France was more than enough to prove. France acquired a large debt in peace through the policy of making things pleasant, and now it has to add the debt of a period of adversity. Clearly too a progressive community cannot plead inability, for it is each year better off than it was the previous year.

This general view appears to us perfectly unanswerable. Objections can of course be urged, but none of any great weight. One is, in the case of England, that our credit is as good as it can be. But Mr Lowe was quite right in saying that there is a peculiar competition for English Government securities, and that a reduction of the quantity would improve the price. Of late years the increasing intelligence of investors, and the supply of other forms of security, have weakened this competition, and these influences are probably not yet exhausted; but they will operate whether debt is paid off or not, and even if we only keep up the price by debt reductions, we should still be gainers. But for our efforts, should these influences be very powerful, there may be a fall; and that is as good a reason for maintaining the efforts as the prospect of bringing Consols up to par. It is also urged as an objection that money is always more profitable in the hands of the people than when paid to the State; but this cannot apply to the repayment of debt, which is only the transference of so much money from one set of people to another. Of course if any part of the money so transferred is diverted from consumption it is a pure saving to the State.

Mr Lowe was equally happy in pointing out that the analogy of the individual in regard to paying off debt does not apply to the State. An individual might be content to live indebted, knowing that there were no permanent interests to be served by freeing his property from incumbrances; but a State never died, and always had permanent interests. There is one case no doubt where a State and an individual have the same interest in remaining indebted—where, in the case of the individual, he borrows money at a low rate of interest to make much out of it, and where, in the case of a State, the taxation is such that any remissions will improve the resources of the State indirectly far more than the repayment of the debt would do directly. The State and the individual in these cases are wise to remain in debt. But in the case of a State it would often be difficult to draw the line, and the indirect gain to the national resources from remitting taxation should be clear. Altogether Mr Lowe's exposition of the corporate life of a State, and of the duties of its successive members, was most excellent. The tendency with constituencies even less popular than those we have now got will be to look to present ease from taxation. The only corrective is to insist that paying off debt is one of the most essential parts of expenditure, that it is in no respect optional, and that it is worth a sacrifice. We are much mistaken if a really popular constituency will not respond to this appeal, when the sacrifice required is but moderate.

What Mr Lowe said on the *second* branch of his subject—the resources of the country, and the lightness of its taxation, as giving the measure of what ought to be our effort to pay off debt—will probably be thought most striking, as perhaps it was. It was not popularly known how much smaller our burdens are than they used to be; but after Mr Lowe's speech he that runs may read.

The facts are very easily put together. During the last half-century, and especially during the last forty years, population has greatly increased, and wealth has increased more rapidly than population, while taxation has hardly varied in amount, and both the capital and annual charge of the debt have diminished. This is the barest statement of the impressive story told by the figures. To begin with the facts as to the numbers of the people—

The population in	1825 was	22,281,000
—	1850 was	27,523,000
—	1871 is	31,437,000

In other words there are very nearly one-half more people in the United Kingdom than there were in 1825. Even if we were only individually as wealthy as our ancestors in 1825, we should be able to bear half as much more taxation than they did.

But the proposition also is that we are individually much more wealthy, and it is demonstrated in various ways. There are one or two taxes which are a great test of wealth. As regards the richer classes we have the income tax, and the facts are that—

	£
An income tax penny yielded in 1850	867,880
An income tax penny now yields	1,520,000

—so that the incomes which the income tax touches have doubled. As regards other incomes, we have the test of the consumption of certain articles—a less perfect test, for the consumption of particular articles may not be in proportion to the general increase of wealth, but will be an insufficient measure of it, the expenditure of the new wealth being on a greater variety of articles. On the other hand, increased consumption may be due to reductions of duty. The facts are nevertheless very striking—

	Consumption per Head of			
	Beer.	Spirits. Home-made.	Foreign and Colonial Spirits.	Tobacco.
	barrels.	*gallons.*	*gallons.*	*lbs.*
1825	.358	.849	.059	0.76
1850	.556	.867	.081	1.00
1871	.823	.730	.268	1.31

Thus the average individual consumption of both beer and tobacco has doubled, while that of spirits (under much higher rates of duty) has remained nearly stationary. Mr Lowe might have given the statistics of tea and sugar as well, but it was safer perhaps to omit them, on account of the complication caused by the great reductions of the duties. It would be easy to show that much of the increased consumption is not due to these reductions, but the case is quite strong enough in the evidence from the consumption of articles of luxury where the duties have not been reduced. It was hardly necessary to add, as Mr Lowe did, the usual figures as to the increase of our foreign trade and shipping.

The *third* fact in the case is the stationariness of taxation for many years—a fact on which we have ourselves insisted most frequently. Mr Lowe gave almost exactly the figures which we extracted a few weeks since from Mr Goschen's report *:—

		Amount.	Per Head.
		£	s d
"Taxation" in	1825 was	54,859,000	49 3
—	1850 —	54,079,000	39 3
—	1871 —	60,472,000	38 5½

This means that an individually wealthier population—perhaps twice as wealthy, or at least possessing twice the taxpaying capacity—pays very much less per head than the people in 1825. It is easy to understand how in the interval the taxes which were once so grievous have come to be hardly felt. Every species of intolerable tax has been successively swept from the Statute Book, and most of those which remain are so easy as not to be acutely felt.

* Mr Lowe excludes from his calculation the entire Post Office revenue, as well as miscellaneous receipts, but Mr Goschen includes the net Post Office revenue. There is no material difference in the result.

As regards the *fourth* point, the diminution of the debt, the fact itself can be plainly shown, though if we go back before 1854 the exact diminution cannot be stated. Mr Lowe himself did not use quite harmonious figures. In one part of his speech he spoke of the debt as having been 902,000,000*l* in 1815, which, we believe, was Mr Gladstone's estimate in a speech made some years since, but in making the comparison from 1825 downwards, he stated the amount of the debt in 1825 at 810,000,000*l*. This would imply that the debt had diminished about 90,000,000*l* in the interval. But the truth is that the figures for 1825 and subsequent years in the comparison are not correct, as they do not include an estimate for the capital value of the annuities. Mr Gladstone's estimate for 1815 did so, and the Statistical Abstract gives such an estimate for every year since 1854, but Mr Lowe's figures leave it out. Mr Lowe is not to blame for this, his figures apparently being taken from a formal return of the "unre- "deemed capitals of the public debt," which is part of the elaborate two volumes containing the history of the public income and expenditure since 1688 just issued by the Treasury. But the return itself is defective, as is shown by a comparison of the Statistical Abstract with it. The comparison for the last three years is :—

	Capital shown by Statistical Abstract.	Capital in Treasury Return.	Difference, being Capital of Terminable Annuities.
	£	£	£
1866-67.....	800,849,000 ...	777,498,000 ...	23,351,000
1867-68.....	797,032,000 ...	749,101,000 ...	47,930,000
1868-69.....	796,861.000 ...	742,314,000 ...	47,547,000

And the point is of some importance since, in consequence of the recent increase of terminable annuities, the omission of their capital value in comparing the capital of the debt with its amount in 1825 or 1850 causes the debt reduction to appear much greater than it really is. The neglect to make the Treasury return complete is most unfortunate.

As we have said, however, the fact of diminution is not doubtful, and the most satisfactory evidence, in the absence of any correct statement, is the diminution of the annual charge. Here again we do not compare the same things, as the payments on account of terminable annuities have increased ; but the figures may be used safely for the present purpose. As the amount of terminable annuities has much increased, and these involve, on account of the repayment of capital, a much heavier annual charge than ordinary interest-bearing debt, the apparent diminution of annual burden thus shown will be less than the real diminution. Still the apparent diminution is not small. The figures are :—

	Annual Charge of Debt.
	£
1825	30,205,000
1850	28,297,000
1870-1	26,826,000

And these figures are substantially correct.* They imply that the annual charge is at least three-and-a-half millions less now than it was in 1825, and the real diminution must have been more. As the country has meanwhile increased so rapidly as we have seen in population and wealth, the smallness of the burden now is the most remarkable circumstance connected with it.

Altogether the circumstances of the country are certainly not such that any plea of incapacity to pay off debt can be put in. There never was a country perhaps with an exchequer so overflowing from light and easily-collected taxes as that of England now is. Mr Lowe's appeal in these circumstances not to tamper with any of the great sources of revenue is well founded, and his vigorous defence of sound policy in the matter will go a long way to repair any loss in popular credit he may have sustained through the Budget.

BOARD OF TRADE RETURNS.

THE Trade and Navigation accounts relating to the five months ended May have been published. The returns show that the value of the articles imported during that period was in—

	£
1869	101,098,856
1870	111,840,733
1871	129,502,118

* Though we observe they do not agree *minutely* with the formal Treasury return to which we have referred.

For May only the figures are—

	£
1869	23,260,988
1870	26,884,506
1871	24,418,272

As our readers are aware the comparison does not entirely hold good, in consequence of the adoption of the new system of making up the returns. The value of the exports during the five months was declared at—

	£
1869	74,744,620
1870	79,801,184
1871	82,379,737

And in May only at—

	£
1869	16,316,540
1870	16,786,946
1871	19,099,880

The following statement shows the increase or decrease in the value of the principal articles imported during the five months of the current as compared with the preceding year :—

Articles.	1870. £	1871. £	Increase. £	Decrease. £
Coffee	1,126,960 ...	1,723,640 ...	596,680 ...	...
Wheat	5,708,832 ...	7,249,089 ...	1,540,257 ...	...
Cotton	26,327,901 ...	30,080,144 ...	3,752,243 ...	...
Silk	3,439,183 ...	2,948,787 ...	... ...	490,396
Sugar	6,644,430 ...	7,106,575 ...	462,145 ...	...
Tallow	909,709 ...	1,225,355 ...	285,646 ...	...
Wine	2,084,322 ...	2,965,982 ...	881,660 ...	...
Wool	7,685,983 ...	8,321,564 ...	635,571 ...	...

The declared values of the exports of the articles enumerated below during the five months compare as follow :—

Articles.	1870. £	1871. £	Increase. £	Decrease. £
Beer	938,437 ...	915,209 ...	... ...	23,228
Coal	2,155,450 ...	2,240,133 ...	84,683 ...	...
Copper	1,359,363 ...	979,334 ...	... ...	370,029
Cotton yarn	6,079,016 ...	5,687,133 ...	... ...	391,883
Manufactures	22,547,752 ...	22,406,647 ...	... ...	141,105
Iron and steel	9,581,523 ...	9,229,245 ...	... ...	352,278
Linen manufactures	3,042,418 ...	2,899,040 ...	... ...	143,378
Silk manufactures	494,217 ...	838,032 ...	344,815 ...	...
Woollen and worsted manufactures	9,103,297 ...	9,604,585 ...	501,288 ...	...

The following are the totals of wine imported and entered for home consumption respectively in the five months ended May 31, 1870 and 1871 :—

	Imports. Quantities. 1870. gals.	1871. gals.	Value. 1870. £	1871. £
Red wine	3,267,233 ...	3,616,522 ...	845,696 ...	1,138,205
White wine	3,911,175 ...	4,196,569 ...	1,238,626 ...	1,827,777
Total of wine	7,178,408 ...	7,813,091 ...	2,084,322 ...	2,965,982

Entered for Home Consumption.		1870. gals.	1871. gals.
From France	Red	1,216,709	1,421,854
	White	495,663	282,532
From Portugal		1,182,964	1,306,932
From Spain	Red	336,321	355,773
	White	2,317,581	2,443,577
Other countries		692,908	909,560
Total	Of wine	6,242,146	6,720,228
	Red	2,790,899	3,148,010
	White	3,451,247	3,572,218

The following is an account of the quantities of certain principal articles of imported merchandise (subject to duties of Customs) remaining in the bonded warehouses of the United Kingdom on the 31st May, 1871, compared with the quantities in warehouses on the 31st May, 1870 :—

	1870.	1871.
Cocoa ..... lbs	6,755,257	9,241,697
Coffee	48,875,178	57,926,423
Fruit—Currants ..... cwts	179,656	148,724
Raisins	76,072	56,856
Spirits—Rum ..... proof gallons	*5,288,710	*5,985,481
Brandy	*8,759,831	*13,445,925
Sugar—Refined and candy ..... cwts	109,658	117,239
Unrefined	2,265,793	2,201,204

BUSINESS NOTES.

THE COLLECTION OF THE INCOME TAX.—Along with a good many others we were a good deal surprised to hear in the recent Budget discussions that, notwithstanding Mr Lowe's reforms in 1869, there is still a large portion of the income tax which remains as an arrear from one year to another. We calculated that an addition of 2d to the income tax, yielding 3,000,000*l*, would give Mr Lowe 337,000*l* more than he wanted, his deficit being only 2,713,000*l* ; but the reply was that 2d additional would just be enough because of the

arrears. An additional penny, it was said, is not so productive in the first year as it is afterwards, because there is no arrear upon it from a previous year. Thus Mr Lowe's reform is incomplete, though matters are not so bad as they were when one-half of the taxes did not become due till April. But why should there be *any* arrears? Most business men would conclude that there should be no difficulty in getting in before the 31st of March money which is due on the 1st of January, especially where the collector is the Government, with special powers to enforce payment which ordinary people do not possess. If the money is not got in we can only imagine that there is some inexcusable defect in the machinery of assessment and collection, which gives rise to delay, and, we fear, to ultimate loss. There is direct evidence however that there is no inherent difficulty in the collection, and that the income and assessed taxes might really be paid in full long before the 31st of March. In 1865, there was considerable discussion on this very point, and a return was then obtained,* which demonstrates that in Scotland, where the system of making the income and assessed taxes fall due on the 1st of January was then at work, it was not only found possible but easy to obtain the money long before the 31st of March. We beg to call the attention of Mr Lowe and the Department of Inland Revenue to this return. Of the total estimated charge for land assessed and income taxes for the year 1864-5, amounting to 858,850*l.*, the sum of 849,966*l.*, or about 99 per cent., was actually collected, and received into the Exchequer before the 1st of March. Of the remainder the sum of 4,384*l.* fell to be deducted for appeal and relief lists, so that only 4,500*l.*, or less than ½ per cent., remained outstanding on the 1st of March. The collection was in fact "closed" at that date everywhere throughout Scotland, except in the following places:—Ayr and Arran, Lanark and Dumbarton, and Stornoway: and in these three Districts the amounts collected were respectively 99·71 per cent., 98.06 per cent., and 81.38 per cent. of the whole charge. Practically therefore, even in the districts where the collection was open, the money had been got in—the whole collection in Stornoway, where nearly 20 per cent. remained out, being only 1,233*l.* The return moreover is in considerable detail, showing in respect of each county how much was got in before the 3rd, the 10th, the 17th, the 23rd, and the 31st days of January. Substantially all the money was well got in before the latter date, the only districts where the collection was not closed having nevertheless yielded the following percentages of the entire charge:—

Edinburgh	98·44	per cent.
Dumfries	98·16	—
Ayr and Arran	97·92	—
Berwick and Peebles	95·40	—
Lanark and Dumbarton	90·84	—
Orkney and Zetland	90·16	—
Inverness	88·17	—
Stornoway	81·38	—

The Inland Revenue Department therefore should be called on to explain why it is impossible to do in England in three months what is done north of the Tweed in two, or even in one month. The only suggestion of an explanation that has been made to us is that the collections in England are larger, but that is really no answer, as collection is only a matter of machinery and the collectors should be proportioned to the number of accounts. In point of fact however, Ayr, Lanark, Perth, and Edinburgh, are quite big enough to be average English counties, and the size of the collections cannot be the reason. If Mr Lowe had only thought of it, he might have relied over a good part of his difficulty this year by repeating the experiment of 1869, with this difference—that he would only have been advancing the collection, whereas before he altered the legal date of payment. But the opportunity may again occur.

* No. 225, Sess. 1865.

The Debtors' Act.—According to the report in the *Times*, Mr Justice Willes has taken a truly alarming view of the functions of the Judges under the Debtors' Act of 1869. His Lordship indeed said that the Act ought to be amended; but in the meantime he considers it no part of his duty to conduct an inquiry, which will be essential in many cases if the Act is not to produce great mischief. The Statute abolishes imprisonment for debt as such, but permits a special award of imprisonment to be given by a Judge where evidence is produced that the bankrupt has means and refuses to pay. It is on this point that the action of the Judges, if they follow the course indicated by Mr Justice Willes, will break down the Act. When the examination of a debtor as to his affairs was proceeding, Mr Justice Willes, as the report states, "after "patiently listening for some time, said such a system could "not be permitted, and never was intended by the Legisla- "ture. The Judges were not to be turned into accountants. "The Act could not have meant that a Judge sitting at "Chambers was to enter into the accounts of a debtor to "ascertain whether he was able to pay." He afterwards said, "he could not listen to such matters, for if he did all other "business would be delayed; indeed it could not be heard." It does not appear that in the numerous cases which have yet come before the Judges there has been absolutely any refusal to proceed, an order of some sort having been made even in the case in which Mr Justice Willes made these strong remarks; but the disinclination of the Judges to deal with such matters will very soon be found out, and be taken advantage of by debtors. In spite of the strong remarks made, we do not see how a Judge, who is ordered by Statute to decide a certain point, can decline the necessary investigation; but the best goodwill on the part of overworked men will not enable them to get through complicated cases of account, which must therefore stand in each other's way, and in the way of the remaining business of the Judges, so causing that delay which will be the first object of an unwilling debtor. There are plenty of defects in the bankruptcy and insolvency legislation of 1869, without this additional mischief. The remedy suggested is that the examination of the debtor should take place before one of the Masters; but probably it would be best to send all such questions before the Bankruptcy Courts, who have a staff of registrars, and are constantly engaged in similar inquiries. To decide on minute matters of fact when there is no question of law at issue at all can certainly be no work for the Judges of our Superior Courts.

Bank Customers with several Accounts.—The question which was lately before the Chief Judge in Bankruptcy as to the effect of divisions in the account kept by a customer with his bankers when there is a credit balance on one division, and a debit balance on the others, has now been heard by the Lords Justices of Appeal in Chancery. What we believed to be the most erroneous decision of the Chief Judge in Bankruptcy has been maintained, and it is full of peril to bankers. The case is named "*ex parte* Kingston *re* Gross," and the dispute arose in the bankruptcy of Gross, who was a solicitor in Ipswich, and treasurer of the county rates as well as of other county funds. It was his habit at one time, according to a not infrequent custom with gentlemen in his position, to pay in some of the county moneys to his private account, which he kept with the National Provincial Bank, and defray the expenditure by cheques on the same account; but in Feb., 1869, he adopted the plan, which is also not infrequent, of still further dividing his account—the divisions then becoming, besides his so-called private account, "Police" Account, "Superannuation Fund" Account, "Special" Account, "E. G." Account, and "B. B. C." Account. Upon his bankruptcy, in July, 1870, it appeared that if all the divisions were treated as one account, there was a balance of 377*l.* in his favour which the trustee claimed, but some of them were deficient, while others showed a surplus, and the Justices of the county insisted that the balances at the credit of the "Police" and "Superannuation Fund" Accounts were balances upon trust accounts where the bank had notice of the trust, and that the bank must account for them to the Justices. On this footing the bank would have a large sum to pay to the Justices, and would claim against the bankrupt estate for the deficiency on the other accounts. The decision of the Lords Justices, as of the Chief Judge in Bankruptcy, is in favour of the County Justices. The bank, it is held, had notice of the trust nature of one or two of the divisions, and could not apply the surplus upon them to the deficiency upon the other divisions. Bankers will at once perceive the perilous nature of this judgment. It is very convenient for their customers to make several divisions of an account, and there is no practice more common; but the banker becomes at once most insecure if Judges are to declare *ex post facto* that the money in some of them can be earmarked as trust money, and that he can no longer treat them as one account. The judgment will certainly go a long way to impede the ordinary business of bankers, who will find the mechanical difficulty of maintaining the unity of an account while giving the customer the

facility of divisions most troublesome, if not impossible, to overcome. The decision however will be so mischievous in its effects, and involves matters so important, that we trust the opinion of the House of Lords will be taken, notwithstanding the confidence of the Lords Justices in the equity of their ruling. Lord Justice James was pleased to say "that the appeal had been argued with a courage, a "tenacity, and a learning which it was, in his judgment, "melancholy to see thrown away upon a case so utterly hope-"less." But in fact the Lords Justices can hardly have considered the case of the appellants at all. It is easy to say that they had notice of the moneys being trust-moneys; but as bankers well know, such notice is not given by the mere division of a customer's account. The only fact they are cognisant of is the customer's convenience, and they have nothing to do with his private business arrangements with any of the people on whose behalf he receives and pays money. For aught a banker could know he might have heavy claims against the County Justices or others at the very time the county account was in credit. In any case they were not custodians of the money, for their customer could operate on it by cheque at any time. It is also a telling argument against the supposed trusteeship, that if a trust account had been overdrawn, the *cestui qui* trust, who are now so forward to claim the credit balance, would have been quick to repudiate any debt. The whole mischief arises from the laxity with which public accounts are controlled. The County Justices should never have permitted a single treasurer, however respectable, to have the uncontrolled disposal of their cash; but if public bodies are lax they should bear the penalty themselves, and not be enabled to visit it on the unfortunate banker of the man whom they have erred in trusting.

THE B LIST OF CONTRIBUTORIES. — Vice-Chancellor Bacon, *re* the Oriental Commercial Bank (Limited), has confirmed the judgment in former cases by other Equity Judges in favour of holding shareholders on the B list of contributories only liable for the debts which were in existence at the time they transferred their shares. He has also held that in estimating their liability, a deduction must be made from the debts to the extent of the contributions by the A shareholders. This in effect establishes the rule that the liability of the B shareholders is only supplementary to the liability of the A shareholders—that they are only liable in respect of certain debts, and only for these after the shareholders primarily liable have been exhausted.

LAFITTE AND CO. — The Lords Justices of Appeal in Chancery have now given their judgment in the well-known case of the claim of M. Charles Lafitte against the limited company of Charles Lafitte and Co., to whom he sold his business. The opponents of this claim are now virtually the National Bank, in virtue of their compromise in the suit of "Gray *v.* Harvey Lewis and others," by which to free themselves from an alleged liability to refund 230,000*l* to Charles Lafitte and Co. they undertook, among other things, to satisfy any claim which M. Charles Lafitte could substantiate against the limited company. The Lords Justices have decided wholly in favour of M. Charles Lafitte, holding that the business has been sold, as alleged, for 100,000*l*, of which 10,000*l* had been paid before the suit commenced, 65,000*l* more was to be paid in cash, and 25,000*l* in 2,500 shares of the new company on which 10*l* each had been paid. It is useless going into the details of a case which has been so often before the Courts, but the Lords Justices were quite decided in rejecting the only two reasons urged against the claim—that there had been misrepresentation in the prospectus of the limited company, and that the business had not in fact been transferred. As to misrepresentation, if any, there was no proof that M. Charles Lafitte had misrepresented anything in treating with the company, and the agreement could not be rescinded in consequence of any misrepresentation in the subsequent prospectus of that company. But the Lords Justices did not think that any such charge of misrepresentation could properly be brought. As to the transfer the thing was not complete in this respect, that the name of the limited company could not be used in Paris until certain requirements of the French law had been complied with; but so far as the old firm could complete the transfer it was completed, and they had only used its name as trustees for the new company. The judgment was that "the claim must be admitted for 50,000*l*, with interest "at 5*l* per cent. from the 24th of April, 1866; 15,000*l*, with "interest from four months later, and 2,500 shares in the "company, credited with 10*l* per share paid up. M. Lafitte "must account for the value of the premises in Paris, and he "must have his costs at the Rolls. The liquidator must "elect within fourteen days whether he would treat M. "Lafitte as the trustee of the company in respect of the "business carried on in Paris since May, 1866."

THE JUDGES AND THE INDIAN GOVERNMENT.—We observe with some satisfaction that the Lords Justices of Appeal in Chancery have reversed the judgment of Vice-Chancellor Malins in the case of the Oriental Inland Steam Company *v.* the Secretary of State for India. The Vice-Chancellor, as we thought, went out of his way to attack the conduct of the Indian Government in resisting the plaintiff, which appeared to be quite defensible, and was at any rate beyond the scope of any Judge's comments, because it was the act of a co-ordinate officer of State, entrusted quite as much as the Judge with duties on behalf of the public. The Lords Justices decide that the allegations in the bill are not sufficient, that no contract was shown between the plaintiff and defendants sufficient to justify the plaintiff's claim of damages for breach of it, and that the Secretary of State for India was bound to look after the public interests committed to him. We need not go into the details of the case again, but the different views taken by the Judges of the conduct of the Indian Government is an additional proof of the absurdity of this setting up as critics of Government policy instead of deciding on the facts before them.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending June 3 :—

	Receipts of Week Ending June 3.
	£
Customs	317,000
Excise	531,000
Stamps	152,000
Taxes	14,000
Income tax	58,000
Post Office	50,000
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	396,252
Total	1,518,252

The total receipts of the previous week were 2,009,342*l*.

The Exchequer issues of the week on account of expenditure were 1,194,014*l*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	nil.
Supply services	1,194,014
Telegraph services	nil.
	1,194,014

During the week the cash balances have increased in the Bank of England and decreased in the Bank of Ireland as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on May 27	3,813,690	1,045,525	4,859,215
— June 3	4,088,450	973,725	5,062,175
Increase	274,760	...	202,960
Decrease	...	71,800	...

The other receipts to date were 13,231*l*, the other payments were 134,509*l*.

THE PAYMENT OF THE DEBT.

TO THE EDITOR OF THE ECONOMIST.

SIR,—Mr Lowe's excellent speech, in reply to Mr White, on Friday night, appears to contain one very important fallacy, which if true would diminish materially the force of his own arguments.

He is reported to have said :—"That by the payment of "debt the resources of the country remain the same, neither "*more* nor less." If this were really the case, what advantage would there be in discharging the debt? But it is not so.

If persons who habitually spend the whole of their income are called upon to contribute to the State a larger sum than

before for the purpose of paying off the debt, they can only do so by economising in their expenditure, and saving the money by diminished consumption—probably of wine, sugar, spirits, tobacco, or other superfluities. The money thus saved is paid to the proprietor of the debt, who must find other means of employing it, and probably lays it out in a loan to a foreign country, which thus becomes tributary to England; or he employs it in some remunerative work at home, by which the wealth of the country is increased, the wealth-producing powers of the persons who had contributed to the payment of the debt remaining just the same as they were before.

The country is therefore richer by the savings of the tax-payer, which have been invested by the receiver either abroad or at home; and in the event of our going to war, the owner can sell his foreign stock, or whatever property he has created at home, and lend the money to the English Government again.

In fact the debt can only be paid off by savings, and those savings, invested in some form or other, remain available for future expenditure when wanted. If it were not so, we should undergo all the inconvenience of the additional taxation to remain as a nation no better off than we were before.—I am, Sir, your obedient servant, THOS. N. HUNT.

London, 5th June, 1871.

Agriculture.

CROPS AND PROSPECTS.

THE present season has been a somewhat disappointing one. In the autumn, from its dryness, the land was remarkably well tilled, and the wheat sown with every advantage save moisture, of which there was a deficiency. During the winter there appeared to be a fair, and, in many districts, a good plant, until the week of very severe frost that occurred just after the disappearance of the great fall of snow, then the wheat received injury from which it never recovered. In April we met a large gathering of midland counties farmers at the Earl of Aylesford's shorthorn sale, and every farmer spoke unfavourably, and some gloomily, of the then state of the wheat crops.

Since that time there has been some rain, and although the weather during the greater part of May has been cold and ungenial, it has been very dry, so that now in June a great improvement has taken place. Save on the best farmed lands the wheat plant is thin, but in colour and vigour of growth the progress has been very considerable. The wheat harvest will most likely not be very early, but with reasonably fine weather, and some rain between now and the middle of July, we incline to the belief that there will be no serious deficiency. Barley and oats are better than the wheat, and the heavy rains which fell during the last week of April will probably become average crops of those grains. Beans and peas are generally good. Notwithstanding the deficiency of rain during May, there has been more progress in all the arable land crops than might have been expected. There has been none of that scorching sunshine which last year at this season did so much to stunt vegetation. The clover and rye grass crops, where there is a plant, will also be abundant, and this is well, for at present the meadow land scarcely promises an average crop. And perhaps the hay crop is the one about which there is just now the greatest anxiety, for so short was last year's crop, so severe the past winter, and so completely are the old stocks of hay used up, that the hay prospects have become of great interest not merely to farmers, but to all that numerous portion of the public who have animals to feed whether for profit or pleasure.

The grazing grounds, especially in the Midlands, are carrying a fair amount of stock, and the animals are generally doing well. Perhaps cattle have seldom been put out on the 1st of May in lower condition than vast numbers of them were this year, but in the five weeks which have since elapsed, we have noticed an improvement in their condition—in some instances perfectly marvellous. There is a good stock of young cattle growing up, but it is quite hopeless to expect that our own breeders and graziers can supply the demand for meat existing in this country. The absurd stories as to disease, and the interested clamour on the part of farmers to increase or uphold restrictions on or obstacles to the importation of foreign live stock, are at once unworthy and needless. The people will not submit much longer to be deprived of their legitimate meat supplies by braggadocio tales of Protectionist farmers and landowners, who really have real cause for desiring protection against foreign stock. Every farmer who has sufficient capital to manage his farm advantageously, who will attend to his business, and whose landlord will grant him reasonable tenure and terms, may make his way without much difficulty.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, May 31.

The greater part of the Ministry of Finance is burned down. The public are assured that the "Great Book"—that is, the mass of account books (some thousands) and of documents relative to the Public Debt—were almost miraculously rescued. The statement is doubtless true; and even if it were not, the Government would probably have thought it a politic one to make, in order to discourage attempts at forgery. But apart from the Great Book, the destruction of papers in this Ministry is terrific. In that establishment were concentrated all the pricipal documents relative to taxes, expenditure, pensions, forests, savings' banks, Customs, railways, &c., &c.; and a great many also that concerned departments and communes. And all are gone. It will cost time and labour to replace those that are absolutely indispensable for the despatch of current business; whilst as to those relative to past transactions, the substitution of others will present vast and in some cases insurmountable difficulties. In England, the burning of the Treasury would be a grave matter; but that of France is much more so, owing to its immense ramifications and centralisation. The destruction of the Hotel de Ville is almost as great a disaster as that of the Finance department. Its income and expenditure were superior to those of many a State, its debts were of magnitude, its traffickings in houses and building ground were vast, and its building and other operations extensive; and all its papers, books, accounts, contracts, and debentures are in cinders. The Bank des Depots and Consignations, which, with all its contents, is also burned down, was charged with various public services,—the reception of funds which courts of justice, communes, departments, and establishments may have to lodge, the purchase of *rentes* for the Government in diminution of the National Debt, the concentration of savings' banks deposits, the payment of certain pensions, and other matters. This bank is one of the oldest institutions in France, dating from 1578, and the disappearance of its books and papers must cause immense inconvenience.

In dealing with private property it is to be noted that the incendiaries appear to have aimed specially at the great establishments of ready-made clothes and linen—a branch of industry which of late years has taken extraordinary development in Paris. Some of these houses are burned down, even though they did not stand in streets in which there was fighting. Apart from these establishments, shops and houses appear to have been fired for no other reasons than that they happened to be near barricades. At La Villette a number of warehouses, all of them containing masses of goods, are, with their contents, burned down, and so is the Granary of Abundance in which there were much grain and other stores. It is singular that in the 9th arrondissement, in which are some of the great banks, Rothschild's, Hottinguer's, the Comptoir d'Escompte, the Société Générale, and in which splendid shops and houses abound, no attempt was made to light fires, and yet the district was covered with barricades, and was the scene of fearful fighting. Though too the burning of theatres entered into the plan of the combatants, no attempt was made to get up a conflagration in the opera, which stands in the district, and yet it is the most inflammable structure in Paris. Shells, to be sure, were thrown at it from a distance, but none touched it. Of the three great theatres set on fire, one—the Porte St Martin—was private property and is entirely destroyed; the two others—the Chatelet and the Lyrique—belong to the City of Paris, and are only partially injured. Railways have escaped better than was to be expected, but the Lyons station is burned. It is not true, as reported, that the goods station of the Eastern line is destroyed. As to the money value of the public and private buildings ruined or damaged by fire, it has not yet been estimated; but it must amount to several scores of millions (francs).

Among the persons put to death by the Communal bands, was M. Jecker, the Swiss banker of Mexico, whose traffickings in Mexican bonds with the late Count de Morny, led to the war of France against Mexico. What reason there was for killing him is not known.

The Versailles troops shot without mercy every member of the Commune, every official of the Commune, and every sympathiser with it they could put hands on. It was said that M. Jourde, its Minister of Finance, was one of the very first victims; but we are told that he was arrested yesterday whilst contemplating the ruins of his Ministry. He has no doubt been shot before now. After what has taken place, it is not easy even to be just to the Commune men; but let us record that this Jourde had the handling of large sums of money in a time of unexampled confusion, and that he presented his accounts with greater promptitude and greater clearness than were ever before witnessed in France on any occasion, or on any matter whatsoever. Assuming that the accounts were exact, and that he had vouchers for each item, they do him

credit, and will form a curiosity of the financial history of revolutions. In the discussions of the Commune too, this same man displayed common sense, which distinguished him from his fellows—showing, in a few words, the *financial* impracticability or inopportuneness of certain socialist projects, and the necessity of modifying others. I never saw him in my life, and before the Commune arose his name was unknown to me; but I cannot help thinking that if French statesmen had deigned to confer with such men as he, had endeavoured to satisfy the legitimate economic demands of the class they represent, and had shown respect for its political convictions—the slaughterings and burnings of the last few days would not have taken place.

The Bank of France was closed the greater part of last week, but it re-opened its doors on Monday. Almost all other banks were also closed, or only open *pro forma*. In fact, shot and shell flew so furiously that it was not safe to be in the streets.

Now that Order is restored, the question presents itself—What will the Government do with respect to commercial bills unpaid since the outbreak of the war, and to rent unpaid also? By the law it has made the Assembly pass, the payment both of bills and rent can be exacted; but small traders in all directions declare that having done no business since August, and having eaten up almost all their savings, they have no money; and that if they are pressed, they must become bankrupt. As to the working classes, to call on them for nine months' rent is purely and simply extravagant.

In a few days the Versailles Government will, it is expected, present to the Assembly a Bill for raising a loan of two *milliards* (80,000,000*l*) to meet the first requirements of the Treaty of Peace; but whether the loan will be in 3 or 5 per cent. stock is not yet known – most probably the former. As part of it will have to be subscribed abroad, measures will have to be stipulated for paying the dividends in foreign coin, not in the inconvertible paper of France. The Assembly will also have to deal with the two loans of 1870—that issued in Paris, and of which all the instalments are not yet paid up, and that obtained in London by the delegation of Tours.

M. Ernest Picard, Minister of the Interior, is, *dit-on*, to be appointed Governor of the Bank of France. He is a lawyer by profession, but is said to be expert in Bourse transactions.

Like the Bank, the Bourse was closed last week. It was re-opened on Monday with a scanty attendance of speculators and of stockbrokers, and the business done was little. But with the re-establishment of Order, people will return quickly to Paris, and transactions will no doubt become active. The principal quotations stand thus:—

In railway obligations, and even in those of the City of Paris, there have been some dealings. The latter have been more offered than demanded.

The re-establishment of tranquillity will permit the great companies to hold their annual meetings, That of the Northern Railway is already fixed for the 30th June.

The Lombard Railways Company is to issue 750,000 new obligations.

The Italian Government announces the payment of coupons of the Pontifical loans of 1857, 1860, 1864, with deduction of the taxes of 8·80 per cent. for those due in 1870, and of 13·20 per cent. for those of 1871.

PARIS, June 7.

What would be said and done in England, if, after disasters unexampled in the national history, Mr Gladstone and Mr Lowe were to propose taxes which would manifestly render them personally thousands of pounds the richer per annum, and would at the same time damage seriously certain branches of industry, and be a burden to the whole community? Yet, in this poor, wretched France, only just emerged from an appalling foreign war, and a more appalling civil one, which have left her mutilated and half ruined, and with pecuniary obligations of fearful amount, her Prime Minister and her Finance Minister make known that they are determined to modify the Customs' tariffs in a Protectionist sense; and one is an owner in coalpits and ironworks, the other a cotton spinner! Is it then true that in this land every man, whatever his political colour, seeks, in troubled times as in calm, one thing, and one thing only—his personal interest? Alas! yes, it is true. The mode of seeking alone differs: for some it is barricades and arson, for others Customs' duties.

M. Thiers and M. Pouyer-Quertier begin by proposing the imposition of a duty of 20 per cent. on the raw materials of textile industries—silk, cotton, wool, flax, hemp. That accorded, they will, we may be sure, tax heavily iron, coal, and other foreign products; in a word, will restore in all its vigour, and even with aggravation, the Protectionist system which the Empire, by its Treaties of Commerce, endeavoured to render supportable to the mass. Under this system, foreign competition being shut out, it is quite certain that ironmasters, coalpit owners, and manufacturers, will be able to enrich themselves with great rapidity. But it is not the less true that the expense of living for all the nation will be increased, and that for working men of all kinds, the quantum of work will diminish, since there will be less demand for their products, the inevitable result being widespread political disaffection, followed at no distant date by revolutions more terrible, it may be, than those just passed through. To such considerations, however, French statesmen are indifferent, for they are incapable of foreseeing the consequences of their acts; and even if they did foresee them, they would, with the flippancy and selfishness of their race, merely say *apres nous, le deluge*.

On learning the resolution to impose a duty of 20 per cent. on silk, the city of Lyons sent a deputation to Versailles to protest energetically against it. Lyons consumes, it said, about 380,000,000f worth of raw silk annually, of which only about 100,000,000f comes from France, and consequently the manufacture of silk fabrics—the most important industry in France after agriculture—would suffer dreadfully. But M. Pouyer-Quertier intimated that remonstrance was useless, but undertook to give drawback on fabrics exported. The consumers of wool on their part have also protested, and have received a similar answer. It is to be presumed that Havre will raise its voice against the taxing of cotton; and Bordeaux will no doubt show that the less cotton, silk, and other foreign products come into France, the less wine she will sell abroad. Although silk is not a bulky article, it is on account of its high value, a not unimportant element in maritime carrying. On that account the Society for the Defence of Commerce of Marseilles has complained of the proposed duty.

What was said last week on the subject of a new loan is correct. A Bill has been presented to the Assembly authorising the Government to raise 2,500,000,000f (100,000,000*l*) for paying part of the indemnity to Germany, and making up the deficits in the Budgets of 1870 and 1871. The conditions on which the issue is to be made will probably be published to-morrow.

M. Victor Lefranc, a lawyer, has been made Minister of Commerce. M. Picard, another lawyer, is definitively nominated Governor of the Bank of France. In the country advocates are considered to be fit for anything. M. Gambetta, one of the tribe, did not hesitate to take the command of armies. M. Leon Say has been appointed Prefect of the Seine. He at least is the right man in the right place. He is an economist of considerable repute, has for many years been an active director of the Northern Railway, and engaged in other commercial operations, and in Haussmann's time paid special attention to the finances of the City of Paris.

From a letter published by the Marquis de Pleuc, sub-Governor of the Bank of France, it appears that the precise sums which the Commune extracted from that establishment were 9,401,000f, a balance due to the City of Paris, and 7,290,000f which it was authorised by the Government at Versailles to advance. It sustained no loss of any kind, though more than once threatened by armed bands.

Citizen Jourde, the Finance Minister of the Commune, has, wonderful to relate, not yet been shot. Some of the newspapers have published an account, said to be given by him, of the Commune's receipts and expenses, and it has been gravely reproduced by London journals. But it is fantastic. The figures in it do not tally with those he published for the first month of his management, and represent the levy on the Bank of France to be larger than it was in reality. There is thus far no other account of the finances of the Commune than that given in the ECONOMIST.

The Western Railway Company has recommenced paying the interest on bonds, which were interrupted by order of the Commune.

The annual meeting of the Southern Railway is fixed for the 28th.

The Messageries Maritimes (ex-Imperiales) is to pay from 10th June on account of dividend of 1870 12f 50c on old shares, and 6f 25c on new.

Genoa letters state that two new joint stock banks have just been established in that city, and that three others are in course of formation.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs a copy of a Royal Swedish decree, declaring increased import duty chargeable on the following articles on and after the 26th ultimo:—Arms, 10 ore per lb; oranges, 10; lemons, 10; dried lemon peel, 10; dates, 20; fennel, 10; figs, 20; fruits and berries, not specified, dried, 10; vegetables, dried, 10; ginger, dried, 10; cinnamon and cassia lignea, 35; capers, 35; cardamom, 50; caviar, 75; coriander, 10; currants, dried, 10; bay leaves and berries, 5; almonds, 15; nutmeg, dried, and nutmeg flowers, 50; cloves, 20; nuts, cocoa-nuts, hazel-nuts, walnuts, other kinds, 10; pepper, all kinds, 12; peach kernels, 15; plums, prunes, &c., 8; bitter oranges and peel, 10; raisins, 10; tea, 60; tobacco, unmanufactured, 20 ore per lb.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

An Account pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 7th day of June, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	39,558,805	Government debt	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	24,558,805
		Silver bullion	...
	39,558,805		39,558,805

BANKING DEPARTMENT.

	£		£
Proprietors capital	14,553,000	Government securities	12,971,405
Rest	3,098,179	Other securities	16,684,209
Public deposits, including Exchequer, Savings Banks, Commissioners of National Debt and [illegible] accounts	2,690,194	Notes	15,413,435
Other deposits	17,890,496	Gold and silver coin	660,422
Seven-day and other bills	497,602		
	45,729,471		45,729,471

GEO. FORBES, Chief Cashier.

Dated the 8th June, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	24,642,972	Securities	30,102,614
Public deposits	2,690,194	Coin and bullion	25,219,227
Private deposits	17,890,496		
	55,221,662		55,321,841

The balance of Assets above Liabilities being 3,098,179*l.* as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase.	Decrease.
	£	£
Circulation	...	175,174
Public deposits	151,110	...
Other deposits	...	517,706
Government securities	...	...
Other securities	...	611,692
Reserve	374,831	...
Rest	4,999	...
Bullion	529,441	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending June 7.	Week ending May 31, 1871.	Week ending June 8, 1870.
	£	£	£
Tuesday	17,[illegible],000	[illegible],000	11,[illegible],000
Wednesday	14,[illegible],000	13,[illegible],000	10,[illegible],000
Thursday	13,[illegible],000	[illegible],000	15,[illegible],000
Friday	11,[illegible],000	Bank holiday	[illegible],000
Tuesday	14,[illegible],000	[illegible],000	9,[illegible],000
Wednesday	11,[illegible],000	16,172,000	[illegible],000
Total	[illegible],000	[illegible],000	64,751,000

(Signed) JOHN RAY, Clerk Inspector.

Bankers Clearing-house, June 8, 1871.

The total since the 1st of January 1871, is 1,859,818,000*l.* compared with 1,685,103,000*l.* for the corresponding period last year, showing an increase of 174,715,000*l.*

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz.:—

At corresponding date with the present week	June 12, 1861.	June 10, 1868.	June 9, 1869.	June 8, 1870.	June 7, 1871.
	£	£	£	£	£
Circulation, including bank post bills	19,932,980	24,033,685	23,306,718	23,245,021	24,842,972
Public deposits	7,567,503	7,415,041	6,049,901	10,715,594	9,690,194
Other deposits	10,952,235	20,392,549	17,169,319	16,007,418	17,890,496
Government securities	9,888,007	13,294,557	14,148,276	13,018,575	12,971,405
Other securities	19,586,813	18,850,214	17,331,344	19,014,016	16,684,209
Reserve of notes & coin	7,142,814	14,068,975	10,788,398	12,789,489	16,073,857

Price of Consols	90½ xd	94½ xd	92½ xd	92½ xd	91½ xd
Average price of wheat	54s 5d	70s 8d	45s 5d	45s 3d	60s 0d
Exchange on Paris (short)	25 32½ 40	25 15 22½	25 25 35	25 17½ 27½	...
— Amsterdam ditto	11 18 18½	11 18 18½	12 2½ 2½	11 18½ 18½	11 19½ 12 0½
— Hamburg (3 months)	13 9 9½	13 9½ 10½	13 12½ 12½	13 10½ 10½	13 11½ 11½
Clearing-house returns	...	61,251,000	61,808,000	64,751,000	88,586,000

In 1861, there was little demand for money, except for Stock Exchange purposes, but the withdrawals of bullion for America continued on a considerable scale.

In 1868, the period of 2 per cent. continued. The Austrian Government had just decided to tax the coupons of the debt.

In 1869, the Bank rate was reduced from a half per cent., and a farther reduction was anticipated, on account of the rapid accumulation of money and the few outlets for it. The discredit of the French Government in consequence of the recent elections was increasing.

In 1870, the resources of the Bank were increasing. A Peruvian loan of 10,000,000*l* effective had just been brought out in Paris and London, and was chiefly subscribed for in Paris. The Education Bill was meeting with great difficulties in Committee.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,914,578*l*; in 1868, an excess of 1,452,335*l*; in 1869, a deficiency of 162,025*l*; and in 1870, a deficiency of 2,946,698*l*. In 1871, there is an excess of 1,206,287*l*.

Discount and Money Market.—We have still the same monotonous report of dulness in the money market to make which we have made for the last two or three weeks. Money continues to accumulate, and the condition of things thus brought about is so abnormal as almost wholly to neutralise the apprehensions entertained about the coming French demands, though these are felt a little, since but for them the Bank rate would undoubtedly have been lowered ere this. There are only nominal changes in the quotations from last week.

Though the course of business has not been sensibly affected there has been a good deal of speculation as to the coming French loan, the preparations for which are reported to be well forward at Versailles. As the time of issuing the loan draws nearer, we find that the opinion is not so firmly held as it was a week or two ago, that the loan would have comparatively little effect on the money market. The inclination now is to the opinion which we have always insisted on, that any large loan operation must have a sensible effect. This will be the case, although, as is feared, the terms of the issue should be so high as not to find much favour in London, where there is a great deal of distrust concerning the French Government. If the money is mainly subscribed in France itself, a large part of the French floating capital which is in London, or invested in Treasury bonds or bills of foreign Governments, will have to be realised, and the demand thus caused will carry off some of the surplus from Lombard street. By the same operation the foreign Governments whose credit is so largely sustained by Parisian capitalists will be weakened, and their securities lowered in value; and this in turn will cause some additional pressure in the money market—bankers and others who have made advances requiring additional cover. The payment instalments, besides having the usual effect of any movement in causing pressure, will probably be more felt by the locking up of a part of the amount received in Berlin. Some of the money paid will certainly be used to replenish the reserve which the Berlin Government has always kept in cash, and which it will probably increase so as to be

in proportion to the estimated requirements of Germany, and not of Prussia only. It can hardly be doubted therefore that a large loan operation by France will have a sensible effect, though it may be less than was at one time apprehended because of the extraordinary events which have postponed the operation, and led to the present extraordinary accumulation of money.

The changes in the Bank return this week are again in the direction of the last few weeks, and the Bank is stronger. The bullion has increased 374,831*l*, the total now being 25,219,227*l*; the reserve of notes has increased 518,265*l*, the total now being 15,413,435*l*, and the private securities have diminished 610,692*l*. The deposits remain comparatively unchanged—Government deposits having increased 451,110*l*, and private deposits having decreased 517,716*l*.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 and 3 months	2¼	2⅜ per cent.
Do 4 months	2⅜	½ per cent.
Do 6 —	3	per cent.
Trade bills—3 months	2⅜	2½ per cent.
Do 4 —	2⅝	3 per cent.
Do 6 —	3¼	3½ per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	1½ per cent.
Discount houses at call	1½ per cent.
Do with seven days' notice	1⅝ per cent.
Do fourteen days	1¾ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	2½	6	2½	...
Vienna	5	5	5	5
Berlin	4	4	3½	3½
Frankfort	3½	3½	2¾	3¼
Amsterdam	3½	3	3¼	3¼
Turin	5	5	5	5
Brussels	2½	4	2½	3¼ ½
Madrid	5	5	5	5
Hamburg	...	...	2¾	3¼
St Petersburg	6	8	5	6

The Bank of Holland has reduced its rate from 3½ to 3 per cent.

THE STOCK MARKETS.—As was the case last week, the general characteristic of the markets this week has been weakness. Except in a very few cases, the actual fall of prices has not been great, but there has been little buying, and any tendency to improvement has at once been checked by the readiness of holders to realise at the present top prices. The apprehensions as to the probable effect of the French demands in causing pressure on the money market and creating securities which will compete with existing issues, have been more operative than ever, and the disposition generally on the Stock Exchange has been to take a depressed view. The continuously unfavourable weather, which throws no little gloom over harvest prospects, is also having some effect, and the labour disputes in the north are also thought to be more and more threatening. The depression has been persistent all through the week, and although prices have been firmer to-day than they were on Thursday, there has been very little business done, and there is no real improvement.

An event of the week has been the issue of a "Submarine Cables' Trust," on the model of the Foreign and Colonial Government Trust. The system introduced by the latter trust is capable of considerable expansion, and should find favour with investors who are willing to risk something, but have not time to look after the detailed adjustment of their securities. Such trusts enable them very easily to distribute their risks.

ENGLISH GOVERNMENT SECURITIES.—This department has shared in the weakness of all the others, and the decline for the week in Consols, after slight fluctuations, is $\frac{5}{16}$ for the account and ⅛ for money. The tone of the market has persistently been weak, and there is little doubt that quietly a good deal of preparation is being made for the probable contingencies of the next few weeks. It is observable too that continental bills have been rather more in demand, from which the inference may be drawn that continental capitalists are also making preparations. During the war there was a good deal of foreign investment in English Government securities, and the realisations which were beginning when the Paris insurrection broke out are apparently being renewed.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	91⅛	91⅛	91⅛	91⅛	par to 5s pm
Monday	91⅛	91⅛	91⅛	91⅛	par to 5s pm
Tuesday	91⅛	91⅛	91⅛	91⅛	par to 5s pm
Wednesday	91⅛	91⅛	91⅛	91⅛	par to 5s pm
Thursday	91⅛	91⅛	91⅛	91⅛	par to 5s pm
Friday	91⅛	91⅛	91⅛	91⅛	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	91⅛ ⅛ xd	91⅛ ⅛	— ⅛
Ditto (July) account	91⅛ ⅛ xd	92 11/16	— 1/16
Reduced 3 %	91⅛ ⅛	91⅛ ⅛	— ⅛
New 3 %	91⅛ ⅛	91⅛ ⅛	— ⅛
Bank Stock, last dividend 4½ %	235 7	235 7	... ...
India Stock, 10½ %, red. at 200 Apl. 30. 1874	206 8	208 10	+ 2
Ditto 5 %, red. at par, July 5, 1880	111¼ 12½	109½ ¾	+ ¼

EXCHEQUER BILLS.—Par to 5s prem.

EXCHEQUER BONDS.—A Parliamentary return has just been issued, stating that during the current financial year 700,000*l* of Exchequer bonds will come due—that sum being payable on 28th March, 1872, and being as yet "unprovided for."

COLONIAL GOVERNMENT SECURITIES.—The following shows the changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	107 8	107⅞ 8½	+ ⅛
Ditto 5 %	100 1	100⅛ 1¼	+ ⅛
New Zealand 5 % Consolidated Bonds	97½ 8½	98 9	+ ½
New South Wales 5 % Bonds, 1888 to 1896	102 3	102 3	... ...
Nova Scotia 6 % Bonds, 1875	104 5	104 5	... ...
Queensland Government 6 % Bonds, 1884-5	110 11	110½ 11¼	+ ⅛
Victoria 6 %	110 11	110 11	... ...
Ditto New 5 %	104 5	104½ 5½	+ ½

FOREIGN GOVERNMENT SECURITIES.—The weakness in this department has been general, though, as will be observed from our usual comparative table, there is no material fall for the week. Egyptian, Turkish, Italian, Spanish, and Argentine, have all suffered in some degree (with the exception of the Turkish 6 per Cents. of 1854 and 1858, which are better), and the new loans—Argentine, Brazilian, and Costa Rica, and Spanish National Lands Certificates—are also lower. The French National Defence loan and Rentes are, however, higher for the week, owing to the more favourable reports of the return to order in Paris, and the tiding over of the difficulty about the Orleans princes. The French National Defence loan has also been improved by the announcement that it is to be quoted and dealt in on the Paris Bourse. One or two Russian stocks are also fractionally better. The weakness of the market, however, has been largely shown in the diminution of business. The state of dealing is not such as to favour a panic in this or other departments, and the depressing influences at work have not so marked an effect as they usually have. The better opinion is that prices must for a little while gradually tend downwards—that no real improvement can take place till the French demands are disposed of.

Nothing more has been heard of the Turkish loan this week. We understand that arrangements were actually concluded, as the telegraph reported last week, but that a hitch has since occurred which will delay or prevent altogether the issue of the loan. It is announced, however, that the Turkish Ambassador in Paris will forthwith proceed with the overdue drawings of the loans which are drawn there, and this has had a good effect.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Argentine 6 %	94½ 5	94½ ¾	— ¼
Ditto 1871	...	2 2½ pm	... ...
Brazilian 5 % 1865	93½ ¾	93½ ¾	... ...
Ditto 4½ %, 1863	82½ 3½	82½ 3½	... ...

Ditto 6 %, Bonds, 1869	54¾ ⅛	54¾ ⅛	− 1/16
Ditto ditto Small Bonds	54¾ ⅛	54¾ ⅛	− 1/16

The Costa Rica loan is now 2⅝ ⅞ prem.—a fall of ¼ for the week, and the Spanish National Land Certificates is at 1 1⅛ prem.—a fall of ⅜.

The Committee of Turkish bondholders of 1862 have received advices from Constantinople from Mr Courtenay that, on the 30th ult., the chief dragoman, on behalf of Her Majesty's Ambassador, presented to His Highness Ali Pasha, Grand Vizier, Mr C. Hanson, Mr Heald, and Mr Courtenay, the English members of the Syndicate for the loan. Mr Hanson stated to his Highness the object of this mission, and wound up by saying that had their mission been in the remotest degree hostile to the Government, he would never have allowed his name to appear as a member of the Syndicate. His Highness replied that it was always the desire of the Imperial Ottoman Government strictly to fulfil its engagements, and that he trusted matters would proceed satisfactorily, and that they should meet with no difficulties on the part of the Minister of Finance, to whom he would speak, and he would arrange, if possible, for a meeting for Saturday.

English Railways.—This market has been the flattest of all the great departments, and there is no real recovery to-day, though prices are steadier. The greatest fall is in Metropolitan, which is 3¼ lower, and Metropolitan District, which is 1¾—both stocks having lately been largely operated in for a rise, and renewed apprehensions of disputes having been felt. But the fall has extended to nearly all the leading stocks—North-Eastern, London and North-Western, Caledonian, Great Eastern, Great Western, Lancashire and Yorkshire, and Brighton. On the other hand there is a new rise in South-Eastern, in which there was a good traffic return, and which will benefit largely by the reopening of communications with France. The unfavourable weather is generally acting injuriously on railways, as it must diminish the summer passenger traffic, and the northern goods lines are threatened by the strikes.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	92¼ ½	92¼ ½	− ¼
Great Eastern	41¼ ½	40¾ ½	− 1
Great Northern	125½ 6½	126 7	+ ½
Ditto A	139½ ½	139½ 7½	+ ½

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending June 3 to 845,168*l*, being an increase of 66,526*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 15,132,422*l*, being an increase of 918,983*l* on the corresponding period of last year. The principal increases for the week are—Lancashire and Yorkshire, 25,118*l*; North-Eastern, 10,991*l*; Midland, 9,088*l*; London and North-Western, 7,109*l*; and South-Eastern, 5,842*l*. In Brighton there is a decrease of 7,212*l*, and in Great Northern, 913*l*.

The following shows the details of the increase or decrease in each case for the week and for the whole period:—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half-year to date. Amount.	Inc. or Dec. as Corresponding per. in '70.

Madras 5 %	106 ½	106 ½	... ...

American Securities.—There is no feature of importance to note in this department. The upward tendency in the value of Five-Twenties appears to be for the moment checked, but the tone of the market is very firm. To-night's closing prices compare as follows with last week's currencies:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	90¾ ½	90¾ ½	... ...

Pennsylvania Gen. Mort. 6 % Bonds, 1910	93 ¼	93¼ ¼	... ...
Virginia 6 % Bonds	56 7	55¾ ½	− 2

Joint Stock Banks.—A steady business has been transacted in the shares of the leading banks, and the result of the week's operations upon prices are favourable. Anglo-Austrian, New Zealand, English, Scottish, and Australian, London Chartered of Australia, and Oriental, have advanced ½; Anglo-Egyptian and City ¼, and Provincial of Ireland (new) 1.

Berlin advices state that a new establishment, entitled the Russian London Bank, is about to be formed, with a capital of 7½ millions of roubles (1,250,000*l*), in shares of roubles.

Telegraphs.—Cable shares have again been in request, and Anglo-Mediterranean have advanced 7. Submarine shares are nominally 10 higher. West India and Panama show a rise of ¾; Anglo-American of ½; China Submarine, Cuba, and Great Northern of ¼; Marseilles and Algeria have declined ½; Silver's India Rubber Works have given way 2½; and Telegraph Construction ½.

A prospectus has been issued of a Submarine Cables' Trust, of which we give an account below in our Notices and Reports. So far as we learn, it is likely to meet with some favour among investors who have already an inclination

towards securities of this description. Although it is quite true that individual investors can distribute their risks more easily in telegraph shares than they could in foreign securities, on account of the small amount of most of the shares, yet this is a sort of labour which many investors are well inclined to have done for them, and for these the trust will be quite suitable. The security has certainly some risk attached to it, not arising from the mechanical nature of the enterprise, which appears indeed not to be risky at all, but from the commercial conditions of success. The exclusive service of a rich commerce is necessary to profit; but every valuable monopoly is sure to be attacked just as the first Atlantic companies had their monopoly invaded by the French Cable Company. There is a margin of difficulty however in attacking a monopoly which will be the protection of existing companies, and unfortunately the profit in several instances has been a good deal smaller than was anticipated, and does not invite attack. This misfortune is not wholly a loss. There will be an interval, during which an increasing profit may be enjoyed with safety. Submarine cables are thus quite suited for a Trust, and investors will only require to keep in view, what was also needed in the case of the Foreign and Colonial Trust, that they are not to *expect* all the reversion which may accrue if no particular investment fails. They must not go into a Trust because of the risk, and then expect they will get a profit which can only arise if the danger feared does not happen in any single case.

The traffic receipts of the Falmouth, Gibraltar, and Malta Company for the month of May amounted to 7,263*l* 15s 4d. The traffic receipts of the British Indian Submarine Company for the month of May amounted to 10,753*l*. The traffic receipts of the Marseilles, Algiers, and Malta Company for the month of April were 813*l*. The traffic receipts of the British Indian Extension Company for the month of May amounted to 4,386*l*. The telegrams on the Great Northern Telegraph lines during the month of May were 37,192; and the estimated revenue was 103,749f (4,150*l*), against 34,005 telegrams, and 92,409f (3,696*l*) in May, 1870. The total receipts for 165,192 telegrams from the 1st of January to the end of May were 467,459f (18,698*l*), and for 126,570 telegrams in the same period of 1870 347,588f (13,903*l*), showing an increase of 38,622 telegrams, and 119,871f (4,795*l*.)

MINES.—The leading changes in British mining shares are a decline of 5 in Devon Great Consols; 3 in East Lovell; 1 in Van; and 3½ in Wheal Bassett. Tin Croft shares have advanced 1; and Herod's Foot 2, In the foreign market we note a fall of 2 in St John del Rey and Eberhardts, and of ½ in Colorado. General mining have risen 1.

The following mining dividends were declared during the month of May:—

Mine.	Per Share. £ s d		Amount. £ s d
Tincroft	1 15 0	.....	10,500 0 0
Minera	3 15 0	.....	6,750 0 0
Devon Great Consols	4 0 0	.....	4,096 0 0
East Wheal Lovell	2 0 0	.....	3,812 0 0
Tankerville	0 6 0	.....	3,600 0 0

Total		.....	41,017 12 6

MISCELLANEOUS.—The changes in this department have been neither numerous nor important, but a fair average business has been transacted. Australian Agricultural shares are ½ better; Foreign and Colonial Trust, and Union Steamship, 1; Peninsular a nd Oriental, and Rhymney Iron (new shares) have given way 2 and 1 respectively.

EXCHANGES.—Bills upon Amsterdam, Rotterdam, Antwerp, and Brussels, have been more in demand since last week.

The tenders for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were—to Calcutta, 300,000*l*, and to Bombay, 10,000*l*. The *minimum* price was fixed, as before, at 1s 10⅛d on all the Presidencies, and tenders on Calcutta and Madras at 1s 10⅛d will receive about 15 per cent,, and on Bombay at that price about 31 per cent. These results show a further increase in the demand for means of remitttance to the East.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—There is no change in our market to report; there is not the slightest demand for export to the continent, and all arrivals go to the Bank, the amount purchased since the 1st inst. being 578,000*l*; on the other hand, sovereigns to the value of 250,000*l* have been withdrawn and sent to the Brazils, the Cape, and Mauritius. We have received about 100,000*l* from New York; 13,000*l* from Melbourne; 7,800*l* from the West Indies—total, 120,800*l*.

Silver has up to the present maintained its value, and is still quoted as 60⅜d per oz standard. We have received during the past week, 137,000*l* Sycee from China; 110,000*l* from New York—total, 247,000*l*.

Mexican Dollars.—The old coinage has experienced a rise to 59⅜d per oz, and the new has slightly receded in value, viz., to 58¾d per oz; the former being in demand for China, the latter being taken for the Straits. We continue to receive various parcels from New York.

Exchange on India for banks' drafts at 60 days' sight is 1s 10¾d per rupee. The India Council drafts were allotted yesterday; the minimum was fixed as before at 1s 10¼d per rupee. Applications on Calcutta at 1s 10⅜d received 15 per cent., and on Bombay at that price about 31 per cent. The amounts allotted were—Calcutta 30,000,000 rs, and Bombay 10,000,000 rs.

India Government Loan Notes are slightly firmer in price. We quote the 4 per Cents., 93¼; the 5 per Cents., 100¼; and the 5½ per Cents., 108.

Quotations for Bullion.—Gold—Bar gold, 77s 8¾d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 74s 0d per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0⅜d per oz std; ditto containing 5 grains gold, 5s 0⅜d to 5s 1d per oz std, last price; Mexican dollars, 4s 10¾d to 4s 11⅛d per oz, last price.

According to the *Gazette* return the imports of the precious metals into the United Kingdom during the week ended June 7 were—gold, 346,418*l*; silver, 241,845*l*. The exports were—gold, 10,550*l*; silver, 149,945*l*.

The sum of 20,000*l* in gold was sent into the Bank to-day.

FAILURES AND EMBARRASSMENTS.—At the examination of Messrs Jeffrey, of Compton House, Liverpool, the statement of accounts showed the following particulars:—

Liabilities to unsecured creditors, 96,719*l* 12s 4d; creditors partly secured, 97,522*l* 13s; less by estimated values of securities, 18,357*l* 10s 2d; other liabilities, 31,068*l* 7s 7d; creditors for rents, rates, taxes, and wages, 3,611*l* 3s 10d; liabilities on bills discounted, 115,056*l* 3s 9d, of which it is expected will rank against the estate, 97,142*l* 6s 9d—total debts, 307,706*l* 18s 4d. The assets are:—By stock-in-trade, at cost price, 95,667*l* 6s 4d, estimated to produce 62,183*l* 15s, since valued at 55,250*l*; book debts, about 59,711*l* 11s 7d, estimated to produce, 33,617*l* 14s 2d; cash in hands, 7*l* 15s; bills of exchange or other similar securities, 3,991*l* 17s 3d, estimated to produce 1,548*l* 2s 6d; furniture, fixtures, and fittings, estimated to produce 10,000*l*; property, 350*l*—total assets, 105,773*l* 11s 8d. The public examination of the bankrupt stands adjourned until the 16th of Nov. next.

NOTE CIRCULATION.—The following statement shows the average position of the note circulation of the country during May, as compared with the previous month. The full details will be found in another page:—

	Fixed Issue. £	Average Circulation. April. £	May. £

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, June 12.

Kent Coast Railway, special.

TUESDAY, June 13.

Great Northern and Western (Ireland) Railway, special general, 15 Park street.

WEDNESDAY, June 14.

African Steam Ship, general, 14 Leadenhall street.
Grand Junction Waterworks, general, 32 Brook street.
Oude and Rohilkund Railway, general, London Tavern.
Welland Railway, general, 2 Queen street place.

THURSDAY, June 15.

Bombay Gas, general, City Terminus Hotel.
Colorado Terrible Lode Mining, general, 2 Winchester buildings.

FRIDAY, June 16.

Bombay, Baroda, and Central India Railway, general, London Tavern.
Carmarthen and Cardigan Railway, general, Great Winchester House.
City Assurance, extraordinary.

NOTICES AND REPORTS.

STOCKS.

Maryland State Bonds.—The holders of bonds falling due in 1870 are requested to present the same for payment at the Farmers' and Merchants' National Bank of Baltimore on or before the 1st of July, on which day the interest will cease. These bonds are payable in the currency of the United States.

Spanish Quicksilver Mortgage Loan.—The second drawing has duly taken place.

RAILWAY COMPANIES.

Bombay, Baroda, and Central India.—The net revenue for the second half of 1870 amounted to 44,035*l*, as compared with 24,023*l* in the corresponding period. Capital receipts, 7,474,217*l*; expenditure, 6,768,258*l*, exclusive of stores.

Union Pacific Railroad—7 per Cent. Land Grant First Mortgage Bonds.—This line extends 1,040 miles from the Omaha Bridge to the Great Salt Lake, and forms part of the Atlantic and Pacific route. The whole is in operation, the net earnings last year being $2,947,862, and a Government grant of 812,080,000 acres of land has been made, upon which a first mortgage of $10,400,000 has been created. Of this, $3,000,000 remaining unissued is now being offered by Messrs Morton, Rose, and Co., at the nominal price of 157*l* 10s per bond, with interest accrued from the 1st April; and the redemption is provided for at par in eighteen years, or previously by market purchases out of sums received by trustees from land sales. The lands already sold have fetched $4½ per acre, and should the balance fetch less than $1 per acre, the redemption of the whole mortgage would be provided for amply. The return to the investor is estimated at over 8⅛ per cent., the principal and interest being payable in New York in currency.

BANKS.

General Exchange Bank.—The liquidators have issued a report, in which they state that there is very little probability of a return being made to the general body of shareholders. Every effort will be made to avoid the necessity of a further call.

Imperial Ottoman Bank.—It is understood that the directors will recommend a payment of 10s per share, making, with the 10s paid in January, a dividend for the year 1870 of 10 per cent., and leaving about 3,000*l*.

ASSURANCE COMPANIES.

London and Provincial Marine.—A dividend at the rate of 10 per cent. per annum is announced.

Thetis Marine.—The directors recommend a dividend of 2s 6d per share.

Universal Marine Insurance.—An interim dividend of 5s per share, being at the rate of 10 per cent. per annum, is notified.

MISCELLANEOUS COMPANIES.

Anglo-American Telegraph.—The 1866 cable has been recovered and repaired.

Anglo-Mediterranean Telegraph.—The total revenue for the year amounted to 78,789*l*, and the working expenses, including 3,333*l* rent of Government cable, to 24,133*l*. The directors have carried to reserve fund for repairs and maintenance of the cables the sum of 7,845*l*, being 10 per cent. of the message receipts, and have written off 1,106*l*, the second instalment of preliminary expenses. After deducting income tax 738*l*, there remains 46,866*l*. Out of this a dividend of 6 per cent. has already been paid, and the directors now recommend a further distribution of 6 per cent., free of income tax.

Berlin Great Market and Abattoirs, Limited.—Mr Alfred Audrey Broad has been appointed official liquidator.

Bombay Gas.—The year's report states that the general revenue account, after payment of the interim dividend of 3½ per cent. on the 1st January, shows a balance of 9,931*l*, out of which the directors recommend the declaration of a dividend of 3½ per cent., free of income tax, leaving 1,531*l*. The new contract with the municipality for the supply of public lights for seven years has been signed.

Grand Junction Canal.—Half-year's dividend, 1*l* 17s 6d per share, free of income tax; balance, 3,891*l*.

Limmer Asphalte Paving, Limited.—Capital, 100,000*l*, in 2*l* shares; first issue, 15,000 shares, of which 4,000 are to be issued to the vendor. The prospectus has been reissued, the former one having been withdrawn, owing to a slight informality.

London Provident Permanent Benefit Building.—The income of the year has been 87,739*l*, or nearly three times as much as the total last year, while the amounts paid to cheques on demand were 76,036*l*, as compared with 23,346*l*. After writing off discounts on redemptions and paying the usual five per cent. dividends and interest, the balance of profit secured stands at 5,573*l*.

Peninsular and Oriental Steam Navigation.—The half-year's report announced that business had been depressed during the period under consideration, and that the receipts had shown a diminution. The reductions in some of the more important items of expenditure had, however, been maintained, and the directors recommended a dividend of 3 per per cent., free of income tax. The opening of the Suez Canal has had the natural effect of introducing a change in the course of passenger traffic to and from the East. Many of the screw-steamers placed on that line for commercial purposes have a certain amount of accommodation for passengers. Under these circumstances the directors considered it would be for the interest of the proprietors so to modify the rates of passage-money as to assimilate them more nearly to those of their competitors, and a general abatement, equivalent to about 20 per cent., has been effected.

Submarine Cables' Trust.—Issue of 1,000,000*l*, in 100*l* certificates, at 90*l* per certificate. This trust has been established upon the principal of the Foreign and Colonial Government Trust, to club together the risks of individual investors in submarine telegraph shares, so as to provide an average return. The trustees are all intimately connected with the development of telegraphy, and the solicitors, Messrs Baxter, Rose, and Norton, are well-versed in the management of trusts. A special feature is that subscriptions will be received in shares as well as money; and it is estimated that the returns will be sufficient to provide regular 6 per cent. dividends (6⅔ per cent. on the issue price), the gradual redemption of certificates by purchase or drawing, and an eventual reversion equal to the whole of the original subscription.

MINING COMPANIES.

Colorado United Gold and Silver Mining, Limited.—Capital, 120,000*l*, in 10*l* shares. The purchase of the "California" mine will be effected for the sum of 100,000*l*, part of which will be paid in shares. This mine, which is very highly spoken of, both by the United State commissioner and independent mining engineers, is situated in the heart of the Nevada mining district near Centre City. The property extends 600 feet along the "mother vein," and has been already worked at a large profit. 52,800 tons of ore are stated to be "in sight" at the present time.

Oporto Mining, Limited.—Mr Charles Garland has been appointed official liquidator.

The Commercial Times.

POST OFFICE ANNOUNCEMENT.

The notice of the 1st ultimo, No. 23, intimating that the purchase of postage stamps from the public by the Post Office would be discontinued after the 30th instant, is rescinded. The arrangement under which such purchases have been hitherto made will, therefore, remain undisturbed.

COMPARATIVE AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended June 3, 1871:—

	Quantities Sold.		Average Price.	
	qrs	bush	s	d
Wheat	55,808	0	60	0
Barley	720	2	36	11
Oats	1,538	1	27	7

COMMERCIAL EPITOME.

FRIDAY NIGHT.

Owing to the unfavourable weather now prevailing the grain trade has ruled firm, and prices have been steadily maintained. At Mark lane to-day wheat sold quietly at full quotations, the imperial average being 60s per quarter. Supplies of English wheat were small, but the show of foreign samples has continued extensive. Flour was unaltered in value, but oats were rather dearer. Maize, beans, and peas have sold on former terms. This weeks imports of foreign and colonial produce into London have amounted to 6,780 qrs of wheat, 3,440 barley, 42,570 oats, 290 beans, 1,550 peas, 5,870 maize, 4,190 barrels of flour.

At Liverpool and Wakefield this morning, the wheat trade showed firmness, and the quotations were well supported.

The Liverpool cotton market opened on Friday last with a very active demand at fully ¼ per lb advance, which continued until Wednesday. Yesterday the tone was decidedly quieter, and a reduction of ⅛d to ¼d from the highest prices "to arrive" was submitted to. To-day the market is again very steady; sales, 15,000 bales, yesterday's decline being almost entirely recovered. The total sales for the week have reached 144,150 bales, of which the trade have taken 77,490 bales; speculators and exporters, 66,660 bales. The imports are 42,160 bales; the actual exports, 18,566 bales; and to-day's stock is estimated at 913,970 bales. Quotations for American descriptions have advanced ¼d per lb: East Indian, ⅛d to ¼d per lb; and Bengals, ¼d to $\frac{3}{16}$d per lb since last Friday.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended June 8, 1871:—

	Imported.	Exported.
American.....bales	17,168	9,222
Brazilian	16,700	2,833
East Indian	7,313	9,359
Egyptian	691	502
Miscellaneous	394	407
Total	42,266	22,323

At New York, on June 8, middling Upland cotton was quoted at 19½c per lb Bombay advices to June 5 quote cotton advancing at 197 rupees for fair Dhollerah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, May 13:—Notwithstanding the generally dull accounts which have reached us from Liverpool since the date of our last issue, a large business has been transacted both in ready and delivery cotton, at prices exhibiting little change from those current at the close of last mail. Occasional sparts took place in the beginning of the week, but the fluctuations in prices were comparatively slight. Our latest telegrams from home, dated 11th instant, came to hand yesterday morning, advising an advancing market in Liverpool, but no change is observable in the quotations for Surats, Dhollerah being still quoted at 5¾d per lb. The news, however, has had a hardening effect here, and, at the close, dealers are unwilling to part with their stocks unless at some advance upon the previous day's rates. This is especially the case as regards Dhollerah descriptions, upon which the attention of exporters has been mainly bestowed, and it would be difficult now to make contracts of any magnitude without causing some advance upon the quotations. Of the transactions reported on European account, which amount to 32,000 bales, nearly 20,000 bales are composed of Mewa, Bhawnuggur, and Dhollerah. Oomrawuttee descriptions combine for a total of about 6,000. Broach and machine-ginned Broach for 2,000, and the balance consists of Dharwar, Verungaum, Vingorla, &c. Quality.—Native Broach and Jundeesaur are becoming grossly adulterated that it is nearly impossible to find a bale free from seed and water packing. Madras gunned Jundeesaur of good quality is still obtainable in small quantities on the "Green," but the average of the parcels shown under the name of machine ginned Broach is far from being satisfactory, either in colour or staple. There is not much change to note as regards Dhollerah, which continues to show an undue amount of leaf. Late arrivals from Bhawnuggur are much mixed; a considerable proportion of white soft cotton is to be found alongside a harsh stapled, leafy description, somewhat similar to the early arrivals from the port of Dhollerah. Sawgined Dharwar continues to attract some attention, but owing to the prevalence of heavy weather on the coast few patimars have been able to leave Compta. New Compta cotton has not yet come forward to the market, and we understand that very little of the season's

crop will reach the coast before the rain sets in. From all parts of the country we have accounts of heavy rains having fallen, accompanied by storms, and we have no doubt that the effect of this will be to make supplies fall off, and cause our season to close somewhat earlier than usual. Slight showers have fallen here, and the appearance of the weather is a little unsettled.

EXPORT of COTTON from BOMBAY to May 12.

Actual exports since last mail left, 34,498 bales.

Messrs E. B. Liddell and Co., of Alexandria, have published the following report, dated May 26:—Our cotton market continues very inactive, and the few operations which take place are most difficult, owing to the poor choice of stuff left, the superior qualities to good fair having almost entirely disappeared from the market, and what little is left is held for prices at which all orders received are too limited. We quote to-day as follows:—Fair, 7⅞d per lb, f.o.b.; good fair, 8¼d to 8⅛d per lb, ditto; fully good fair, 8⅛d to 8⅜d per lb, ditto; Gallin, 9⅛d to 11⅛d per lb, ditto. Freight for steam-pressed cotton ¼d per lb.

The colonial produce markets have presented no feature of particular interest. The demand for sugar has ruled dull, and the tendency of prices has been downwards. Coffee has come forward in considerable quantities, and has sold at a slight decline. Tea is without change. Cocoa and rice have been in steady request.

The annexed is dated Rangoon, May 1:—The demand for Natsain rice for shipment to Europe has become very slack, partly on account of the unfavourable advices from the home market, but chiefly on account of the scarcity of tonnage. There are only 6,500 tons burthen in our harbour, loading for Europe, whilst we estimate the stocks of rice in the hands of shippers at about 30,000 tons. Under these circumstances prices of Natsain rice have further declined, and we quote to-day 138 rs to 140 rs per 100 baskets, 5 to 6 parts, equal to 5s 11½d to 6s 0½d per cwt, free on board. Supplies have become very small, and the same will probably soon stop entirely should our market continue its downward tendency. Soft kinds of rice have been in less demand than Natsain, and as rather large quantities of the same were offered for sale, buyers have succeeded to reduce prices for 5 to 6 parts Ngakyouk rice to 125 rs to 129 rs per 100 baskets of 68 lbs. As prices in the interior are at present higher than those here ruling, supplies will no doubt soon cease to come forward. We only expect a few boat-loads still, which may have been shipped before the fall in prices on our market became known in the upper districts. The demand for the Straits and China is but moderate, and there is neither much inquiry for Indian ports. Exports of rice from 1st January up to date, during the last eight years, compare as follows:—

	To Europe.	To the United States.	To Straits, China, and Coast.	Total.
	tons.	tons.	tons.	tons.
1871	127,036	..	18.437	145,473
1870	125,677	...	19,627	145,304

1865	34,729	2,397	147,268	184,394
1864	42,314	...	63,350	105,664

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on April 29, remark:—The demand for all descriptions of wool continues steady, and as the arrivals are moderate, stocks are very small. Of country scoured the arrivals have been very small. There is no stock of this description, as all parcels are placed immediately on arrival. Fleecewashed of good quality is scarce, and the demand good. Considerable quantities of grease wool have arrived. The American demand for long-stapled wool continues very active, and all of this description has been cleared off at full prices. Short wools for scouring are a shade lower, as with larger stocks to select from, the washers are more careful. Inferior parcels are difficult of sale. Wool is coming plentifully into the country towns, so we may soon look for larger supplies here. Our last quotations will serve for this mail.

Messrs T. J. and T. Powell observe:—The leather trade of the past month has not presented any new feature; as usual during the bark season the supplies of fresh goods have been somewhat limited, while the demand has been of about an average extent, and has kept the stocks of most articles in a small compass. There has been an increased inquiry for good heavy English butts, which it is to be hoped may aid the demand for foreign butts, but the articles most prominently in request have been light English butts, calf skins, and good kips. Raw goods present very little change in value. The imports include the first direct cargo this season from the Piver Plate, but are on the whole of limited extent. The variations of prices are slight, but the market is generally firm. The stocks on hand are moderate.

The annexed is dated New York, May 26:—The volume of trade, as a whole, is very moderate, and the tendency of prices in a majority of instances is in favour of buyers, as is almost invariably the case at the approach of the dull summer period, when buyers are reluctant and holders anxious to realise. But this tendency is partially offset by the exceptional ease in the money market, which renders it less difficult and expensive to carry over stocks. The imports are quite free for this period of the year, but they are pretty evenly balanced by the exports, and with a good surplus of agriculture products yet to go forward, and the prospect of an early pacification of Europe, we look for a good outward movement during the summer. The business indications are certainly favourable for the remainder of the year, unless some adverse and disturbing agency, not now foreseen, shall appear to disappoint our reasonable expectations. The plethora of money continues, and call loans are 3 to 4 per cent. with exceptions at 2 per cent., while the dis.

count rates are 5 to 7 per cent. Gold and exchange have not varied much, but the rates remain strong under continued free remittances of specie.

THE COTTON TRADE.

LIVERPOOL.—JUNE 8.

Cotton has been in unusually extensive demand this week from the trade, as well as for export and on speculation, and prices of all descriptions have advanced about ¼d per lb. Yesterday the market closed rather quietly, and to-day has been without animation. Sea Island continues slow of sale, without change in prices. In American the business has been large, and prices, after advancing fully ¼d, close about ¼d per lb higher. New York advices to the 8th inst. quote middling Uplands 19¼ cents, costing to sell in Liverpool 9¾d per lb by steamer. In Brazil a very extensive business has been done, at ¼d to ⅜d per lb advance. The comparative cheapness of Egyptian has attracted the attention of buyers, and a very large business has been done at an advance of ¼d per lb in the current qualities. East Indian has been in active demand, and closes at an advance of ¼d per lb.

In cotton to arrive the transactions have been very extensive at advanced rates. The sales yesterday included—American, basis of middling, not below good ordinary, from Charleston, due, 8¼d, 8⅛d; Savannah, at sea, 8¼d; Texas, not sailed, 8¼d; New Orleans, due, 8⅛d, from any port, delivery July-August, 8 7/16d, 8¼d; Dhollerah, fair new merchants, Cape, May-June shipment, 6¾d; Rangoon, fair new merchants, at sea, 5¾d per lb. The latest prices are to-day—American, basis of middling, not below good ordinary, from Savannah, ship named, 8¼d; New Orleans, ship named, at sea, 8¼d; May shipment, 8¼d; bales, June delivery, 8d; July, 8d; August, 8d; July-August, 8 1/16d; low middling, not below good ordinary, New Orleans, at sea, 7¾d; ship named, 7¾d; August delivery, 7¾d; Texas not sailed, 8d; at sea, 7¾d; Dharwar, sawginned, fair, ship named, 6¾d; Broach, good fair new merchants, ginned, ship named, 7d; Dhollerah, fair new merchants, canal, May sailing, 6¾d, Cape, May-June shipment, 6¾d, 6 7/16d; Oomrawutee, fair new merchants, ship named, at sea, Cape, 6¾d per lb.

The sales of the week, including forwarded, amount to 144,150 bales, of which 46,980 are on speculation, and 19,700 declared for export, leaving 77,490 bales to the trade.

JUNE 9.—The sales to-day will probably amount to about 15,000 bales, with a steady market.

	bales.
An increase of import compared with the same date last year of	710,360
An increase of quantity taken for consumption of	194,080
An increase of actual exports of	243,590
An increase of stock of	310,710

In speculation there is an increase of 13,520 bales. The imports this week have amounted to 42,161 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to June 2) is 206,000 bales, against 155,000 bales last year. The actual exports have been 18,566 bales.

Return showing the quantities of cotton in stock, the quantities imported, exported, and forwarded inland for consumption:—

* Pickings.

LONDON.—JUNE 8.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

During the past week the market has been very active and somewhat excited, and a large business, principally for arrival, has been transacted at an advance of ¼d to ⅜d per lb. To-day a much quieter feeling has prevailed, and about ¼d per lb of the advance has been lost.

PRESENT QUOTATIONS.

NEW YORK.—MAY 27.

The excitement and buoyancy in the cotton market have partially disappeared, the market toning down at once under the less encouraging advices from Liverpool, and buyers becoming cautious throughout. The impression that the late improvement would be likely to draw out cotton and probably increase the receipts during the coming week also had its effect in causing the reaction in prices. Holders, however, have at no time during the day shown any great amount of anxiety to hurry business, and the offerings generally were moderate with a continued assumption of confidence, the basis of which is no better explained than before. The call for goods on the spot for a day or two has been large and from legitimate buyers; but this is thought to be in a measure the result of a fear that the speculative manipulations might carry values very high, and that it was best to anticipate the wants of a short time a head. At the close the feeling is a trifle more steady. We quote as follows :—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c

Good middling	17¼ ...	18 ...	18¼ ...	18½ ...

NEW YORK, June 2.—According to Messrs Moffat Davidis, and Co.'s report, the week's receipts of cotton at United States' ports have been 37,000 bales, and since the 1st of September, 3,795,000 bales. Shipments to England, 36,000 bales; to France, 8,000 bales; and to the continent, 6,000 bales; and since the 1st of September, 2,950,000 bales. Stock at ports, 266,000 bales. Middling Upland, 8 5/16d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, June 8.—Business in our market was not resumed till Tuesday on account of the Whitsuntide holidays, and since then the daily business has been on the most meagre scale, possibly owing to the excitement in the Liverpool cotton market, and the almost daily advance in price. Both spinners and manufacturers here were consequently compelled to advance materially their quotations, whilst buyers were reluctant to follow the upward course of prices. The transactions that have taken place have been simply to provide for passing wants, and buyers in this position have had to pay an advance on last week's rates. As the latest accounts from India and China markets continue unfavourable, no buying of importance has taken place for these quarters. Other foreign markets are also well supplied with Manchester fabrics, and there is a lull in the demand for home trade goods as we are at present between seasons. There is consequently no activity in any department of trade, and as the cotton market to-day is quieter, the tone of our market is less strong and prices hardly firm.

Messrs Alexander Collie and Co. have received the following telegram from Manchester, dated June 9:—The market continues firm at Tuesday's quotations; buyers, however, will not pay the full rates demanded, and in consequence little business is doing.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—MAY 26.

The market for Western and State flour was irregular. The better grades of winter and spring wheat are higher, though the advance in value was not general. Shipping grades were dull and to sell lower on the lower grades with limited disposition on the part of sellers to make the necessary concessions to sell. Rye flour in moderate demand at steady prices. Southern more active, including 600 barrels to arrive; Minnesota spring steady and firm with moderate business. St Louis and Southern Illinois firm, but very moderately active. New wheat extra shipping quotable, but with the range of $6.35 to $6.50 delivered; old wheat ditto, $6.05 to $6.30 delivered.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The prevailing cold weather has had a hardening effect upon the corn trade, though the transactions have been on the most limited scale throughout the week. The accounts received of the growing crops are becoming contradictory, and are by no means so satisfactory as has been recently the case. Vegetation has been much checked by the lowness of the temperature, and the wheat plant is backward; while on light lands much loss of colour is apparent. On heavy and well-farmed lands the crops have not been seriously affected. The average price of English wheat has now reached 60s per quarter, and to-day the trade ruled very firm. The export demand continues, and a fair quantity of produce has again been shipped; but the imports have been on a full average scale. There are now on passage 240 cargoes of wheat, against 175 at the corresponding period last year, and further considerable shipments are announced both for European and American ports.

Flour	3,479,000	1,331,005	4,913,311	24,376

The spring corn trade has remained without important feature. Oats show an improvement on the week; but maize, barley, and pulse have sold slowly at late rates.

Mr George Dornbusch observes :—The floating grain trade has this se'nnight been characterised by inactivity, which to some extent was owing to the small quantity offering off the coast, but the tone has, during the last few days, improved.

The total amount of business transacted this week embraces—6 cargoes wheat, 5 cargoes and 1 lot maize, 1 cargo barley, 2 cargoes rye, and 1 cargo oats. Wheat—Partly owing to the inertia prevalent in the general corn trade, and partly to the absence of a suitable choice of cargoes off the coast, business has lacked animation. In the early part of the week more especially, sales were difficult to effect, till the continent came to revive the demand, and invest the trade with improving tendencies. Prices at first declined 1s on the week—part of this loss has since been recovered. In cargoes on passage and for shipment, business has continued limited to a few cargoes of American wheat, at about late prices. No sale in Black Sea or Azow has transpired, except a cargo Berdianski in second hand at 57s per 492 lbs, but at similar low prices sellers and importers refused to sell. Maize—For several days the coast has been clear of cargoes. Subsequently, two steamers arrived, and were quickly disposed of at about late prices. In cargoes on passage and for shipment, a few transactions are reported in American corn, at rather receding rates. No sale in Danubian on passage has taken place. The reported sales are as follows:—Mediterranean, 1 cargo and 1 lot Bulgarian, 5,336 qrs, 35s per 480 lbs. Kustendjie, 6,675 qrs, 34s 9d per 480 lbs. Barley—So little has been offering that transactions could not possibly assume any importance. A cargo not in perfect condition has continued offering, but failed to draw a sufficient bid till last Wednesday, when it was disposed of. A lot arrived in a steamer has been sent to Cork. In cargoes on passage and for shipment, no business has been done. The only reported sale is as follows—Barley arrived, 1 cargo Varna, 3,787 qrs 26s 6d per 400 lbs. Rye—The demand has been somewhat more animated than for some time past. There being no cargo offering off the coast, business has been limited to cargoes on passage for the continent at fully late prices. The reported sales are as follows—Rye arrived at Gibraltar, 1 cargo Danubian from Sulina 2,422 qrs, 37s 3d per 480 lbs, free shipping or shipped. 1 cargo Black Sea from Nicolaieff 2,900 qrs, 37s 6d per 480 lbs. Oats have continued in demand for the continent, and several sales have been made including—Oats arrived, 1 cargo Black from P. E. Island, 2,250 qrs, 24s per 312 lbs. Beans—The trade has been quietly supported. A small cargo of Lattakia has been offering off the coast, but the high prices asked, viz, 40s per 480 lbs has prevented business being done. Mediterranean—No business has transpired, and the prices are quite nominal.

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been without further change this week. For West India, however, the demand is less active than of late as regards refining sorts, while crystallised support the improvement already established. 1,205 casks had sold in three days. Only part of the Barbadoes by auction found buyers. Crystallised Berbice and Demerara sold at 37s to 38s per cwt. Further business has been done in Jaggery, including some afloat. Manila and other low sorts are about the same as last quoted. There have not been any further floating cargoes of foreign disposed of. According to official returns the duty payments upon sugar in five months show an increased consumption of nearly 15,000 tons as compared with the previous season. The landings of West India last week caused some addition to the stock, but it is still much less than in the two previous years, viz., 61,550 tons, against 88,250 and 74,650 tons respectively. Deliveries continue large. The quantity of land under beet cultivation in Europe is larger than in previous years.

Mauritius.—Small sales of grainy privately.

Madras.—1,250 bags Jaggery on the spot at 29s 6d to 21s. 300 tons have sold to arrive at 21s.

Penang.—200 baskets low brown sold privately at 19s 6d.

Manila.—About 10,000 bags are reported by private contract: clayed, of old import, 25s to 25s 6d. 13,277 bags by auction were bought in, and since 7,000 bags good clayed, 4s 9d duty, sold at 27s 3d.

Other Foreign.—At auction, 151 casks Porto Rico part sold at 35s 6d to 37s 6d for good to fine yellow.

Refined.—The market is dull, and last week's prices not quite maintained for dry goods. Transactions are reported in French goods for delivery here.

MOLASSES.—About 150 puncheons St Lucia and Dominica have sold at 11s to 12s per cwt.

RUM.—The sales effected have been moderate, at prices about the same as last week, and including Demerara at 1s 8½d to 1s 10d; Berbice, 1s 7d; pale Leewards, 1s 6d, proof. Jamaica is in steady demand, with sales at 3s 3d to 3s 9d, and very good up to 4s 2d per gallon.

COFFEE.—A steady business has been done, including a few parcels of Ceylon at last week's rates by private contract. 479 bags by auction part sold at 46s to 51s for ordinary to middling, and 53s to 57s for good. 632 bags Trinidad went steadily as follows: grey and ordinary, 52s 6d to 57s; middling, 62s to 67s; good to fine, 69s to 95s; a few bits, 121s to 130s. 491 bags Guayaquil at 46s 6d to 47s. Small sales of fine Guayaquil privately at high rates.

COFFEE.—The market has been freely supplied during the week, and the public sales have gone off without animation. A demand for France is anticipated. 1,171 casks 49 barrels 292 bags plantation Ceylon chiefly sold, the grey sorts at prices in favour of the buyers, from 57s 6d to 69s for small to bold. Colory descriptions about maintained their former value: low middling and small, 59s to 62s 6d; middling to good, 63s to 72s; fine and bold, 75s to 81s. Clean qualities of native have met with some inquiry; good ordinary, 53s 6d. 516 bags by auction consisted of Triage. 288 casks 2,429 cases 706 bags East India, per steamer, were only partly sold at prices in favour of the buyers, especially for the common qualities; greyish and pale Wynaad; small to bold, 57s 6d to 70s; colory, 63s to 77s 6d; native, 55s to 58s 6d. 458 bags Singapore part sold at 50s to 54s 6d. 447 half-bales Mocha realised 88s 6d to 93s for common to good quality short berry. 1,189 bags Rio 47s 6d to 52s. 291 bags washed dutt, 57s to 57s 6d. 999 bags Costa Rica, 56s to 64s. 1,130 bags Santos, 52s to 60s. A floating cargo of St Domingo is reported for the continent at 54s per cwt. The quantity of coffee afloat from Ceylon is much larger than at same date last year.

TEA.—A very small business has been done this week. Public sales comprising 11,526 packages went flatly, and about 4,200 sold. The next sales of Indian tea will be held on the 13th inst. By private contract the trade have taken limited supplies of China. Some of the new crop Ceylon congou has brought fair prices.

RICE.—White Bengal continues in demand, several parcels having changed hands during the week at full prices; low to good middling, 9s 10½d to 11s 6d; fine, 12s 9d to 13s. Arracan, 9s 1½d to 10s 6d. Ballam, 9s 4½d to 10s 1½d. 600 tons Cochin Sona at 9s 3d. Two sales afloat have been readily restricted to 700 tons Ballam and Rangoon at 9s 10½d ex quay. There is a large quantity of rice grain now on the way to Europe. At public sale 4,000 bags Bengal were readily bought in. A few bags good table sorts sold at 12s per cwt.

IMPORTS AND DELIVERIES OF RICE TO JUNE 8 WITH STOCKS ON HAND.

	1871.	1870.	1869.	1868.
Imports	13,000	14,000	12,000	20,000
Deliveries	14,000	8,000	12,000	12,000
Stock	27,000	21,000	14,000	17,000

SAGO.—Transactions have been quite unimportant.

SPICE.—Pepper.—A parcel of Singapore is reported sold at the previous value of 5½ per cwt.

PIMENTO.—About 1,000 packages have been offered, and a considerable portion sold; rough, 3½ to 4¼ per lb; small, 4¾ to 5¼ per lb; fine, 5¾ to 6¼ per lb. Nutmegs, 7s 9d to 8s per cwt, with limited prices. 700 packages Penang pepper, part sold at 4¼d to 4¾d per lb. Cassia and cloves in request by private contract.

BRAZIL PIASSAVA.—There has been some revival of speculative demand. Prices show £1 per ton, and a good deal of business has been done. Fairs afloat at 4¾ to 5¼d, including 1 cargo at the latter price. On the spot Fairs have readily sold at 5¼d. Singapore 5¾d to 6¼d. 1,495 bags to auction were taken—three sold; Penang, 5¼d, Aumpy, 5¼ to 6d. Singapore withdrawn above the value.

WHITE PEPPER.—There is still a demand, prices tending upward. By private contract sales of Singapore at 8d. At auction 183 bags sold at that price for middling quality, and a few lots very good at 8⅛d per lb.

OTHER SPICES.—The public sales this week have been much smaller than usual, and have resulted in few changes. 58 cases brown nutmegs by auction partly sold: 84's, 2s 4d; 74's, 2s 6d. 5 cases Penang mace obtained a high price, viz., 3s 7d for middling reddish slight mouldy. 6 cases Penang cloves were bought in above the value. Pimento is dull. 284 bags by auction part sold at 1½d per lb. 10 cases Cochin ginger: middling bold, 66s. 110 barrels sea-damaged Jamaica, 39s to 48s per cwt.

SALTPETRE.—The few sales effected have been at former prices, and the market continues steady. On the spot about 1,200 bags Bengal are reported sold: refraction 18 to 14, 26s; 8, 26s 6d. About 150 tons have sold afloat at 26s 6d to 27s per cwt.

IMPORTS and DELIVERIES of SALTPETRE to June 3, with STOCKS on hand.

INDIGO.—The next periodical sales of East India are declared for the 10th proximo. This morning the declarations reached 9,450 chests. The market has been rather quiet during the week. A partial demand prevails for France.

OTHER DRYSALTERY GOODS.—A quiet tone is generally prevalent. Gambier sells rather slowly. Supplies here and afloat are ample. 1,800 packages by auction were chiefly taken in. A portion sold at 19s 9d for cubes. 50 tons have sold afloat at 15s 9d ex-ship. 500 boxes cutch by auction were taken in at 21s 6d for good. 78 bales Bengal safflower were bought in. Privately business has been done on the spot and afloat. Turmeric has sold at 18s 9d for Bengal to arrive. 1,316 bags by auction were taken in at 19s per cwt. Lac dye continues in demand; fine has sold at 2s to 2s 2d per lb.

SHELLAC.—Rather higher rates have been paid, viz., fine orange, 6*l* 15s per cwt, including 111 cases by auction. Some business has been done for arrival.

METALS.—In some few instances prices have shown an improvement, but there is not much speculation. The principal feature of interest in the markets has been a revival of demand for tin. Straits, 128*l* to 128*l* 10s; the same to 10s more afloat, being an advance on last week's rates. English is 2*l* dearer, viz, 129*l* to 130*l* for common; Banca, 130*l* to 130*l* 10s. Tin plates steady. The shipments have, according to official returns, been very large. The only business reported in spelter has been 50 tons Silesian, of a fine brand, to arrive, at 18*l* 10s per ton ex ship. No change can be quoted in manufactured iron. Scotch pig does not maintain the late advance. This morning's quotation was 56s 9d per ton cash. Several sales of copper are reported, chiefly in Chili, &c., at 65*l* 5s to 66*l* 5s. Walaroo, 74*l*. English is quiet. Lead has been sold upon terms rather in favour of the buyers.

HEMP.—There is less disposition to sell Manila. 966 bales by auction were chiefly taken in. A few lots selling: good at 49*l*; low brown at 40*l*. The business privately has been limited on the spot, but 4,000 bales sold for delivery on the basis of 44*l* to 45*l* per cwt for fair quality. 553 bales other kinds at public sales were chiefly disposed of. Sunn, 15*l* to 17*l* 5s. Coconada, 19*l* to 19*l* 10s per ton.

JUTE.—The market continues firm, and the stock here is very much smaller than usual. During the week several parcels have changed hands on the spot at firmer prices, and a steady business also done for arrival. Trade in Dundee has rather improved.

LINSEED.—Several sales have been made on Calcutta to arrive at 61s to 61s 6d. Quotation on the spot, 63s to 63s 6d; Bombay, 64s. Azoff cargoes, 60s 6d per quarter.

OILS.—The few sales made in olive have been restricted to common qualities: Mogadore, 44*l*. Sperm dull, and can be bought at 82*l*. Common kinds of fish oil sell slowly at 33*l* to 36*l* per tun according to quality. Pale seal the latter price. Linseed oil has been steady at 32*l* 15s spot, and 32*l* 10s to 32*l* 15s last six months. English brown rape quiet at 43*l* 5s to 43*l* 10s. The latter price for the last four months. English refined, 45*l* 10s; foreign, 46*l* to 48*l*. Ceylon cocoa-nut is rather dull with sellers at 40*l*. Cochin scarce at 47*l* to 50*l* per ton. Palm firmer at 36*l* 10s to 37*l* per ton for Lagos; low qualities unchanged.

PETROLEUM.—Refined American firm at 1s 5¾d to 1s 6d; forward, 1s 6⅜d per gallon.

SPIRITS TURPENTINE.—American advanced to 39s, and 40s per cwt now demanded.

SHELLS.—The prices obtained for mother-o'-pearl in the sales were high. Bombay chiefly ranged from 4*l* to 8*l*; Australian, 6*l* 17s 6d to 8*l* 15s; and the lower sorts in proportion. A few fine Macassar shells were bought in at high prices. A parcel of mixed Manila sold at 7*l* 15s per cwt.

TALLOW.—Foreign has been steady during the week, and is now rather quiet although the public sales of colonial to-day are smaller than usual. Closing quotations for new Petersburg, 43s 6d to 43s 9d; October to December, 45s 9d per cwt.

POSTSCRIPT.

SUGAR.—The market continues quiet. Barbadoes by auction to-day went at easier rates. Sales of West India, 794 casks. For the week, 2,088 casks. 210 casks Honduras were bought in. 1,346 bags beet part sold at 38s 6d to 39s 6d, for white crystals. By private contract 1,500 bags Jaggery sold at 21s per cwt.

COFFEE.—114 casks 72 barrels and bags plantation Ceylon in the sales went at steady rates, up to 84s for superior bold colory. 519 bags native part sold at 53s 6d to 54s 6d for bold. 31 bales Mocha, good mixed yellow long berry, 105s. 2,009 bags Singapore, about one-fourth part sold at 50s to 51s 6d. 64 casks 174 barrels and bags Jamaica good ordinary to middling, 53s to 66s 6d. 422 bags Manila, 54s to 57s 6d. 5,019 bags Guatemala chiefly sold at 51s 6d to 62s; middling to good, 63s 6d to 67s. 365 bags Costa Rica, 57s to 63s 6d. 415 bags washed Rio partly sold at 59s to 63s per cwt. Common qualities generally were rather dearer.

RICE.—300 tons fine white Bengal, just arrived, sold at 13s per cwt, ex quay.

PEPPER.—The speculative demand continues. Singapore, 5⅜d to 5½d; to arrive, 5¼d. Penang on the spot, 5⅜d per lb.

CUTCH.—550 tons good Pegue were taken in at 21s 6d. 1,300 packages Gambier were chiefly taken in: block, 16s to 16s 3d. Cubes part sold at 19s 6d.

METALS.—Tin sold at 129*l* for Straits to arrive. Scotch pig declined to 56s 9d per ton cash.

OILS.—306 casks palm chiefly sold at 30s to 38s 6d for low. 129 casks Ceylon cocoa-nut were partly disposed of at 40*l* to 41*l* per ton.

TALLOW.—No alteration in town or Russian. 942 casks Australian by auction went rather dearer. Sheep, 42s 6d to 43s 3d; beef, 40s to 41s 6d. 195 casks South American at 42s to 43s 9d beef; and 42s to 42s 6d per cwt for mutton tallow.

ADDITIONAL NOTICES.

REFINED SUGAR.—The Dutch market closes fully 6d cheaper for the week, with few transactions to report. The home market must be quoted 1s lower for the week all round with a downward tendency.

GREEN FRUIT.—The report of Messrs Keeling and Hunt state that the price of oranges is easier from large arrivals, but an improvement in value may be expected from the backward state of home-grown fruits. Lemons higher, with a limited stock. Barcelona nuts well supported. Black Spanish nearly finished, and a small quantity of Brazil remaining. West India cocoa-nuts in demand.

DRY FRUIT.—Currants are dull, and in some instances cheaper; but a little more business is moving. Raisins are quiet.

ENGLISH WOOL.—Market rather quieter, prices unaltered.

COLONIAL WOOL.—The market is unchanged. Prices firm.

FLAX.—Market firm.

HEMP.—Market firmer, and more business doing for forward delivery. There is also more inquiry for Manila, and holders are asking higher rates.

SILK.—Market very quiet, except in Cantons, which are selling freely at low prices.

SEEDS.—The harsh weather causes firmness in the seed trade, and holders are indisposed to make sales.

TOBACCO.—There has been rather more business done in North American tobacco during the past week; the total transactions, however, are only upon a limited scale. Prices are firmer for all fine descriptions, and holders show no disposition to make concessions. For other growths there has been a good inquiry. Stocks at present are very limited.

METALS.—The doings of the week have been rather small, but there is a somewhat more cheerful feeling prevailing. Copper is rather firmer, and more business is doing, although there is still room for improvement. Iron is in steady demand. Tin has improved in value by 30s a ton during the week. Lead is rather neglected. Tin plates are in demand at rather improved rates.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	43	6
Fat by ditto	2	0
Yellow Russian ditto	45	0
Melted stuff	32	0
Rough stuff	16	0
Greaves	19	0
Good dregs.....	6	0

Imports for the week, 1,209 casks.

METROPOLITAN CATTLE MARKET.

MONDAY, June 5.—The total imports of foreign stock into London last week amounted to 17,195 head. In the corresponding week in 1870, we received 7,868; in 1869, 16,637; in 1868, 5,907; and in 1867, 10,382 head.

The cattle trade has been in a healthy state, and more money has been realised. About an average supply of beasts has been on offer, and the bulk of the home receipts has come to hand in good condition. All breeds have experienced a steady sale, and 2d per 8 lbs more money has been realised. For the best Scots and crosses 5s 8d to 5s 10d per 8 lbs has been easily obtained. Owing to the falling off in the receipts from abroad the supply of sheep has been much less extensive. A good business has been transacted, and an advance of 4d per 8 lbs has been established. The best Downs and half-breds have been disposed of at from 6s 4d to 6s 6d per 8 lbs. Lambs have been purchased to a moderate extent at from 6s to 7s 6d per 8 lbs. Calves have changed hands firmly, but pigs have been quiet.

SUPPLIES ON SALE.

	June 6, 1870.	June 5, 1871.
Beasts.....	3,220	3,085
Sheep and lambs	30,809	24,000
Calves.....	216	280
Pigs.....	120	150

HOP MARKET.

BOROUGH, Friday, June 9.—In consequence of the unsatisfactory appearance of the vine, coupled with the cool weather now prevalent, this market continues firm, and prices show a further improvement:—Mid and East Kent, 45s to 147s; Weald of Kent, 45s to 75s; Sussex, 40s to 70s; Farnham and country, 75s to 112s; olds, 20s to 35s.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, June 9.—The supplies of potatoes are large. Not much business is doing, at our quotations:—English

Regents, 45s to 70s; Scotch, 45s to 70s; Rocks, 50s to 70s per ton; New, 5s to 10s per cwt.

METROPOLITAN MEAT MARKET.

Per 8 lbs by the carcase.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 9.—The public sales of sundry kinds of foreign, held here on 6th and 7th inst., comprised 8,963 bales and ballots, and of these about 6,000 bales found buyers at enhanced rates, washed River Plate wool realising 1s 2d to 1s 3½d per lb; Peruvian white fleece, 1s 1d to 1s 2½d; unwashed River Plate, 7½d to 9½d; and some superior unwashed Turkey fleece, 7½d to 9¾d. Our market is now left unusually bare.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 9.—There was a fair attendance at this market to-day. Wheat was in good consumptive demand at an advance of 1d on white and fine qualities of red. American flour was 6d dearer.

WAKEFIELD, Friday, June 9.—The change to cold ungenial weather has given more firmness to the wheat trade this week, and at the market this morning millers have to pay 1s per quarter advance on last Friday's prices for all fine fresh qualities. English beans were fully as dear. Egyptian rather cheaper. Other articles unaltered in value.

The Gazette.

TUESDAY, June 6.

BANKRUPTS.

Joseph Grantham, Eastbourne terrace, Paddington.
Alfred Wild, Providence row, Shepherd's bush, carpenter.
August Friedrich Blanck, Gloucester, commission agent.

PERRY DAVIS' VEGETABLE

PAIN KILLER.

FOR INTERNAL AND EXTERNAL USE.

DEPOT—17 SOUTHAMPTON ROW, W.C. Price 1s 1½d, 2s 9d, 4s 6d, and 11s per bottle. Inhaler, 2s 6d each.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For private citizens, and for rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

ICE SAFES AND WENHAM LAKE.—The WENHAM LAKE ICE COMPANY'S celebrated ICE for Water Filters, Ice Cream Machines and Pure Milk. They undertake the agency of parties connected with India, the purchase and sale of Indian and other Securities, the custody of the same, the receipt of Interest, Dividends, Pay, Pensions, &c., and the collecting of Remittances between the above-named dependencies.
They also receive Deposits of £100 and upwards for fixed periods, the terms for which may be ascertained on application at their Office.
Office hours, 10 to 3. Saturdays, 10 to 2.
Threadneedle street, London, 1871.

BANK OF CALIFORNIA.—THE
ORIENTAL BANK CORPORATION are prepared to issue Drafts at sight on the Bank of California San Francisco, the terms for which may be ascertained at their office.
Threadneedle street, 1871.

LONDON CHARTERED BANK OF AUSTRALIA.
(Incorporated by Royal Charter.)
Paid-up capital, One Million.
Reserve fund, £120,000.
Offices—88 Cannon street, E.C.
This Bank conducts banking business of every description with the Australian Colonies upon current terms. Bills are sent for collection, and letters of credit granted upon the Bank's branches in Victoria and New South Wales.
WILLIAM MARTIN YOUNG, Secretary.

NATIONAL PROVINCIAL BANK OF ENGLAND.
Bishopsgate street, corner of Threadneedle street, London, E.C., June 6, 1871.
The Directors of the National Provincial Bank of England hereby give notice, that a Half-Yearly Dividend at the rate of 8 per cent. per annum, and a Half-Yearly Bonus of 7 per cent., will be payable on the Company's Stock on and after the 10th day of July next, when the Dividend and Bonus Warrants may be obtained at the Company's Office, No. 112 Bishopsgate street (corner of Threadneedle street), or at the different branches.
The Transfer Books will be Closed on and after Saturday, the 10th day of June, until the Dividend and Bonus become payable.—By order of the Court of Directors,
E. ATKINSON, } Joint General
W. HOLT, } Managers.

THE LONDON JOINT STOCK BANK,
5 Princes street, Mansion House, 8th June, 1871.
Notice is hereby given, that the next Half-Yearly General Meeting of the Shareholders of the London Joint Stock Bank will be held in the Board Room of the Bank, No. 5 Princes street, London, on Thursday, the 20th day of July next, at 12 o'clock precisely, to Receive the Report of the Directors and announcement of Dividend, and that immediately after the conclusion of the business of such general meeting, an Extraordinary General Meeting of such Shareholders will be held for the purpose of electing a Director of the said Bank, in the place of Frederick John Jourdain, Esq., deceased.
And notice is further given, that the Transfer Books of the Bank will be Closed on Friday, the 30th instant, and will remain so until Saturday, the 8th day of July.—By order of the Board.
THOMAS BURROWES, Secretary.

THE ALLIANCE BANK (LIMITED),
London and Manchester.
Capital, £1,000,000,
Divided into 40,000 shares of £100 each.
Paid-up Capital, £970,650, in 38,826 shares, £25 called up, which are held by upwards of 1,200 proprietors.
Matthew Hutton Chaytor, Esq., Chairman.
Alfred Castellain, Esq., Deputy-Chairman.
Interest allowed on current account balances if not drawn below £200.
Deposits of £10 and upwards received on current terms and for fixed periods, as may be agreed upon.
Every facility afforded for the transmission of money between London, Liverpool, and Manchester, and for the receipt and delivery of stocks, shares, &c.
Circular notes and letters of credit issued, and every other description of banking business transacted.
R. O. YEATS, } Managers in
WM. HANCOCK, } London.
Bartholomew lane, E.C.

DEBENTURES AT 5, 5½, AND 6 PER CENT.
CEYLON COMPANY (LIMITED).
The Directors are prepared to Issue DEBENTURES to replace others falling due, viz., for 1 year at 5 per cent., for 3 years at 5½ per cent., and for 5 years at 6 per cent. per annum, also for longer periods on terms to be ascertained at the office of the Company.
R. A CAMERON, Secretary.
Palmerston buildings Old Broad street, E.C.

COMPTOIR D'ESCOMPTE DE PARIS.
Incorporated by National decrees of 7th and 8th of March, 1848, and by Imperial decrees of 20th of July 1854, and 31st of December, 1866.
Recognised by the International Convention of 30th April, 1862

	francs.	£
Capital fully paid up	80,000,000 ...	3,200,000

TWO-AND-A-QUARTER PER CENT.

The unprecedented change made by the Bank of England from 2½ to 2½ per cent. has naturally given rise to many observations. It is unprecedented, for there was no such change in 1846, as has been stated. But it is not necessarily the worse for being unprecedented. On the contrary, under many circumstances it may be an improvement for the Bank of England to follow the market rate more closely than they have been used to do, and to change their rate more frequently and by smaller fractions. Everything which tends to steadiness of price is good. The smaller the leaps by which the value of important commodities changes the better. On principle we see no objection to the beginning of *finer* variations which the Bank has this week made. On the contrary, we believe it will be a valuable precedent, and the introduction of a new monetary alternative, which at times may be very useful. But, on the other hand, we confess we cannot see the use of this alternative on the present occasion, and with reference to present circumstances.

There are two reasons for which the Bank of England may justifiably and wisely change its rate of discount. First,—it may do so to get more business, and so augment its profits. But will this object be effected on the present occasion? We must remember that *primâ facie* the reduction in the rate of discount lessens the profits of the Bank of England like those of other bankers, and more than that of most bankers. Most bankers pay for some part of their deposits; and as the Bank of England pay for none, they cannot on any day recoup themselves by giving less to those from whom they borrow when they charge less than before to those to whom they lend. If the Bank of England only have the same amount of business after the change as before, they must lose by it; they must considerably augment their business even to preserve their *status quo*. The "private securities" of the Bank of England are now a little over 16,000,000*l*; but of this a considerable amount (said to be about 5,000,000*l*, though we cannot vouch for the precise figure) is invested in railway debentures and other interest-bearing securities not varying with the rate of discount. The loans of the Bank which do so vary we may roughly take at 11,000,000*l* or 12,000,000*l*. The Bank has now lowered its rate of discount one-tenth: viz. from 2½ to 2½ per cent. Accordingly, it must get one-tenth more business even to be as well off as it was—that is, it must abstract from the general market 1,000,000*l* additional bills. To get even a fraction more of profit it must abstract from the market still more bills. Now, it will be at once admitted in Lombard Street that the Bank will not augment its discounts by 1,000,000*l*, or by anything near it. The general market is always a more eager discounter than the Bank. A very large sum is held there upon which interest is paid, and which must be lent, for it would be ruinous to let it lie idle; and the rate fixed in order to lend this money governs the rate upon the rest. It is a maxim of political economy that the market price is fixed by the dealer or dealers who are under the strongest motive to deal. Therefore it is not to be supposed that the discounts of the Bank will be augmented at the cost of the general market by the large amount necessary to enable it *not* to lose by the change—far less by the much larger item which would be required to enable it to derive a substantial profit from the change. The first reason therefore for a change in the Bank rate—the wish to augment the Bank's profit and dividend—does not justify this change; if conceived with that object the policy is a mistake.

The second reason for which the Bank may rightly alter its rate of discount is the effect on the exchanges. They may say—"Our banking reserve is not enough to meet possible demands, "and to increase that reserve we must raise the rate;" or, on the other hand, they may say—"Our reserve has become "excessive, and more than we can require, and therefore we "should lower the rate." The object of these sort of changes in the Bank minimum is either to lessen the reserve or to augment it; either to drive bullion abroad, or to attract

it from abroad. But it was well shown by Mr Goschen, and for the last ten years has been an almost cardinal maxim of bank policy, that to produce an effect on the exchanges in all ordinary states of the market, you must make a considerable change—even a change so great as 1 per cent. No one can say that the present condition of the exchanges is one in which bullion is exceptionally liable to leave us, and therefore the general rule holds good that so small a reduction as ½ per cent. cannot affect the Bank reserve. It will have no tendency to send money abroad. The plethora of capital in Lombard Street will, as far it goes, be just as it was.

Both the possible justifications for the step the Bank have taken seem to us therefore to fail; and we cannot but conceive it to have been taken either from an indistinct perception of the principles which should govern the settlement of the rate, or from a compromise between two parties, one which wished to do more, and the other which wished to do nothing—in which case, as is not uncommon, the step actually taken is a *via media*, combining the defects of both extreme measures betwixt which it professes to steer.

THE LORDS' DEBATE ON THE WASHINGTON TREATY.

THE debate of Monday on the Washington Treaty was in one way exceedingly satisfactory. The Lords who opposed the Treaty did not talk around the subject, but expressed frankly and fully all the objections entertained by diplomatists and a certain section of the public to the concessions which, as they contend, have been made to the Government of the United States. These concessions, so far as we can perceive, are four in number, each of them important, but each defensible, though on widely different grounds. Earls Russell and Derby denounce *ex post facto* legislation as unjust and undignified in itself; Earl Russell declares that, even if just, it would create a most dangerous precedent; Lords Salisbury and Carnarvon maintain that the rights of the Canadian Dominion have been sacrificed; and everybody all round regrets that the claims of the Canadians to compensation for the Fenian raids should have been omitted from the arbitration. There can be no doubt that these are the objections to the Treaty really felt in this country, and we propose very briefly to examine each of the four.

1. The first objection, that the agreement to argue the case of the Alabama as if international law had at that time maintained a principle which it did not maintain is unjust, may, we believe, be very speedily dismissed. The case for that side could not be better put than it was put by Earl Russell, when he said—"I entertain the strongest objection "to the measure proposed in the course of the negotiations, "and afterwards confirmed by the Treaty—viz., that certain "rules, partly founded on the authority of the law of nations, "and partly deviating very much from it, should be adopted, "and should not only be hereafter recommended as improve- "ments in the law of nations, which, of course, it was per- "fectly competent for the Commissioners to do, but should "have a retrospective effect, this country being thus liable "for any deviations committed in 1861 from rules made in "1871. I conceive this to be a gross departure from all the "rules upon which negotiations have hitherto been conducted, "and from any rule that you apply to domestic affairs. "What would be said if a bill of indictment were sent up to "the Grand Jury at Liverpool, charging a workman with intimi- "dation committed in 1869, under an Act passed in 1871? "The Grand Jury would at once ignore such a bill, and would "hold it contrary to every principle of justice that a man "who had committed some act, not at the time penal or "criminal, should be punished for it under a statute passed "some years subsequently." That would be wholly unanswerable if it had anything to do with the matter; but it has not, the workman in question not having consented voluntarily to be so tried. If he had, his trial, whether wise or not, would clearly have been just, and that is the position of the British Government. It has not been coerced, much less conquered, but has of its own free will consented that certain hypotheses shall be taken as the basis of an amicable arrangement between America and England; and the question whether those hypotheses are imaginary or not is of no moment, or of no more moment than any other data assumed by both parties to a suit to avoid trouble.

2. But, says Earl Russell, you are setting a most inconvenient precedent. Suppose the German Government, being discontented with the sale of firearms to France, demands compensation, and asks that in proof of friendliness Great Britain shall assume the law to have forbidden such export, what is the British Government to say? That it made such a concession to the United States out of friendliness, but will not display the same friendliness to Germany? That is a very plausible point, and one which under other circumstances would tell heavily against the Treaty; but it is, we think, rather plausible than convincing. The concession is limited to the occasion, just as the concession of the right to navigate the St Lawrence is limited to that river. The German Government cannot argue that because for reasons of our own we have admitted the United States to the free navigation of the St Lawrence, therefore we must admit Germany to the free navigation of the Thames. That would be an absurdity, and so therefore would be a claim to enjoy any other concession specially made to a particular State upon exceptional grounds. Such exceptional arrangements are by no means so uncommon in diplomacy as Earl Russell appears to imagine, nations having repeatedly made them to other nations without making them general. For example, the Extradition Treaties between different countries are often radically different not only in terms but in principle: the owners of Polish provinces, for instance, granting to each other concessions such as, if demanded by other Powers, would provoke instant war. No one can even conceive of Germany allowing France to send troops across the border of Alsace in pursuit of insurgents; yet that privilege was granted for mutual convenience to Russia when hunting down Polish rioters on the frontier of Posen. For a particular purpose a rigid international rule was held to be suspended for a time. We have not, in allowing the States to invent an international law, admitted the existence of such law, but have formally denied its existence, and only granted the right to invent it as a great concession.

3. Then it is said that Canada gives up her fisheries, or at least sells them, against her own consent. There is no proof of that assertion. The strong probability is that the Canadian Parliament will accept the Treaty, and though the maritime provinces of the Dominion may dislike it, we have no more to do with their dislike than we have with that entertained by the city of Rouen towards the French Treaty. We can only deal with governments, and in the long run only with central governments, or diplomacy will be reduced to inextricable confusion. Even if the Dominion should be annoyed, the Treaty leaves her the opportunity of rejecting the clauses which affect her; and the Imperial Government, which in the event of war on account of the cod-fish would have to bear five-sixths of the expenses and annoyances caused by that calamity, has surely a right to suggest to Canada a policy of conciliation. If it has not it has no rights at all, and had better at the earliest moment reduce its responsibilities to a level with its rights. We confess we are tempted to lose patience with a Colonial Parliament which asks us to protect it, and then disputes our right to protect it in the most cheap and effectual manner by selling a few cod-fish, or rather the right to catch the said cod-fish if they can, for a price to be settled by arbitration. The dispute, as we pointed out some weeks ago, is the most dangerous one which can arise between nations, and the settlement has this especial merit, that it can never arise again.

4. Finally, there is the matter of the Fenian raids, and upon this we are, as critics of the Treaty, in accord with, and as politicians hostile to, the opposition in the Lords. The American Government ought to have included an arbitration on those raids in the provisions of the Treaty. The arbitrators would, we doubt not, have decided that President Grant did all he could do to prevent the invasion of British soil; but if our liability for the Alabama is to be discussed before a tribunal, so ought the American liability for the Fenian filibusters to be. It was ungenerous of the Americans not to make the concession, and weak of the British Commissioners not to demand it. But neither the absence of magnanimity on the point, nor the exhibition of weakness, are reasons for rejecting the Treaty. Statesmen must attend to the facts as well as to the law, and the fact was that to ask for justice against the Fenians was to ask almost more than human nature could be prevailed upon to grant. The Government of the Union is a party Government; it is on the eve of a grand party struggle; and to have included this

claim in the Treaty would have been to exclude the dominant party at the next election from power. All the Irish and all the Chauvinists, who are very numerous in America, would have voted against the Government which admitted such a claim, and the Treaty, instead of being a measure of pacification, would have been a mere weapon to be employed in a great party fight. Considerations of this kind have repeatedly influenced treaties in Europe. For example, the entry of the Germans into Paris was abandoned because it would overthrow M. Thiers' Government in France; and statesmen, like private individuals, have always to consider whether the full assertion of an undoubted right is consistent with still larger interests which may happen to be involved. By pressing the anti-Fenian claim, the Government of Great Britain would have obtained nothing, while it would have sacrificed an excellent opportunity of resuming those cordial relations with the United States which are our best guarantee that Fenian enterprises will never be successful.

THE LESSON OF THE ARMY BILL.

The Government have only succeeded in carrying through the House of Commons the Bill for the abolition of purchase by sacrificing a very large part of the provisions for the reorganisation of the army: an unsatisfactory result, we should suppose, not only for the Government, but for the officers who formed the nucleus of the relentless Opposition, since they have succeeded in defeating, or at least delaying, the part of the Bill which did *not* offend them, and have been compelled to accept the part of the Bill which did. But the chief interest which this partial defeat of the Government has for us, is its bearing on the general question of popular Parliamentary Government. Sir Roundell Palmer, in "pointing a moral" for the House of Commons, appeared to refer the mischief rather to the excessive factiousness of the Opposition, and compared its flagrantly obstructive conduct on this Army Regulation Bill with the moderation shown in resisting two much more revolutionary measures—the Irish Church and Irish Land Bill. But we much doubt whether Sir Roundell Palmer hit upon the real distinction between the cases of those great contests and this much smaller but much more protracted and troublesome struggle, when he regarded it as springing from any excess of acrimony or unscrupulousness in the Army-Conservatives. You may have a struggle protracted from either of two causes, the increased strength of the weaker party or the diminished strength of the stronger. Now, we are disposed to think that the intensity of dislike entertained by Army-Conservatives for the abolition of purchase, though keen enough, is probably *less* instead of greater than the intensity of dislike which was entertained by Church-Conservatives for the disestablishment and disendowment of the Irish Church, or than the intensity of dislike which was entertained by Land-Conservatives for the recognition of a tenant's customary right to be compensated for "disturbance." But then the intensity of interest felt by the reforming party in their reforms has diminished much more in proportion than the intensity of dislike felt by the Conservative party to that reform. The case is one of a somewhat diminished interest on both sides, but a much more illuminated interest on the side of the innovators than on the side of the Conservatives. The majority in favour of purchase has been clear but languid. Its members have felt no indignation at the difficulties they have met with, no disposition to put down and crush obstruction. The disturbers of the peace have been so active, chiefly because the police have looked on with the air of amazed spectators, instead of feeling themselves moved to discountenance the effervescence of rebellious feeling. Army questions do not belong to the general stock of Liberal traditions. Influential constituents do not urge their members about army questions. There is something of an air of unpopularity as yet attaching to the zealous discussion of these matters, even from the popular and democratic point of view. Members of Parliament feel that there is room here for the play of prejudice and personal feeling without dangerous consequences. The indifferent take leave to remain indifferent; the dissatisfied venture to show their dissatisfaction; and so, though the working majority, when it comes to a vote, is nearly as large as ever, there is plenty of room for the exercise of the Fabian policy without any manifestation of that unmistakable earnestness on the part of the majority which always brings Parliamentary minorities to their senses, and puts a term to vain repetitions of vain and rejected pleas. All minorities on questions where great interests are involved are eager enough for bitter opposition, and commonly their only capacity for judging what is fair and what is factious arises from their observation of the feeling which that opposition excites in the majority opposed to them. If they see a half-smile or a languid yawn where they would, if their opponents were in earnest, be met by murmurs and answered by cheers, they are quite convinced that they have not been factious. A minority cannot be factious without openly thwarting the fixed intentions of the majority, and to thwart is to excite and to displease. Where the majority are passive, the minority will always appear be far more important than it really is. As a shrunken and withered flower or fruit swells out delusively beneath the receiver of an air pump, as the pressure of the atmosphere diminishes, into the full dimensions of its ripest period, but collapses again the moment the air is readmitted, so a minority which feels that the pressure of the majority is relaxing, swells and grows into proportions of deceptive magnitude, but very soon collapses again the moment the majority find their earnestness and heart. It would have been wiser for Sir Roundell Palmer to lecture the majority for their apathy than to lecture the minority for their tenacity of purpose. The latter is a mere appearance due to that exhaustion of the Liberal atmosphere under which it has sprung up.

And no doubt it is one great disadvantage of our present army system that, while the subject of army changes is of the first national importance, it is one which touches the popular feelings of the popular party so little. In France and Germany army questions are at the very core of popular politics, because the interests of the whole people of France and Germany are identified with the army system of those countries. In England, however, where our army is voluntary and comparatively small, and where it is recruited not from the most intelligent and political, but from the most ignorant and unpolitical strata of the people, the organisation of the army has always been rather an administrative and official question than one of popular interest. Even the interest excited by the imaginary "Battle of Dorking" has not really stimulated public feeling about it. The electors think about taxation and religious tests, and church or disestablishment, and ballot, and women's votes, four times as much as they think about army recruiting and army purchase; and while it is so we must expect debates on the administrative reorganisation of the two great services to be conducted on very different principles from debates on those subjects about which the constituents eagerly catechise their members. We fear it must be admitted that Parliamentary discussion, successful as it is in winnowing subjects on which popular discussion is vehement, is not a very useful or powerful force in relation to matters on which popular feeling is languid. A class interest in the House is most valuable when it is subjected to a proper amount of Parliamentary pressure; it is then on its mettle, and speaking as it does with full technical knowledge, it often corrects most usefully the vague criticisms of the Reformers. But class interests expanding easily under the free air of popular indifference are not equally valuable; they become restive and irresponsible, and fight, as the minority has been fighting this Session, for temper rather than for a cause. But the fault lies with the people and the people's representatives. A little earnestness on their part would have rendered the scandal of this Session impossible.

THE DISPUTE BETWEEN MERCHANTS AND SHIPOWNERS ABOUT BILLS OF LADING.

A DISPUTE of a very important kind, and which is peculiarly interesting from its origin in the great new condition of the shipping trade—the rapid growth of extensive steam-shipping lines—has lately arisen between merchants and underwriters on the one side, and shipowners on the other. The controversy is about the stipulations in bills of lading. Merchants complain that by degrees shipowners have contrived to exempt themselves from every onerous common law obligation attaching to the ordinary contract for the carriage of goods by sea. They regulate the voyage as they please as regards calling at ports or deviation; they exempt themselves by special clauses from every conceivable sort of damage which can happen in the conveyance of goods; they take power to ship, tranship, and stow cargo at their absolute and unfettered discretion. A bill of lading which would contain the various clauses designed by shipowning ingenuity

would in fact bind the shipowner to nothing more than the carriage of goods from one place to another, with such care, at such times, and under such arrangements, or want of arrangements, as he himself might think proper. The consequence has been that numerous cases of damage and loss have occurred, in which the merchant, not having studied bills of lading with the care bestowed by the shipowner, or having only Hobson's choice in the forwarding of his goods, has been completely victimised. The special clauses in the bills of lading have relieved the shipowner, and neither is the underwriter liable, the policy of insurance not covering all cases of loss occurring in the way, or from causes, for which the shipowner would have been liable at common law. The underwriter, however, is at length brought in contact with the grievance, because merchants have very naturally attached the bill of lading to the insurance policy, or inserted the conditions affecting them in it, so as to make it cover the voyage as described in the bill of lading. Such is the dispute, and the main cause of it is said to be the existence of large steam-shipping companies. These companies, from the great scale of their operations, are very sensitive as to the losses for which they are responsible, and the *quasi*-monopoly they possess gives them great power in imposing their own terms. To catch a market a merchant has usually no choice but to send goods by a particular "line," and he must either deal on the terms of the shipowner, or not at all. The process of filling in the special clauses has also been assisted by the habits of merchants, and the peculiarly abstruse wording of a bill of lading. Instead of its being considered a formal contract for the conveyance of goods, the merchant thinks of it as a "receipt" or "warrant," on which he may obtain advances; and even if he were disposed to study it, he would probably not make much way with a document which has been adapted from time to time to legal decisions, and is full of every sort of technicality. Anyhow the grievance is now thought to be a very serious one, and has been the occasion of a circular issued by the Salvage Association at Lloyd's, warning merchants and underwriters of the various stipulations against which they should be on their guard. How far is the complaint well founded? And what course is open to the trade to protect their interests?

To the best of our belief merchants have got a very just cause of complaint, and the proof is the list of "exemption "clauses" contained in the circular of the Salvage Association, to which we have referred. The Secretary of the Association has been at the pains to compile from the bills of lading of 148 vessels trading with every part of the world—132 of the vessels being steamers and 16 sailing, while 32 are owned by companies and 116 by private individuals—a catalogue of the exemptions which are now more or less in use. Of course no particular bill of lading includes them all, and some have obvious reference to the peculiarities of particular trades, while others are not of *very* recent origin; but no such catalogue would have been possible without the shipowner, as a rule, having contrived to exempt himself from almost every disagreeable obligation. We give the catalogue itself below, and it speaks for itself; but we may notice one or two of the characteristic exemptions.

1. The stipulations affecting the voyage are almost all very mischievous to the merchant. The "liberty to sail without "pilot" is possibly not in all cases objectionable, but what can be made of the absolute license stipulated for as to calling and staying "at ports in or out of customary route, in any "order, for any purpose?" or of the liberty to "tow and "assist vessels in all situations?" or of the liberty "to de-"viate from the voyage for any purpose?" It is manifest that under such clauses a shipowner may regulate a voyage as he pleases. Instead of carrying goods straight to a destination, he may carry them round the world, and he may assist other vessels or deviate from the voyage under circumstances which are almost fatal. We have heard of a case of this description, where a ship gave "assistance" to a leaky consort in the Baltic trade at the cost of a week or ten days' delay in towing it back to Riga, which was just sufficient to render doubly hazardous a voyage which would otherwise have been tolerably safe. The actual result was that the ship which had given the assistance was caught in bad weather, and was lost. Under the bill of lading, the shipowner who had deviated was exempt from his common-law liability, and the deviation being contrary to the policy of insurance, the underwriter was also exempt.

2. The stipulations as to damage to goods are equally comprehensive in exempting the shipowner. Almost every species of negligence in packing or management which can be thought of is separately specified, and the shipowner released. Clause 8, relating to the conduct of servants, is especially comprehensive:—

8. Nor from damage through any of the following causes:—
Misdoing, Error in judgment, Negligence, Default — of — 1. Pilot; 2. Master, Mariners, or Engineers; 3. Stevedores; 4. Any other person in service of the shipowner; whether on navigating the ship or otherwise.

Under such stipulations it is quite plain the shipowner need be at no pains in selecting his servants, and the exception of *stevedores* will be especially mischievous. Claims are constantly arising through defective stowage, over which the shipowner has peculiar control, but this is trying to get rid of the difficulty at a stroke. The last clause of all exempting the shipowner from liability "for any damage whatever which "is capable of being covered by insurance" does not require any comment. The exemption of the shipowner from any contributions on account of "jettison" is also of a very dangerous character, besides interposing no small practical difficulty in adjusting the loss among the other contributories at common law. We should not say that everyone of the stipulations catalogued under this head is improper. One or two are very special indeed, such as the exemption "for damage from "stranding in the Suez Canal, however caused," and are clearly a fit subject for special bargains. But the comprehensive clauses we have cited are of a different nature; and there are some others, as will be seen, which are less comprehensive, and yet exempt the shipowner from the consequences of not giving the most ordinary care to his business.

3. The stipulations affecting the carriage are also very serious—especially the first catalogued, authorising the shipowner "to carry the goods by any other steamer, any other "ship, either belonging to the owner or to any other person; "and whether proceeding directly, or indirectly, to the port "of delivery." A contract of this sort is hardly a contract to carry at all. The merchant can have no certainty as to when his goods will reach market. In most cases no harm will come of it, as the shipowner, having filled his ship, is naturally anxious to do the work, and make ready for more freight. To a certain extent he has the same interest as the merchant. But this is a very different thing from a contract, and when a shipowner's interest clashes with the merchant's, the latter will go to the wall.

So far as we can learn too there is not only a good foundation for the grievance, but it is on so large a scale as to have materially affected some trades. We do not refer merely to the action of the merchants upon underwriters, who object very much to the extension of their risks under these novel bills of lading. This is the most serious matter of all, and it will not be less so if the underwriters are unable to withstand the pressure. In that case the conditions of profit in a business which is directly not very profitable will be altered materially for the worse, to the ultimate injury of all concerned. But there are other hindrances to trade involved. We are informed, for instance, that New York bankers are declining to make advances on bills of lading, which will really be no security in very many contingencies. A loss to the merchant will in fact be a loss to the banker; and after the issue of the present circular, bankers here as well as in New York would do well to look to the cover of their document bills.

What then should be the remedies for the grievance stated? The first thing to be done of course is for those interested to combine against the *quasi*-oppression of the shipowner. One cause of the evil being that merchants are many and shipowners few, the only resource of the merchant is to associate with his fellow sufferers, and take what common action may be possible. A united remonstrance from the merchants in a particular trade, backed as it would be by the underwriters, would be certain to have some influence on the shipowner. In the worst event such an association would have some power of bringing the shipowner to terms. The conditions of the trade are after all not such as to place the merchant, or at least associated merchants, permanently at the mercy of great shipowners. The latter have a very imperfect monopoly, and sufficient competition may be very easily stirred up

—there being no such difficulty as exists in the case of railways, where competition can only take place at the cost of millions of capital. One or two small steamers may be quite enough to cause such a loss of traffic to the great lines as to induce them to be more reasonable.

Nor do we see any insuperable difficulty in coming to terms. A good deal of what the shipowner really desires would probably be obtained under a more detailed contract. Instead of protecting himself by special clauses which place the merchant at his mercy, it would probably answer his purpose quite as well to specify (say) the nature of the deviation which he desires to make, or the limit of the assistance he may render to other vessels, and in the case of a line of steamers to make regulations for carrying goods according to priority of receipt and their suitability for stowage, goods left from one ship to have priority in the next. We would venture to suggest that merchants and shipowners in a particular trade might meet together and settle, by committee or otherwise, a common form of bill of lading adapted to the circumstances of that trade. Such meetings, assisted by the underwriters, would be able to ascertain where the shoe pinches in the case both of the shipowner and merchant, and devise a reasonable solution. At present the shipowner's plan of exempting himself from everything is sheer barbarism, and looks partly as if he had been too lazy to consider exactly what he wanted, and took advantage of his position to get rid of the difficulty anyhow. This is intolerable; but merchants and underwriters could plainly have no invincible objection to a specific contract, even if it conceded a great deal to the shipowner.

IV.—Stipulations affecting the Voyage.

1. Liberty to call and stay at ports in or out of customary route; in any order; for any purpose.
2. Liberty to sail with or without pilot.
3. Liberty to tow and assist vessels in all situations.
4. Liberty to deviate from the voyage for any purpose.

V.—Stipulations limiting the liability of Shipowners for Damage to Goods.

1. Not to be liable for damage from machinery, however caused—including consequence of defect in machinery, or of damage to it.
2. Not liable for damage from steam, or from boilers, however caused.
3. Not liable for damage from collision, however caused.
4. Nor for damage from stranding or wreck, however caused.
5. Nor for damage from heat, heat of hold, fire on board, fire in hulk or craft, fire on shore—however such fire (in any of these cases) may be caused.
6. Nor for damage from evaporation.
7. Nor for damage from smell of other goods.
8. Nor from damage through any of the following causes:—

Wrongful act, neglect, default, error in judgment, or negligence of } of { 1. Pilot; 2. Master, Mariners, or Engineers; 3. Stevedores; 4. Any other person in service of the shipowner, whether on navigating the ship or otherwise.

9. Nor for damage in craft, or hulk.
10. Nor for damage in course of transhipment. (Chiefly Suez and at Singapore.)
11. Nor for damage from stranding in the Suez Canal, however caused. (Special.)
12. Nor to be liable for damage from sweating coals, or coal dust.
13. Nor for damage from rust or from injurious effects from other goods.
14. Nor for damage from vermin.
15. Nor for damage, or loss, following from ship's not having room at port of transhipment.
16. Nor for pilferage.
17. Nor for damage to wrappers, however caused.
18. Nor for damage or loss to goods by fire while on any pier or lighter awaiting shipment. (Special to New York.)
19. Nor for any damage to goods, even when caused by negligence of persons in service of the shipowner.
20. Nor for loss by jettison, whether the subject of general contribution or not.
21. Nor for any damage whatever which is capable of being covered by insurance.

VI.—Stipulations affecting the Carriage.

1. Liberty to carry the goods by any other steamer, any other ship either belonging to the owner or to any other person, and whether proceeding directly, or indirectly, to the port of delivery.
2. Liberty to carry the goods beyond the port of delivery, when necessary to enable the ship owner to fulfil an engagement as to delivery of mails or (in particular trades) other engagements. In all such cases at the shipowner's expense, but at the merchant's risk.
3. Liberty to tranship the goods to land and store them, either on shore or afloat; to reship and forward them.
4. Liberty to stow the goods on the poop, or deck-house.
5. Liberty to carry goods of all kinds whether dangerous or not.

BUSINESS NOTES.

The New French Taxes.—We must await the publication of the detailed report of the Committee of the French Assembly, which is now considering the financial measures of the Government, before criticising these measures at length; but in the meantime we may refer our readers to the able account of the new taxes and their probable effects which our Paris correspondent furnishes this week. Condensing his account a little, and converting francs into English money, we obtain the following summary of the expedients by which M. Pouyer-Quertier proposes to fill up his deficit:—

	£	£
Registration and stamp duties (including 340,000*l.* from newspapers, and 600,000*l.* from fire and marine insurances)...		3,600,000
New taxes on consumption—Customs and excise	£	
on sugar	1,320,000	
Customs duty on coffee	800,000	
Tax on chicory	200,000	
Excise on beer, spirits, and wine	3,140,000	
Public house licences	200,000	
Duty on playing cards	60,000	
Increased price of tobacco	800,000	
Tax on lucifer matches	400,000	
		6,920,000
Taxes on raw materials and manufactures—		
Customs duty on petroleum	400,000	
Do. textile materials	2,800,000	
Do. raw materials, &c.	4,000,000	
Do. manufactured goods	400,000	
Export duties	600,000	
Navigation dues	200,000	
Tax on manufacture of paper	400,000	
		8,800,000
Increased postal charge on books and papers		20,000
Total		19,340,000

About one-half of the proposed taxes therefore are of a Protectionist order, while some of the taxes on consumption and the registration and stamp duties will also be of a kind to interfere with trade. We doubt very much whether such taxes will yield, but great as that misfortune will be it is not the worst. If France is obliged to submit to such taxes, it will undoubtedly pay enormously in indirect losses for the luxury of a Provisional Government, which also happens to be Protectionist.

Mr Fawcett on India.—Mr Fawcett's motion in favour of taking evidence in India on the subject of Indian finance and financial administration, which is now undergoing investigation, at his instance, by a Select Committee of the House of Commons, has been summarily rejected, but that it should have been made at all is a most serious occurrence, and there are one or two aggravating incidents. The mischief of the course proposed is self-evident. As the Government of India is necessarily despotic in form, it is essential for the mere existence of society in that country that nothing should be done to diminish the respect felt for the despot, or engender a notion that "authority" is confused and anarchic. The prestige of the despot is everything, and it would be far better to permit the existence of many abuses than destroy the only condition of settled order in a vast and diverse Empire. But Mr Fawcett's proposal would obviously take away the authority of the Government in India. A committee at home works in comparative secrecy; but were there to be a commission in India, the idea would be circulated that the delegates in India of the ultimate governing power ruling from Westminster are not supported by the authority which commissions them; that all kinds of appeals will be tolerated; that the "authority" with which everyone comes in contact may be successfully resisted. The special commission to take evidence would be literally a Court of Appeal from the Indian Administration, and the higher officials in a body would be justified in resigning at once. Of course if Mr Fawcett were prepared to urge that the House of Commons should take upon itself the detailed Government of India, there would be some logic in his proposal; but we doubt if even he, or any of the minority which voted with him, have ever conceived it to be possible for the House of Commons to do such a work, much less do it with justice both to home and to Indian concerns. On no other condition however could the English Legislature venture on any step to impugn the visible authority which it has set up in India. So long as the English people retain their governing sense we may be sure no such proposal will be listened to, but the motion is nevertheless grave, because the mere fact that it can be made will probably be exaggerated among an eastern population, and may breed some of the mischiefs which the carrying out of the proposal itself would have produced. We may fancy how rumours will swell the report in India that a party at home is seeking to substitute a new

authority for that which now reigns in Calcutta. And whatever mischiefs may thus ensue will be multiplied by the discreditable conduct of Mr Fawcett himself, in originally wording the preamble of his resolution so as to assert that wide-spread discontent exists among the natives and European inhabitants of India in reference to the financial and general administration of that country. This is the sort of language which is apt to fulfil itself, and Mr Fawcett, by indulging it and then hesitating to prove it and urge on the remedies, has been guilty of a most serious political offence. It is all very well to say, as he does, that the Government too changes its Bills and plans. No English Government could dare to change so much as would be implied in making a grave assertion of the existence of discontent among a portion of its subjects, and then not following it up. People who aim at being political personages should be tried by the same tests, and the incident ought to be damaging to Mr Fawcett's Parliamentary career. The whole affair is most damaging. We may well believe Mr Grant Duff's assertion, that it is an attempt of Mr Fawcett's to neutralise the effect of the evidence against him of that very Select Committee which he obtained. He wishes to furnish a reason for not succeeding in proving his case. The misfortune is that it should be a Government like that of India which is made the victim of a politician's wounded vanity.

LEGACY AND SUCCESSION DUTIES.—Mr Lowe's proposal to increase the tax on some successions was very summarily with drawn this year; but as the arrangement of the duties is not in a satisfactory state, we should esteem it as not improbable that an attempt will be made in an early Session to rectify the basis and the scale of the duties. We subjoin therefore from the appendix to the newly issued fourteenth report of the Inland Revenue Commissioners a statement of the amounts levied at each rate of duty, and the amount of property on which duty was paid, showing in brief compass the subject-matter with which the Finance Minister will have to deal :—

LEGACY AND SUCCESSION DUTIES.

AMOUNT paid at each Rate in the Years ended March 31, 1869 and 1870.

RATES OF DUTY.	LEGACY DUTY.											
	Year ended March 31, 1869.						Year ended March 31, 1870.					
	Amount of Duty.			Amount of Property on which Duty was Paid.			Amount of Duty.			Amount of Property on which Duty was Paid.		
	£	s	d	£	s	d	£	s	d	£	s	d
1 per cent.	471,138	19	10	47,114,969	16	2	503,382	17	2	50,339,828	10	4

6 —	11,316	1	8	188,775	0	1	13,038	8	3	217,853	9	10
10 —	175,576	2	10	1,756,631	17	11	172,046	8	11	1,770,966	15	8
Total	722,322	3	3	36,044,582	1	10	741,583	3	7	37,184,481	8	7

It will be seen from this that what Mr Lowe proposed to deal with was by far the most considerable part of the property liable to the duty. Out of 87,721,000*l* of property on which legacy duty was paid in 1869-70, no less an amount than 50,339,000*l*, or about 60 per cent. paid duty at the rate of 1 per cent., and out of 37,184,000*l* of property, which paid succession duty, 26,194,000*l*, or 70 per cent., paid duty at the rate of 1 per cent. By doubling the rate upon this class of property, Mr Lowe would, in fact, have added about one-fourth in the case of legacies, and about one-third in the case of successions, to the present yield of the duties. While we point out the facts however we refrain from expressing any opinion on the particular proposal of Mr Lowe, though we fully sympathise with his wish to extract more for the State from this particular class of taxes. Apart from that proposal, there is quite enough in the difference of basis between the legacy and succession duties themselves to justify the interference of the Finance Minister. So long as the value of property chargeable to successions is only estimated at the life-interest of the successor, while property chargeable to legacy duty pays on its full value, there will be ample room for overhauling the present system. There is probably about 4,000,000,000*l* of real property in the country, and as it is calculated, according to a minimum estimate, that about a forty-fifth part is annually succeeded to, it would follow that instead of 37,000,000*l* being annually subjected to duty, the amount ought to be nearly 100,000,000*l*. That so much value escapes is a very serious loss. It is also urgent that some attempt should be made to subject the property of corporations to an equivalent charge. Instead of yielding about 3,000,000*l* altogether, or including probate duty 4,600,000*l*, the succession to property ought to be made a much more productive source of income than it is to the State.

BANK HOLIDAYS.—A short Bill has been introduced into Parliament by Mr Watkin Williams and Mr Locke to make the law uniform as to the time when bills and notes falling due upon holidays shall be payable. It is stated in the preamble of the Bill that by the Act 7 and 8 Geo. 4, c. 15, all bills and notes falling due upon Sunday, Christmas Day, Good Friday, and any fast or thanksgiving day appointed by royal proclamation, shall be payable on the day *preceding*, while by the recent Bank Holidays Act bills and notes are made payable on the day *following* the holidays thereby established. The enacting clause proposes to secure uniformity by adapting the practice sanctioned in the recent statute to the older holidays—so that when there is a holiday or Sunday, bills should always be payable the day after. Desirable as uniformity may be, we have no hesitation in saying that a measure like this ought to be very carefully considered. The change will be a very considerable one, as the older holidays, including Sundays, are ever so many more than the one or two new holidays established. If mere uniformity in an indifferent matter were the object, the change, we should think, ought rather to be in the direction of assimilating the practice with the new holidays to the former practice. The practice followed with the new holidays however was avowedly urged on the House of Commons in order to provide for exceptional cases in which the holidays would occur on a Monday or a Saturday; yet it is now proposed to make the provision for the exception the rule. This is certainly an extreme case of getting in the thin end of the wedge, and driving it home. On the whole question we are disposed to think that the arrangements as to bills falling due on holidays had better remain as they are. As much can be said at least for making them fall due on the day preceding as on the day following, the creditors who receive payment having theoretically as much interest in getting paid the day before as the debtors who pay have in paying the day after, and having, we believe, a larger practical interest in anticipating payment than the debtor in postponing it for a day. The matter at any rate is not to be settled off hand in deference to a mere craving for uniformity.

SUEZ CANAL.—The following is officially given as the traffic of the Suez Canal in the month of April last :—

	Francs	c
Passage dues on 55 ships	627,406	98
Passage dues on small craft.....	12,249	26
Transit of merchandise	2,102	6
Transit of passengers	7,836	19
Total	649,594	49

At 25f to the pound, 25,983*l* 15s 7d.

At this rate the Canal would yield 312,000*l* a year, with about 20,000*l* besides for rents from property. The amount, even *without* deducting working expenses, would be miserably insufficient for the interest of the debt which has been created, and which interest must be met before the shareholders can get a farthing. It is now quite evident from experience that the glowing anticipations of traffic which were indulged in before the opening, and which we denounced at the time at the risk of being reckoned "enemies" of the enterprise, were in fact gross delusions. There never was any real doubt about the matter.

BANKRUPTCY WITHOUT CAUSE.—The case of Johnson *v.* Emerson and Sparrow, which was an action of damages against a firm of solicitors for getting the plaintiff made a bankrupt without reasonable or probable cause, has now come before the Court of Exchequer, upon an application for a new trial by the defendant Sparrow, against whom the verdict had been entered. The peculiarity of the case, it will be remembered, was this, that although there would have been little doubt about the liability of Sir R. Harvey, for whom the defendants

acted as solicitors, yet it was necessary, in order to establish the liability of the latter, to show that they had taken independent steps, or had been acting upon undue and improper motives, in order to please their clients. The whole question resolved itself into one of evidence as to the facts bearing on these points, and though the defendant Emerson was relieved, the jury gave a verdict against the other defendant. The case was a most interesting one, as there can be few matters of legal policy more important than to prevent the abuse of the bankruptcy process in a case where the alleged debtor honestly disputes the claim. In the present stage however the case is interesting as another proof of the mischief of a deficient court. The Court of Exchequer was exactly divided—Barons Martin and Bramwell being for making the rule absolute for the defendant, and the Lord Chief Baron and Baron Cleasby being for maintaining the verdict entered at the trial. The practical conclusion come to therefore was to facilitate an appeal to the Court of Exchequer Chamber, and for that purpose Baron Bramwell withdrew his judgment, thus throwing the balance of opinion against the defendant, who however, in the special circumstances of the case, is relieved of the necessity for giving security for debt and costs, which would have amounted, it is stated, to nearly 4,000*l*. These successive hearings and appeals are undoubtedly most costly, and whatever the ultimate decision may be, this will probably be one of those cases in which both parties would have been wiser to suffer the extremest injury at first proposed to be inflicted on them by their opponent rather than vindicate their rights at law.

Preliminary Expenses of Lending.—The Court of Queen's Bench, in the case of Gibson *v.* Wright, has decided that if a party offers a certain security for a loan, and the lender is dissatisfied with either the value or the title, the latter has no claim to be paid the expenses of the inquiry in the absence of an express contract. The Lord Chief Justice stated that the rule in a sale is different, because the vendor then undertakes to sell and make out a good title, whereas in a mortgage he only offers the security to guarantee the repayment of a loan, and there is no contract until the security has been accepted. The decision is one which should be attended to the reasons being clearly such that a special preliminary contract ought to be made; but we rather think that there is a closer analogy between a mortgage and a sale than the Lord Chief Justice allows. Very often in a mortgage the security is the only thing, the personal obligation of the lender being never considered. In these cases the undertaking to give security is like the undertaking to sell; and if the borrower pretends to offer more value than he really does, or cannot show a title, he is exactly in the position of a seller who cannot give what he pretended to sell, and who is consequently held bound to pay the vendee's expenses. Those interested however will now understand that when a loan negotiation has reached the point of a tender of security, the intending lender should take care to secure himself by a preliminary contract against any expenses he may incur if the security should not satisfy certain prescribed conditions.

Principal and Surety.—A case of some interest bearing on this subject has just been decided by Vice-Chancellor Malins. The case was that of the Oriental Financial Corporation, Limited *v.* Overend, Gurney, and Company, Limited—being one of the many litigations arising out of the Overends' collapse. The object of the plaintiffs was to be released from all liability upon certain bills of exchange for 10,000*l*, which they had accepted for the accommodation of one M'Henry, and which he had discounted with Overends. Their plea was that M'Henry had deposited securities with Overends to provide for the bills, and that they had been included in a settlement of large bill transactions between M'Henry and the defendants. At any rate the defendants, by giving time to M'Henry, had released the plaintiffs. On the other hand it was contended for the defence that the alleged settlement between M'Henry and the defendants was only an agreement to hold over the bills until the securities had been realised, and that the bills had never really been provided for. Vice-Chancellor Malins adopted the latter view, and also held that the plaintiffs were not released in consequence of delay having been given to M'Henry. The plaintiffs were the apparent principals, as they had accepted the bills, and although it was a rule of law that giving delay to the principal released the surety, yet the corresponding rule—that giving time to the surety released the principal—"was one which, though settled, had not met with "general approbation by the Judges, and was not to be ex- "tended." Moreover the giving time must be by a binding contract, and as this was not so in the present case, M'Henry having simply induced the defendants not to press the plaintiffs, there was no case for extending the rule of law to such circumstances. The plaintiffs therefore failed in obtaining the declaration that they were not liable upon the bills.

Railways and Carriers.—The Court of Common Pleas, in the case of Parkinson *v.* The Great Western Railway Company, has decided that a railway company, being bound to give delivery of goods at the various stations, and having no right to insist upon being itself the deliverer, is bound to attend to a general order from merchants authorising a certain carrier to receive and deliver all the goods coming to them. It was contended for the railway company that they were entitled to a specific notice in the case of each parcel of goods; but the plaintiff succeeded in establishing that it was only a reasonable facility that they should attend to the general orders of his customers. Unless they were made to do so they would place him at a disadvantage in carrying on his own business, and they were expressly prohibited from giving themselves such a preference.

Deficient Income Tax Returns.—The striking passages in the report of the Inland Revenue Commissioners two years ago, on the subject of defective returns under Schedule D will not have been forgotten. The same subject is glanced at in the fourteenth report which has just been issued, and which contains the following comparison of specimen "returns" and "assessments:"—

Return.	Assessment.	Return.	Assessment.
£	£	£	£
nil	7,217	1,000	5,000
1,925	3,485	5,000	10,000
4,540	8,000	750	2,000
4,500	9,366	1,700	5,500
140,207	184,224	6,000	10,000
76,420	95,027*	13,957	24,000
29,612	40,060†	3,000	8,000
239,834	287,780	1,950	5,000
190,513	254,150	3,500	16,000
nil	5,285	1,800	5,000
7,068	18,272	25,000	35,000
120,000	178,000‡	2,500	8,000
104,565	130,111	1,450	9,000
14,596	25,000	7,500	11,500
7,675	15,000	18,240	29,238
7,500	12,000	250	3,500
104,618	126,925	16,330	22,000
6,200	10,000		
17,500	22,000	1,181,838	1,650,880
4,160	10,000		

* In this case duty was paid on 10,482*l* on profits not returned in the previous year.
† Duty on 17,200*l* paid in respect of the previous year.
‡ Duty on 58,577*l* paid in respect of the previous years.

According to these specimens, the people who make defective returns under Schedule D are ascertained to omit on the average one-third of their income, if not more; and as only a small portion of the deficiencies can be discovered, we may imagine what the leakage is. The tax has the misfortune of being inquisitorial, but at least those who are made to pay full duty are not devoid of good reasons for wishing to make the tax more inquisitorial than it is. Each penny would become more productive, and it would be possible to charge fewer pennies on the honest payers.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

Paris, June 8.

Even the manufacturers of Roubaix, though always bitterly hostile to the Treaty of Commerce with England, were moved at the announcement of the intention of the Government to tax the raw materials of textile industries. But a moment's reflection would have convinced them that it only began with materials to have a pretext for taxing still more heavily the manufactured products of foreign countries. This was indeed distinctly declared to them in a letter which M. Ozenne, one of the principal officials of the Ministry of Commerce, was ordered to write to them on 30th May last. He said—"In case it should become necessary to tax raw materials imported,

it has always been understood that the duties would be restored in the form of drawbacks on the export of the manufactured products, and that the amount of the drawbacks, augmented by a sum representing the indirect charges that weigh on manufactures, would be added to the import duties on products manufactured abroad."

The Treaty of Commerce between France and Belgium, which is substantially the same as that with England, was concluded on 1st May, 1861, for ten years. It consequently expired on 1st of last month. But like the English treaty, it contained a clause that in the event of its not being formally denounced by one or other of the parties twelve months before the expiration of the ten years it should continue in force; and no denunciation was made. It is expected, however, in Belgium that the French Government will soon manifest a desire to see it cease; but even in that case it will exist for a year afterwards.

The well to-do-people who fled from Paris, on pretext that they did not like the Commune, but in reality from cowardice, have returned *en masse*. With them has come back the troop of Bourse speculators; and among the latter are many of the Germans, chiefly Israelites, who for years made Paris the centre of vast operations. The consequence is that the Bourse has become almost as much thronged as in the palmy days before the war, and already have transactions assumed a certain degree of activity. For the moment, however, discussions take up more more time than dealings, the object being to ascertain the situation of things, and to calculate the turn they are likely to take. The new loan is of course the principal subject of the conversations, and great impatience is manifested to see the precise conditions of it published. An expectation prevails among some people that it will be in 5 not 3 per cent. stock, and that the price of issue will be about 82 or 83. Another matter of much interest is the situation, present and prospective, of the Credit Foncier. Many of the houses mortgaged to it, both in the provinces and in Paris, have been bombarded or burned into ruins, and many others have suffered from shells or fire; whilst almost everywhere, from the non-payment of rents and the long depression of trade and agriculture, the recovery of the annuities due to it is likely to present difficulties.

The following is a comparison of principal Bourse quotations of the week:—

	June 1.		June 8.

A drawing of the bonds to be paid off of the Ottoman loan of 1863 and 1865 has taken place to-day at the Credit Mobilier.

PARIS, June 13.

In the National Assembly at Versailles yesterday, the Minister of Finance, M. Pouyer-Quertier, presented his plan for the augmentation of taxes, which the disastrous war has necessitated, and it is as follows:—

REGISTRATION DUTIES AND STAMPS.

	francs.
Double tenth (*decime*) on registration duties and various receipts	31,000,000
Double tenth on stamps	15,500,000
Succession duty after death on foreign securities	5,000,000
Repressive measures and registration of leases	15,000,000
Tax on fire and maritime insurances	15,000,000
Tax on newspapers	8,500,000
	90,000,000

CUSTOMS.—NET YIELD OF NEW TAXES AND SURCHARGES.

	francs.
Increased duty on foreign and colonial sugar	14,000,000
Coffee	20,000,000
Petroleum	10,000,000
Textile materials	70,000,000
Raw materials, &c.	100,000,000
Manufactured goods	10,000,000
Export duties	15,000,000
Navigation dues	5,000,000
	244,000,000

INDIRECT TAXES.

	francs.
Increased duty on native sugar (beetroot)	19,000,000
Do. on circulation of wines, cider, &c.	16,000,000
Do. on the consumption of brandies and spirits	58,000,000
Do. on beer	4,500,000
Do. on licenses for public houses	5,000,000
Do. on playing cards	1,500,000
From tobacco	20,000,000
Tax on lucifer matches	10,000,000
Tax on manufacture of paper	10,000,000
Tax on chicory	5,000,000
	149,000,000

POST OFFICE.

	francs.
Revision of the charge for carrying books and printed papers	500,000

The total of these new imposts is 483,500,000f, making 19,340,000*l*. As regards the first chapter, it may be necessary to explain for some readers that in France it is the custom to augment or diminish certain direct taxes by tenths of a franc (*decime*), about a penny, and that "repressive measures" means the infliction of fines for attempts to evade the Stamp Laws. Under the head of Customs the item of 100,000,000f translated "raw materials, &c.," stands in French "matieres brutes *et autres*," which is terribly comprehensive.

After presenting the preceding detail, M. Pouyer-Quertier called on the Assembly to remark that it did not add a farthing to the land tax, to the trade tax (licenses), or to the two other direct taxes called "personal" and "furniture," and he remarked that the new taxes would be collected without additional expense. Adding the savings proposed to be effected to the increased revenue from new taxes, he said that the country would improve its resources by about 660,000,000f a-year (26,400,000*l*).

What will be thought of M. Pouyer-Quertier's scheme in England is not difficult to divine. It is the exact contrary of that which Sir Robert Peel and our Parliament devised for relieving the country from embarrassments infinitely less serious than those in which France is plunged; and I fear not to say that it is the exact contrary of that which the situation of France calls for. To set industry free in order to benefit the working classes, and by means of an income tax to make "the rich" contribute their fair share to the public burdens—this is the *desideratum* of France, as it was with us some thirty years back. Instead of that, M. Pouyer-Quertier proposes taxes which, striking at commerce and industry, will lessen the demand for labour, and will at the same time render the expense of living greater to all, especially to the working man and the peasant, and he leaves the possessors of acquired wealth untouched. "The poor will become poorer, and the rich richer." In no country would such financial policy be just or wise; in France where "the poor," that is, the working classes, are angry about the distribution of wealth, and where they have just shown in what terrible fashion they can use cannon, and muskets, and petroleum, it is purely and simply madness.

PARIS, June 15.

The expectation that the conditions of the new loan would be promptly promulgated has been disappointed, and up to the present moment we know them not. The loan itself is, as may be imagined, the subject of conversation in every financial circle, and all manner of theories about it—that is, as to whether it had better be in 5 or 3 per cent. stock; be conceded in the lump to bankers or offered, in the fashion of the Empire, to public subscription; be in part or wholly accompanied with lottery prizes, &c., &c.—all these theories are expressed. It would be a waste of time to recapitulate what is said, and to examine "the ideas" put forward. But as foreign, and especially English, capitalists are to be solicited to take part in the affair, perhaps it may be well to observe that the system of taxation proposed by M. Pouyer-Quertier to meet the charges of the loan requires the gravest consideration from them. If there be any truth in Political Economy, any truth in the experience of England, that system will cripple industry and commercial enterprise, and will consequently render the payment of those charges extremely difficult. In times of peace France could hardly bear the financial burden of the Empire; how can she sustain an infinitely heavier one when, after fearful disasters, the degree of commercial liberty she enjoyed under the Empire is taken away? In a purely political point of view too what M. Pouyer-Quertier proposes is simply monstrous: it will press more heavily on those who work than on those who possess acquired wealth, and will consequently maintain, and even aggravate, the *economic* grievance which had a great part in, and was in truth at the bottom of, the terrible events that have appalled the world.

The country has not yet had time to study the scheme of its Protectionist Minister of Finance. But that it will protest energetically against it may be considered certain. Lyons, which on hearing speak of a duty of 20 per cent. on raw silk—the material which gives bread to its working population—sent a deputation to say that such a thing ought not to be, is

about to forward a message still more energetic. Marseilles sees that several of its industries, and its shipping interest, will be injured, and is preparing to act. Havre, which would suffer terribly from the proposed duties on cotton, coffee, and other things, is on Saturday to have a grand meeting of its merchants to complain. Bordeaux, which understands and appreciates what is called in this country free trade (though in truth no such thing exists), because it knows that in order to sell its wines abroad it must consent to buy the goods foreign countries have to sell,—Bordeaux is preparing to give M. Pouyer-Quertier and his chief, M. Thiers, a lesson which will be peculiarly disagreeable to them, and that is, to send M. Rouher and M. de Forcade la Roquette to the Assembly in the approaching elections. Political considerations would certainly, at the present moment, make Bordeaux prefer to be represented by other men than these two distinguished upholders of Imperialism; but they contributed largely to the commercial reforms of the Empire, and Bordeaux is grateful for the past, and thinks they will be useful against a Protectionist Government in future. Last, but not least, M. Michel Chevalier, who is the real author of those reforms, as Cobden was of that in England, has already begun to raise his voice in the College de France in defence of the cause to which he has devoted talent of a lofty order, and the labour of a life; and though he only now speaks from a Professor's chair, he will be heard throughout the land.

Not only is M. Pouyer-Quertier's plan radically wrong in principle, but it is open to grave objections in detail. The taxation of paper and of newspapers will, for example, be almost ruinous to the paper trade, and will at the same time naturally be injurious to the printing trade, and to all the callings dependent thereon. And why, if it be right to tax playing cards, are not billiards and dominoes, in which the French people waste an infinity of time, taxed also? And if the spread of public-houses is to be checked by means of taxes, why should *cafés*, which are in reality public-houses of a superior order, be spared? Again, would it not have been right to put a stamp on invoices and receipts? And considering the childish manner of the French people for "decorations"—the privilege of wearing a bit of ribbon in a buttonhole—would it not have been well to make it produce money, especially as decorations are given in nine cases out of ten not for public merit, but from private interest? Many other sins of commission and omission in the scheme might be pointed out, but these for the moment must suffice.

The anxiety in Paris to see "something done" about rents and bills is very great and very general. The Government and the Assembly have legislated thereon with the *légèreté* that characterises the French, but which is really unpardonable in serious things, and a better law is loudly demanded. A number of the leading merchants and traders have held meetings at the Comptoir d'Escompte to discuss the bill question, and their conclusion is, that larger delays than those accorded are necessary. The difficulty of paying rents, of which nine months are due, is greater than that of bills.

M. Ernest Picard, nominated Governor of the Bank of France, has resigned. He could not do otherwise. The directors of the Bank flatly refused to accept him, and public opinion was outraged at seeing a man who had passed twenty years of his life in denouncing the abuses of the Empire, thrust himself into a sinecure of about 4,000*l* per annum.

In addition to the loan of the Government, there will have to be one for the city of Paris. The city is in reality bankrupt, having suspended payment of interest on its debentures for some time past; but it will be able to obtain new credit. A curious question is the extent of its responsibility for the damage done to private property both by the bombardment of M. Thiers and by that of the Commune.

A member of the Assembly has presented a Bill for raising the 2,500,000*l* required by the Government, by the issue of five series of bonds of 500,000*l* each, the bonds being of 5*l*, 10*l*, or 100*l*, and bearing 6 per cent. interest, but with power to the subscriber to transform them into other bonds at 3·60 per cent interest, to which lottery prizes of 1,250,000*l* per annum for each series will be attached. The project is based on the theory that as lotteries are extremely popular among the French, the Government has the right to use them as a cheap way of getting money.

The Government of the National Defence decreed that the making and sale of arms should be completely free. The Assembly has just passed a Bill which subjects anew the arms trade to the severe control of the Government. A deputy pointed out the extreme desirability of leaving this industry, like all others, free, and that freedom produces in other countries not only great commercial advantages, but constant improvement and new inventions. But he spoke in vain. So it is in France—continual revolutions, never a reform.

The Society for the Development and Defence of Commerce and Industry of Marseilles—a self-constituted but very intelligent and active body—has complained to the Government that the Courts of North Germany have decided that bills on France which have remained unpaid, in virtue of laws and decrees granting delays, cannot be made the subject of actions against endorsees residing in Germany because they were not protested in due time. The society, after pointing out that the decision is disastrous to French commerce, and after expressing the fear that it will be imitated in other countries, argues that it is unjust, for the reasons that the delays granted in France, though extending to months, ought to be considered only an extension of days of grace, and that it is an established principle that bills payable in a country are subject to the laws and usages of that country.

An English company is proposing to different towns in France, among them Nantes and Bordeaux, to construct tramways for them.

The *Journal des Fabricants de Sucre*, organ of the beetroot sugar trade, thus sums up an article on the situation:—"The approaching season promises to be very active, and the sugar industry does not appear to have suffered much from the invasion and the war." Another sugar journal, the *Bulletin Commercial*, says that England has made such large purchases recently that prices have risen, and that she has given orders for execution from October to January.

The Bank of France, as is known, accepts for a moderate charge the care of *valeurs* of all kinds—Government stock, shares, bonds, &c. In a letter of the sub-governor, M. de Plœuc, published a few days ago, it was stated that the Commune had not touched these things; but nevertheless it appears that the possessors of them are uneasy. Accordingly the Bank has had inserted in the *Official Journal* a declaration that the fears are entirely unfounded, and that though the Commune made requisitions on it, they "did not extend to the securities deposited, or to the funds of private persons."

On the Bourse transactions have resumed activity, and they will no doubt become more so when the conditions of the new loan are known. The Threes, which on the 8th were 53f 45c, are to-day 53f 52c, and the Italian has fallen from 57f 90c to 57f 40c. In the other quotations of to-day are the Bank of France, 2,920f; Comptoir d'Escompte, 630f; Credit Foncier, 905f; Société Générale, 528f 75c; Lyons Railway, 855f; Southern, 630f; Northern, 995f; Orleans, 800f; Western, 530f; Parisian Gas, 737f 50c; Suez Canal, 236f 25c; Spanish Exterior, 32½; United States, 5-20's, 102¾.

The "Imperial Ottoman Government" notifies, through the Comptoir d'Escompte, that the delay in the payment of calls of the 1869 loan, which "circumstances" necessitated, cannot be prolonged, and that if they be not paid up before 1st August, the sale of obligations, for which provisional scrip has been given, will be proceeded to on the Bourse. The Comptoir, on its part, makes known that beyond 30th June no further delay can be granted for the payment of calls due on the mortgage bonds of the Viceroy of Egypt of the 1870 issue, and that the bonds on which they are not paid will be sold.

Messrs Erlanger and Co. announce the payment from 1st July of the interest on Portuguese loans of 1848, 1853, and subsequent years.

The directors of the Credit Industrial Bank announce that the dividend of 1870 will be 12f 50c. Of this sum 2f 50c were paid in November. On the shares only 125f have been called up.

The directors of the Southern Railway Company, in the approaching annual meeting, will propose the payment of 25f per share in addition to the sum already distributed.

The Compagnie Générale d'Eclairage par le Gaz (Lebon and Co.) is paying 30f on half-a-year's interest of 1,000f bonds, and 7f 50c on those of 300f.

The Company des Chemins de Fer Normand is paying a coupon of interest due 1st June.

The Company of the Railways of Saragossa to Pampeluna and Barcelona is about to pay (date not yet fixed) the coupons of bonds of the Pampeluna line due 1st October and 1st April.

The Bank of Belgium announces the payment from 1st July of 40f per share as second dividend of 1870.

The Banque de Credit et de Depots des Pays Bas informs shareholders in France that the balance of the dividend of 1870, 22f, is now in payment. A sum of 20f was distributed in November.

The annual meeting of the French Transatlantic Company is fixed for the 3rd July, that of the Western Railway for 30th June, that of the Suez Canal for 20th July. The assembly of the Lyons and Mediterranean Railway will have to be postponed, owing to the destruction of books and papers in the fire of its premises.

The provisional issue of 88,000 obligations of the North-East Railway Company, made in 1869, is by authority of the Government declared definitive, and interest on them is to be paid 1st April and 1st October. In other words, the certificates of subscription that were given as a temporary measure are held to represent bonds. No call is made.

EXCISE.

QUANTITIES of the several ARTICLES CHARGED with DUTIES of EXCISE, and FREE of DUTY; the QUANTITIES EXPORTED; and the QUANTITIES RETAINED for HOME CONSUMPTION in the UNITED KINGDOM, in the QUARTER ended 31st MARCH, 1871, compared with the corresponding Periods of the Years 1869 and 1870.

	£	£	£
Balances on June 3	4,088,450	978,725	5,062,175
— June 10	4,523,837	1,068,654	5,592,491
Increase	435,387	94,929	530,316

The other receipts to date were 85,370*l*, the other payments were 59,671*l*.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs a copy of a despatch from Her Majesty's Consul at Manila, stating that in accordance with the instructions contained in a decree issued at Madrid on the 20th December, 1870, the differential duties will no longer be levied on goods arriving in foreign vessels at the port of Manila, this change in the Customs regulations coming into force on the 15th April last.

The following is a return of the number of paupers (exclusive of vagrants and lunatics and casuals) on the last day of the first week of June, 1871 and of the corresponding week in 1870 :—

In the first quarter of the year 1871 there were paid on 1,760,[illegible] gallons of home-made spirits for consumption as beverage in the United Kingdom, being an increase of 34[illegible],000 gallons over the corresponding period of 1870. The foreign spirits entered for home consumption in the same period were 1,116,977 proof gallons of rum, 408,[illegible]44 proof gallons of brandy, and 271,[illegible]84 proof gallons of other spirits, but all these duties also are larger than in the first quarter of 1870.

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during May, 1871 :—

IMPORTS.

Export list, showing the distribution of coal imported into the port or district of London by sea, rail, and canal, and afterwards exported coastwise or to foreign ports, or sent beyond limits of London district, by rail or inland navigation, during May, 1871 :—

EXPORTS.

1. Railway-borne coal passing "to vessels" through district	tons	51,573
2. Seaborne coal exported to British Possessions, or to foreign ports, or to the coast	tons 39,[illegible]	
Inland coal bunkered in sea-going vessels	11,[illegible]	
Sent by canal out inland navigation	4,[illegible]	
		55,837
3. Railway-borne coal exported to British Possessions, or to foreign ports, or to the coast	29,[illegible]	
Sent by canal bunkered	501	
Sent by canal out inland navigation	112	
		30,[illegible]
4. Seaborne coal brought into port and exported in same ships		200
Total quantity of coal conveyed beyond limits of coal duty district during May, 1871		137,[illegible]
Ditto, May 1870		90,[illegible]

The advices from South Australia are dated April 24. There was a considerable export of cereals; four vessels had cleared for England, and the total value shipped to all parts since the 1st of January had reached 502,954*l*, the business being not less than 43,000 tons. The prospects of the vintage were good. The Government had consented to receive defaced silver coin at a discount of 5 per cent. for remittance to England. New land regulations are issued providing for occupation licenses in connection with mining, also for leases of land supposed to contain coal, oils, and other valuable produce. The overland telegraph was progressing satisfactorily. A pass has been discovered through the M'Donnell range, and thus far those in charge of the enterprise, with weather in their favour, had surmounted all obstacles. Gold has been found near Port Elliot, and diamonds are reported to have been met with 700 miles north of Adelaide. Mining affairs show the following features:—The Burra is improving under the new system; the Moonta has paid another dividend, and has large accumulating funds; the Yelta and minor undertakings are productive, but as yet do not yield a profit. The growth of flax and hops was engaging attention. Wheat had fallen from 5s 8d to 5s 6d per bushel; flour was 12*l* 10s per ton; copper, 70*l* per ton. The banks sold drafts on London at 60 days' sight at 1 pm., and bought at 1 discount.

A Bill now before Parliament, introduced by the Chancellor of the Exchequer, with regard to the borrowing powers of the Metropolitan Board of Works, proposes to enact that trustees may invest in the stocks issued by that Board, unless forbidden by the will or other instrument under which they act.

According to a statement from Messrs C. and C. J. Coles, the official Customs' returns of the stock of sugar in bond in the United Kingdom at the end of May for this and last year, have excited much attention, owing to their making the stocks of each year nearly equal, whereas the returns of the stock of sugar in the public warehouses of the four principal ports of Great Britain at the end of May showed a deficiency of 41,000 tons this year as compared with last. It appears that the discrepancy is owing to the change of system this year, requiring the weight of sugar to be estimated and stated in the warehousing entry, which weight is now immediately carried to account on the day of entry, whereas last year it was not taken into account until the real weight was ascertained. A difference of at least a fortnight has thus been created.

An annual return shows that in the year 1870 30,220,268 gallons of proof spirits were distilled in the United Kingdom; 7,479,422 gallons in England, 14,483,744 gallons in Scotland (nearly half the production of the United Kingdom), and 8,257,102 gallons in Ireland. Duty was paid in the year on 23,452,240 gallons, amounting, at 10s per gallon, to 11,726,120*l*. The consumption of British spirits in the year is stated at 22,613,490 gallons—viz., 11,940,083 gallons in England, 5,501,987 gallons in Scotland, and 5,170,700 gallons in Ireland. 1,633,219 gallons were removed in the year from Ireland to England and Scotland, and no less than 4,258,097 gallons from Scotland to England and Ireland; 125,337 gallons from England to Scotland and Ireland. At the end of the year there were 16,941,149 gallons of British spirits in bonded stores in the United Kingdom ready to supply thirsty souls in 1871.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 14th day of June, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	40,134,680	Government debt	11,015,100
		Other securities	3,984,900

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending June 14, 1871.	Week ending June 7, 1871.	Week ending June 15, 1870.
	£	£	£
Thursday	10,449,000	17,913,000	7,866,000
Friday	10,925,000	14,975,000	10,223,000
Saturday	12,076,000	16,044,000	11,632,000
Monday	10,864,000	11,932,000	9,850,000
Tuesday	12,769.000	14,223,000	11,758,000
Wednesday	11,023,000	11,499,000	33,952,000
Total	68,106,000	86,586,000	85,281,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, June 15, 1871.

The total since the 4th of January, 1871, is 1,927,924,000*l*, compared with 1,768,684,000*l* for the corresponding period ast year, showing an increase of 159,240,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz.:—

At corresponding dates with the present week.	June 19, 1861.	June 17, 1868.	June 16, 1869.	June 15, 1870.	June 14, 1871.
Circulation, including bank post bills	£ 19,743,718	£ 23,949,480	£ 23,023,975	£ 22,971,029	£ 24,222,745
Public deposits	7,855,633	7,986,257	7,139,111	11,166,165	10,189,888
Other deposits	11,082,951	19,706,991	17,455,401	17,342,775	18,347,116

Clearing-house returns	...	74,243,000	69,300,000	85,281,000	68,106,000

In 1861, there was still little business in the money market, but the open market rate was still nearly up to the Bank minimum. The shipments of gold to America continued. The want of cotton was already much felt on account of the blockade of Southern ports established by the North. The South had also prohibited the export of cotton, except through Southern ports.

In 1868, the 2 per cent. period continued with little prospect of a break, gold continuing to arrive. It was expected that the price of wheat would now tend downwards. The Abyssinian campaign had closed successfully.

In 1869, the tendency of money was downwards. Some movement upwards was anticipated from the payment of the money for the purchase of telegraphs by the Government, but only a slight movement, as the payment could make no change in the total supply of money. Mr Forster had carried the Endowed Schools Bill through the chief stages in the House of Commons.

In 1870, the Bank was apparently stronger than it had been, but this was stated to be owing to the fact of an unusually large demand for discount a day or two previous to the account, and of the borrowers not yet having drawn out the amount borrowed. Large purchases of wheat were being made on French account.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,638,945*l*; in 1868, an excess of 1,293,356*l*; in 1869, an excess of 469,001*l*; and in 1870, a deficiency of 2,867,177*l*. In 1871, there is an excess of 1,826,999*l*.

DISCOUNT AND MONEY MARKET.—The Bank directors, at their meeting on Thursday, took the unprecedented course of

reducing the minimum a quarter per cent., viz., from 2½ to 2¼. There is no doubt that, under any other circumstances, a fall in the Bank rate would have taken place some time ago; but while a reduction is not much disapproved of, considering the remarkable strength of the Bank, the great accumulation of money in London, and the low amount of the private securities, the expediency of a reduction of one quarter per cent. only is very much criticised. The change is considered too minute to affect business materially, and unless this is to be done, the Bank effects nothing towards employing the surplus money which it desires to use.

Prior to the reduction, there was no particular change from the condition of the money market which we noticed last week. For a day or two indeed there had been a little extra demand on account of the Stock Exchange settlement, and if anything the preparations in view of an approaching dearer market were on the increase. Since the change, which was quite unexpected, there has hardly been time to make a market: but the rates nominally quoted are at least an eighth all round less than they were last week, and still so far below the Bank minimum as to make sure that no large amount of fresh business can be acquired at the Bank by the change. The quotation for short-dated paper is 2 to 2¼, against 2¼ ⅜ last week; but it will be understood that the dealings at 2 per cent. are only for the very best paper at short dates.

The principal changes in the Bank account for the week are—an increase of 1,134,000*l* in the reserve, an increase of 705,000*l* in the bullion, an increase of 499,000*l* in the public deposits, and of 456,620*l* in the private deposits; and a decrease of 420,000*l* in the circulation, and of 164,000*l* in the private securities. The proportion of reserve to banking liabilities is 60 per cent.—the reserve being 17,208,000*l*, and the liabilities 29,042,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 and 3 months	2 ¼	per cent.
Do 4 months	2¼	per cent.
Do 6 —	2½ ¼	per cent.
Trade bills—2 and 3 months	2¼	per cent.
Do 4 months	2¾	per cent.
Do 6 —	3 3¼	per cent.

The joint stock and other banks and discount houses have reduced their allowances for money to correspond with the reduction in the Bank rate, and the quotations now are—

Joint Stock Banks at call	1¼ per cent.
Discount houses at call	1¼ per cent.
Do with seven days' notice	1½ per cent.
Do fourteen days'	1½ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.

Brussels	2½	4	2¼	3¼
Madrid	5	5	5	5
Hamburg	...	...	2½	3¼
St Petersburg	6	8	5	6

The Stock Markets.—Business this week has been of rather a mixed character, the earlier movements in the principal stocks being almost all in a downward direction, but having been subsequently recovered from, so that in many instances there is an advance for the week. English Government securities have especially improved; foreign stocks have also derived some benefit from the continued postponement of the French demands; and in English railways the fortnightly settlement, which occurred this week, has also acted favourably on prices, owing to the deficiency of stock which was apparent. It is noticeable in most of the markets that there has been a considerable absorption for investment, and the settlement, though a comparatively small one in total amount, has been remarkable for the large proportion of investing business. Money being superabundant and the savings of the country accumulating, it is likely enough that the tendency of investors will continue to be in the same direction; but the great amount of demands which may be anticipated both from France and other foreign countries will have no small effect in preventing any material rise. As it is, the purchases of investors barely suffice to take up the sales for realisation by foreign bankers and others who are making provision for eventualities.

English Government Securities.—Consols fell ⅛ last Saturday, as compared with the closing price the previous day; but since Saturday the tendency has been upwards, and has been steadily maintained. The closing price is 92⅛ ¼, both for money and the account, showing a rise of ⅛ for money and of $\frac{9}{16}$ for the account. The characteristics of the market have thus been entirely different from what they were the previous week, the change indicating a reaction against heavy bear operations, and being stimulated by the postponement of the French loan operations, and perhaps to some extent by the improved prospects of the ensuing harvest. There are, however, a good many bear accounts still open, and it is hardly possible, if anything like a settled government is set up in France, but that it will be difficult to maintain the price at its present high level.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	91⅛	91⅛	91⅛	91⅛	par to 5s pm
Monday	91⅛	91⅛	91⅛	91⅛	par to 5s pm
Tuesday	91⅛	91⅛	91⅛	91⅛	par to 5s pm
Wednesday	91⅛	92	91⅛	92⅛	par to 5s pm
Thursday	91⅛	92⅛	92	92⅛	par to 5s pm
Friday	92	92⅛	92	92⅛	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Ditto New 5 %	104⅛ 5⅛	105 6	+ ⅛

Foreign Government Securities.—It will be seen from the usual list which we subjoin, that as the result of the week the course of transactions in the foreign market has been very nearly even. Towards the close the tendency has been firm, and prices are well maintained, but still only sufficiently so to counteract the drooping tendency of the early part of the week. On the whole too the symptoms of depression preponderate. The most decided changes for the week have been falls in Turkish, Egyptian, Spanish, and Peruvian stocks, which are all of a class that has been largely held by French capitalists. As we pointed out last week in our remarks on the money market, this class of persons is disposed to realise, and the movement in the stocks we refer to confirms our suspicions of what the market would be. The disposition of the public to invest, and the great abundance of money, enable them to realise to advantage; but the sales are nevertheless on so large a scale as to prevent any buoyancy in the market. It is not impossible that there may be a reaction as soon as the present movement has reached a limit, especially if the French demands should again be indefinitely postponed; but in the meantime there is little likelihood of any considerable improvement.

A Reuter's telegram from Versailles, received this afternoon, states that the New French Loan will be issued as a 5 per cent. stock, and the amount will be 80,000,000*l*, instead of 100,000,000*l* as originally fixed.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

The Costa Rica loan is now at 2 5/8 3/4 pm., a fall of ⅛ for the week, and the Spanish National Land Certificates at ⅜ ⅞ pm., a fall of ¼.

The French National Defence loan is almost without change for the week.

With regard to the new Turkish loan, a *Times* telegram from Constantinople states that the "definite contract for a loan was signed on Saturday between the Turkish Government, the Crédit Générale Ottomane, and Mr Edwards, with his associated English, French, and German capitalists. The nominal amount of the loan is stated to be 5,700,000*l*, and the Firman and contract will be deposited with the Bank Poleterre." This confirms what we stated last week, that the previous announcement related only to an unratified arrangement. The past statements as to the terms of the intended loan must therefore be subject to ratification.

With regard to the recent action of the Committee of Turkish bondholders of 1862, the following statement is made by the *Levant Herald* of the 7th inst. :—

On Tuesday, May 30, Messrs Courtenay, Hanson, sen., and Heald, the gentlemen forming the syndicate recently appointed by the London Committee of the bondholders of this loan, had their first "official" interview with the Grand Vizier. Mr Hanson, though only one of the *adjoint* members of the triumvirate, was the spokesman of the occasion, and in stating to his Highness the object for which the syndicate had been formed, said that he had himself been induced to accept a place on it in no way by the few hundreds a-year attached to the office, but purely out of a desire to render service to the Porte itself, whose credit would, he said, be benefitted by such an increased confidence on the part of the English holders of its stock as it would be the aim of this syndicate to promote. With one of his peculiar smiles, and after taking counsel for some seconds with the toes of his boots, A'ali Pasha thanked Mr Hanson and his colleagues for the friendly concern of the Imperial Government, but he hoped that, in the future as in the past, this would continue to rest on the sufficiently firm foundation of both the ability and the honest good will of the Porte to meet all its obligations. With reference to the particular loan of 1862, its bondholders, his Highness believed, had hitherto had no reason to complain of the punctuality with which their coupons had been met, and the Treasury needed no pressure whatever to secure to them a continuance of this good faith. After a few further verbal courtesies, Mr Hanson and his colleagues withdrew. In connection with this matter, we learn that an effort has been made to induce the Porte itself to authorise the deduction from the coupons which the Ottoman Bank has refused to sanction, but unsuccessfully—the Malieh having neither the will nor the legal power to impose any tax whatever on the stock of the loan.

English Railways.—As we have already stated, there has been a very general improvement in this department. Among the leading railways the only decline is in London and Brighton, and in this the fall is but slight; and while prices have been stationary in one or two other cases, there is in the vast majority a perceptible rise for the week—the change being most marked in Metropolitan, Metropolitan District, and North-Eastern. The rise hardly compensates the fall of the previous two or three weeks, but it denotes a turn of the market, which is only natural after the steady decline which had set in. The course of the settlement, as we have hinted, had much to do with this change. The contangoes were much lighter than on the previous occasion, and it was in fact discovered that bears had oversold, and were under the necessity of buying back to close their accounts. Much of the stock recently put upon the market has been quite taken off it, and the weak bulls and bears having both been crushed, there is now a comparatively strong tendency to better values from the natural progress of investment. Probably this tendency is partly temporary, being largely due to the continued postponement of the French demands; but though caution is needed, it is also true that such is the natural growth of English railways, a prudent investor might very safely select his investment and lock up the stock he purchases for a steadily-improving market.

The rise in the Metropolitan and Metropolitan District lines is especially accounted for by a report that some arrangement of their differences has been come to. This arrangement, it is stated, will be less favourable to the Metropolitan than the existing one, but much better than the reckless competition with which the shareholders were threatened.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	92⅛ ⅜	92¼ 3	+ ⅛

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending June 10 to 747,524*l*, being a *diminution* of 43,496*l* on the corresponding week of the previous year [Whitsun week]. The aggregate receipts of the half-year to date are now 15,879,946*l*, being an increase of 875,487*l* on the corresponding period of last year. The principal decreases for the week are—Lancashire and Yorkshire, 16,339*l*; Midland, 14,896*l*; Great Eastern, 6,589*l*; South-Eastern, 5,634*l*; Manchester, Sheffield, and Lincolnshire, 3,906*l*; and Brighton, 2,647*l*. London and South-Western has increased 3,015*l*; Great Northern, 2,017*l*; Caledonian, 1,458*l*; and North British, 1,671*l*. The following shows the details of the increase or decrease in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

American Securities.—The tone of the market has continued firm, though the amount of business transacted in either Government or State bonds has been limited. The leading fluctuations on the week are shown below. Advices from New York report but little progress in the issue of the Funding loan, of which only 100 millions (dollars) have been taken.

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchg	4⅝ ¼	90⅝ ½	+ ⅛
[illegible] issue	89½ ¼	89½ ¼	— ⅛

Pennsylvania Sterling Bonds 1873	99¾ ¼	99⅝ ⅛	+ ⅛
Virginia 6 % Bonds	55½ 0½	55 6	— ⅛

Joint Stock Banks.—The changes in the quotations for joint stock bank shares have not been numerous, and have been variable in character. Egyptian Bank shares have declined 1 and Agra B ¼; on the other hand, there is an advance of 1 in Standard of South Africa; ½ in English, Scottish, and Australia, Chartered Mercantile, and Hong Kong and Shanghae; and of ¼ in Anglo-Egyptian.

Telegraphs.—The tendency in value of cable shares has been in favour of holders, but the improvement has not been in any case important. Anglo-American and French Cables have advanced ¼; West Indian and Great Northern ⅜; British Indian Submarine, ½. China Submarine, however, have given way ½. A reaction of 2 has taken place in Silver's India Rubber Company, which closes 2 higher on the week; but Hooper's and Telegraph Construction show a fall of ½.

Advices from Madrid state that the privilege to lay a submarine cable between England and Corunna has been withdrawn.

Mines.—The following are the principal changes in British mining shares:—A fall of 10 in South Caradon, 2 in East Lovell, 2½ in Van, and 1 in West Chiverton. Tin Croft has risen 2 and Assheton ½. In the foreign market there is a decline of ½ in Cape Copper and United Mexican, 1 in St Juan del Rey, and ½ in Pacific. Colorado Terrible shares have risen ½.

We have received the prospectus of the Ajax (Big Indian) Silver Mining Company, Limited, with a capital of 40,000*l*. The property is known as the Big Indian Lode Mine, situate upon Republican Mountain, Clear Creek, Colorado, in the immediate vicinity of Georgetown, North America, and of the Terrible, Equator, Brown, Silver Plume, and other mines, which are being most successfully worked. It is not proposed to raise the whole capital in the first instance, but to issue only 8,000 shares of 5*l* each, 2,000 of these being fully paid-up shares, to be issued to the vendor in part payment of the purchase money, the remainder (10,000*l*) being paid in cash. There are thus 4,000 shares now ready for allotment, and on these it is proposed that 10s per share shall be paid on application, no further call being made until the approval by the directors of the report of the engineer to be sent out as above explained. Should the report be deemed not satisfactory, the whole of the capital will be returned to the applicants, less only such necessary expenses as may have been incurred, which it is guaranteed shall in no case exceed one shilling per share.

The subscription list for debentures in the Anglo-Argentine Company will be closed on Monday next.

Miscellaneous.—There is no feature of interest to notice in this department, but the tone of the market has been firmer. Union Steamship shares have advanced 2, Madras Irrigation 1, North Metropolitan Tramways ½, National Discount ½, Anglo-Mexican Mint show a fall of ½, and London Financial ½.

The directors of the St Thomas Dock Company (Limited) are prepared to receive subscriptions for 25,000*l* 10 per cent. debentures, to rank *pari passu* with a previous issue of 30,000*l*, forming a first charge on the profits of the dock and property of the Company. The amount proposed to be raised by the present issue is mainly required for repairing and putting to work the large Iron Dock, which was sunk when on the eve of completion in the harbour of St Thomas, in the West Indies, and which has been lately raised and transported to a place of safety, where it now awaits the necessary repairs previously to its being put to work in the harbour.

Exchanges.—There are no material changes from last week, except that the demand for bills on North Germany and Belgium has rather fallen off.

Bullion.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—There being no export demand, the Bank has purchased all the gold to hand since our last, the amount taken to that establishment during the week being 485,000*l* in bars and coin. 60,000 sovereigns have been withdrawn for shipment to the Brazils, Lisbon, and the Cape. The arrivals comprise—76,000*l* per Cimbria, from New York; 2,000*l* per China, from New York; 223,000 per Rhein, from New York; 27,000*l* per Batavia, from New York; 5,000*l* per Roquelle, from Africa; 26,000*l* per Tasmanian, from the West Indies; 36,000*l* per Nesterian, from Quebec. The shipments are—251,000*l* per La Plata, for the Brazils; 53,000*l* per La Plata, for Lisbon; 20,000*l* per Beethoven, for the Cape; 4,000*l* per Guapimbo, for the Brazils. The P. and O. steamer due about 20th July brings 501,000*l* in Australian gold.

Silver.—There is more inquiry for silver, though the market is not active. Sales have been effected at 60⅝d and 60¾d per oz standard. The China, from New York, brought 37,800*l*; City of London, from New York, brought 12,000*l*; Tasmanian, West Indies (bars and coin), 95,000*l*; Malta, from Alexandria, brought 5,700*l*.

Mexican Dollars.—The amounts received from the West Indies and from New York have been disposed of at 58¾d per oz for the new coinage, and at 60d per oz for the old (a very limited quantity). The P. and O. steamer Massillia took 76,440*l*, chiefly dollars, for China and the Straits on 10th inst.

Exchange on India for banks' drafts at 60 days' sight is 1s 10¾d to 1s 10¾d per rupee.

Indian Government Loan Notes are unchanged. The 4 per Cents. are 93½; the 5 per Cents., 100⅛ to 100¼; and the 5½ per Cents., 107⅝ to 108.

Quotations for Bullion.—Gold—Bar gold, 77s 8¾d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0⅝d to 5s 0¾d per oz std; ditto containing 5 grains gold, 5s 0⅝d to 5s 1d per oz std, last price; Mexican dollars, 4s 10¾d to 5s per oz, last price.

The sum of 57,000*l* in gold bars was sent into the Bank of England to-day.

According to the *Gazette* return the imports of the precious metals into the United Kingdom during the week ended June 14 were—gold, 479,086*l*; silver, 187,599*l*. The exports were—gold, 358,417*l*; silver, 88,840*l*.

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, June 19.

London and Westminster Bank, special general, Lothbury.

TUESDAY, June 20.

London and Australian Agency Corporation.
Ceylon Company, general.

WEDNESDAY, June 21.

Imperial Ottoman Bank, general, City Terminus Hotel.
Royal Exchange Assurance, general.
General Bank for Promoting Agriculture and Public Works, extraordinary, Brussels.
British Indian Submarine Telegraph, general.

THURSDAY, June 22.

Scinde, Punjaub, and Delhi Railway, general, London Tavern.
Colonial Company.

FRIDAY, June 23.

Madras Railway, general, London Tavern.
Norwegian Trunk Railway, special.

SATURDAY, June 24.

Chelsea Waterworks, general, Pimlico.
Malta and Mediterranean Gas, extraordinary.

NOTICES AND REPORTS.

STOCKS.

Danish 5 per Cent., 1864.—Bonds representing 8,300*l* have been advertised for redemption on the 1st July.

Turkish 6 per Cent. Loan, 1863-64.—The fifteenth and sixteenth half-yearly drawings have taken place in Paris, and the numbers have been published for redemption at par on the 1st of July.

Turkish 6 per Cent. Loan, 1865.—Bonds to the number of 9,700, of 20*l* each, have been drawn for redemption at par on the 1st of July. This represents the tenth and eleventh half-yearly drawings in one.

RAILWAY COMPANIES.

Bay of Havana and Matanzas Bonds.—Holders of the bonds of the loan of 250,000*l*, 1861, are informed that the certificates issued in respect of the unpaid portion of the coupon due, but unpaid, on the 15th June, 1870, and of the coupon due 15th December, 1870, will be paid, with interest at 7 per cent per annum, on and after the 15th instant. As regards the loan of 400,000*l*, 1865, it is notified that 21½ per cent. of the amount of the certificate, issued in respect of the unpaid portion of the coupons due 10th June, 1869, 10th December, 1869, and 10th June, 1870, will likewise be paid. Further certificates will be issued in respect of the coupons due 10th and 15th instant.

Glasgow and Cape Breton Coal and Railway.—A call of 2*l* per share is payable on the 10th July.

Oude and Rohilkund.—Heavy floods have retarded the progress of the works, and it has been decided in consequence to increase the waterway under some of the bridges. The completion of the lines from Lucknow to Fyzabad, to Byramghat, and for the first 60 miles towards Shahjehanpore, together with the branch from Allyghur to the Ganges, is expected early in 1872, and that of the Benares section, in which there are some heavy bridge works in the Juanpore district, at the end of 1872. The completion of the whole system of lines, including the two large bridges over the Ganges and one over the Ram Gunga, is looked for at the end of 1873. The working of the Cawnpore branch continues satisfactory.

Scinde, Punjaub, and Delhi.—The net revenue in the half-year amounted to 45,946*l*, exhibiting an increase of 24,673*l* compared with the corresponding half of the previous year, partly due to increased mileage. The statement of receipts and expenditure on capital account shows that up to the 31st of December last there had been received on account of capital the sum of 10,287,654*l*, of which there remained at the close of the year a balance of 253,797*l*.

Stourbridge.—It has been resolved to accept 13s 6d in the pound in settlement of the claims of the unregistered stockholders.

BANKS.

Anglo-Austrian Bank.—The net profit of the year, including the balance brought forward, amounted to 4,337,675fl. Five per cent. was divided on the 1st of January last, and it was decided to pay an additional dividend of 1*l* per share.

Bank of New Zealand.—The usual 15 per cent. per annum dividend has been declared, and 30,000*l* has been added to the reserve.

National Bank of Australasia.—The net profits for the half-year amounted to 37,496*l*, from which 3,446*l* was deducted, being the sum set down in the last report as necessary to cover all previous bad debts. The dividend recommended was at the rate of 8 per cent. per annum, leaving, after the addition of 4,000*l* to the reserve fund, 3,650*l* to be carried forward.

ASSURANCE COMPANIES.

British and Foreign Marine Insurance.—An interim dividend at the rate of 10 per cent. per annum, free of income tax, is declared.

English and Scottish Law Life.—At the quinquennial meeting the invested funds were reported to be 760,132*l*, and the net amount of existing assurances, 3,229,784*l*. The report showed a divisible surplus of 77,068*l*, which was distributed by appropriating 90 per cent. (67,831*l*) to the assured, and 7,706*l* to the proprietors, the former sum providing a reversionary bonus at the rate of 1½ per cent. per annum on the sum assured, and the latter raising the dividend during the next five years to 7*l* 15s per cent. per annum.

MISCELLANEOUS COMPANIES.

African Steamship.—The half-yearly report shows a revenue balance of 5,974*l*, out of which the directors recommend the paymend of a dividend of 8s per share and interest at the same rate on the amount of the call, from the date of its payment to the close of the half-year; surplus, 272*l*.

Anglo-American Leather Cloth, Limited.—Capital, 50,000*l*, in 10*l* shares. It is intended to take over the works and business of an establishment on the Thames, opposite Woolwich Arsenal. The lease has 94 years to run, and has been purchased for 12,000*l*; and the works are capable of turning out from 70,000 to 80,000 pieces per annum, an amount which can be much augmented by small additions to the machinery.

Bombay Gas.—A dividend was declared at the meeting of 3½ per cent. for the six months.

British Australian Telegraph.—Interest warrants, at the rate of 5 per cent. per annum, will be issued for the first half of 1871.

British Indian Submarine Telegraph.—The gross receipts for the six months ended the 31st March were 42,644*l*, while the expenses were 17,316*l*. Out of the balance of 25,328*l* a dividend of 4s per share is declared, leaving 1,578*l*. For the two subsequent months of April and May the net receipts have been equal to the rate of 8 per cent. per annum. It will be remembered that during a portion of the above period the Falmouth cable was interrupted.

Great Northern Telegraph.—Interest at the rate of 5 per cent. per annum is announced.

India Rubber, Gutta Percha, and Telegraph Works.—In respect to the fire at the company's works, the following circular was issued:—

Sir,—It is with very great regret that the directors have instructed me to report that a fire occurred in our works at Silvertown yesterday afternoon, resulting in serious injury to a portion of the cable manufactory. I have to add that, so far as can be at present estimated, we are fully covered by insurances, and that our principal manufactories and premises are unharmed, so that the general business will be continued as usual. The utmost exertions will be used to reinstate the damaged works, and it is fully expected that the inconvenience caused by the fire will be speedily overcome.—Your obedient servant,

J. A. BRAND, Secretary.

John Brown and Co.—The balance sheet shows a considerable improvement on those of previous years. The directors propose to pay 5*l* per share, which, with a 2*l* *interim* dividend already paid, will be equal to 10 per cent. for the past year on the paid-up capital of the company, leaving a balance of 32,736*l* 19s 4d.

London Quays and Warehouses, Limited.—Mr James Cooper, the liquidator, has announced the payment of a further dividend of 9s in the pound, making 15s in the pound. The dividend is payable at the offices of Messrs Johnstone, Cooper, Wintle, and Evans.

North Metropolitan Tramways.—The line from the Angel, at Islington, to Finsbury has been opened.

Société du Cable Transatlantique Français.—The report shows a profit balance of 32,552*l*, out of which the directors recommend a dividend of 2½ per cent., making with the dividends already declared 10 per cent. for the twelve months. The balance is 2,552*l*. The current receipts enable the dividend to be paid on the 10th of July, without interfering with the interim distributions, although the above-mentioned balance includes an amount still due from the French Government. It is added that the maintenance of uninterrupted communication with America, notwithstanding the accidents which have occurred both to this and the Anglo-Company's cables, has shown the advantage not only to the companies, but to the public, of the working arrangement between the undertakings. At the meeting a shareholder will propose resolutions for the publication of the traffic, and the commutation of the Omnium shares.

West India and Panama Telegraph.—The cable to Antigua has been successfully laid.

MINING COMPANIES.

North American Gold Mining, Limited.—Capital, 80,000*l*, in 4*l* shares. The number of 13,750 shares is offered for subscription, upon which 2s 6d per share is payable on application, and the balance when called upon after the receipt by the company of a satisfactory report from the special agent appointed by the directors to examine the property. The mines are stated to consist of gravel-washing gold properties in Sierra county, California. They have already been worked at a profit, and are stated to be capable of yielding large returns. The purchase price is 45,000*l* in cash, and 25,000*l* in shares.

Port Phillip Gold Mining.—A dividend of 1s per share, free of income tax, has been declared.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The weather having recently been favourable for the growing crops, and the accounts from the agricultural districts being more encouraging, the grain trade at Mark lane to-day assumed quite a retail character, and the amount of business transacted was very limited. Prices were nominally unchanged for both English and foreign wheat, but factors showed more disposition to give way. Barley was rather firm, but beans and peas were unaltered in the absence of business of importance. Oats and maize showed a slight downward tendency in value. In flour there was no variation to note. This week's import of foreign and colonial produce into London have amounted to 14,640 qrs of wheat, 3,600 barley, 72,720 oats, 4,800 maize, 2,150 beans, 680 peas, 1,020 sacks and 6,710 barrels of flour.

At Liverpool and Wakefield this morning the wheat trade ruled dull, and the tendency of values was in favour of buyers.

The Liverpool cotton market has been exceedingly active during the past week, and a very large business has been done at an advance of $\frac{1}{16}$d to $\frac{1}{8}$d per lb. The total sales for the week are 133,630 bales, of which the trade have taken 71,110 bales; speculators and exporters, 62,520 bales. The imports are 124,790 bales; the actual exports, 22,474 bales; and to-day's stock is 945,240 bales. Quotations for American descriptions have advanced $\frac{1}{16}$d per lb; East Indian, $\frac{3}{16}$d per lb; and Bengals, $\frac{1}{8}$d per lb. To-day the market closes firm; sales, 18,000 bales. Prices hardening.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended June 15, 1871:—

	Imported.	Exported.
American bales	93,987	12,925
Brazilian	20,657	2,630
East Indian	9,581	17,590
Egyptian	6,204	285
Miscellaneous	2,703	638
Total	133,132	33,078

At New York, on June 15, middling Upland cotton was quoted at 26½c per lb. Bombay advices to June 12 quote fair Dhollerah at 204 rupees per candy. The shipments of the week had amounted to 45,375 bales. We give the following telegram, which arrived from New York to-day, under reserve, the estimates forwarded by the Agricultural Bureau being below the mark as a rule:—"The Department of Agriculture reports that the decreased average of cotton will be 1,500,000 bales. The crop is below the average in every state, and is not expected to exceed 3,500,000 bales, which an unpropitious season might reduce to 3 millions.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, May 20:—The amount of business in cotton transacted during the week has been restricted owing to the very unusual weather which has prevailed. Transactions do not exceed 9,000 candies of all descriptions, and of that total Dhollerah, Bhowmuggur, and Mowa make for about 3,500 candies. Prices are higher all round, but the advance is chiefly noticeable in the above mentioned qualities. The chief effect of a recent storm has been to check arrivals of boats from the Dhollerah ports, and, as might be expected, make that description very scarce and dear on the spot. All exporters are naturally anxious to make as much of their cotton as possible May shipment, and a keen competition has consequently existed for such parcels as were ready and available for sale. At the moment the "green" is quite denuded of Dhollerah stocks, but we learn that many boats from that quarter have taken shelter in the small ports contiguous to the Bombay, Baroda, and Central India Railway, and moderate supplies by rail maybe expected in a day or two. Accounts from Broach and Dhollerah report heavy rains, and that the country roads are quite impassable. Between Dhollerah and

Wudwan it is reported that about 6,000 bales have been caught in the rain, and as the carts are unable to move backward or forward, a great deal of damage will no doubt be done to the docras. The chief question now before exporters is whether a break in the weather is likely to take place, which will admit of further supplies coming forward from the northern ports. Should fair weather set in again, a large business would no doubt be done between this and (say) the 10th proximo. Many people seem to think that we are presently experiencing the south-west monsoon, and that our supplies hereafter will be very scanty. From Tinnevelly we have a telegram dated 18th instant, quoting 6d per lb, c. and f.

EXPORT of COTTON from BOMBAY to May 19.

	1871.		1870.

Actual exports since last mail left, 46,528 bales.

The Imperial Ottoman Bank, writing from Alexandria, on June 2, remark:—Still more favourable accounts from Europe, with rapidly advancing prices in America, have caused great excitement in our cotton market during the first two days. Holders in many instances have withdrawn their stocks altogether, until they learn the result of this upward movement. All qualities have advanced ¼d per lb since the commencement of the week. We quote:—Middling fair, 7¾d per lb, f.o.b.; fair open, with staple, 8¼d, ditto; good fair, with staple, 8½d, ditto; fully good fair, with staple, 9d to 9⅛d, ditto. Weekly arrivals, from May 26 to June 2, 9,040 crs. Sales, from May 26 to June 2, 10,720 crs. Shipments, from May 26 to June 2—To England, 1,885 bales; to Italy, 194; to Austria, 59—total, 2,138 bales.

More steadiness has prevailed in the colonial produce markets, and a fair amount of business has been transacted in sugar at full quotations. The stock in the United Kingdom on June 10 was estimated at 125,000 tons, against 169,000 at the corresponding period last year. Most kinds of coffee have improved 1s per cwt in value, the demand having ruled more active. The Government have been large purchases of rum this week, and the tone of the market has been steady. Fine Trinidad cocoa has sold freely, but common descriptions have met with little inquiry. Rice was in good request early in the week, but has closed with less animation.

The following report dated May 13, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—The break of the south-west monsoon, with the consequent uncertain weather, is not favourable to curing or shipping operations, but exports of coffee have nevertheless been considerable, maintaining the figures at fully those of last year. The distribution of these may be seen below:—

PLANTATION COFFEE.

	1871. cwts.		1870. cwts.
To Great Britain.....	588,544	.....	579,652

Australia and India ...	13,533	.....	9,177
	635,670	.....	622,295

NATIVE COFFEE.

	1871. cwts.		1870. cwts.
To Great Britain	73,767	.....	55,835
Foreign ports.....	16,215	.....	38,068
Australia and India ...	3,184	.....	2,137
	93,166	.....	96,040

Unfavourable advices relative to the state of the coffee markets in Europe have had the effect of withdrawing purchasers of our staple, growers have consequently been unable to obtain offers approximating to previous quotations, and in the absence of business we must call our quoted rates nominal. Not much has been done in native Ouvah, which we quote slightly within our last figures.

The annexed is dated Akyab, May 12:—Supplies of Nakrenzie rice have been pretty fair of late, and this has enabled several shippers to complete their requirements and to retire from the market, which circumstances, together with more favourable advices from the southern ports, has caused a much easier feeling here. The natives in the interior have consequently become more willing to realise their stocks, and this must have its effect on prices here 'ere long, principally if the demand remains as weak as it is just now. At present, however, the quotation given in our last report remains unchanged, and good three-parts shipping quality costs still 54 rs to 55 rs per 100 baskets, 28 lbs, equal to 5s 8d to 5s 8½d per cwt, free on board. Supplies of rice consist entirely of grain purchased in the interior beforehand, whilst of real market rice none is coming in. Of rain we have had only a few showers so far, and, on the whole, the weather has remained very favourable to shippers. Exports to Europe up to date—1871, 96,439 tons; 1870, 56,164 tons; 1869, 48,349 tons. Tons loading—1871, 7,160 tons burthen; 1870, 18,200 ditto; 1869, 12,400 ditto.

These quantities include all that has arrived off coast and the different ports, but not yet taken into stock.

With reference to the wine trade, Messrs Matthew Clark and Sons observe:—We have nothing new to report in our wine and spirit market during the past month; a fair moderate demand has prevailed, but few large transactions have been entered into. The Board of Trade Returns show that the falling off in April has been recovered in May, the quantity of wine taken for home consumption last month showing a decided increase. In brandy also the home delivery increased last month, and the total delivery this year already shows an increase of upwards of 125,000 gallons over previous years. The imports however continue to be excessive, and the returns show that an addition of 338,148 gallons has been made to the bonded stock during the month of May. The market at Cognac is reported firm, with little doing, Here the position is the same, no buyers, but holders indifferent about selling at full rates. The vines are looking well, and with good promise for the next vintage.

Annexed is Messrs Hunt and King's circular:—The extreme dulness and depression in the silk market reported at the beginning of May continued throughout the month. Prices have gradually declined, and our quotations now show a further fall of about 5 per cent.; this reduction has however within the past week attracted a considerable demand. The deliveries again show an improvement. In China silk there has been a fair business within the last few days, and about 1,000 bales, chiefly tsatlees, have changed hands. Taysaam of coarse size is neglected. In Canton silk, fully 500 bales have also been taken. In Japan silk, mybash especially has been forced to a very low point, and nearly 1,000 bales have been sold, a much better demand having arrived from the continent this week. In Bengal silk there is very little doing. In European silk prices are lower. The crop is expected to average about as last year.

IMPORTS, DELIVERIES, and STOCKS to June 1, 1871.

	Imports. bales.		Deliveries. bales.		Stock, June 1. bales.
China.....	2,486	.....	3,605	.....	22,890
Japan.....	848	.....	567	.....	7,778
Bengal	154	.....	329	.....	5,928
Waste.....	769	.....	1,560	.....	9,230

According to Messrs Arles Dufour and Co., of Lyons, the progress of the European silk crop has continued to attract the chief attention of dealers. In Spain, the result is now ascertained to be quite equal to that of last year. In France, the wet and cold weather of the past few days is interfering with the gathering of cocoons, and may prove prejudicial to

the yield in silk. Prices in that country have consequently risen. In Italy, it is too early to form an exact opinion, particularly for Piedmont, but in Lombardy, Friouli, Tuscany, and Naples the crop will, in quantity, be at least equal to that of last year. Prices therefore have not experienced any appreciable changes. Business, which until now had been exceedingly quiet, has been reviving a little during the last week, but the heaviness of the stocks, both of raw material and manufactured goods, coupled with political and financial difficulties, and the threatened imposition of a duty on imported silk, are expected to check any important rise.

Messrs Windeler and Bowes report —Consumption of colonial wool continues very active, and manufactured articles sell freely. From the continent, the United States, and from our domestic buyers we have had a brisk demand at an advance upon last sales' prices, and there is a prospect of a steady and sustained competition at the auctions, to begin 22nd inst. Considering that a strong demand often arises between the auctions, it is a question whether it will not be desirable for consignors to authorise and encourage intermediate sales by private contract: within the last month we could have sold some thousands of bales, entire flocks, at a decided improvement on previous rates.

Annexed is Messrs Wm. Moran and Co.'s indigo report, dated Calcutta, May 16.—We have but little change to notice in the prospects of the growing crop, which continue pretty favourable. Manufacturing is progressing but slowly in Eastern Bengal owing to the very low state of the rivers, and the yield from the plant is still small, being only about two maunds per 1000 bundles; the weather however is all that could be desired, and we have no doubt the next returns will show an improvement. Nearly all the districts of Lower Bengal, as well as Tirhoot, Champarun, and Chuprah have had good falls of rain, and the condition of the plant is generally satisfactory. London telegrams have given us the daily results of the quarterly May sales now being held; up to yesterday, 10,200 chests had been passed, of which 3,800 chests were sold; the advance quoted on the first day of 3d per lb on February rates was speedily lost, and prices fell rapidly till they showed a decline on February of from 3d to 6d per lb (7.8 rs to 15 rs per maund), the lower qualities being the least sought after. Exports of indigo from 1st November, 1870, to 12th May, 1871.—To Great Britain, 16,569 chests; France, 513; Trieste, 2,780; foreign Europe, 250; America, 2,405; Gulfs and Levante, 1,762—total, 24,289 chests.

The annexed is dated New York, June 3:—General trade has settled down to the usual summer dulness, so far as the distribution of merchandise to the interior is concerned; but the export movement is fair, with the prospect of a good outward business during the summer, as there is a liberal surplus of the leading agricultural and other staples still on hand, while Europe has the disposition and ability to absorb them at fair prices. The predominant features in financial circles are the continued plethora of currency and marked ease in the money market, and the hardening tendency of the gold and foreign exchange markets, with continued free remittances of gold. The abnormal condition of the cotton market, with prices relatively higher at home than abroad, has for some time past held the export trade in that staple in check; but there are indications of a speedy restoration of the equilibrium, and consequently an increased supply of exchange, which cannot fail to have an important bearing on the gold market. The new five per cent loan moves slowly. Less than a hundred millions have been taken, and at the rate subscriptions are made it will be some months before that sum is reached. The extreme ease of the money market for some weeks past is as yet unbroken, the rates for call loans remaining 3 to 4 per cent on call and 5 to 7 per cent for discount of prime commercial paper, and 7 to 9 per cent for second-class names.

THE COTTON TRADE.

LIVERPOOL.—June 15

Cotton continues in very active demand for consumption, as well as for export and speculation, and prices have gradually hardened; quotations of all descriptions showing a further advance. The Bank rate has been this day reduced to 2½ per cent. For Sea Island there has been a good demand, almost entirely confined to the better qualities, which commanded full rates. American has been in very general request, and has advanced ¼d per lb. New York advices to the 10th instant quote middling Uplands 29¢ cents, costing to sell in Liverpool 10⅞d per lb, by steamer. In Brazil the sales have been considerable, at ¼ to ⅛d per lb advance. The business in Egyptian has again been large, including considerable purchases on speculation and for export; prices are fully ½d per lb dearer. East Indian has been in strong demand, and the supply offering is much reduced; prices have advanced about ¼d per lb.

In cotton "to arrive" the business continues very large, at advancing prices. The latest quotations are—American bales of middling, from any port, May shipment, 8⅛d, delivery from any port, not below good ordinary, July-August, 8⅛d; August, 8¼d; August-September, 8⅜d; Savannah, not below low middling, August, 8 9/16d; low middling, New Orleans, not below good ordinary, June delivery, 8 5/16d; Broach, Cape, good fair new merchants, ship named, 7d; good fair ginned, ship named, 7⅛d, 7 7/16d; Dhollerah, fair new merchants, Cape, April-May shipment, 6 13/16d; May, 6¾d; May-June, 6 13/16d; Oomrawuttee, fair new merchants, Cape, ship named, 6¾d; at sea, 6¾d; Scinde, fair new merchants, Cape, ship named, 5¾d; Bengal, Cape, fully fair new merchants, June-July shipment, 5¾d per lb.

The sales of the week, including forwarded, amount to 133,630 bales, of which 36,590 are on speculation, and 25,930 declared for export, leaving 71,110 bales to the trade.

June 16.—The sales to-day will probably amount to about 15,000 bales, with a firm market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	765,090
An increase of quantity taken for consumption of	224,570
An increase of actual exports of	326,430
An increase of stock of	317,220

In speculation there is an increase of 48,030 bales. The imports this week have amounted to 124,792 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to June 9) is 132,000 bales, against 115,000 bales last year. The actual exports have been 22,474 bales.

LONDON.—June 15.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

There has been a strong demand throughout the past week, large sales having been effected at an advance of nearly ¼d per lb on the spot, and ⅛d to ¼d per lb for cotton afloat. The market at the close is very firm at this advance.

Sales to arrive.—3,650 bales Tinnevelly, at 6¾d to 7d, February and April sailing to July shipment, for good fair; 4,500 bales Western Madras, at 6d to 6⅛d, May to July shipment, for fair new—6¼d to 6⅜d, March to May sailing, for fair; 3,800 bales Cocanada, at 6⅛d to 6¼d, February to April sailing,

May to July shipment, for fair red; 200 bales sawginned Dharwar, at 6¾d, May shipment, via Suez, for good fair; 250 bales Broach, at 6¾d, May-June shipment, for fully fair; 600 bales Broach, at 7¼d to 7⅜d, April shipment and sailing, machine-ginned, for good fair; 10,500 bales Dhollerah, at 6⅝d to 6 13/16d, April to June shipment and ship named, for fair; 3,700 bales Oomrawuttee, at 6½d to 6⅝d, February-March sailing to May-June shipment for fair—7d, ship named, for good fair; 500 bales Comptah, at 6¾d, ship named, for fair; 7,500 bales Bengal, at 5½d to 5⅝d, January-February sailing and April to June shipment, for fair; 900 bales Rangoon, at 5⅜d to 5½d, March sailing and ship named, for fair—total, 35,500 bales.

NEW YORK.—JUNE 2.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, June 2. From the figures thus obtained it appears that the total receipts for the seven days have reached 36,402 bales, against 40,178 bales last week, 45,067 bales the previous week, and 46,849 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,792,269 bales, against 2,772,432 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,019,837 bales. The exports for the week ending this evening reach a total of 47,892 bales, of which 34,605 were to Great Britain, 7,789 to France, and 5,498 to rest of the continent, while the stocks as made up this evening are now 267,139 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending June 2.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	3628	8803	13521	16988	92978	107887
Mobile	...	965	965	2414	20733	31129

Total	34605	13287	47892	36160	267139	276080
Total since Sept. 1	2214912	729285	2944177	1959703	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 1,555 bales, while the stocks to-night are 8,941 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to May 26, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph:—

Ports.	Receipts since Sept. 1.		Exported since September 1 to				Shipments to Northrn. Ports.	Stock.
	1870.	1869.	Great Britain.	France.	Other Foreign.	Total.

The buoyancy noticed in the market last week has continued this week, and prices have rapidly advanced. There has not been a very active demand, but the supply here is small, and the balance in the country left of the crop after deducting the engagements is very limited, so that holders remain firm, advancing their asking rates almost daily. For export there has been but little inquiry, our quotations during the most of the week having been about 1c above the parity of Liverpool. Spinners also have held off supplying their more pressing wants. But notwithstanding this limited inquiry prices have advanced as stated above, and to-night middling Uplands closed at 17¼c, against 16¼c a week ago, and 15¼c the previous Friday, being an advance of 1c since last Friday, and of 2c during the last two weeks. For future delivery, the quotations have shown more fluctuations, but at the close the improvement in prices is very nearly the same as for spot cotton. Low middling closed to-night at 16¾c for June, 17⅛c for July, 17 5/16c for August, and 16¾c for September. The total sales of this description for the week are 88,900 bales. For immediate delivery the total sales foot up this week 18,107 bales, including 2,213 for export, 7,218 for consumption, 2,902 for speculation, and 5,774 in transit. Of the above 112 bales were to arrive. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c	c	c	c
Ordinary per lb	13¾ @ ...	13¾ @ ...	14 @ ...	14¼ @ ...
Good ordinary	15⅞ ...	16 ...	16⅛ ...	16¼ ...
Low middling	17 ...	17⅛ ...	17⅜ ...	17½ ...
Middling	17¾ ...	18 ...	18¼ ...	18½ ...
Good middling	18¾ ...	19 ...	19½ ...	19½ ...

For forward delivery the sales have reached during the week 88,900 bales (all low middling or on the basis of low middling).

Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending June 2, 1871.			Week ending June 2, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	608	1565	5396	337	1272	11820
Columbus	266	813	2597	346	673	6125
Macon	235	511	3520	241	413	7108
Montgomery	224	498	1209	238	620	5063
Selma	237	415	1317	199	274	3225
Memphis*	2189	4217	7795	2107	4545	12240
Nashville	1304	1649	885	510	1233	4819
	5063	9668	24680	3978	9030	50400

* A count of stock at Memphis to-day made the stock 7,795 bales, which was 1,500 bales more than the running count.

The above totals show that the interior stocks have decreased during the week 2,197 bales, and are to-night 25,711 bales *less* than at the same period last year.

The following are the receipts of cotton at New York, Boston, Philadelphia, and Baltimore, for the last week and since September 1, 1870:—

Receipts—	New York.		Boston.		Philadelphia.		Baltimore.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, June 15.—A very sluggish demand has been the prevailing feature of the market during the past week, as prices for both yarns and cloth have further advanced owing to the continued activity and higher rates ruling in the cotton market. In yarns for shipment very little has been done as the recent advance is nearly equal to 1d per lb and prices in spite of our large consuming interests warrant merchants in buying to any extent. The home trade demand for yarns has also been quiet, and chiefly to supply passing wants. In the cloth market the same remarks apply, the advance asked being the chief cause of the limited business in progress. There are some offers for India shirtings and other goods, but as prices nearly touch the limit to buyers. The continental trade as yet has felt slightly increased. There is more doing for the home consumption, and stocks in merchants' hands have lately been materially reduced, which will likely cause more business into the market soon. The market closes quiet, but very steady.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

There was considerable firmness in the grain trade at the opening of the week, but the fine growing weather subsequently experienced has had the effect of depressing the market, more particularly for wheat. At Liverpool and Wakefield to-day, a decline of about 1s per quarter took place, and a similar reduction must have been submitted to in this market to effect business. The accounts from the agricultural districts, though somewhat variable, are not unfavourable to the crops generally. If wheat has fallen off at all, it is apparently on ill-farmed and poor lands, and at the present moment there is little to apprehend in regard to the probable return. Another cheering feature in the agricultural outlook is the improvement in the grass lands, which have recovered considerably under the influence of the late genial rains. As yet little grass has been cut. Barley, beans, and peas are generally favourably spoken of; but more moisture would benefit the oat crop.

The spring corn trade has presented no special feature, the dealings in barley having been restricted. Beans and peas remain without change in value; but oats are cheaper. Flour has continued dull of sale.

Mr George Dornbusch thus reports as to the floating grain and seed trade:—During the last eight days 53 grain and seed-laden vessels have arrived at ports-of-call, viz:—19 wheat, 13 maize, 6 barley, 3 rye, 1 milletseed, 4 cottonseed, 1 valonia, 2 ground nuts, 1 oilcake, 1 flour, 2 sundries. The floating grain trade has been wanting in animation. Wheat slow and cheaper to sell. Maize—The few cargoes have been readily disposed of at about last week's prices. Barley in fair demand, at steady prices. Of rye only 3 cargoes were offering, in imperfect condition, which could not readily be disposed of at the prices asked—one sold to-day at 34s per 480 lbs, continent. The reported sales are as follow:—Wheat—5 arrived cargoes: Ghirka Odessa, 49s to 49s 6d; Nicolaieff, 50s per 492 lbs; No. 1 Milwaukie spring and New York, 56s per 480 lbs; No 1 spring, 56s per 480 lbs. On passage, 1 cargo Ghirka Nicolaieff, 51s 3d per 492 lbs. To be shipped, 53s 6d per 480 lbs. Maize—6 arrived cargoes: Moldavian and Sulina, 35s 6d to 36d; old ditto, 36s and 36s 3d; Odessa, 35s 3d; Foxanian, 36s per 492 lbs. On passage—7 cargoes: Galatz and Sulina, 33s to 35s 3d per 492 lbs; new Danubian, 33s 6d; ditto (old crop), 32s 6d; ditto and Kustendje, 30s 6d to 33s per 480 lbs. To be shipped, 1 cargo mixed American and New York or Montreal, 30s 6d per 480 lbs. Barley, 1 cargo arrived at Malta, 27s per 480 lbs. Linseed in fair demand at late prices. Arrived in London, 800 bags and 200 tons East India, from Calcutta, at 63s 9d. On passage, 1,200 bags East India, from Bombay, 61s per 416 lbs; and 3,000 quarters Black Sea or Azow, 61s 3d per 424 lbs. To-day 600 tons Calcutta sold at 63s 6d per 410 lbs, A.T. Rapeseed quiet, the tendency in prices being in buyers' favour. Arrived in London, 200 tons ordinary brown Calcutta, at 66s 3d per 416 lbs. On passage, 500 tons Calcutta, at 66s 3d to 66s 6d; and 200 tons inferior yellow mixed, at 67s 6d per 416 lbs. Shipped or to be shipped, 200 tons ordinary brown Calcutta, 65s 6d to 66s per 416 lbs. Cotton-seed slow; nominal at 8*l* 15s to 9*l* per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been a quiet market during the week, but no alteration in prices. The recent demand for low descriptions has quite subsided. Very moderate sales of West India have been effected, although the supply shows some increase. 1,647 casks had sold to yesterday, including the parcels by auction. Barbadoes brown to fine yellow, 29s to 35s 6d. Good to fine crystalised Demerara, 37s 6d to 38s 6d per cwt. Few floating cargoes are reported. During the past two days there has been some increase of demand for refined goods. The landings of West India were rather heavy last week, but the home deliveries have so greatly increased that the stock is still much less than usual. Stocks of other kinds are also smaller, but the excess in beet sugar is important. The total stock in London, as per last return, was 63,500 tons, against an average of 75,000 tons in the three preceding years.

Mauritius.—There have not been any public sales this week. A floating cargo per Helena sold at 27s for Liverpool.

Madras.—140 bags brown native by auction realised 23s to 23s 6d. No further business reported in Jaggery. Price, 20s to 21s per cwt.

Manila.—3,706 bags clayed of old import offered by auction were taken in above the value. 120 tons by private contract at 25s 6d, and 750 bags Zeba at 22s per cwt.

Other Foreign.—At auction 451 casks 70 barrels Porto Rico were chiefly taken in. A few lots low to good yellow sold at 31s 6d to 35s 6d. 71 boxes grainy Havana, 37s to 37s 6d per cwt.

Foreign Cargoes.—One of Havana, No. 11¾, has sold for the United Kingdom at 31s per cwt.

Refined.—The market is rather firmer than last week, with a slight advance in prices for the common qualities of dry goods. Fine have sold at some reduction during the last fortnight, as supplies of foreign are expected.

MOLASSES.—About 620 puncheons Trinidad have sold afloat for the United Kingdom at 11s 4½d. Sales on the spot are about 400 puncheons Berbice and Demerara at 11s to 11s 3d; St Kitts and Antigua, 12s to 12s 9d per cwt.

RUM.—Towards the close of last week purchases made by the Government gave a firmer tone to the market, and the deliveries have been rather large. Several sales are reported in Jamaica at prices ranging from 3s 3d to 4s 6d; common kinds are in steady demand. Leewards in puncheons: pale to good, 1s 6d to 1s 8d; Demerara, 1s 8½d to 1s 9d. 200 casks Mauritius have sold at and about 1s 4d per proof gallon.

COCOA.—The public sales have gone off with fair spirit, and occasionally at rather higher rates for Trinidad, of which 1,324 bags chiefly sold: grey and ordinary, 54s to 58s; good ordinary to fair, 59s to 68s: good to fine, 70s to 106s. 212 bags Grenada part sold at 46s to 52s 6d. 692 bags foreign part sold at 68s for Cuba. 941 bags Guayaquil withdrawn at 49s to 50s. Privately sales of the latter at 47s 6d to 54s 6d per cwt. With a continuance of very large deliveries, the total stock is now 36,064 bags, &c., against 35,179 bags last year, and 38,233 bags, &c., in 1869 at the same date.

COFFEE.—The large deliveries here and in Holland, with some demand for France, has led to more business, prices being in many instances 1s to 2s per cwt higher. Native Ceylon has sold by private contract to the extent of 3,000 bags at 54s to 55s. 570 casks 132 barrels 169 bags plantation Ceylon by auction went rather dearer for colory sorts: middling to fine bold, 65s to 85s; pale and grey, 59s to 67s. 731 cases 764 bags East India went at full rates to some advance; Wynaad, 63s to 65s; bold, 69s to 75s; colory Coorg, 70s to 80s 6d; native sorts, 55s 6d to 56s. 169 bales Mocha part sold at 86s 6d to 87s; low ungarbled, 78s to 80s. 285 bags Singapore at 50s to 50s 6d for Bally. 209 bags Honduras part sold at 55s 6d. 2,533 bags Guatemala went as follows, and all sold: pale to fine ordinary, 56s to 61s; colory, 62s to 71s 6d. 2,233 bags Costa Rica at 54s 6d to 63s 6d. 160 casks 107 barrels 569 bags Jamaica found ready buyers; low to good ordinary, 50s to 56s; fine ordinary to middling, 57s to 68s. Several parcels of East India, ex last week's sale, have sold by private contract; also a good business in plantation Ceylon.

TEA.—There has been an increased supply of red leaf Congou from

recent arrivals. In common to fair grades the transactions are of moderate extent, previous rates being maintained. New season's Congou, per steamers, expected in the course of five or six weeks. Arrivals of Indian tea have been rather heavy, and lower prices generally established by private contract. At the public sales, Assam Company's growths obtained previous rates for broken teas and Pekoe, but for Souchongs prices were lower. Other kinds by auction dull. At a small sale of China tea held yesterday, some fine Moning sold at 2s 2½d per lb.

Rice.—Some arrivals of soft grain have taken place. One cargo of Rangoon was reported sold yesterday, at 10s, ex ship. On the spot Bengal has sold at 10s 3d to 13s. 1,000 bags Rangoon at 9s, including some sea-damaged; 700 tons Raree to arrive, at 9s 10½d to 10s ex quay, and 870 tons Ballam kind at 9s 9d, continental terms.

Imports and Deliveries of Rice to June 10, with Stocks on hand.

	1871.	1870.	1869.	1868.
Imports.....tons	34,000	16,750	4,070	27,100
Deliveries	5,000	27,650	26,000	26,470
Stock	29,000	38,670	47,000	17,310

Sago.—A sale of small grain has been made afloat at 15s 7½d. 255 bags by auction were taken in at 17s 6d for rather bold brownish.

Tapioca.—1,650 bags chiefly found buyers at 1⅞d to 2¼d per lb for Penang and Singapore of low to fair quality. 317 bags Penang tapioca dearer bought in at 1¾d per lb. Several bales privately. 503 bags pearl tapioca sold at 18s 6d to 19s per cwt for medium and bold white.

Black Pepper.—Further speculative business has been done at ⅛d above last week's prices, but the sales were not large at the advance: good Singapore 5¼d; good Penang 5⅜d. 221 bags of the latter by auction sold at 5⅛d to 5⅜d. 3,464 bags Singapore were chiefly withdrawn above the value. Some good sold at 5¼d. The last transaction afloat was at 5¼d per lb.

White Pepper is again rather higher. By private contract Singapore has sold at 8⅛d to 8⅜d. 128 bags damaged at auction realised 8⅛d per lb.

Other Spices.—A large quantity of pimento was offered at Wednesday's sales—viz, 3,226 bags, and the bulk taken in. The portion sold realised 1¾d to 2d. 50 cases low Java kind of mace were chiefly bought in. A portion sold at 3s 3d. 1 case of middling Penang, 3s 7d. 87 packages brown nutmegs sold at about the previous value—68's to 64's, 3s 9d to 3s 6d; 80's to 74's, 2s 6d to 2s 7d; 84's to 82's, 2s 5d; small 116's to 96's, 2s 2d to 2s 3d per lb. 1,050 barrels Jamaica ginger partly sold. Low to good ordinary, 38s to 47s; rather bold to middling 48s to 67s; good to fine, 68s to 100s. Privately business has been done in Bengal at 26s 6d to 27s 6d; African, 32s to 33s per cwt. 138 bags cinnamon chips, part sold at 3½d per lb.

Saltpetre.—The market is firm, and a few sales of Bengal have been made steadily in the lower qualities, at 26s 3d to 26s 9d prompt. To arrive, 50 tons Bengal sold at 27s per cwt.

Imports and Deliveries of Saltpetre to June 10, with Stocks on hand.

	1871.	1870.	1869.	1868.
Imported.....tons	5,440	4,650	3,760	2,880
Total delivered	5,450	7,140	4,210	4,830
Stock	2,000	2,950	3,750	6,180

Deliveries last week, 212 tons.

Cochineal.—At the sales on Wednesday, prices went without material change, excepting for low blacks, which were rather cheaper. Of 1,335 bags Honduras, the chief part sold: silver, 2s 3d to 2s 6d; black, low to good, 2s 3d to 3s 2d. 182 bags Honduras: silver, 2s 2d to 2s 9d; black, 2s. 62 bags Mexican, part sold at 2s 4d to 2s 8d per lb for blacks.

Other Dyestuffs Goods.—Cutch has met with more inquiry, and at firmer prices than last quoted: good to fine, 20s 6d up to 21s 6d and 22s. The market for Camwood is firmer, and speculative business done for arrival at 15s 9d to 16s ex ship. 837 packages by auction were taken in. Sales of Bengal turmeric to arrive at 13s 9d; value on the spot 13s to 13s 3d per cwt, with a few sales. Business has been done in lac dye on the spot and afloat.

Sherbet.—The market is rather higher. 668 chests by auction, about two-thirds sold: lemon and native orange, 6l 5s to 6l 12s 6d; garnet, 6l to 6l 5s; button, dark to fine, 5l to 6l 15s.

Mocatta.—More activity prevails in these markets. Tin has experienced a further improvement in price under the influence of speculative demand, and business of some extent is reported. Straits yesterday sold at 130l, the same price to 131l afloat and for delivery. Banca quoted 131l. Holders now require some further advance. English remain as per 109s to 110s. All kinds of copper are dearer, and the demand rather improving. Chili, &c., 65l to 66l 10s. Australian, 74l 10s to 75l, and the price of Burnie is officially advanced 2s. The market for spelter has ruled higher. Sales of Silesian are reported at 18l to 18l 5s on the spot and 17l 15s free to arrive. The makers having many orders for zinc, prices are likely to be maintained. Scotch pig has not experienced any material change, but the market is now less excited. The last sales for cash were at 57s per ton.

Hemp.—The few sales effected in Manila have been at full rates, including Sourabaya, at 40l to 40l 15s c.i.f. 132 tons Petersburg by auction were chiefly bought in; steam quiet, at 33l to 33l 10s per ton.

Jute.—There is still a very firm market with prices rather higher. Sales to arrive have been made at 20l to 25l 5s. The public sales on Wednesday contained 1,350 bales, and of this small quantity about half sold at previous quotations to low mean to good, 19l 5s to 20l, and a few fine, 21l 10s to 22l. The common qualities were not any dearer. Some of the new crop sold to arrive, but no particulars given.

Linseed.—The market is firm. Calcutta, 63s 6d, afloat, 61s 6d; Black Sea, 62s 6d to 63s per quarter.

Oils.—Linseed and rapeseed oils remain very dull. The former offers at 32l per ton. Olive difficult to sell, and the nominal quotations to small quantities of the lower sorts. Linseed oil remains flat, although the stocks are small. Prompt, the spot, 31l 10s; forward, the same to be named. English brown rape has declined to 43l spot and delivery. Refined 45l; foreign, 44l to 45l. Cocoa-nut remains dull. Ceylon 37l 10s to 40l. The price of Cochin is now almost nominal. Palm without change. Palm Lagos, 37l per ton.

Petroleum is rather lower. American refined, 1s 6d; and ¼d per gallon more sellers for the last four months.

Turpentine.—American spirits, 39s 6d per cwt.

Tallow.—Rather a quiet tone has prevailed during the week, but prices of Russian have varied very slightly: old, 43s 3d; new, 43s 6d to 43s 9d; Oct. to Dec., 45s 6d to 45s 9d per cwt. About 1,650 casks, chiefly Australian, are declared for sale to-day. Arrivals of the latter keep liberal.

Particulars of Tallow—Monday, June 12, 1871.

Hides.—On Thursday, 173,175 East Indian, chiefly sold at former rates to ½d and in some cases ¾d per lb advance upon most descriptions of kips.

POSTSCRIPT.

Sugar.—The market closes with a quiet appearance. Sales of West India, 772 casks. For the week, 2,382 casks. St Lucia and Barbadoes by auction went without material change in prices. 1,552 bags beet were bought in. A floating cargo of Mauritius sold for the United Kingdom: No. 12 to 13 at 31s 6d.

Coffee.—The sales of 711 casks 214 barrels and bags plantation Ceylon went off without material change in prices. 160 bags native, 53s 6d to 54s 6d. 78 casks 597 barrels and bags Jamaica sold, chiefly ordinary qualities, at 53s to 57s. 150 bags East India at 71s to 79s for Coorg. Good ordinary native Ceylon has sold privately at 54s 6d to 55s per cwt.

Pepper is firm at the advance.

Saltpetre.—A small parcel of Bengal, refraction 9 to 9½, sold at 26s 3d cash.

Shellac.—136 chests realised previous quotations: button, 4l 2s 6d to 6l 17s 6d: native livery orange, 6l 2s 6d to 6l 5s per cwt.

Tin.—A good business in Straits, at 130l to 131l.

Oil.—400 casks cocoa-nut by auction chiefly sold up to 39s 9d for Sydney. Ceylon taken in. 584 casks palm chiefly sold at 30l to 33l per tun for the lower qualities.

Tallow.—At auction, 1,663 casks 12 barrels Australian sold at 3d to 1s advance: beef, 36s 6d to 42s 6d; mutton, 42s 6d to 43s 6d per cwt.

ADDITIONAL NOTICES.

Green Fruit.—The report of Messrs Keeling and Hunt states that Valencia oranges are lower, owing to the quantity of summer fruit in the market. Lemons higher, owing to a short stock. Barcelona nuts maintain their value; black Spanish nearly finished. Brazil in demand, and present supply received, via Liverpool. A cargo direct to London is daily expected. West India cocoa-nuts have a brisk sale.

Dry Fruit.—Currants have improved in value within the last few days, chiefly in consequence of better inquiry from exporters. The fruit is held firmly. Raisins also meet an improved demand from shippers, but the inquiry for home consumption is dull. Prospects of both crops appear to be favourable.

English Wool.—Market quiet, except for deep grown wethers.

Colonial Wool.—Market quiet; prices very firm.

Flax.—Market firm.

Hemp.—Market steady at unaltered prices.

Silk.—A very large business doing at present rates in Cantons, the proposed duty by the French Government causing large shipments.

Seeds.—There has been very little business passing in seeds during the past week, but a better tone is becoming manifest, and all descriptions are firmly held.

Tobacco.—There has been rather more activity in the market during the past week, and some fair sales have been made for home trade purposes. Fine descriptions are sought after, but the stato of such is very limited. For exportation there has been more inquiry, and a good business may be looked for. In segar tobacco and other growths there has been a large business done.

Leather.—There is no alteration to note in the character of the demand for leather since our last report. At Leadenhall, on Tuesday, a fair amount of business was transacted at about late prices. There was a moderate supply of fresh goods. The articles most in request were light English butts, light shoulders, prime calf skins of all weights, and English horse hides.

METROPOLITAN CATTLE MARKET.

Monday, June 12.—The total imports of foreign stock into London last week amounted to 15,348 head. In the corresponding week in 1870, we received 7,344; in 1869, 14,460; in 1868, 7,500; and in 1867, 12,592 head.

Considerable heaviness has been apparent in the cattle trade to-day. The supplies of stock have been much more extensive, owing to the increased liberality of the receipts from abroad. As regards beasts the arrivals from our own grazing districts have been good, both in respect to number and quality. Foreign receipts, however, have not come to hand in such good condition. For all breeds the trade has been dull, at a decline of about 4d per 8 lbs. The extreme quotation for the best Scots has been 5s 8d, the more general being 5s 6d per 8 lbs. The market has been extensively supplied with sheep, and the quality of the home breeds has been good. The demand has been heavy, and prices have given way 4d to 6d per 8 lbs; for the best Downs and half-breds 5s 10d to 6s per 8 lbs has been accepted. Lambs have been in limited request, at from 6s to 7s 2d per 8 lbs. Calves have been dull and drooping. Pigs have been neglected.

Supplies of Sale.

	June 13, 1870.	June 12, 1871.
Beasts	3,200	4,200
Sheep and lambs	27,270	31,200

Veal	4	8	5	0	Small pork	4	4	5	0

Lamb, 5s 0d to 5s 8d.

HOP MARKET.

BOROUGH, Friday, June 16.—Owing to the more favourable weather this market has assumed a somewhat quieter aspect. The demand has been scarcely so good, nevertheless extreme prices have been realised:—Mid and East Kent, 56s to 147s; Weald of Kent, 56s to 90s; Sussex, 50s to 80s; Farnham and country, 75s to 112s; olds, 20s to 35s.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, June 16.—These markets have been well supplied with potatoes. The trade has been steady at our quotations:—English Regents, old, 45s to 70s; Scotch, 40s to 65s; Rocks, 45s to 65s per ton; Jersoys, new, 9s to 12s; kidneys, 11s to 16s per cwt.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 16.—The demand for home consumption continues very good, and prices of all current descriptions are tending upwards, whilst stocks remain within very limited compass.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 16.—At this market to-day wheat was dull of sale, at a reduction of 2d to 3d per cental on red, and 1d to 2d on white wheat. Flour was 6d easier. Barley, 4s 2d; beans, 55s 3d; peas, 41s; oats, 3s 9d to 3s 11d; oatmeal, 30s to 31s.

WAKEFIELD, Friday, June 16.—The favourable change in the weather has had its effect in the wheat trade at this market to-day. There was scarcely any business doing, although a decline of 1s was generally conceded. Spring corn was also rather lower.

The Gazette.

TUESDAY, June 13.

BANKRUPTS.

Sydney Chidley, Queen Victoria street, City, solicitor.
Francis Appleby, Scarborough, innkeeper.
John Aspden, Manchester, baker.
Arthur Berriaford Bailey, Fulshaw, Cheshire, licensed victualler.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN,

Is extensively used for all kinds of

OUT-DOOR WORK.

MILNERS' STRONG HOLDFAST

AND FIRE-RESISTING SAFES (of Six Progressive Qualities and Prices, suitable for all amounts of risk), CHESTS, STRONG ROOMS AND DOORS with all the Latest Improvements. Effectually guarding against the novel modes of attack, as used by the Caseley gang in the Cornhill and other robberies (against which, no safe made before 1865 is secure), but which addition to Milners' succession of improvements during the last half-century constitutes their safes the strongest, and (quality considered) the cheapest safe-guard against fire and the modern burglar. Milners' Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street, City, near the Bank of England. Circulars free by post.

BANKERS.
Messrs Glyn, Mills, Currie, and Co., the National Bank of Scotland, and the Bank of England.

BRANCHES in Edinburgh, Calcutta, Bombay, Madras, Kurrachee, Agra, Lahore, Shanghai, Hong Kong.

CURRENT ACCOUNTS are kept at the Head Office on the terms customary with London bankers, and interest allowed when the credit balance does not fall below £100.

DEPOSITS received for fixed periods on the following terms, viz.:—
At 5 per cent. per annum, subject to 12 months' notice of withdrawal.
At 4 per cent. per annum, subject to 6 months' notice of withdrawal.
At 3 per cent. per annum, subject to 3 months' notice of withdrawal.

BILLS issued at the current exchange of the day on any of the branches of the bank free of extra charge; and approved bills purchased or sent for collection.

SALES AND PURCHASES effected in British and foreign securities, in East India stock and loans, and the safe custody of the same undertaken.

Interest drawn, and army, navy, and civil pay and pensions realised

Every other description of banking business and money agency British and Indian, transacted.
J. THOMSON. Chairman

ORIENTAL BANK
CORPORATION.
Incorporated by Royal Charter, 30th August, 1851.
Paid-up capital, £1,500,000; reserved fund, £444,000.

COURT OF DIRECTORS.
CHAIRMAN—James Blyth, Esq.
DEPUTY-CHAIRMAN—John Binny Key, Esq.

George Arbuthnot, Esq.	Alexander Mackenzie Esq.
Major-Gen. H. Pelham Burn	Lestock Robert Reid, Esq.
Duncan James Kay, Esq.	W. Walkinshaw, Esq.

CHIEF MANAGER—Charles J. F. Stuart, Esq.
SUB-MANAGER—Patrick Campbell, Esq.
BANKERS.
Bank of England, Union Bank of London, Bank of Scotland, London.

The Corporation grant Drafts, and negotiate or collect Bills payable at Bombay, Calcutta, Colombo, Foochow, Hongkong, Kandy, Madras, Mauritius, Melbourne, Point-de-Galle, Shanghai, Singapore, Sydney, and Yokohama, on terms which may be ascertained at their office. They also issue Circular Notes for the use of travellers by the Overland route.

They undertake the agency of parties connected with India, the purchase and sale of Indian and other Securities, the custody of the same, the receipt of Interest, Dividends, Pay, Pensions, &c., and the effecting of Remittances between the above-named dependencies.

They also receive Deposits of £100 and upwards for fixed periods, the terms for which may be ascertained on application at their Office.

Office hours, 10 to 3. Saturdays, 10 to 2.
Threadneedle street, London, 1871.

BANK OF SCOTLAND,
London Office.
Notice is hereby given, that the RATE of INTEREST allowed on Deposit Accounts will be ONE-AND-A-QUARTER PER CENT. until further notice by advertisement. T. F. SANDERMAN, Manager.
43 Lothbury, June 15, 1871.

THE LONDON JOINT STOCK BANK.
Notice is hereby given, that the RATE of INTEREST allowed at the Head Office and Branches of this Bank on Deposits subject to seven days' notice of withdrawal is this day reduced to ONE-AND-A-QUARTER PER CENT. per annum.
J. W. NUTTER, General Manager.
5 Princes street, Mansion House,
15th June, 1871.

THE NATIONAL BANK OF SCOTLAND.
London Office—Nicholas lane, Lombard street.
Notice is hereby given, that the RATE of INTEREST allowed on Deposits with the National Bank of Scotland at this Office will be ONE-AND-A-QUARTER PER CENT. from this date until further notice.
W. STRACHAN, } Joint Agents.
JAMES COWAN, }
15th June, 1871.

CHARTERED BANK OF INDIA,
AUSTRALIA, and CHINA,
Hatton court, Threadneedle street, London.
Incorporated by Royal Charter.
Paid-up Capital £800,000

COURT OF DIRECTORS, 1871-72.
Andrew Cassells, Esq., Chairman.

THE TRUST AND LOAN COMPANY OF UPPER CANADA.
Incorporated by Royal Charter.
Established 1851.
Capital, £1,000,000; Paid-up, £250,000; Uncalled, £750,000; Reserved Fund, £79,547.

DIRECTORS.
The Right Hon. Edward Pleydell Bouverie, M.P., President.
Charles Morrison, Esq., Deputy-Chairman.

James Hutchinson, Esq.	W. Gordon Thomson, Esq.
The Hon. Ashley Carr Glyn.	T. M. Weguelin, Esq., M.P.

BANKERS—Messrs Glyn, Mills, Currie, and Co.

This Company was the first established in England for the purpose of receiving, upon the security of a large subscribed capital, money on deposit at a fixed rate of interest, and lending the same, together with the paid-up capital, on mortgages of real estat in Canada.

The Company has been in successful peration since 1851.

The Directors are now issuing Debentures for three years and upwards. Any information required can be obtained on application to
F. FEARON, Secretary
7 Great Winchester street buildings, London.

THE "NORTH AMERICA" GOLD MINING COMPANY (Limited).
Capital, £80,000, in 20,000 shares of £4 each, with power to increase,
Of which 13,750 are offered for subscription, payable as follows, viz.:—2s 6d per share on application, and the balance when called upon after the receipt by the Company of a satisfactory report from the special Agent appointed by the Directors to examine the property.

DIRECTORS.
W. M. Torrens, Esq., M.P., Chairman.
Joseph Bartrum, Esq., 12 Gresham street West.
T. E. Greenhow, Esq., 11 New Broad street.
J. L. Shuter, Esq., Lawn House, Holloway.
(With power to add to the number.)
BANKERS—The London and Westminster Bank.
SOLICITORS.
Messrs Stone, Billinghurst, and Wood, 13 Poultry.
BROKER—William Abbott, Esq., 10 Tokenhouse yard.
SECRETARY—Henry May, Esq.
TEMPORARY OFFICES—10 Tokenhouse yard.

PROSPECTUS.

This Company is formed for the purpose of purchasing and working the extensive gravel-washing Gold Mines known as the "North America," "Niagara," and "Vermont" mining claims, containing about 250 acres in Sierra County, State of California, about 70 miles from Marysville, and 240 from San Francisco.

These mines are in complete working order, and are daily yielding large profits. The tunnels, gangways, air shafts, covered dump-yards, ditches, flumes, &c., have cost about £40,000. The possession of the water right enables the gravel to be washed very cheaply, compared with the cost in many other companies which have to buy water.

The "North America" mine alone has yielded, from 8 acres only, between the years 1863 and 1869, a sum of 555,390 dols, or about £111,078, as shown in the Company's books, being an average of about £18,000 per annum profit. The work done in the "Niagara" and "Vermont" mines shows them to be equally valuable.

Nearly two-thirds of the gold annually obtained from California is the result of gravel-washing mines, which, it has been fully shown, yield more regular, continuous, and in the end larger profits than any other description. It would be scarcely possible to get together so large an amount of really valuable mining land, with equal facilities for working, as is found in these mines.

The price to be paid to the vendors is £45,000 in cash on taking possession of the property, and £25,000 in fully paid-up shares.

The sum of £10,000—which is considered amply sufficient—will remain for the working capital and expenses of the Company.

The Directors have carefully considered the enclosed report from Mr D. W. C. Morgan, a practical miner of great ability and experience in this description of mining. On reference to it, it will be seen that these mines are in a state to make an immediate return to the shareholders, no absolute outlay being required to produce a satisfactory dividend, though some small disbursements, in order to develop the facilities on a larger scale, may be considered desirable. Mr Morgan states that the mines, if worked properly and systematically, are capable of yielding a profit of £55,000 to £80,000 per annum.

A provisional agreement, dated 2nd June, 1871, has been entered into between John E. Hughes, as agent and attorney for Henry Hughes, and W. M. Torrens, Esq., M.P., and J. L. Shuter, Esq., on behalf of the Company, by which the Directors have secured the right of employing their own appointed Agent for the purpose of making an independent report on the value and prospects of the property, previous to the purchase, and payment therefor. This right the Directors have secured in the interest of the shareholders, and the call of £3 17s 6d per share will not be made until the Directors are in receipt of a confirmatory report from their Agent so appointed.

The instalment of 2s 6d per share will provide a fund for meeting the expense of the above examination. Should the report be considered unsatisfactory, the surplus funds remaining in the hands of the Company will immediately be returned to the shareholders.

Prospectuses, forms of application, &c., may be had at the Offices of the Company.

Registered at the General Post Office as a Newspaper and for Transmission Abroad.

THE *VERY* DANGEROUS FINANCIAL POLICY OF M. THIERS.

That France is still a very rich country is certain—that her people are most thrifty and industrious is even more certain. That the industrial and commercial resources of France are more than sufficient to meet even the present great demands upon her is hardly to be doubted; but if any thing could make one doubt it, it would be the speech which M. Thiers has delivered and the policy which he has avowed.

There are three points in the exposition which M. Thiers has given us—two of temporary and one of most enduring interest. We will take the two temporary ones first.

The most obvious financial question as to the late war is how the French side of it has been paid for. The Germans we know lived mainly at the cost of the enemy, but the French soldiers in Paris and out of it could not have done so. How, then, did they live? Until now we did not know, but M. Thiers has told us. He says that the following deficits in 1870 and 1871 respectively have been partly caused by the cost of the war, and partly the loss of revenue which necessarily ensued on the war:—

	£
In 1870, the deficit was	25,960,000
In January and February, 1871, was	27,200,000
In the remaining ten months of 1871, probably will be	12,280,000
Total deficit caused by the war	65,440,000

And this is the aggregate deficit after reckoning the loan effected by M. Magne when the war broke out, and the so-called "Morgan loan," which was negotiated by the Government of the National Defence in London. In simple words, this may be called the unknown deficit which no one had ever stated or explained till now. And it has been paid thus:—

	£
By a loan from the Bank of France	53,200,000
By an addition to the floating debt	12,240,000
	65,440,000

The addition to the floating debt, M. Thiers says, is of trifling importance, as the aggregate of that debt before was only 26,000,000*l*.—a less amount than it has been generally during the second Empire. But the advances from the Bank of France are much more interesting. We confess we wish that the complete balance-sheet of that great establishment had been published before the loan. It would have given the financial world confidence to have seen the complete figures. All we know besides is that the reserve in the Bank of France has diminished since September from 32,320,000*l* to 20,800,000*l*, and that the circulation has augmented from 69,800,000*l* to 88,000,000*l*, and even this increase of liability and diminution of the reserve are not equal to the whole amount lent to Government. We should have liked to have seen the whole account, and to be sure that we understood the entire transaction. There is scarcely any one more remarkable in the history of finance. If the notes of the Bank of France had been at a discount, nothing could have been more common, or according to rule; but they have never been at a discount: on the contrary, at Versailles during the Prussian occupation they appear to have borne, and in Belgium at present they are now said to bear, a premium. That so large a volume of paper currency, being about 26 per cent. of that before existing of France (31 per cent. if we go back to the ante-war period), should have been added to it without depreciating its value is unexampled. And M. Thiers evidently thinks that this augmentation of paper currency is permanent, and will be maintained. He speaks sanguinely of speedily resuming cash payments. But we should like to have additional information before we admit that this leaping step will not be attended with danger. During the war a great deal of gold and silver might be and no doubt was hoarded; a temporary substitute was for the instant required; as yet France is not settled enough to release that hoarded gold. But when hereafter it is released, will paper be still on a level with gold? or if it is, will not prices be raised by the sudden increase of the circulation? It is

sometimes said that France is "under-currencied;" but what does "under-currencied" mean? Does it mean that transactions are carried on by barter, because there is no suitable money? or that the range of prices when measured in gold and silver is lower—that the purchasing power of gold and silver is higher—that gold and silver are scarcer, in France than elsewhere in contiguous countries? We should like to see the term "under-currencied" better defined before we reason on it. As the matter now stands, it will be an economical singularity if so large an amount can be so suddenly added to the paper circulation of any country without producing great and deranging effects.

But whether or not M. Thiers is right in thinking that the extension of the French banknote circulation is likely to be permanent or to be beneficial, there can be no doubt that if it be so it is a great advantage to French finance. M. Thiers only pays 3 per cent. now to the Bank of France; he is only to pay 2 per cent. next year; after that only 1 per cent. In fact, he divides with the Bank of France the profit of the additional paper circulation, and takes the greater part of it. And in this he is right. The Bank of France have already a lucrative monopoly of the circulation, and if that circulation can be safely extended they ought to pay highly for the increase of that monopoly. But whether that circulation can with safety be so rapidly augmented—whether the usual effects of a very large sudden issue of inconvertible paper will not before long overtake France, is in our judgment very dubious, and well worthy the close attention of economists and financiers.

Secondly,—M. Thiers tells us what he will want for the immediate future, and this is of more immediate interest. The 200,000,000*l* payable to Germany are payable, by the Treaty, thus:—

£	
20,000,000	in thirty days after the establishment of the authority of the Government in Paris.
40,000,000	in the course of the year.
20,000,000	on 1st May, 1872.
120,000,000	on or before March, 1874.
200,000,000	

So that for the moment M. Thiers has only 80,000,000*l* to deal with; and of this he has already paid 5,000,000*l* in money, and the railways in Alsace and Lorraine are to be taken at 13,000,000*l*, so that out of this 80,000,000*l* he has already provided for 18,000,000*l*, and, so far as the immediate indemnity goes, has only really to deal with 62,000,000*l*.

Unfortunately, however, that indemnity is not the whole of the present demand. Besides that, there is the cost of the German army of occupation; the pay of their own army; the compensation to be given in Paris and elsewhere to persons whose property has been destroyed by French troops for French advantages; the rebuilding of the walls of Paris, and of the public buildings there. These additional demands make it necessary to borrow more than the precise amount of the indemnity, and M. Thiers proposes to borrow 80,000,000*l*, of which—

£	
62,000,000	are to be used for the indemnity.
18,000,000	are to be used for other demands.

The mode in which he proposes to raise the loan appears to be very fair, and there is no material objection to it.

But unhappily the conditions upon which the principal of a loan is raised are comparatively of slight importance; they only affect the money market of the moment. The critical point is how the interest is to be levied. And here the fatal unsoundness of the finance of M. Thiers shows itself plainly. He says that for all the loans due to this war—viz., that of M. Magne, that from the Bank, that of the National Defence Government, and the 80,000,000*l* now raised,—and for the interest at 5 per cent. on the remaining three milliards of the indemnity as stipulated by the Treaty,—a sum of 14,240,000*l* will be added to the annual charge of the National Debt; and he proposes to raise it all by indirect taxation. He is cautious of committing himself to the precise Budget which his colleague, M. Pouyer-Quertier, has introduced, and which we analysed last week. He is especially cautious as to the duties on the raw materials of manufacture which naturally are especially unpopular, and may perhaps be modified. But though the details may differ the substance is the same. Both M. Thiers and M. Pouyer-Quertier rely for raising 14,000,000*l* almost entirely on taxes on commodities, and largely on augmented customs dues. But this is a painful and retrograde movement. Since 1860 France has been at the head of the Free-trade movement on the continent, and she now changes and returns to Protection. Of course the old pretence is repeated, that the Customs dues are for revenue only; and no doubt, under the adroit management of a shrewd and ardent Free-trader customs duties may be balanced by excise duties, and so the conditions of competitive production remain unaltered. But the task is always most difficult,—only a most active and acute Free-trader can effect it. The home producer is sure to be ready with many plausible reasons why he should enjoy this advantage, why he should not be subjected to that disadvantage. Even a consistent Free-trader will often be misled by them. But M. Thiers does not even profess to be a Free-trader. He says—"I always was a Protectionist, and I am a Protectionist "still." M. Pouyer-Quertier is a Protectionist too. Nothing can be more certain than that the new French indirect taxes will be imposed in the interest of the home producer, and be made subservient to domestic popularity. That Protection is a poison is admitted, and it is to this that France is returning. And indirect taxes cripple trade, diminish consumption, lessen production. For twenty years France has been starting forward into vigorous industrial life; great cities have been created for that life, and by it. But now this energy is to be fettered, and this life impeded. Order and civilisation have been not easily maintained in Paris and Bordeaux, Lyons and Marseilles, even in times of good trade, due to an intelligent Government—how then can they be maintained in times of bad trade, due to an unintelligent Government, and caused by pernicious taxation?

The plain policy before France was to diminish her military and naval expenditure. The naval expenditure is, especially in her case, childish. She has no over-sea dominion, no colonies, and no commerce requiring it. Her present army can only be wanted for aggression, and 1870 should have taught her that aggression is disastrous. But M. Thiers says expressly that the second Empire, though it gave too much to luxury, did not devote "enough to the necessary "expenses of the public power." The cost of the French army and navy is then to be augmented, at the same time that French industry is to be impeded. Can any policy be more disastrous for Europe, or more dangerous to the credit of France? For years she has been the main aggressor in Europe; for years she has been more subject to intestine commotions than any other State in Europe, and now by the policy of M. Thiers she is to augment her outlay on aggressive forces, and increase her liability to civil convulsions. What prospect can be worse for her or for Europe? What could a person who wanted to dissuade monied people from lending to France say more than M. Thiers has said in order to encourage them? And yet this is not the whole case, or the entire financial mistake. Not only has M. Thiers 14,240,000*l* of interest to provide now, but, as if this was not enough, he engages to raise 8,000,000*l* annually for a sinking fund. This climax is almost ludicrous, indeed would be quite so if the subject were not so important. Every rational financier would have told M. Thiers, according to the slang saying—"First "to catch his hare"—first to borrow the money, and to levy the taxes necessary for the interest, and when he had done that (which will not be done in the life-time of so old a man) to begin to talk of paying off debt. Nothing can be more fallacious than the pretension to pay debt without the means. Nothing can be more fallacious—nothing more significantly indicative of a specious but unsound—financier than the attempt to pay old debt by borrowing new debt.

THE MARITIME LAW OF THE CONVENTION OF PARIS.

The Earl of Denbigh made a vehement attack on Monday night on the principles of international law agreed upon in the Congress of Paris in 1856, asserting that in fact they had deprived the country of all power to carry on a naval war effectually. We will allow Lord Denbigh to state his own case in his own words:—"Our navy was formerly our chief "means of defence, but we had lost all power of injuring an "enemy by sea, while our army was utterly inadequate for "offence or defence. As steam rendered an enemy almost "ubiquitous, we should, unless prepared by fortifications round "the island, well manned, be taken at a great disadvantage "and though we should send out our ironclads and swift cruisers

"the enemy's fleet would remain in port, preserved by torpedoes, while his commerce would be transferred to neutral bottoms, where under the Treaty of Paris they would be safe. This was the case in the Crimean war, for England and France having publicly admitted that a neutral flag should cover the enemy's goods, the commerce of Russia passed through Prussia, Russia thus receiving about 17,000,000*l.* of our money, and being thus enabled to prolong the war. The enemy, on the other hand, would fit out cruisers to prey on our commerce, the rate of insurance would rise, British merchants would prefer neutral bottoms, our merchant ships would rot in their harbours, and our sailors would be attracted by high wages and safety to neutral ships. Our navy too would seek in vain for the enemy, and there being no prize-money in prospect, sailors would not man our fleets.....If it was right to employ francs-tireurs on land, why should not privateers be employed at sea? If we could not touch enemies' goods on board a neutral ship, any war in which we might be involved would be much more protracted."

The Earl of Denbigh has not a very strong case if that is all which can be said for it. In the first place, he hardly understands the actual working of the naval measures necessary to break up an enemy's commerce. So far as our own commercial marine is concerned, it would be far more likely to be shut up rotting in our harbours in time of war if the Declaration of Paris were rescinded, than it will be if it remains in force. Not only are neutral goods respected in enemies' bottoms while that Declaration holds good, and for those between whom it holds good, but the practical effect of war under that Declaration is simply to transfer a great many commercial ships for the time being from the flag of the belligerent to the flag of the neutral. As a great many American ships were transferred to British owners and hoisted the British flag during the war of secession, so if we were engaged in a great war, our commercial marine, instead of lying rotting in our harbours, would, in all probability, be transferred to some neutral carrying power, and would carry our exports to other nations just as before. Certainly it is not any part of the *commerce* of England which either in war or in peace would suffer by the observance of the Declaration of Paris. When we are neutral we gain greatly by it, because we gain the privilege of carrying the traffic of the belligerent nations unmolested, as well as our own. If we are at war we gain by it, because as, with our navy, a blockade of our ports would be impossible, our ships, bought *pro tempore* by the United States or by Denmark, would just carry our merchandise out and in as before; whereas if enemies' goods were not respected in neutral bottoms, we should be liable to commercial ruin at the very moment we wanted all our resources for a great war. Nothing can be more absurd than to suppose that our *commerce* would not, whether in war or in peace, receive the greatest protection from the Declaration of Paris. And to those who know how completely money is the sinews of modern war, that consideration is by no means a secondary one.

But now as regards our means of offence in time of war on the commerce of the enemy; Lord Denbigh's position is that this is destroyed by the Declaration of Paris. If we cannot seize enemies' goods now are we to attack their most vital part—their commerce? We reply, by the only really effective weapon with which a naval power can ever attack commerce—the right of blockade. Suppose the Declaration of Paris abrogated to-morrow, and that we were at war with Germany. We might then no doubt seize and confiscate cargoes of German goods imported by French ships to French ports, on receiving evidence that they belonged to German owners. But in the first place there would be plenty of modes of evading us. The German merchants would lend *money* to the French merchants, and the French merchants would buy on their own account the goods Germany wanted, and then sell them to Germany.—nor could we check such a system at all, and if we tried to interfere with it we should rush into a war with France as well as Germany. The inconvenience to be inflicted on Germany by our right to seize German goods in Dutch, or French, or Belgian ships would be infinitesimal. We should be always finding out that the goods were really owned by the French, or Dutch, or Belgian owners, though intended for sale to Germany, and have to give up our prey after all, and meantime we should pick many an unfortunate and mischief-breeding quarrel. But whether the Declaration of Paris were to hold or not, we could effectually blockade the German ports, and make Kiel, Hamburg, and Bremen, for instance, suffer very keenly for the war. Nor would the Declaration of Paris interfere in any way with this—the only real blow our navy could inflict on German commerce. The imports and exports through Holland, Belgium, or France, we could no more prevent if the Declaration of Paris were abrogated than we can now. The trade of the few great German ports we could annihilate just as effectually if the Declaration of Paris continues in force as we can now. We do not believe that the difference between the observance of that Declaration and its abrogation would make an iota of difference in the length or fate of a war between Germany and England. The difference it would make would be in the feelings of neutrals, who would be much more likely to become enemies if the Declaration of Paris were abrogated than if it were observed. Lord Denbigh and those who take his side are apt to forget that we cannot in either case touch really neutral trade, and that in modern commerce it is not a very difficult matter to arrange that the neutral shall first own and then sell to a belligerent what, if there were no war, would be directly owned by the belligerent. It is true of course that if ever again we happened to be pitted against the whole of Europe, we should only have America to trust to for carrying our traffic, and that if America also were hostile, we should have no carrying power to aid us at all. But then this is precisely the case in which the Declaration of Paris would be no hindrance at all to our power of attacking the commerce of our enemies; for as there would be no neutrals of any consequence,—as all our neighbours would be enemies,—the merchandise of Europe, so far as it was on the sea, would necessarily be enemies' goods carried in enemies' bottoms, and this the Declaration of Paris—intended only to protect neutrals—does not restrain us from confiscating. It is true that if we were to go as far as America wishes to go, and as far as we think we might safely go, and recognise the inviolability of *all* private property at sea except contraband of war and ships intended to break a blockade, we should not have this resource in case of a war against the world,—but then we should also have all our own commerce safe, and that would be an even greater set-off;—for, as we have said, money is the great condition of modern war, and you cannot get money out of a bankrupt community.

The more closely the circumstances of the case are examined, the more clearly it will appear that the great instrument of maritime war is blockade. This was the great weapon wielded by the North against the South, and it would be our great weapon against any great maritime country. Of course against Germany it would not be a great weapon; but that is not the fault of the Declaration of Paris, it is the fault of geographical facts, and of nothing else. The nation that possesses the most powerful navy can always shut up the ports of any nation with a good maritime coast, and it is this shutting up of its ports which really brings the calamity of war home to the people. Suppose we declared a blockade of all the ports of France,—to which our resources are certainly quite as equal as were those of the United States to the blockade of the Confederate ports,—would not Marseilles, and Bordeaux, and Nantes, and Havre suffer immediately, and all the French consumers who were accustomed to receive their goods through these ports, and who would now be obliged to import by way of the Rhine or the Elbe with a good deal of overland transit, feel the pinch at once? And of course the greater the alliance against us the more tremendous the pressure we could apply. If Germany, and Holland, and Belgium were with France, we could shut up almost every avenue by way of sea to these countries, and practically deprive them of their ocean traffic. And the same is still more true of America. It would not be by stopping neutral ships on the high seas that we could really strike a vital blow at the United States if they were at war with us, but by blockading their great ports, by sealing up Boston, and New York, and Philadelphia, and New Orleans,—blows in comparison with which the stoppage of neutral ships containing United States' goods, but not intended to break any blockade, would be a mere puncture of the skin.

As to the privateering right on which Lord Denbigh insisted, we think it is so obvious that the nation with the greatest commerce gains the most by the abolition of that right, that it is hardly even arguable. If we retained the right to fit out privateers to prey on the enemy's commerce, the enemy

would retain the same right to send out privateers against our commerce; but our commerce being far the most valuable in the world, and the injury to it being in a proportion far beyond the actual loss,—namely, in proportion to the fear and risk of loss,—we should of course lose just as many times what our antagonists lost as our commerce was more valuable than theirs. If taxability be at the root of the fighting power of any really warlike nation, as we submit that it is, the Declaration of Paris, in protecting our traffic and rendering our vast export and import trade comparatively safe, and so conserving our taxability, really vastly increases our resources as a naval and military power.

THE DEBATE ON THE BALLOT.

Now that the Ballot Bill has been brought forward in Parliament as a Cabinet measure its advocates appear disposed to throw away one half of the arguments in support of their own case. They are so weakly conciliatory that they will end, if they do not become a little sterner, in losing their Bill. Everybody, for example, on the side of the ballot not only admits that a vote is a trust, which is as true of the electoral as of every other public function, but that every trust ought preferentially to be exercised in public. Why ought it, if such publicity is contrary to the welfare of the delegating power, and is admitted by them to be contrary? Some of the very highest trusts committed to Englishmen are exercised by them in profound secrecy, as for example, the right of previous discussion of a great measure entrusted to every member of the Cabinet; the right of vote as to sentences which may be capital confided to officers on courts-martial; and the right to find a verdict confided to every man who sits upon a jury. If it is wrong to release an elector from the pressure of influence or of opinion, *a fortiori* it is wrong to release a juryman; and yet, as we all know, to compel jurymen to vote by roll-call would imperil justice. On the other hand, if secresy and publicity are matters of expediency only, then we are driven back on the evidence, and as the Economist has always contended, the evidence is decidedly in favour of secret voting. The speakers on Thursday seemed all more or less inclined to say that intimidation and bribery were dying out; but there must be scores, not to say hundreds, of members within the House who know that they are not, that but for the power of great employers or great landholders, but for the adroit use of money in conciliating opponents, but for direct gifts to the refuse of the constituencies, they would never have been returned. It is true the methods of corruption are much more subtle than they were. A landlord does not now order a tenant to vote on his side, he only takes care to choose tenants who will vote with him. Neither does he expel a tenant who is a Dissenter; but if he is a man of strong opinions his tenantry will very soon be found to consist mainly of sound Churchmen. Nor does a millionaire now give a twenty-pound note for all the votes he can get, any more than he gives twenty-pound notes to people of position to let him into society. He only lets his money flow, pays all bills, responds to all demands, and finds himself drifting on the tide of expense into the desired haven. The Judges, it is said, found little evidence of rank bribery, and, as Mr Plunkett said—"Judges' opinions have almost the weight "of facts;" but have the Judges ever inquired into the history of municipal elections? or can they inquire into the pressure maintained, not for an election, but for a lifetime? Is it not the fact that in every county in England the succession of Liberal heirs to Tory fathers would affect the elections, and that in one-half the boroughs a poor but educated man has not the shadow of a chance? Let the members ask their own consciences, as was said in the debate, and they will acknowledge that the evil exists, and that the ballot will in a great measure correct it. It will not correct it entirely, because no scheme could do that, but it will immensely diminish it, first, by establishing a tradition of independence; secondly, by rendering intimidation impossible, the tenantry and workmen claiming the right to obey the law of secrecy; and thirdly, by enabling the candidate who always wishes to keep his money, to resist the pressure of the electioneering agents, who wish to make him spend it. Under the ballot they can give him no proof that they have not put it in their pockets. If there is one thing wonderful about the English mind it is in its tendency to believe in legal rights rather than natural rights, and the moment the law decides that an elector's vote, like a juryman's opinion, is to be given according to his conscience, pressure will be resented, as dictation to a jury is resented now.

But, argue the opponents of the Bill, it is better that electors should be influenced by the opinion and the wishes of the upper classes and propertied classes in our society. They can govern better than the masses can. That—the secret opinion of all Tories—may be very true, but it is entirely beside the point. Those classes have parted with their power to govern, and the only question is, whether it is better that the classes really in possession of power should exercise it honestly, or whether they should exercise it under a perpetual sense of pressure and of guidance, which destroys their responsibility. We say the first is best; that it is better—to take a crucial case—that the man who at heart holds Mr Rylands a meddling fool for stopping his Sunday grog should vote down Mr Rylands, than that he should, under the pressure of the respectabilities, vote for Mr Ryland and then riot against Mr Rylands's Bill when passed into a law. The opponents of the ballot say it will leave the electors free to act on all manner of base impulses; but so does any electoral Act which leaves the electors truly independent. If it does not, then they are under pressure—the very thing denied. As a matter of fact, we believe this will not prove so; that electors released from observation will act as jurymen do under the pressure of ideas—often wrong, like the ideas of English jurymen on infanticide—but not under the pressure of corrupt influences; but in any case they will act as the Constitution intends them to act—for themselves. Mr Cave told a capital story upon this point, but he entirely missed its obvious meaning:—"He was once," he said, "canvassing a "place in the south of England; and on coming to a public-"house in one of the streets, the persons who were with him "said—'You need not go in there; the landlord is a red hot "'ballot man.' However, he went in, and said to him—'I "'am come for your vote, but I suppose I shall not get it.' "'Are you for the ballot?' the man asked. 'No,' he "replied, 'certainly not.' 'Oh, then, I'll vote for you.' 'I am "'surprised,' he said, 'for I heard you were a red hot ballot "'man.' 'So I was,' the man rejoined, 'till lately; but "'I've found out what a base thing the ballot is.' He said "he had a story to tell, so he sat down, and I let him go "on. 'A few weeks ago,' he said, 'there died the landlord "'of a neighbouring public-house, in which a friendly society "'held its meetings. Myself and another publican each "'wanted the society to come to our house, and the mem-"'bers agreed that it should be decided by ballot. We "'both canvassed; there were 30 members, and I got 20 "'promises, so I thought myself sure. When the time came "'I got 10 votes, and lost. But that was not the worst of "'it, for in the course of the day the whole 20 came in one "'after the other, and said—'My dear fellow, I am so sorry "'you did not win; you know I voted for you.'"

Surely the moral of that story is, that without the ballot men cannot be expected to vote for the man they like best, as against the man of whom they are most afraid; and that to secure independence they will even lie. The publicans' customers, be it remembered, were not protected by a law establishing secrecy as a principle, and enabling an elector to say, as a juryman says—"It is a rule not to tell how we "voted."

It was alleged in the debate, and has been alleged outside, that the feeling of the country is changing, and the ballot is no longer desired. Our own impression, we confess, is a very different one. We believe that the feeling in the counties, and the medium towns, and the working cities, like Sheffield, is one of strong desire for the ballot, kept down mainly by the certainty that it will be obtained, and that any Liberal member who votes against it will be deserted by a large section of his party. It is a growing mistake among the cultivated to suppose that because parties, for convenience sake, use certain reforms as Shibboleths, and so give them an exaggerated force, therefore the constituencies are indifferent to those reforms. They are no more indifferent than the religious sects are who exaggerate in a similar way the importance (say) of an attitude at the altar, but who nevertheless at once distrust and in a manner expel any man of their party who declares himself for or against, as it may be, the lighting of those candles. The ballot may be less valued than it was once; but its advocacy was once a clear test of Liberalism, and the Liberal who, having once adopted it,

votes against it will be held, and rightly held, by his constituents to have strayed into a less Liberal attitude of mind. Of course if they also have become Conservative that will do him no harm, but the latent Conservatism of electors without property has always seemed to us a very imaginary quantity.

MR SCUDAMORE'S REPORT ON THE TELEGRAPHS.

THE account which Mr Scudamore has given of the establishment of the Government telegraphic system is an ample justification of the measure which he has done so much to carry through. He leaves to a second report the financial results of the measure, the simple assurance being given that these are as satisfactory as the other results; but there is enough in what is dealt with to show the great public gain and make that assurance credible. As the question is of vital consequence to the country not only in itself, but from its bearing on the State management of monopolies, it will be useful to study carefully what Mr Scudamore has done.

We hear very few complaints now, if any, of the working of the system, but it is proper to remember the accumulation of difficulties under which the department took up the work. In the best of circumstances, the transference of so large a business from several independent boards of management to a single Government department could hardly have taken place without a great deal of friction. Different principles and different modes of working had to be combined, under the new condition of a low and uniform charge which increased enormously the amount of business done. This would have been quite sufficient to cause accidents and delays, and grumblings on the part of the public that they had exchanged better for worse. But there were other causes which aggravated the difficulties. The companies from whom the business was taken over had in the first place, from a very natural motive, neglected the calls upon them for extension for a number of years. For a long time before, the project for the State acquisition of telegraphs was hung over their heads, and they naturally objected to take the risk of new ventures from which they would get no return. At a still earlier date, owing to the great amount of repairs caused by storms in 1865 and 1866, extension had likewise been neglected. Altogether, for about five years previous to the transfer, the companies had been in arrear to the public — so that the Post Office started "heavily in debt to public expectation." A fresh aggravation of the difficulties was produced by the postponement of the money bill from 1868 to 1869. The consequence was that orders for *matériel*—poles, wires, and instruments—which ought to have been given in the winter of 1868-69, could not be given till the following spring and summer—six months after they should have been given. The department thus started very heavily weighted; and now that the difficulties have been surmounted, the wonder rather is that the complaints were so few.

Passing over these preliminary difficulties, we have to see how the promises made beforehand to the public are kept. Besides the low tariff which was put into the Bill, the principal advantages promised were these—1. The multiplication of country offices, and the substitution of convenient offices for the offices at railway stations; 2. The multiplication of offices in the suburbs and districts remote from the centre of large towns; and 3. The extension of greater facilities to intelligence or press messages. There can be no doubt that in these respects the Government purchase has answered.

First,—as regards rural stations Mr Scudamore's statements are very clear. The Post Office in fact started into new on the 5th of February, 1870, with 1,007 new postal telegraph offices, "each "of which was at a Post Office serving a distinct locality, and "in the centre of the population of that locality." It may also be stated, he adds, that—"between the 5th February "and the 31st December, 1870, it succeeded (in spite of the "circumstances which compelled it to employ a large force on "the construction of new and the improvement of old main "lines) in opening upwards of 900 additional offices for the "accommodation of as many distinct localities. And, further, it is proceeding with this work at the rate of from 20 "to 30 additional offices per week, and has at this moment "upwards of 96 offices, which wait either for clerks or instru-"ments to be opened.* The whole of the postal telegraph "offices now open, and which are nearly 2,000 in number, "are served by wires which are used solely for commercial "purposes, the railway and commercial systems having been "completely separated. Telegraphic business, however, is "carried on on behalf of the Postmaster-General at upwards "of 1,800 railway stations, so that travellers and persons "resident in the immediate vicinity of the railway stations "have lost none of the advantages which they possessed prior "to the transfer, though, as I shall show presently, they "make but little use of those advantages." And what Mr Scudamore states as to the superior utility of the new offices substituted for railway stations is that 91 per cent. of the messages are sent from them, and only 9 per cent. are sent from the old railway stations. A large amount of additional accommodation, which they fully appreciate, has thus been accorded to the public.

Second,—as regards the multiplication of offices in large towns, Mr Scudamore supplies maps of 12 of these towns, showing the position of offices open under the old and new systems, and these maps are very striking to the eye. They show conclusively that while in Manchester, Liverpool, Glasgow, Leeds, and other towns, the rival companies kept their offices together in the centres where the best business was to be competed for, the Government has been able to consolidate the central offices, and establish additional offices in the suburbs. And that the new offices are additional facilities to the public is proved by the statement "that "9 per cent. of all the messages handed in at Glasgow, "11 per cent. of all those handed in at Edinburgh, 14 "per cent. of those handed in at Birmingham, 17 per cent. "of those handed in at Leeds, 26 per cent. of those handed "in at Liverpool, and nearly 40 per cent. of those handed in "at Manchester, are handed in at the stations which the "Post Office has set up in districts previously unprovided "with accommodation, in substitution for the duplicate and "triplicate offices which it has closed." Much has also been done in the same direction, Mr Scudamore adds, in smaller towns, such as Bristol, Hull, Sheffield, Bradford, Derby, Nottingham, and Brighton. Thus in Brighton the principal thoroughfare faces the sea, and the former telegraphic offices were confined to it; but there is another parallel thoroughfare more inland, in which the Government has opened offices at convenient points.

The accommodation of the Metropolis has also been so far extended as to secure the immediate despatch and delivery of all local messages—a business which was very imperfectly accomplished before. On the 17th of September last 285 telegraph stations had been opened, increased to 334 in January, of which about one-third are in direct communication with the Central Office in Telegraph street. The magnitude of the business thus accommodated is shown by the statement that 20 per cent. of all the messages in the United Kingdom are London messages, and of these 20 per cent. are for local delivery.

The facilities would be nothing of course unless the public took advantage of them, but on this point likewise there is evidence. In the first week of the transfer the number of messages, exclusive of news messages, was 128,872; in the week ending the 31st of March, 1870, the number had risen to 160,775; and the average weekly number in the three following quarters was successively—177,410; 200,787; and 203,572. In the last week of December, which is usually considered the worst week for telegraphic work, the number was 144,041, or nearly 16,000 messages in excess of the number with which the department started. The total number of messages in the three quarters was as follows:—

In quarter to 30th June	2,306,340
— 30th September.....	2,610,237
— 31st December	2,646,438
In the nine months	7,563,015

It is thus demonstrated that great additional facilities have been given to the public, and that the habit of telegraphy, which was the direct aim of the transfer, has increased.

Third,—as respects press or intelligence messages, the improvement of the new system is also very conspicuous. "The "companies," it is stated, "sent news to 144 towns only in "the United Kingdom; the Post Office sends it to 365

* One hundred and six extensions are in progress, and one hundred and sixty-eight are ordered for early extension.

"towns." Formerly in fact the business was a monopoly in the hands of the companies who had an "intelligence depart-"ment" of their own, and discouraged rival collectors of intelligence. Under the *régime* of free trade, there are two independent associations, whose competition has brought about the above result. The companies besides had only 173 newspapers subscribing for their telegraphic intelligence, but the new associations have 1,106 subscribers. It is also probable that the news correspondence, independent of these associations, amounting now to between 15,000 and 20,000 words daily, has increased, though there are no statistics of what the companies sent. The department has increased the facilities for this correspondence.

Another kind of facility given to the press is the use of special wires—a branch of business which has not increased, there being seven special wires under the new as under the old system. The charge has, however, been reduced, from between 750*l* and 1,000*l* to a uniform charge of 500*l* per annum; and the department could have lent many more wires if it had had them to spare.

It is not generally known in the Metropolis, at least, to how great an extent the provinces are supplied with telegraphic intelligence, chiefly from London. Mr Scudamore states that "a very large portion of every leading provincial newspaper "now consists of news received by telegraph. I have seen as "many as twelve columns of telegraphic news in leading pro-"vincial journals, and have read in Aberdeen, in a local "paper, several columns of news which, if Aberdeen had been "dependent upon London papers for its news, could not have "been known there until six-and-thirty hours afterwards." Such is the press business to which the new department has given so many more facilities, including a much lower tariff. No better means could be devised of knitting together the entire kingdom, and extending to the remotest districts many of the advantages of residence in the principal centres.

Mr Scudamore has thus proved by experience his principal case for the acquisition of the telegraphs. Most of the advantages thus described are palpably due to unity of management, and to the principles of action adopted by a Government department, which would have been entirely unsuitable for rival companies anxious to make a profit. They could not be expected to extend an already injurious competition to districts of little business, or increase public facilities at their own expense, even if that expense was likely to be but temporary, for they had no security against a competition which would defeat their end. But there are other matters in which the benefit of Government action has been felt, and will afterwards appear in a clearer light. It is impossible to go through Mr Scudamore's details as to teaching employés, organising repairing rooms, inquiring into and perfecting apparatus, without being assured that the unity of management, under the pressure of public opinion, conduces to great economy and efficiency in the working. A great deal has been done for instance by "interchanging and connecting" the wires of different companies. Prior to the transfer Leeds and Derby, say, had no direct communication, although Leeds was connected with a third town by one company's wires, and Derby with the same town by another company's wires. Now the different wires are joined at the place where they meet, and direct telegraphic communication established between Leeds and Derby. The principle will be adopted and extended by means of short connecting links between places where wires nearly meet, and the result will be greater efficiency and stability in the services. Not only will more business centres have direct communication with each other, but, as the number of circuits will be multiplied, the effects of any storm or accident will be confined to the narrowest possible limits. The business will in fact be "carried round" the scene of the mishap. In short when one reads the narrative of the actual work, it becomes simply impossible to conceive how anyone could ever have ventured to put companies in competition with a State department in a business of this description. The narrow aims and means of the companies are in curious contrast with the comprehensive views of the department, and its means for putting them into execution. The advantages on the side of the State are absolutely overwhelming, and in a few years, when the full effect of the change has been felt, will be universally acknowledged. The ultimate effect of the transfer cannot but be the strengthening of public opinion in favour of the acquisition of other monopolies by the State.

BUSINESS NOTES.

AMENDMENTS OF THE REGULATION OF RAILWAYS' ACT.—A Bill has just been laid before the House of Commons by the President of the Board of Trade to amend the law respecting the inspection and regulation of railways. It proposes some material improvements. The Board of Trade is to have power to appoint inspectors for carrying out any inquiries respecting particular railways or accidents which the Board is authorised to make, and these inspectors will have ample powers to inspect the books of the companies, and call for the evidence of officials. This will improve the machinery which the Board now has for inquiring into the management of railways, and setting the results before the public. Another excellent proposal is to increase the authority which the Board possesses in regard to accidents. At present there is no proper arrangement for informing the Board of accidents, except in cases of loss of life, and the information which the Board publishes and the inquiries it makes are defective. It is clearly as important for the public welfare that accidents which happen not to be fatal should be recorded and inquired into as accidents which are fatal. There is as likely to be a defect of management deserving of inquiry in the one case as in the other. As we have often urged the necessity of some provision for a record of this sort, we are glad to see the clauses in the present Bill which bind the companies under penalties to report not only accidents where there is loss of life or injury to anyone, but cases of collision, of a train or part of it leaving the rails, and of any other sort of accident which may be specified by an order of the Board. We hope that the penalties will be found sufficient, and that the Board will be rigorous in enforcing them. The Board, when an accident is reported, is also to have power to order an inquiry by an inspector, and a more formal investigation, if necessary, to be conducted by a stipendary magistrate. A more doubtful part of the Bill provides for the return of certain statistics by the companies. The particulars required are nearly all furnished in those accounts which railways are already bound to produce, and we think it decidedly injudicious to double figures. If different returns are made up they are likely to disagree in minute points, which will be very perplexing. A portion of the additional information required in the new forms in this Bill is very important—such as a statement of the number of each class of passengers, and of the train mileage performed by passenger and goods trains respectively. But instead of ordering new forms to be prepared, it would have been wiser to order the insertion of any additional particulars in the present accounts. From these the statistical department of the Board should be able to compile any figures it wants.

THE MERCHANT SHIPPING BILL.—A few lines in the Parliamentary report of this week contain the notification that on the motion of Mr Chichester Fortescue the order for the second reading of the Merchant Shipping Bill was discharged, and the Bill withdrawn. We must express the utmost regret at this announcement. Mr Fortescue added that he should introduce a short Bill containing the clauses relating to the protection of life and property at sea; but even if this short Bill should pass, the result would do very little to mitigate the scandal upon the Parliamentary mechanism of legislation which is implied in the successive failures to handle the comprehensive measure proposed by the Board of Trade. Considering the immense interests at stake in our shipping, and the necessity both for extensive amendments and for a consolidated measure, it is a great business loss to the country that the Government Bill cannot be put through—that there is hardly a hope of touching it, even if the Board of Trade could get a Session all to itself. The fate of this measure is certainly one of the strongest arguments for adopting Mr May's suggestion of "Grand Committees." In any case the revisal of the Bill is only fitted for specialists, and would secure the attendance of only a fraction of the whole House supposed to be in Committee. But in the absence of such Grand Committees we must confess to a feeling of some astonishment that the House of Commons has not forbearance enough to refer the Bill to a Select Committee, and then abide by the report of that Committee, suspending, if necessary, the standing order which requires the Bill to be considered in Committee of the whole House. The question is in this position—that *any* legislation recommended

by the department, and with which a Select Committee substantially agrees, would be better than none at all. But a defective code of laws is maintained, merely because there is no machinery of introducing amendments. To give the force of law to Government decrees, except in so far as they are formally censured by either House within a given number of weeks, would be an extreme innovation; but it will be necessary to consider extreme remedies if the present block continues.

Is a Toll a "Tax?"—The Court of Exchequer Chamber has just been engaged in considering this question in a suit by the Income Tax Commissioners against the Corporation of Brighton. The income tax authorities maintain that the surplus of a certain rate or duty levied by the Brighton Corporation on coals, coke, &c., landed at Shoreham for "keeping up the sea walls" is liable to income tax as an annual profit arising from a certain kind of property, and the Brighton Corporation maintain that the income tax cannot be levied on another tax. The case is of no small interest, as the Corporation of London and other bodies levy similar duties, and the intention of the income tax authorities to apply a decision in their favour in the present case is not concealed. We confess we are a little surprised both at the action of the income tax authorities, and at the decision of the Judges, which happens to be in their favour. It is clear enough that a coal duty is a tax as much as a rate, perhaps more surely falling on the consumer or whole community affected than a rate on property does; but because in some way it has some of the incidents of "property" its essential character is overlooked, and the income tax authorities are enabled to tax a tax. The net result will be that the local charges of Brighton will be increased for the benefit of the Imperial exchequer, and that towns which have been enabled to tax themselves in this particular form will be exposed to similar treatment. In London the various duties which the Corporation receives will be less effective than they are, and a resort to new taxation will become necessary so much the sooner. The grievance is a minor one in the case of London, as the inhabitants of the Metropolis have no control over the central municipality within it, and the loss which would be caused by the tax is small by comparison with other waste of the municipal revenues; but had London any proper municipal authority, a proposal by the Government to levy a charge on its coal and other duties would be treated as a pure absurdity.

The Census.—Summaries of the census of England, Scotland, and Ireland have now been published, and the most general facts as to the increase of population are as follows:—

	Population. 1861.	Population. 1871.	Increase.	Decrease.
England	20,066,224	22,704,108	2,637,884	...
Scotland	3,062,294	3,360,018	297,819	...
Ireland	5,764,543	5,402,759	...	361,908
			2,934,703	
			361,908	
The United Kingdom	28,927,485	31,465,480	2,537,995	

This is the largest absolute increase of any decade in the century, and if England alone is taken, the rate of increase is almost as great as it has ever been. It is well known that the birth-rate has risen during the last decade, according to the estimates of population made by the Registrar-General. We called attention to this increase some time ago, intimating a doubt whether it was not merely apparent, caused by an under estimate of population. But as the Registrar-General's estimates have been confirmed, the fact of the increasing birth-rate may be considered established. There is thus some probability of not only a larger increase of population during the next decade, but of a larger rate of increase, especially as the emigration from Ireland is checked.

Payment of Freight in Advance.—The Court of Exchequer Chamber, in the case of Byrnes v. Scoffier, has held the doctrine to be established that a payment of freight in advance will not be recovered back in the event of the freight not being earned through the ship being lost. The case was a very strong one for applying the opposite doctrine. The defendants had chartered a ship upon a charter-party, one of the conditions of which was that they were to have the option of sending the vessel from Calcutta to Port Louis, Mauritius, or Colombo, with a cargo of rice, at 1 rupee 12 annas per bag, and the master was to sign bills of lading at any current rate of freight, but not under chartered rates, "unless the difference was paid in "cash." Upon this contract the dispute arose. Freights were so low in Calcutta at the time that the chartered rate could not be obtained, and the master refused to sign the bills of lading without a fresh engagement from the defendants' agents that the difference would be paid in cash, and he also obtained a promise that it would be set off against the advances made by the defendants. The ship was lost: but when the present action was brought for the difference, amounting to 737*l*, the defendants pleaded that the voyage had failed, that even if the freight had been prepaid it could, on the voyage failing, be recovered back, and of course if it had not been paid it could not be recovered. The Court however held distinctly the opposite view, that a payment in advance could not be recovered back, and that the circumstances were such that though the payment had not been made in the present case it was still recoverable. In giving the judgment, the Judges repeatedly expressed their regret that the law in this country on the point was opposed to the law of other maritime countries of Europe as well as America. It is perhaps less important however what the law is on such a point than that it should be clear; and the doctrine being firmly established, shipowners, charterers, and merchants will know in future how to frame their stipulations. The contingency of freight not being earned where it has been paid in advance is one which in almost any case ought to be specially provided for, and is in point of fact very often provided for in bills of lading.

Bills of Sale.—The Court of Exchequer has decided that the registration of a bill of sale signed not by the true Christian name of the grantor, but in another Christian name which he said he had adopted for some years is sufficient—if the deed itself was good. The Act only required the residence and description of the grantor to be truly stated, and said nothing about the name. But if a man assumes a name and is known by it, the persons with whom he deals not knowing his real name, why should there have been such a question as that raised in the present case? The documents which such a person signs with his assumed name ought clearly to be as binding on him as if he had signed his real name, and the only question which should arise upon deeds which affect the rights of third parties would be as to their knowledge of the assumed name. If they did know of it, they should be equally bound.

Liability as Contributories.—The Lords Justices of Appeal in Chancery recently affirmed the judgment of Vice-Chancellor Stuart in the case of McEwen v. The West London Wharves and Wharehouses Company, holding the appellant to be liable as a contributory where, although he had sold shares which had been allotted to him, and the company had virtually accepted the transferee, yet the transfer had not been properly completed according to the constitution of the company. The facts were that the company was formed in 1865; the appellant sold his scrip certificates and handed them to the Contract Company; subsequently calls were made, which were not even notified to him; but in June, 1867, the company went into liquidation, and the liquidator made him a contributory, no transfer of the shares having been executed as the Act of Parliament required. Their Lordships held that the issue of the certificates to bearer was *ultra vires*, or at any rate only bound the company to register the bearer if required to do so. The point is of interest to applicants for shares in new companies, who naturally sell their allotment certificates as if that were sufficient. The case shows the insecurity of the proceeding, purchasers in the market being able to buy the certificates, and then get themselves registered or not according to the event, the unfortunate applicant all the while remaining liable as if he had not sold at all. This is another of the many cases which show how careful shareholders who sell should be in inquiring into the completeness of the transaction. The system of share certificates to bearer will not wholly amend the difficulty, as it is only practicable in regard to fully-paid shares, where of course if the shares are not to bearer it would always be the buyer's interest to have the registry in his own name.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and June 17, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	Total Exchequer Receipts To June 17, 1871.		Same time last year.	
	£	£	£	£	£
Balance on 1st April, 1871—					
Bank of England	...	5,678,915		7,633,761	
Bank of Ireland	...	1,344,520		972,887	
			7,023,435		8,606,648
REVENUE.					
Customs	20,100,000	4,146,000		4,457,000	
Excise	22,420,000	4,969,000		4,904,000	
Stamps	8,750,000	2,082,000		2,026,000	
Taxes	2,330,000	263,000		681,000	
Income Tax	8,820,000	799,000		881,000	
Post Office	4,670,000	800,000		870,000	
Telegraph Service	750,000	...		100,000	
Crown Lands	375,000	55,000		...	
Miscellaneous	4,100,000	1,610,564		716,444	
Revenue	72,315,000		14,724,564		14,585,444
OTHER RECEIPTS.					
Advances, under various Acts, repaid		472,929		610,907	
Money raised for fortifications		...		...	
Money raised by Exchequer Bonds		...		...

Advances under various Acts		355,482		252,999	
Expenses of fortifications		...		...	
Exchequer Bonds and Bills, &c., paid off		80,900		25,500	
Surplus Income, to reduce Debt		737,509		63,746	
			1,173,891		342,245
Balances on June 17th, 1871—					
Bank of England		4,853,781		8,744,976	
Bank of Ireland		1,083,804		1,123,186	
			5,937,585		9,868,162
Totals			22,220,928		23,802,999

The following are the Receipts on account of Revenue during the week ending June 17 :—

	Receipts of Week Ending June 17.
	£
Customs	604,000
Excise	789,000
Stamps	201,000
Taxes	12,000
Income tax	25,000
Post Office	650,000
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	1,000
Total	2,282,000

The total receipts of the previous week were 1,212,000*l.*

The Exchequer issues of the week on account of expenditure were 1,871,206*l*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	5,750
Supply services	1,865,456
Telegraph services	nil.
	1,871,206

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on June 10	4,523,837	1,068,654	5,592,491
— June 17	4,853,781	1,083,804	5,937,585
Increase	329,944	15,150	345,094

The other receipts to date were 500*l*, the other payments were 66,200*l*.

SAVINGS' BANKS RETURN.

THE following Return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Saturday, June 10, 1871 :—

	Total Amount received by the Commissioners.			Total Amount paid by the Commissioners.		
SAVINGS' BANKS :—	£	s	d	£	s	d
In money and interest credited	33,534	1	7	112,947	0	4
To transfer certificates from Post Office Savings' Banks to Savings' Banks	168	2	2	...		
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...			1,852	3	11
Total	33,702	3	9	114,799	4	3
POST OFFICE SAVINGS' BANKS :—						
In money and interest credited	171,621	4	3	...		
To transfer certificates from Savings' Banks to Post Office Savings' Banks	1,852	3	11	...		
By transfer certificates from Post Office Savings' Banks to Savings' Banks	...			168	2	2
Total	173,476	8	2	168	2	2

	£	s	d
Total amount on June 11, 1871, at the credit of—			
The fund for the Banks for Savings	37,623,741	17	2
The Post Office Savings' Banks fund	15,978,631	14	10
Total	53,602,373	12	0
Ditto—by last monthly account	53,510,162	6	6

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, June 22.

The Government presented to the National Assembly a Bill for raising a loan of 2,500,000,000f (100,000,000*l*), and M. Pouyer-Quertier, Minister of Finance, in an elaborate report demonstrated that the sum was necessary. But a committee of the Assembly, after an examination of the state of affairs, required a reduction of 500,000,000f, and M. Pouyer-Quertier consented. In our country a Chancellor of the Exchequer, who, in a most important operation, and at a most critical moment, should make a mistake to the extent of twenty millions sterling, would be promptly relegated to private life; but "they manage things better in France," and M. Pouyer-Quertier is still Minister.

M. Thiers, the superior in the Government of the Norman manufacturer, is even a more surprising financial genius than he. This old man, who could find no other means of solving a political difficulty than in bombardment and massacre, has seen the wonders that the application of *true* financial and commercial principles have accomplished in England, and in those countries which, more or less completely, have imitated her—among them France herself (in commerce, though not in finance)—this old man has "learned nothing and forgotten nothing," and he proposes to provide for the burdens that will weigh on France by a return purely and simply to what existed previous to 1830—the taxation of industry, and the exemption from taxes of wealth. He proposes this, though since 1830 the working men of Paris, by repeated insurrections and revolutions, and only last month in a still more significant manner—by fire, have manifested a marked repugnance to such a system, seeing that they suffer from it. In England M. Thiers would have been judged and condemned years ago; in France he still passes for a statesman.

In the Commune days Parisians used to laugh at the Versailles Assembly as "rural;" and in truth it is composed chiefly of men of the country interest. To say that it possesses anything approaching political capacity would be gross flattery; but the majority of its members, like the peasants they represent, know very well that the treaties of commerce, and the commercial reforms of the Empire, have enabled them to sell for export or for towns their wines, their pigs, their eggs, their vegetables, and their oxen, at prices which their fathers did not dare even to dream of. Yet these Rurals stand by M. Pouyer-Quertier and M. Thiers, though proposing to cut off their markets, and to impose taxes which, at their expense, will enrich cotton-spinners and *bourgeoisie*.

Under the Commune firemen endeavoured, we are told, to extinguish conflagrations by pumping petroleum. In seeing these French Ministers and this French Parliament devise a financial system of which the inevitable consequence will be

to lessen production and trade, and consequently work and profits, and thereby will aggravate the political and social discontent that has prevailed for years, and has produced all we have witnessed—may we not ask if they are not doing the very same thing as the firemen of the Commune? The next insurrection and the next burning of Paris will answer; and we shall, according to present appearances, not have very long to wait for them.

This said, let us turn to the speech which M. Thiers delivered in the Assembly, in support of the Bill of the new loan of 2,500,000,000f *minus* 500,000,000f. The oration was of terrible length—three hours; but though encumbered with the digressions, the repetitions, and the twaddle that are inevitable in old age, was a very clear and (assuming the figures presented to be true) a very exact exposition of the financial situation of the moment. Taking only the really essential figures, we find that the year 1870 left a deficit of 649,000,000f, and that the first part of 1871 will present one of 987,000,000f —total, 1,636,000,000f (65,440,000*l*.). In consequence, 1,320,000,000f are due to the Bank of France, and 306,000,000f are *en découvert* (unprovided for) in the floating debt. These two items, oddly enough, make precisely the same as the preceding sum. The amount due to the Bank is likely to be increased 200,000,000f, that establishment having undertaken to advance that sum if required. Then there are 2,000,000,000f (80,000,000*l*.) shortly due to Germany as part of her indemnity; an undefined sum for the maintenance of her troops; a further one for the sufferers from the war and from the bombardment of Paris; and others for repairing the fortifications and constructing fortresses on the frontier. M. Thiers did not venture any estimate of the total of these undefined expenses; but even without them the amount due is really startling. Passing to the question of resources, the Minister said that from the war indemnity due 125,000,000f have to be deducted for payments already made, and 325,000,000f for the Eastern Railway; and there are besides the 200,000,000f from the Bank—total, 650,000,000f. With that sum, and with the proceeds of the loan, it will be possible to provide for the *first part* of the indemnity, and for expenses *immediately* exigible. As regards the Budget, he calculated that in counting the charges the new loan will necessitate, and those of 1870 Paris and London loans, also those of the Bank for its assistance, and some others, it will be increased by 356,000,000f; and to that sum he proposed to add 200,000,000f for sinking fund (*amortissement*). On the other hand there will be a reduction of (say) 120,000,000f for economies effected, and new taxes may be made to yield 420,000,000f. This will put the Budget at 2,450,000,000f (98,000,000*l*.), a figure which the Empire was fast approaching. The sum is large, but as France is industrious and courageous, said M. Thiers, she will bear it; and though the providing of it may diminish her comfort, it will not injure her real power.

In the course of his long and discursive speech M. Thiers treated of a multitude of matters into which it is not possible, from want of space, to follow him. But here are a few:—Speaking of the floating debt he stated that at this moment the total of it is not more than 650,000,000f, the lowest figure seen for thirty years. Speaking of the Bank he said that it is in spite of the delays accorded for the payment of commercial bills, getting bills paid every day; and that its metallic reserve is now, notwithstanding all that has passed, 3,200,000,000f (128,000,000*l*.). He said that the loan contracted in England had been obtained on most onerous terms, but "I must honestly confess that I think better could not be had." With respect to the new loan of two *milliards*, he announced that it is to be in 5 per cent. stock, and said "that in adopting that stock we do not increase the nominal capital as we should do if we had taken 3, and we only leave a margin of improvement to the lender of 18, supposing it to be issued at 82, whereas in 3 we should have had to leave him 40 or 50." The 5 per cent., he added, presents the further advantage of permitting reductions of interest to be made easily, and if France conducted herself prudently he promised that she might count on them. He did not say at what price the loan would be issued, but his mention of the figure 82 was an indication, and he intimated that the first deposit would be 15 per cent. With respect to the new taxes, he did not go into detail about them, but took occasion to proclaim himself a Protectionist, and to say that Protection would be re-established. These were his words:—"I will not discuss the new taxes, but capitalists must be told that without injuring the prosperity of France, and without checking the development of production, we could not have found any others that produce so much. What does public opinion say about them? Certainly those who are touched by them complain, but by the mass I believe that in the situation in which we are the new taxes are regarded, I will not say joyfully, but as presenting nothing alarming for the prosperity of the country and the development of production. Among them there is only one that I hear seriously complained of. All are contested, but by minorities. But the one I speak of is opposed, I will not say by a majority, but by a very strong minority: it is that on raw materials, and on the least part of raw materials—those of textile industries. Well, gentlemen, you know I am an old Protectionist, and with me an old opinion never changes." This declaration drew forth expressions of regret from some members of the Chamber. M. Thiers went on to say:—"The commercial system we shall propose to you—and I say this for all our neighbours—will not be the re-establishment of prohibitions, but only the remodelling of some tariffs which experience has demonstrated to be insufficient. And this commercial system will permit us to say to all industries—'Support quietly your share of the common suffering, and make sacrifices, for the commercial system we are proposing will give you the means of repairing the losses you have sustained.'"

If by industries M. Thiers means manufactures, and of course he does, there is no doubt they will profit sufficiently by the promised remodelling of tariffs to bear patiently any additional taxes they may have to pay; but workmen will suffer in having less employment, and the community at large will have more to pay for their purchases. At the same time foreign countries, by having their goods shut out from the French market, cannot buy so much from France as they used to do, and that will diminish work and profits in the *specialités* in which she excels. And whilst thus striking at the interests of the industrious classes, which it is the object of all other countries to protect, M. Thiers abstains from putting one farthing of direct tax on acquired wealth.

This policy is so unjust in itself, and so dangerous in such a country as France, that one is lost in astonishment in seeing it adopted.

M. Germain, the banker, who spoke in the Assembly after M. Thiers, boldly condemned this policy. "I do not fear to say," he declared, "that many capitalists entertain the conviction that you are asking too much from raw materials, and that you are wrong not to establish an income tax. I say that your system would have produced greater effect if it had been headed by an income tax." He was interrupted by violent clamour; but he went on to speak of the said tax in England, and to say that the adoption of it would have given confidence to foreign capitalists. "It is necessary," he said, "not only for the resources it will procure, but because it will give the possessing classes, who legitimately direct society, the right of demanding sacrifices from others since they make them also." And he spoke of Peel, and declared "that the best means of comforting the savage and barbarous doctrine of socialism was to make reforms." M. Thiers replied angrily—"You say that lenders wish us to think of that tax. I tell you that if anything can give confidence to the public in Europe, it is that we can do without that deplorable impost.....I do not fear to tell the French people that they are deceived when they are told that it presents a resource. No, there is no resource in it, and it is a fatal delusion to make the people believe that they must impoverish the rich to be rich themselves. When they impoverish the rich they diminish their own resources, for they have no others!" At this the Chamber applauded. Then he described the tax as odious, and asked what would happen if the levying of it were confided to Municipal Councils. He concluded by saying—"I consider this tax so dangerous that I will never consent to accept it.....I would sooner leave the Government than submit to it." Here there was more applause. From this people in England will be able to judge both M. Thiers and the Chamber.

Up to this moment the law on the new loan has not been promulgated, and the conditions of it are not made known. The publication of these conditions cannot however be long delayed. On the Bourse to-day, it was said that the price would be 82f or 82f 50c, and that after the first deposit of 15 per cent., mentioned by M. Thiers, the balance would be required in 17 equal terms, payable monthly. The loan has been worked up to a premium of about 1 per cent. That it will succeed, that it will be completely subscribed is not doubted; the Government will take care of that. It has indeed, *entre nous*, already got promises of subscription to a large amount from foreign bankers. But the system of taxation proposed by M. Thiers is so objectionable, and likely to produce so much trouble, that a great many persons feel repugnance to investing permanently in it, notwithstanding the high rate of interest it bears.

The Bourse has been occupied during the past week almost entirely with the loan. The following are the quotations:—

The Prefecture of the Seine (Paris) peremptorily demands the payment before 15th July of the calls due on the 1869 loan, the last term of which fell in November; but it says nothing of paying the interest due on bonds. It should remember that it has failed in its engagements.

The coupon of the Ottoman loan of 1860, which fell due on 1st January last, is being paid since the 19th by the Credit Industriel.

The Western Railway Company is to pay from 1st and 6th July the coupons of interest falling due on 3 per cent. obligations, and on those of the old Dieppe, St Germain, Versailles, Rouen, Havre, and Western Companies.

The Lyons and Mediterranean Company announces that from 1st July it will pay the interest on obligations falling due on that date; and will do so, as before the war, in certain of its stations, as well as at Paris, Lyons, and Marseilles.

The Parisian Gas Company makes known that the balance of dividend due 6th April, but of which the payment was delayed, can be received from the 20th. It is 28f per share. At the same time the final call of 100f on the obligations of 1868 is required to be paid. As to the half-year's interest on obligations due 30th June, 12f 50c, it will be paid from 1st July.

The Engine-building Company of Fives-Lille will pay from 1st July 12f as interest on obligations.

The Austrian Railways Company announce from 1st July the payment, through the Credit Mobilier, of 40f—35f for balance of dividend of 1870, 5f as an advance on the interest of 1871. This company is about to issue 150,000 new shares of 500f, of which 100,000 to shareholders, and 50,000 to go to the founders in part payment of the privileges they reserved themselves.

The annual meeting of the Comptoir d'Escompte is fixed for the 14th July.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Right Honourable the Lords of the Committee of Privy Council for trade have received, from the Secretary of State for Foreign Affairs, a copy of a decree of the Italian Government, published in the official *Gazette* of the 10th instant, by which such exemptions from duty as have hitherto been confined to exportations from Italy by land, are extended to similar exportations by sea.

The Secretary of the Treasury has published his usual monthly statement of the public debt of the United States, showing its amount on the 1st of June to have been the following:—

	dols. c
Debt bearing interest in gold	1,894,128,750 0
Debt bearing interest in paper	49,123,000 0
Debt on which interest has ceased	1,999,002 26
Debt without interest	413,816,965 70
Total debt	2,359,067,717 96
Interest due and unpaid	38,672,430 67
Total debt, principal and interest	2,397,740,148 63
	dols. c
Money in Treasury—Coin	89,744,375 66
Currency	8,861,188 16
	98,605,563 82
Total debt, less money in Treasury, June 1	2,299,134,184 81
Similar total, May 1	2,303,573,543 14

The debt was decreased during May 4,439,358 dols 33c. Since March 1, 1871, the decrease has been 21,574,662 11c; and since March 1, 1869, the beginning of President Grant's administration, the decrease has been 204,751,413 dols 69c, or very nearly 9 per cent. of the entire debt in a period of twenty-six months. The rate of monthly decrease has fallen off somewhat of late, owing to reductions in taxation, but there is still an ample surplus to devote to this object. During June the Secretary of the Treasury will continue his policy of debt reduction by selling gold and buying bonds with the proceeds, and his published programme embraces sales of 7,000,000 dols gold, and purchases of 4,000,000 dols bonds during the month. The new Five per Cent. Funding loan does not yet enter as an element of the monthly debt statement. The subscriptions at the present time are about 65,000,000 dols, and they continue at the rate of from 50,000 dols to 200,000 dols a day, almost exclusively made by the national banks. Of these banks a return was required on April 29, and was received from 1,704—all but two of the entire number in existence. They held at that time in the aggregate 391½ millions of United States bonds, had 778½ millions of loans, 22½ millions of specie, and 253½ millions of legal tenders, and other national currency. Their capital was 446 millions, undivided profits 142 millions, deposits 620 millions, and circulation 307½ millions.

The *Review* for this month has an article on the market value of the shares of existing insurance companies. We extract a statement which shows at one glance the very remarkable increase in the value of the shares of the companies enumerated, among which the Standard Life Office stands very conspicuous. The average increase is upwards of 1,200 per cent., and we cannot but think that in the present dearth of employment for money—and indeed under any circumstances—there is an excellent opening for new concerns to come forward, more especially if any well considered improvement in the plan of carrying out the real intentions of life assurance, that is by affording unquestionable security to policy-holders, can be devised. We leave the figures to speak for themselves:—

Name of Company.	Year Founded.	Amount Paid up on each Share Originally. £ s d	Present Market Value. £ s d	Increase in Value.
Rock	1806	0 10 0	8 5 0	1,550
Provident Life	1806	10 0 0	35 0 0	250
Law Life	1823	10 0 0	100 0 0	900

Advices from Brazil state that the annual report of the Minister of Finance had just been issued, showing that the income and expenditure of the year were nearly balanced, while for 1872-3 the estimate of revenue was 9,337,000*l*, and of expenditure 8,634,103*l*, presenting a surplus of 702,896*l*. The total debt of the Empire is now about 67,800,000*l* (equal to seven years of ordinary income), of which 16,180,300*l* is foreign. The floating debt in Treasury bills has been reduced to 3,832,600*l*, and, according to the *Anglo-Brazilian Times*, "its reduction is being rapidly proceeded with, for which purpose the greater part of the late 3,000,000*l* loan is still available." The Government measure for the gradual abolition of slavery has been introduced, and was thought likely to be much contested, and ultimately to be passed with amendments.

The regular estimate for the financial year 1870-71, now completed, shows that the gross revenues of India in that year amounted to 51,017,396*l*. The allowances, refunds, and drawbacks reduce the amount to 50,678,796*l*. Deducting from this the charges of collection, cost of salt and opium, and other payments in realisation of the revenue, and the allowances and assignments under treaties and engagements, the net public income of India is reduced to 41,731,196*l*. The expenditure, excluding public works extraordinary, leaves a surplus of 1,083,561*l*; but the cost of public works extraordinary turn this into a deficit of 63,182*l*. The guaranteed interest on the capital of railway and other companies forms an item of the expenditure amounting to 1,859,413*l*, viz., 4,390,113*l*, less 2,530,700*l* for net traffic receipts. The charge for the army is 16,209,077*l*. The charges for interest of the debt are 3,551,486*l* for interest on India debt, 1,659,868*l* on home debt, and 629,970*l* dividends to proprietors of East India stock.

The sixty-third annual poor-rate return which has been issued shows that in the year ended at Lady Day, 1870, the amount of the levy for poor-rate in England and Wales was no less than 11,573,608*l*. Deducting county-rate, police-rate, and other charges, which, though not for relief of the poor, are levied as part of the poor-rate, we find the amount expended in the year on relief and attendant expenses 7,644,307*l*, being 6s 11½d per head on the estimated population of the Kingdom. The best thing that can be said of the great expenditure on poor relief is that it is 28,793*l* less than in the preceding year—a decrease of 0·4 per cent., or 1¼d per head. There was an increase in several quarters, especially in the Metropolis, in Middlesex, in the North Riding of Yorkshire, in Durham, and in South Wales; but in most parts of the King-

lom there was a decrease. The expenditure on medical relief was 282,538*l*. The balance of loans effected shows a liability amounting to 1,746,785*l* at the close of the year. The average price of wheat was as low as 46s 2½d, or 11s 6d less than in the preceding year. The gross estimated rental of the property assessed to the rate was 118,431,102*l*, according to the return for 1867-68; the rateable value 100,668,608*l*.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

An Account pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending in Wednesday, the 21st day of June, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued...	40,652,740	Government debt.....	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	25,652,740
		Silver bullion	...
	40,652,740		40,652,740

BANKING DEPARTMENT.

	£		£
Proprietors' capital ..	14,553,000	Government securities	12,980,490
Rest	3,119,246	Other securities	16,816,887
Public deposits, including Exchequer, Savings' Banks, Commissioners of National Debt and dividend accounts...	10,246,047	Notes	17,106,210
Other deposits	10,257,287	Gold and silver coin...	755,537
Seven-day and other bills	500,944		
	47,668,124		47,668,124

GEO. FORBES, Chief Cashier.

Dated the 22nd June, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation, including bank post bills	24,047,474	Securities	30,253,377
Public deposits	10,246,047	Coin and bullion	26,408,277
Private deposits	10,257,287		
	56,661,654		56,661,654

The Balance of Assets over Liabilities being 3,119,246*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit :—

	Increase.	Decrease.
	£	£
Circulation	.....	175,241
Public deposits	56,453	...
Other deposits	945,171	...
Government securities	13,277	...
Other securities	298,770	...
Reserve	468,923	...
Notes	6,111	...
Bullion	474,764	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

Week ending June 21, 1871.	Week ending June 14, 1871.	Week ending June 22, 1870.
£	£	£
Tuesday	[illegible]	14,[illegible]
Wednesday	[illegible]	[illegible]
Thursday	[illegible]	[illegible]
Friday	[illegible]	[illegible]
Saturday	[illegible]	14,[illegible]
Monday	[illegible]	9,[illegible]
Total	[illegible]	74,[illegible]

Bankers' Clearing-house, June 22nd, 1871.

JOHN O. PARKES, Deputy Inspector.

The total since the 4th of January, 1871, is 2,022,228,000*l*, compared with 1,843,440,000*l* for the corresponding period last year, showing an increase of 185,789,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week	June 26, 1861.	June 24, 1868.	June 23, 1869.	June 22, 1870.	June 21, 1871.
Circulation, including bank post bills.....	£ 19,785,212	£ 24,153,581	£ 25,128,896	£ 22,936,032	£ 24,047,474

Clearing-house return...	...	58,018,000	61,017,000	74,755,000	101,304,000

In 1861, money was tending to be cheaper, notwithstanding the drain of gold to America. Business was still restricted the exports being greatly diminished, apprehensions being felt as to the effect of the American contest, and the internal trade of the country being bad. Our rates for money were also higher than the continental rates. Baron Ricasoli had just become Premier of Italy, in consequence of the death of Cavour.

In 1868, the 2 per cent. period continued. Baron Beust had just made a serious defence of Austrian repudiation, the gist of which was that his Government was not responsible as the Chamber had done it.

In 1869, the Bank rate was reduced from 4 to 3½ per cent., the recent rise having done its work. The House of Lords had just read the Irish Church Bill a second time.

In 1870, the tendency in the money market was downwards, owing to the continued flow of gold into the Banks of England and France. A new Honduras loan had just been introduced. The Government Education Bill was passing through the House of Commons very slowly on account of the religious difficulty. In foreign affairs the difficulty which was apprehended between France and Prussia, on account of the Prussian subvention to the St Gothard Railway, had been smoothed over.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,668,770*l*; in 1868, an excess of 1,370,835*l*; in 1869, an excess of 507,942*l*; and in 1870, a deficiency of 2,899,456*l*. In 1871, there is an excess of 2,440,400*l*.

Discount and Money Market.—There is no particular change to notice from last week. The rates for money in the open market have continued substantially the same as they were made after the reduction of the Bank rate, the minimum rate for the best short paper being 2½, and the demand has continued much the same. The demand at the Bank has also been moderate, and the unprecedented accumulation of bullion has increased. The change in the rate as yet has only brought an addition of 200,000*l* to its discounts. To-day there has been a slightly improved demand at the Bank, and there is also rather more stiffness in the open market as respects long-dated paper—the change being partly ascribed to apprehensions of the effect of the French loan, and partly to the usual preparations made towards the close of the half-year by joint stock banks and others, who wish to exhibit a good balance. For the moment there is rather more pressure, but whether it will continue beyond the 30th, will of course depend exclusively upon the former cause alone.

As regards this point there is a good deal of speculation, and there is a strong disposition in some quarters to believe that the loan and the payment to Germany will have but a moderate effect. The unprecedented accumulation which has been continued so long after the conclusion of peace, when the loan seemed to be impending, will undoubtedly contribute to mitigate the effect of the operation as compared with what would else have been felt. The latest telegrams from Paris also state that the payment of the loan will be by numerous instalments, which will moderate the effect on the money market.

while it is also urged that the actual borrowings and payments by France to Germany during the last three months have been on a considerable scale, and yet they have been hardly felt in the money market at all. Besides the Paris indemnity of 8,000,000*l*, the payments for the subsistence of the German troops (2,000,000*l* a month) will have been 8,000,000*l* to 10,000,000*l* more by the end of this month, and M. Thiers tells us that he has paid off the first quarter-milliard of the national indemnity—another 5,000,000*l*. These sums altogether are from 21,000,000*l* to 23,000,000*l*, yet the money market has hardly known of them excepting a slight effect produced by the Paris indemnity. For all these reasons it is maintained that the effect of the impending operation will be very small. We must point out, however, that except as regards the accumulation of money, which will have some effect, these arguments are not very sound. As regards the instalments of the loan, the important point is that whenever they are made payable, Germany is likely to receive very soon—before the end of the present year—the remainder of her first 60,000,000*l*. The French Government counts upon receiving enough of the loan in that time, or if not, upon receiving advances on the instalments to come due. The effect on the money market will be nearly the same as if the money were subscribed and paid, unless, which is barely possible, the German Government should prefer to *hold* the drafts in which it may be paid. The actual payments of the last three months appear also to be unfelt, because made in French banknotes, and used by the army of occupation in France; or if made in drafts, then in drafts at long date which have not yet become due. These latter circumstances, however, are not in favour of the future ease of the money market. It is the interest of Germany, as well as of France, to keep the money market easy till the loan is out; but afterwards the drafts will be falling due, and the actual transference of money to Berlin will take place. The German Government will give as much time as they can, but they must be a little anxious to replenish the State reserve. The better opinion must still be that the loan operation, coupled with all the other demands for capital on French account, and the new foreign commitments impending, will enhance the value of money, though probably to a much less extent than if the loan had been brought out without any Paris insurrection. In ordinary circumstances indeed there would have been a sharp rise in the rate in consequence of the loan operation, but with the present accumulation of money the movement will be less marked.

The principal changes in the Bank account for the week are an increase of 56,000*l* in public deposits, and 910,000*l* in private deposits; and the private securities have increased 296,000*l*. The stock of bullion is also 483,000*l* more than last week. The reserve is now 17,861,000*l*, against 30,000,000*l* of liabilities.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 and 3 months	2½	per cent.
Do 4 months	2⅝	per cent.
Do 6 —	2¾	per cent.
Trade bills—2 and 3 months	2¾	per cent.
Do 4 months	2¾ 3	per cent.
Do 6 —	3 3¼	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call	1½ per cent.
Discount houses at call	1½ per cent.
Do with seven days' notice	1½ per cent.
Do fourteen days'	1½ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	2½	6*	2¼	...
Vienna	5	5	5	5
Berlin	3½	4	3	3¼ ½
Frankfort	...	3½	2⅝	3¼
Amsterdam	3	3	3¼	3¼

Brussels	2½	4	2½	3¼
Madrid	5	5	5	5
Hamburg	...	...	2¾	3¼
St Petersburg	6	8	6	6

* Nominal.

THE STOCK MARKETS.—The tendency this week, as in the early part of last week, has been downward in almost all departments, and though there is some firmness in the foreign market, and in the English railways to-day, there has been no rally from the depression of the early part of the week. Operators and the public are both in suspense until the introduction of the French loan, while the unfavourable weather has had a specially prejudicial effect on English railways. In these circumstances, and with the settlement occuring next week, the money out on the Stock Exchange belonging to the joint stock banks being also called in preparatory to the close of the half-year, there is very little business doing, and prices are weak. The realisations by large holders of foreign securities are likewise gradually in progress, so that any material improvement is prevented. Several new undertakings, chiefly mining ventures, have been brought before the public this week, but call for no special notice. Attention has been principally concentrated on the coming French loan, in which, before the issue of the prospectus, there have been various dealings; but operators, on the whole, have held off, pending the receipt of information as to the terms of issue.

ENGLISH GOVERNMENT SECURITIES.—This market has been fully affected by the weakening influences of the week, and there has been a fall of ⅜ in Consols for the week, the closing prices of to-day and last Friday marking the extremes of the fluctuations. In addition to other causes of depression, the long continuance of the rains, which were at first welcomed, excites alarm about the harvest, and is taken advantage of by bear operators. Now that the French loan is seen to be imminent, there is also some disposition to await the effect.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	92	92¼	92	92¼	par to 5s pm
Monday	92	92¼	92	92¼	par to 5s pm
Tuesday	91¾	92¼	91¾	92¼	par to 5s pm
Wednesday	91¾	92¼	91¾	92¼	par to 5s pm
Thursday	91¾	92	91¾	92	par to 5s pm
Friday	91¾	92	91¾	92	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	92¼ ¼	91¾ ⅜ xd	— ⅜
Ditto (July) account	92¼ ¼	91¾ ⅜ xd	— ⅜
Reduced 3 %	92¼ ¼	91¾ ⅜ xd	— ⅜
New 3 %	92¼ ¼	91¾ ⅜ xd	— ⅜
Bank Stock, last dividend 4½ %	235 7	235 7	... ...
India Stock, 10½ %, red. at 200 Apl. 30, 1874	shut	shut	... ...
Ditto 5 %, red. at par, July 5, 1880	109¾ 10	109¾ 10	... ...

EXCHEQUER BILLS.—Par to 5s prem.

COLONIAL GOVERNMENT SECURITIES.—The following shows the changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	108¾ 9	108 9	... ...
Ditto 5 %	101 2	101½ 2½	+ ¼
New Zealand 5 % Consolidated Bonds	98½ 9½	98½ 9½	... ...
New South Wales 5 % Bonds, 1888 to 1896	102 3	103 4	+ 1
Nova Scotia 6 % Bonds, 1875	101 5	104¼ 5½	+ ¼
Queensland Government 6 % Bonds, 1884-5	111 12	110½ 11½	— ¼
Victoria 6 %	110½ 11½	110½ 11½	... ...
Ditto New 5 %	105 6	105 6	... ...

FOREIGN GOVERNMENT SECURITIES.—The predominant influence in this department, as we have already stated, has been the disposition of large holders to realise, so as to be ready for taking part in the new loan. Turkish, Egyptian, Italian, Spanish, and similar securities, have therefore been weaker. There is no material change of price to notice. Comparatively little business has been done during the week, and this absence of business is very observable to-day.

The market has been occupied with the new French loan, which is now announced for issue next week, but the statements regarding it are rather vague and conflicting. It is now certain that the amount will be 80,000,000*l*, that it will be a 5 per cent. loan, and that the price of issue will be about 82, in reality 80, making allowance for the discounts on instalments, and interest during subscription. But the exact terms and dates of payment of the instalments are not specified. No little curiosity is felt about some points. M. Thiers has stated that the loan will be closed as soon as the amount advertised for is subscribed; but as the loan, it is understood, will be issued simultaneously in Paris, London, and other cities, some doubt is felt as to whether a portion will be reserved for each place of subscription, or how the loan will be closed in justice to the subscribers in different localities. The doubts however are only in details. The disposition to believe that the loan will be taken is much greater than it was a week ago, more confidence being felt in the establishment of some sort of settled order in France,

and the peaceful setting-up of a Monarchy at an early date. It is also understood that offers have been made by a syndicate of bankers in Paris, London, and Germany, to take up 40,000,000*l* at a fixed price, but the offers are still under consideration. The dealings during the week have been at ⅝ 1¼ pm., corresponding to quotations from Paris. French Rentes and the National Defence loan have also been firm, the latter closing at 95¼, ⅜.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.

The dealings in the other new loans have been restricted this week, and the prices are lower. Costa Rica at 2 to 2½ pm. shows a fall of ¼ for the week, and Spanish National Lands certificates at ¼ dis to par, show a fall of ⅜.

English Railways.—The dulness in this department is general, being greatly aggravated by the weather, and the temporary falling off in the rate of increase in the traffic on most lines. Coupled with the other causes of depression, and the great rise of railways in the spring, the present state of the traffics is certainly such as to justify a little apprehensiveness among speculators, though investors need have little doubt about a progressive improvement, which will benefit them sooner or later. To-day prices have been better supported than they were early in the week, but there has been little business.

It is stated that the Midland Company, in the absence of any agreement with the Great Northern, has resolved to take its own course, and will charge at the rate of ½d per ton per mile for the conveyance of coal to London. We hope that this means the early stoppage of the present insane competition. It would certainly pay either of the companies concerned better to submit to a loss of traffic rather than convey it at terms, which must involve a serious loss to all.

Metropolitan have been rather better this week, owing to the contradiction of reports as to the conclusion of a working agreement with the District Line. It was at first supposed that the agreement was unfavourable to the Metropolitan, but it is a great matter to have averted the threatened competition.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending June 17 to 767,180*l*, being an increase of 46,260*l* on the corresponding week of 1870. The aggregate receipts of the half-year to date are now 16,647,125*l*, being an increase of 921,746*l* on the corresponding period of last year. The principal increases for the week are—Midland, 16,090*l*; North-Eastern, 7,740*l*; London and North-Western, 7,051*l*; and Lancashire and Yorkshire, 4,251*l*. In London and South-Western there is decrease of 3,345*l*. The following shows the increase or decrease in each case for the week and for the whole period :—

We subjoin in our "Notices and Reports" a notice of the prospectus of a second mortgage loan for the new Mexican Railway Company. The price quoted to-day is 2¾, 3¼ pm. Since the publication of the advertisement, a protest has been made by the Mexican Bondholders' Committee to the effect that the promise of a subvention of 50,000*l* by the Mexican Government to the new railway is a breach of that Government's engagement with its bondholders, by which all the revenues of the country are pledged. The Railway Company are understood to maintain that the promised subvention is no such breach, and that in any case the making of the railway will be favourable to the interest of the bondholders.

Some remark has been excited by the neglect of the Lombardo-Venetian Railway to hold a meeting in Paris, and circulate its accounts, as soon after the close of the insurrection as possible. But for the insurrection the meeting should have been held in April, and the dividends paid in May. The

insurrection of course covers the failure of the directors to hold the meeting and pay the dividends at the proper time; but the fact of delay having occurred should have made them anxious to get through the postponed business as soon as opportunity offered. The insurrection, however, has been over for nearly a month, and there is no announcement of the meeting, or of a dividend, or of the state of accounts. The delay is far greater than it ought to be, and the directors would do well to lose no more time.

It is announced that the sales of the property of the Atlantic and Great Western Railway Company, under the decrees of foreclosure, are advertised for the 18th, 22nd, and 26th of July, in New York, Pennsylvania, and Ohio, respectively.

Messrs McCalmont, Brothers, and Co., have received a telegram, announcing that the Philadelphia and Reading Railroad Company has declared a cash dividend of 5 per cent., payable in Philadelphia.

AMERICAN GOVERNMENT SECURITIES. — Advices from New York state that the subscriptions to the new Funding loan come in slowly, and principally on account of the national banks. There have been no transactions reported in this market, but the value of the old Government bonds has been well supported. Atlantic and Great Western bonds are 1¼, and Erie shares are ⅜ lower on the week; otherwise the changes, as shown below, are not important.

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.

JOINT STOCK BANKS.—There is no especial feature to notice in this department, the most important change being a decline of 2 in Bank of Australasia. Otherwise the fluctuations on the week are not important, but are such as to testify to a steady absorption of stock by the public. British North America have advanced 1; Anglo-Australian, Anglo-Egyptian, South Australian, and Oriental, ½; City, ¼. Alliance, and London Chartered of Australia are each ½ lower.

TELEGRAPHS.—Some considerable realisations have taken place in telegraph shares, but the tone of the market at the close to-night was not unfavourable. The leading changes for the week are—A rise of ½ in Anglo-American, ¼ in Cuba and Great Northern, and ⅛ in Submarine Scrip; British India Extension, China Submarine, and French Cables have declined ⅜; Falmouth and Gibraltar, and Marseilles, Algiers, &c., ¼; British Australia, and British Indian Submarine, ⅛. Silver's India Rubber Works are 1 better, but Hooper's have declined ½.

MINES.—Some important changes are apparent in the quotations for British mines, but these securities have only attracted an ordinary amount of attention. The chief alterations are—A nominal advance of 10 in Wheal Basset; a rise of 3 in Margaret, Uny Lelant; 2½ in Van; 1 in Wheal Grenville and Tin Croft; ½ in South Condurrow. On the other hand, there is a fall of 5 in West Seton; 4 in West Chiverton; 2½ in Wheal Seton; 1½ in Great Wheal Vor; ½ in East Caradon, East Lovell, and Great Laxey.

The list of applications for shares in the Ajax (Big Indian) Silver Mining Company will close on Tuesday next for London, and on Wednesday for the country.

The subscription list of the Mineral Hill Silver Mines Company (Limited), a notice of which we subjoin, will be closed on Monday, the 26th, for London, and Tuesday, the 27th inst., for the country.

MISCELLANEOUS. — The dealings in the miscellaneous market have been limited, and the tendency of values—more especially to-day—has been downwards. Hudson's Bay shares close at a reduction of 1½ on the week. Anglo-Austrian Bondholders' Certificates have given way ½; Ceylon, Ebbw Vale, and North Metropolitan Tramways, ¼; Credit Foncier, ⅛; Anglo-Mexican Mint, Berlin Waterworks, Fore Street Warehouse, and Trust and Agency of Australasia, have risen ¼; Rio City Improvements, ½, and Canada Company, 1.

It is announced that the business of Messrs Foster, Porter, and Co., of 47 Wood street, warehousemen, will from the 1st of July be carried on under the Companies' Acts of 1862 and 1867, as Foster, Porter, and Co., Limited, with a capital of 300,000*l*, of which two-thirds will be paid up. The shares in the company will not be offered to the general public, nearly the whole having been already taken by persons connected with the establishment. Mr J. P. Foster will be chairman of the company.

The prospectus has appeared of the Beechlands Coffee Estates Company (Limited), with a capital of 75,000*l*, in 10*l* shares, payable as follows:—2*l* on application, a similar sum on allotment, and the balance in two equal instalments of 3*l* each, falling due on September 15th and December 15th. The company is formed for the purpose of extending the cultivation of the Beechlands Coffee Estates in the district of Coory, in the East Indies, and of acquiring the Government grant and the buildings and plant upon the estate. The purchase-money is 25,000*l*; three-fourths in cash, and the balance in fully paid-up shares, upon which no dividend will be paid for any of the years 1871-5, unless a minimum dividend of 5 per cent. in each year is paid to the holders of the other shares of the first issue.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

GOLD.—Out of the recent arrivals about 240,000*l* has been purchased for export; the demand is, however, by no means active; and 514,000*l* has been sent into the Bank since the 15th instant. The Douro has brought 18,000*l* from the Brazils; the Pera has brought 404,290*l* from Australia; by various steamers, 224,000*l* from New York; and about 190,000*l* in ½ Imperials have also come to hand—total, 836,290*l*. The Poonah has taken 37,000*l* to Alexandria.

Silver has been in fair demand for the continent, and the price has been well maintained. We have received 181,000*l* in sycee from China, and about 72,000*l* by various steamers from New York.

Mexican Dollars.—The amounts to hand during the week have been comparatively small, the prices have consequently been maintained, and may be quoted at 58¾d for new, and 60d per oz for the old coinage.

Exchange on India for banks' drafts at 60 days' sight is 1s 10[3/16]d to 1s 11d per rupee. Tenders for 400,000*l* in bills on India were received yesterday at the Bank of England. The amounts allotted were—to Calcutta, 350,000*l*, and to Bombay, 50,000*l*. The minimum price was fixed as before, at 1s 10½d on all Presidencies. Tenders on Calcutta and Madras at 1s 10¾d per rupee will receive about 31 per cent., and on Bombay at that price in full.

India Government Loan Notes remain unchanged. The 4 per Cents. are 93¼; the 5 per Cents., 100¼ to 100½; and the 5½ per Cents., 107¾ to 108¼.

Quotations for Bullion.—Gold—Bar gold, 77s 8[3/4]d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0[3/8]d to 5s 0[7/16]d per oz std; ditto containing 5 grains gold, 5s 0[3/4]d to 5s 1d per oz std, last price; Mexican dollars, 4s 10[3/4]d to 5s per oz, last price.

The *Gazette* return shows that the imports of the precious metals into the United Kingdom during the week ended June 21, were—gold, 967,254*l*; silver, 343,998*l*. The exports were—gold, 89,814*l*; silver, 52,716*l*.

Bar gold to the amount of 54,000*l* was sent into the Bank to-day.

EXCHANGES.—The changes to-day show rather a better demand for bills upon the cities of Belgium and Holland, and on Paris.

The tenders for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were—to Calcutta, 350,000*l*; and to Bombay, 50,000*l*. The *minimum* price was fixed at 1s 10½d on all the Presidencies (an advance of 1 per cent.), and tenders on Calcutta and Madras at 1s 10¾d will receive about 31 per cent., and on Bombay, at that price, in full. These results show a further increase in the demand for means of remittance to the East.

NOTICES AND REPORTS.

STOCKS.

Argentine 6 per Cent. Loan.—Bonds representing 35,500*l* have been drawn for redemption at par on the 1st July.

San Domingo 6 per Cent. Loan, 1869.—Bonds representing 7,000*l* have been drawn for redemption at par on the 1st July.

RAILWAY COMPANIES.

Great Western.—Applications are being invited from the proprietors for £50,000 perpetual 5 per cent guaranteed Metropolitan stock at the price of 5 per cent premium. The instalments are payable in sums of 20 per cent. each, with 1 per cent. of the premium.

London, Brighton and South Coast.—The directors have determined to create 10,000 per cent debenture stock at par for the purpose of paying off a like amount of terminable debentures falling due. The said stock cannot carry a greater dividend per annum, and the terminable debt will then be reduced to £16,000 over London.

Madras.—The North-west line has been completed to Bellary and to Beypoor port, whereby the Great Eastern Peninsula line extends to Bombay. The total receipts for the half-year amounted to 227,500*l*, and the expenditure to 124,874*l*, leaving the net receipts 102,626*l*. The receipts for the corresponding half of 1870 amounted to 206,000*l*, the expenditure to 117,200*l*, and the net receipts to 88,800*l*, showing a decrease in the gross receipts of 44,000*l*, embracing 25,810 for passengers, and 18,190 for cotton, and in the net receipts of 13,800*l*. The capital account showed that 9,056,345*l* had been expended.

Mexican Railway, Limited.—Issue of 7 per Cent. Bonds.—Messrs. Bischoffsheim and Goldschmidt have received applications for 1,180,000*l* in bonds, secured by a first mortgage upon the Vera Cruz and Apixaco section, 180 miles in length, of which 53 miles are already in operation, and the balance will be completed by the end of next year. The other section from Puebla and Apixaco to Mexico city is in operation, and worked at a profit. The line has already cost 4,000,000*l*, including a Government grant of 500,000*l*, and the present issue will complete the works. The railway passes through a productive territory, and will open out a large mining district. 50,000*l* of the annual money grant from the Government will be set aside for the service of these bonds. The issue price has been fixed at 70 per cent. and a 1½ per cent. sinking fund is to be applied to the redemption of the bonds, thus to be completed within 26 years.

Scinde, Punjaub, and Delhi.—The revenue receipts for the half-year amounted to 244,889*l*. The working expenses absorbed 198,943*l*, or 81·23 per cent., leaving a net revenue of 45,946*l*. The opening of the Sutlej Bridge was too late to influence the results of the past half-year's working to any great extent; but now that the whole of the company's system has been placed in direct connection with the East Indian Railway, and unbroken railway communication had been established between Lahore and Mooltan and Delhi, Calcutta, and Bombay, an addition to the traffic is looked for. Capital received 10,287,654*l*, leaving as balance in hand 253,798*l*.

BANKS.

Anglo-Hungarian.—The dividend for the year was fixed at 5 florins silver per share, of which 8s was paid in January, leaving a further 2s for present distribution.

Bank of South Australia.—A dividend at the rate of 10 per cent., free of income tax, has been declared.

Imperial Ottoman.—The adopted report showed a gross profit of 425,905*l* for the past year, the available balance, after adding 9,400*l* the previous surplus, being 239,170*l*. The great increase in the difference between the gross and net profits of the year 1870, compared with that of 1869, is to be explained by the necessity of writing off a large amount for bad debts incurred by the sudden collapse of credit in the East, and the consequent ruin of many houses. In addition to which the securities held by the bank were valued at the quotations of the end of the year 1870, and consequently at a period of exceptional depression. After deducting the statutory addition to the reserve fund and interest on the same (raising that fund to 209,095*l*), there remained 205,635*l*, of which 101,250*l* was distributed by way of interim dividend in January; a similar distribution now (making 10 per cent. for the year) has been declared, leaving 3,139*l*.

London and South-Western Bank.—The office has been removed to No. 7 Fenchurch street.

Provincial of Ireland.—The usual 20 per cent. per annum dividends are announced.

Roumania.—The report shows an available balance of 40,342*l* 2s 10d after deducting 36,110*l* 14s 2d expenses, &c., for the year 1870. The committee recommend a payment of 5s 6d per share, making, with the previous distribution in January, a dividend of 8*l* 8s 9d per cent.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

International Financial Society.—An interim distribution at the rate of 5 per cent. per annum is announced.

ASSURANCE COMPANIES.

Crown Life Assurance.—At the meeting a dividend of 31s per share was declared. The new policies for the year were stated to have been 758, for a total of 373,369*l*, yielding 11,069*l* in new premiums. The accumulated fund is 1,175,334*l*, the assurances in force are 4,568,000*l*, and the annual income is 182,298*l*.

Home and Colonial Marine.—It is announced that Mr A. Clavell, of the firm of Messrs Bordies, Fabris, and Co., has joined the board of this company.

Maritime Insurance.—Interim dividend notified at the rate of 10 per cent. per annum.

Royal Exchange Assurance.—A dividend of 16 per cent. for the half year has been declared.

Scottish Life Assurance.—The new assurances effected during the past five years were reported at 5,713,812*l*, and the sum of 371,000*l* remains for division amongst the policy holders.

MISCELLANEOUS COMPANIES.

Anglo-American Telegraph.—Both the 1865 and the 1866 cables are now in working order.

Asphalte Limestone Rock Paving, Limited.—Capital, 100,000*l*, in 10*l* shares. This undertaking has purchased the exclusive right of supplying Austria with Val de Travers Asphalte, the price paid to the Bituminous Rock Company being 5,000 fully paid shares. Pavements in Austria are reported as being generally bad, while the price of granite is very high.

[CONTINUED FROM PAGE 755.]

Ceylon Company.—A dividend at the rate of 6 per cent. per annum has been declared. Owing to the war the price of coffee last year showed some decrease.

Charles Cammell and Co.—Available profit, 82,446*l*, inclusive of 6,946*l* brought into the account. A dividend of 6*l* per share absorbs 60,000*l*, leaving surplus 22,446*l*.

Colonial Company.—At the meeting the year's net profit was stated at 34,472*l*, and a dividend of 12s per share was declared, making 8 per cent. for the twelve months.

Crystal Palace.—The debentures and preference dividends will be paid on the 15th July. The number of admissions have shown increase. Large renewals have been made, and the water towers are being put in a state of thorough repair.

Ebbw Vale Steel, Iron, and Coal.—A dividend of 20s per share, making 30s for the past year, is announced. The report states the net profit for the year, including the sum of 90,466*l* expended in outlay of additional plant, amounted to 120,535*l*, making a total of 126,380*l*, with 5,844*l* brought forward.

Foreign and Colonial Government Trust—Second Issue.—Certificates amounting to 6,900*l* have been drawn for redemption at par on the 15th July.

Hudson's Bay.—The net profits for the year ended the 31st of May amounted to 27,357*l*, as against 53,321*l* for the year ending the 31st of May, 1870. The balance of undivided profits was 61,417*l*, as compared with 64,061*l* last year. The interim dividend paid in December, 1870, was 30,000*l*. Of the total receipts 35,494*l*, from which the profit of 27,357*l* was made in the past year, 11,425*l* was due to the balance of gain on the premises in Fenchurch street; 5,686*l* represented the income derived from investments, and only 18,383*l* arose from the profits of the fur trade. The loss of property during the disturbances at Red River had affected the accounts to the amount of about 30,000*l*. As regarded the fur trade, the directors believe that great economy may be effected by steamers upon some of the lakes and rivers, and by a reduction in the staff of officers. As regarded the other business, they have a large landed interest in a territory which is now beginning to attract emigrants. The directors consider it desirable to employ some of the officers in the management of the land. They propose to purchase the respective interests of that body, which has been calculated at 75,255*l*, and to add to it 31,800*l*, or two-fifths of the Oregon money, after deducting expenses, spreading the payments over three years. The great object of reorganising the establishments on a thoroughly satisfactory footing could not be attained at a lower cost. The directors recommend that a further dividend of 6s per share be paid, thus reducing the balance to 31,417*l*.

Leigh Gas Light and Coke.—Mr W. W. Woodman, of 25 St Swithin's lane, has been appointed official liquidator.

National Steamship.—Interim dividend declared at the rate of 10 per cent. per annum.

Thames Shipbuilding, Graving Docks, and Iron Works Company, Limited.—Capital, 250,000*l*, in 12,500 shares of 20*l* each. The Thames Iron Works, Shipbuilding, Engineering, and Dry Dock Company, Limited, before 1866 acquired the business and premises of the largest private shipbuilding firm in England, and the works then taken over have been since added to. In all 600,000*l* has been expended on the property, which has a frontage of 1,100 yards upon the river, and the whole will be purchased for 250,000*l*, partly in shares. The business is in thorough order, and the reconstruction, it is believed, will make it very paying, especially as the trade is stated to be rapidly improving.

MINING COMPANIES.

Imperial Ottoman Mining.—The following telegram has been received from the manager:—Pera, June 19,—Good lode cut at 25 fathoms level, producing lead and copper. Cheering prospects. Particulars by post. Shipment of ore in Swan's hands.

Mineral Hill Silver Mines, Limited.—Capital, 300,000*l*, in 10*l* shares, of which 24,000 shares are handed over to the vendors as a moiety of the purchase price. The remaining 6,000 shares will be given to the subscribers of the present issue of debentures upon their redemption, at the rate of 2 shares per 100*l* debenture. The debentures now being issued are for 300,000*l* in sums of 100*l* each, bearing 15 per cent. interest, payable quarterly; and they are redeemable at 125*l* each out of all surplus profits after 15 per cent. has been paid upon the share capital. It is at the same time estimated that the whole will be redeemed by quarterly drawings in three years. Out of the money thus raised the other moiety of the purchase price will be paid, the balance being reserved for erecting new machinery. The Mineral Hill is situated in a productive part of the State of Nevada; and is reported upon by Messrs John Taylor and Sons and others, from personal inspection, to be a most valuable property, already yielding large returns although not fully developed. The claims and mines acquired are forty-one in number, and one to the value of over 240,000*l* is stated to be in sight.

St John del Rey.—The report states that the cost in 1870 amounted to 52,846*l*, and the produce to 47,822*l*. The cost exceeds that of 1869 by 7,622*l*, while the produce is 1,100*l* less. The reserved fund amounts to 21,405*l*.

Taquaril Gold.—The report refers to the unsatisfactory result of the operations at the mine, but adds that favourable results may yet be obtained. The gold return has amounted to 7,789 oitavas, realising 3,350*l*.

Tolima Mining, Limited.—Capital, 100,000*l*, in 5*l* shares; 14,000 A shares bearing a minimum 10 per cent, preference dividend are for public subscription, and 6,000 B shares are taken by the vendors as part of a purchase price of 70,000*l*. 20,000*l* will be handed to the vendors to pay off incumbrances, and 20,000*l* will be paid after the A shares have received a yearly dividend of 20 per cent. The Tolima State of the Colombian Republic, South America, is stated to be very rich in mineral wealth; and this undertaking is formed to purchase the "Frias Silver" and "Organos Gold" mines, situated upon properties comprising 3,100 acres of well-watered and timbered land. The silver mine has already been brought into profitable working order, and by aid of additional machinery large profits are looked for. Labour is stated to be cheap and plentiful, and dividends are estimated at 50 per cent.

Barley	203	3	45	11
Oats	1,576	7	26	10

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The unfavourable weather has created an uncertain tone in the general trade, and transactions at Mark lane have been much restricted. To-day the tendency of the quotations for wheat was being against holders, owing to the return of warm weather, and to the comparatively liberal arrivals of foreign produce; nevertheless, the factors were not willing to give way, and only did so when pressed to sell. English wheat remained nominally unchanged in value. Flour was easier to buy. Maize, oats, and peas, were also cheaper; but barley and peas were unaltered. This week's imports of foreign and colonial produce into London have amounted to [illegible] qrs of wheat, 4,[illegible] barley, 8,[illegible] oats, 11,920 maize, 2,[illegible] peas, 2,[illegible] sacks and 29,780 barrels of flour.

There was no important feature in the Liverpool and Wakefield markets this morning, prices remaining unchanged for most descriptions of grain.

The Liverpool cotton market was very active until Wednesday, at an advance of ¼d to ⅛d per lb. On Wednesday a quarter of an inch and yesterday the trade was dull at a decline of ⅛d per lb. The total sales for the week are 147,400 bales, of which the trade have taken 7,[illegible] bales, speculators and exporters [illegible] bales. The receipts are 64,[illegible] bales, the actual export [illegible] bales, and to-day's stock is estimated at [illegible] bales. Quotations for American descriptions have advanced [illegible] per lb, and Brazils ⅛d per lb, while Egyptian [illegible] have been [illegible] to-day there has been a better feeling, and the market closes steady, sales 12,000 bales.

At Manchester, on June 22, middling Orleans cotton was quoted at 9¾ cents per lb.

The following returns show the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended June 22, 1871 :—

	Imported.		Exported.
American	bales	[illegible]	[illegible]
[illegible]	...	[illegible]	[illegible]
East Indian	...	[illegible]	[illegible]
[illegible]	...	[illegible]	[illegible]
[illegible]	...	[illegible]	[illegible]
Total	...	[illegible]	[illegible]

We extract the following from Messrs. W. Nicol and Co.'s circular dated Bombay, May 27:—The tone of the cotton market has been decidedly dearer. Since the receipt [illegible] of telegrams on Monday dealers have been able to secure daily increasing prices, and the advance continued to late yesterday's [illegible] until [illegible] to-day's [illegible] to-day's [illegible] to-day's

11,772 Van Diemen's Land, 2,632 Swan River—total, 221,635 bales; and the series as at present arranged is to last till the 1st August.

The annexed is dated New York, June 9:—Business generally is dull, but not more so than usual at this period of the year when the home trade is reduced to the absolute necessities of interior distributors. And in consideration of the general apathy, prices are very well maintained, the crop prospects, under the late refreshing rains, having improved, with the exception of cotton. Indeed throughout the grain-growing States the weather is now peculiarly favourable to the crops, and advices from all sections regarding cereals and pasture are very favourable indeed. Corn is growing rapidly, and the acreage being uncommonly large, the indications point to a most munificent yield. In the Southern States the wheat harvest is progressing favourably, and in such States as Virginia, Tennessee, Maryland, and Kentucky, the yield promises to be the largest since before the war. The cotton crop will undoubtedly fall considerably short of last year, a circumstance that cannot fail to have a serious influence upon the prosperity of the whole country. We are inclined to the opinion, however, that the estimates of decrease have been quite generally exaggerated. The volume of the exports of produce (except cotton, which is relatively dearer at home than abroad), continues fair, thus giving the markets for the leading staples a good support. The outward movements in breadstuffs and provisions during the present fiscal year has been exceptionally large, and with a good surplus still on hand, and peace in Europe restored, the outlook for the remainder of the season is promising. There is no interruption of the easy condition of the money market which has been so conspicuous a feature for several weeks past, the rates continuing 3 to 4 per cent. on call, and 4½ to 7 per cent. discount of approved business notes. Gold remains firm and steady, while foreign exchange is the turn easier.

THE COTTON TRADE.

LIVERPOOL.—June 22.

The cotton market opened this week with great animation, the sales continuing very large, at daily hardening prices, and quotations show an advance in all descriptions. On Wednesday a quieter tone set in, which has since continued, and the extreme prices have not been maintained. Sea Island has been in good demand, and with the exception of the common qualities, which continue unsaleable, prices are 1d to 2d per lb dearer within the fortnight. In American the business has been large, and after advancing fully ⅛d per lb, prices close about ¼d per lb above the quotations of Thursday last. New York advices to the 22nd instant quote middling Upland 20⅛ cents, costing to sell in Liverpool 10¼d per lb, by steamer. Brazil has continued in good request, and has advanced ⅛d to ¼d per lb. Egyptian has again been in extensive demand, and prices have risen fully ¼d per lb. The supply of East Indian is much reduced, and with a strong demand both from the trade and exporters, prices have advanced ¼d per lb.

In cotton to arrive the transactions have been very extensive, at higher rates, but closing easier. The highest quotations early in the week were—American, basis of middling, from any port, not below good ordinary, May shipment, 8¾d; August-September delivery, 8⅝d; New Orleans, not below low middling, ship named, not sailed, 9d; low middling, New Orleans, not below good ordinary, nearly due, 8⅝d; Dhollerah, Cape, fair new merchants, May-June shipment, 7 1/16d; ship named, 7 1/16d; Oomrawuttee, Cape, fair new merchants, April sailing, 7d; February, 7 1/16d per lb. This day—American, basis of middling not below good ordinary, delivery from any port, August-September, 8⅝d; bales, from any port, July-August, 8 5/16d; Texas, August-September, 8⅝d; New Orleans, August, 8⅝d; ship named, 8¾d; Mobile, not below low middling, August, 8⅝d; low middling, not below good ordinary, New Orleans, delivery June, 8 1/16d; Texas, at sea, 8 5/16d; Dhollerah, Cape, fair new merchants, ship named, 6 15/16d; May shipment, 6 15/16d; May-June, 6¾d; Oomrawuttee, fair new merchants, canal, May-June shipment, 6¾d per lb.

The sales of the week, including forwarded, amount to 137,460 bales, of which 38,570 are on speculation, and 19,820 declared for export, leaving 79,070 bales to the trade.

June 23.—The sales to-day will probably amount to about 15,000 bales, with a steady market.

N.B.—The actual stock in Liverpool will be taken on the 29th and declared on the 30th instant.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	766,28[illegible]
An increase of quantity taken for consumption of	260,08[illegible]
An increase of actual exports of	276,63[illegible]
An increase of stock of	267,33[illegible]

In speculation there is an increase of 82,120 bales. The imports this week have amounted to 64,017 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to June 16) is 102,000 bales, against 108,000 bales last year. The actual exports have been 20,626 bales.

LONDON.—June 22.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The demand continued without interruption until yesterday, and the sales, both on the spot and to arrive, at one time showed an advance of fully ¼d per lb; since then the market has turned flat, and prices of cotton to arrive can only be called ⅛d per lb above those of last week, while spot parcels are steady at the highest point.

PRESENT QUOTATIONS.

NEW YORK.—JUNE 9.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, June 9. From the figures thus obtained it appears that the total receipts for the seven days have reached 28,136 bales, against 36,402 bales last week, 40,178 bales the previous week, and 45,967 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,821,180 bales, against 2,792,879 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,028,301 bales. The exports for the week ending this evening reach a total of 42,423 bales, of which 23,107 were to Great Britain, 12,465 to France, and 6,751 to rest of the continent, while the stocks as made up this evening are now 235,508 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending June 9.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	11,937	4,000	15,937	12,250	74,472	101,317
Mobile	800	700	1,500	...	16,196	14,000
Charleston	...	400	400	...	7,991	9,932
Savannah	900	500	1,400	1,872	10,000	20,485
Texas	1,400	...	1,400	1,000	5,000	10,674
New York	5,000	...	5,000	5,471	57,200	48,000
Other ports	90	7	97	100	13,650	14,000
Total	23,107	12,465	35,572	32,442	235,508	261,000
Total same time 1870	17,000	15,442	32,442			

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 12,361 bales, while the stocks to-night are 25,492 bales less than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to June 2, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

Ports.	Receipts since Sept. 1.		Exported since September 1 to				Shipments to Europe, other Ports.	Stock.
	1870.	1869.	Great Britain.	France.	Other Europe.	Total.		
New Orleans	1,000,000	900,000	750,000	200,000	100,000	1,050,000	17,000	90,000

Total this year	3,820,000	...	1,915,000	400,000	405,000	2,720,000	1,000,000	200,000
Total last year	2,792,879	...	1,500,000	350,000	400,000	2,250,000	542,879	225,000
Total, 2 years	...	5,774,000	3,415,000	750,000	805,000	4,970,000	1,542,879	425,000

The upward movement in prices which has been in progress the past two or three weeks has been further stimulated this week by continued unfavourable crop reports from a considerable section of the South and a favourable response from Liverpool, middling Uplands reaching on Tuesday 19½c, against 17½c at the close of last Friday. For forward delivery prices have also advanced again this week, attended on Tuesday with great excitement, but afterwards they fell off largely, and recovering, though not quite to the same extent as spot cotton. For the later months September and October quotations are lower. Low middling closed to-night at 18½c for June, 19c for July, 18½c for August, and 18c for September. The total sales of this description for the week are 78,250 bales. For immediate delivery the total sales foot up this week 21,852 bales, including 1,437 for export, 9,635 for consumption, 2,428 for speculation, and 8,352 in transit. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary per lb	15 @ ...	15½ @ ...	15½ @ ...	15½ @ ...
Good ordinary	17½ ...	17½ ...	17½ ...	17½ ...
Low middling	18½ ...	18½ ...	18½ ...	19 ...
Middling	19½ ...	19½ ...	19½ ...	20 ...
Good middling	20½ ...	20½ ...	20½ ...	21 ...

Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending June 9, 1871.			Week ending June 9, 1870.		
	Receipts.	Shipments.	Stock.	Receipts.	Shipments.	Stock.
Augusta	691	1633	4444	302	567	11555
Columbus	347	348	2586	106	714	5616
Macon	231	227	2524	113	532	6673
Montgomery	292	405	4886	89	686	4456
Selma	278	304	1201	71	96	3200
Memphis	2151	4278	5648	2103	3684	12044
Nashville	1287	1089	1112	331	241	4780
	5107	8345	21511	3115	6520	48324

The above totals show that the interior stocks have decreased during the week 3,178 bales, and are to-night 26,813 bales *less* than at the same period last year. The receipts, however, have been 2,052 bales in excess of same week last year.

The exports of cotton this week from New York show a decrease since last week, the total reaching 5,781 bales, against 11,718 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:—

EXPORTS of COTTON (bales) from NEW YORK since Sept. 1, 1870.

—*New York Commercial and Financial Chronicle.*

NEW YORK, June 17. — According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 24,000 bales, and since the 1st of September, 3,845,000 bales. Shipments to England, 13,000 bales; to France, 5,000 bales; and to the continent, 3,000 bales; and since the 1st of September, 3,013,000 bales. Stock at all ports, 225,000 bales. Middling Upland, 9⅜d, cost and freight, per steamer.

NEW YORK, June 20.—The receipts of cotton for the last four days have been 15,000 bales. Shipments to England, 22,000 bales; to France, 4,000 bales; and to the continent, 4,000 bales. Middling Upland, 9½d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, June 22.—The business of the past week has again been of a very restricted character, caused by a further advance in prices for all descriptions of yarns and cloth, in consequence of the continued upward movement in cotton. Up to Tuesday the business done was small, but prices were strongly maintained. On Wednesday the cotton market became quiet, stocks being freely offered, with a slight decline in value, which is more marked to-day. The recent advance, being too rapid and considerable, is not likely to be maintained, consequently buyers hold aloof, in anticipation of doing better by and bye. The quotations given below are mostly nominal, as the market closes dull, and prices favouring buyers.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

Messrs Alexr. Collie and Co. received the following telegram from Manchester yesterday:—Tone of market better than yesterday, but little business doing, and prices, as compared with Tuesday, are in buyers' favour.

BRADFORD.—The reports as to the state of the wool market are rather conflicting. Prices in the country are so much in advance of what can be realised in this market that the purchases of spinners, who operate with caution, are very restricted. The business doing in the yarn market continues steady. The home demand is without change. Owing to the great firmness of wool spinners are hardening their quotations. Though little fresh business has been done in the wool market manufacturers continue very busy and prices are stiff.

LEEDS.—The cloth market has been chiefly remarkable for the buoyant demand in the tweed department—a demand which seems only likely to expire when the supplies themselves come to an end. Coatings and Meltons sell regularly, but not often in bulky parcels.

ROCHDALE.—The flannel market is quieter. The merchants who supply themselves here seem to have acquired sufficient stock during the last month, and can now be content to look on and watch the fluctuations of the market.

NOTTINGHAM.—There is a steady demand for lace goods, and future prospects are of a very cheering character. In the silk branch sprigged nets are still in request. The market for raw silk is firm at late quotations. The hosiery trade is in a healthy state. There is no change in the price of hosiery yarns.

BELFAST.—Flax—In some of our provincial markets, supplies though by no means extensive, were in excess of those offered; all presented changed hands with freedom, at unaltered rates. Yarns—Transactions reached a fair amount, but few forward orders were placed. Stocks further decreased; rates steady, with a tendency to advance. Handloom linens (brown)—For linen and cambric handkerchiefs and approved makes of light linens for bleaching, demand has been comparatively active, at late full prices. Powerloom—Little alteration can be announced regarding this discription of goods since last report. Bleached and finished linens—Demand very good on home account. Stocks generally are not extensive; little change in prices.

DUNDEE.—In the flax market there is no change to notice; holders of goods on the spot continue very firm, and refuse to sell unless at full prices, the quotations in this market being still in many cases comparatively lower than those ruling abroad. Medium and good qualities of tows continue in demand at steady prices. Jute continues to have rather an upward tendency, notwithstanding the favourable accounts hitherty received of the new crop. The yarn market continues exceedingly firm; prices of all kinds are well maintained, and spinners refuse to make farther contracts unless at very full rates. The demand for linens continues very good, and manufacturers are generally well supplied with orders. Jute goods continue in extensive demand, but flax canvas still remains exceptionally dull.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—JUNE 9.

We have had a small but pretty general improvement in the market for breadstuffs during the week, the result, mainly, of reduced receipts here and at the West and some decline in ocean freights, closing strong. Flour has arrived but moderately, and the demand has not been brisk, but the relative dearness of wheat has made holders unwilling sellers, and the low grades of State and Western brands, the good supers and common extras from new wheat, have brought some advance, while the medium grades have shown a little weakness. Wheat has improved 4c to 6c per bushel. The receipts have been materially reduced, and holders have offered but sparingly, insisting daily upon a slight advance, which a decline in ocean freights and an advance in gold have enabled shippers to pay to a moderate extent, but the business shows a great falling off as compared with the previous few weeks. The accounts from Liverpool are barely steady, and show the arrival of large quantities of other than American wheat in that market, for the first time in many months. Corn has shown a gradual improvement on reduced supplies, better quality of the offerings, and a decline in ocean freights, with the development, towards the close, of some speculative feeling, based on the fact that the increased receipts at the West bear no proportion to the increased demand. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The grain trade has been much unsettled throughout the week, owing to the changeable nature of the weather. The arrivals of foreign produce, however, having been on a liberal scale, millers have declined to operate except on easier terms, and a slight decline has been conceded in large transactions. The amount of business reported, however, has been very small, there being a general disposition to refrain from

operating at the moment. The heavy rainfall has had a prejudicial effect upon the growing crops, while the hay, where cut, has suffered materially. Sufficient moisture has been secured for the wheat plant, which is only just springing into ear, and a spell of warm forcing weather is now very desirable for all crops. Only in the earliest districts has the plant commenced to bloom, while a general loss of colour is reported. The harvest will probably be a week or ten days late, but we are by no means inclined to endorse the unfavourable reports so industriously circulated in regard to the prospects of the crop. The hope of a large export demand on French account has been signally disappointed, and the markets, both in England and France, are overstocked with the flour manufactured in view of this movement. This has naturally tended to further depress the trade, and to check purchases. Foreign wheat may be quoted 1s cheaper on the week, but English is nominally unchanged in value, owing to the scanty supplies and the absence of business of sufficient importance to test prices.

With large arrivals of maize and oats and further heavy shipments on the way the trade ruled dull, and values have given way 1s per quarter. Beans have sold at a similar decline. Barley and peas are without material alteration in price.

Mr. George Duncan sends this report of the state of the floating grain trade:—During the last eight days 39 grain and flour laden vessels have been reported arrived at ports for all, viz.:—19 wheat, 5 maize, 3 barley, 1 rye, 2 oats, 2 beans, 4 wheat and flour, 1 millet seed, and 2 Indian corn. The floating grain trade has been dull in tone with prices tending downwards. Wheat has been slow to sell at 1s to 2s below late rates. Maize steady at about late prices. Barley quiet. Rye.—All the reported cargoes off the coast have been disposed of. The reported sales are as follows:—Wheat—3 arrived cargoes Galatz Odessa, 50s per 492 lbs., spring and New York, 53s to 54s 3d per 480 lbs. Maize—6 arrived cargoes Odessa, 35s 6d to 37s 7½d; Moldavian Sulina, 35s 6d; old Roumanian, 35s 9d; fine yellow, 38s; American, mixed, 33s per 480 lbs. Shipped or to be shipped, 1 cargo American, from New York, at 32s per 480 lbs. Barley—2 arrived cargoes Ibrail, 27s 6d; Danubian 29s per 400 lbs. Rye—3 arrived cargoes Enos, 34s; Moldavian, 28s 6d per 480 lbs. Linseed quiet, and to sell cheaper. Rapeseed steady at 6d decline. Cotton-seed steady at the late decline.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

For Report of this Day's Markets see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—The chief feature to notice this week is the rather large business done in floating cargoes for the United Kingdom, some of these being at easier rates. No improvement in the general demand can be quoted. There were 1,164 casks West India sold in three days at former prices to an extended slight reduction. The above quantity including the portion sold by auction, Barbadoes, 29s to 31s 6d; grocery, 32s to 37s 6d; crystallized Demerara, 37s to 38s 6d; brown to fine Jamaica, 30s to 31s 6d. Two floating cargoes of Trinidad are reported for the United Kingdom at 29s 3d and 26s 4½d; two of St. Lucia at 27s 9d per cwt. Grainy descriptions are quiet. There is only a partial demand for Manilla and other low qualities. Further arrivals have taken place not yet included in the stock, which is still much below the usual average for this port, and the deliveries continue large.

Mauritius.—5,482 bags in the public sales chiefly sold at previous rates for sale qualities: brown 29s 6d to 30s 6d, yellow and grey, 31s 6d to 32s 6d. A floating cargo has sold for the United Kingdom, No. 14½, at 32s 6d per cwt.

Natal.—604 bags brown part sold at 26s to 29s for brown.

Manilla.—About 450 tons have sold on the spot: Zebu, at 22s; Ilo Ilo, at 24s; and Taal, at 20s 9d.

Europe.—Of 242 casks 43 barrels Porto Rico the bulk was taken in. A few lots sold at 33s to 37s for middling to good yellow. 195 casks 150 barrels 163 bags Guatimala &c., partly found buyers; grainy, 31s to 36s; soft brown and grey, 26s 6d to 31s 6d. 1,024 boxes Cuba were bought in. A few lots strong dry grey realised 37s 6d to 39s. 100 casks Honduras concrete sold at 28s 6d to 29s per cwt. 503 casks 650 bags beet sugar withdrawn.

Foreign Cargoes.—The following are reported sold for the United Kingdom. One Havana, No. 11½, at 31s; one Cuba, at 27s 9d; three of Porto Rico, at 28s; one of Bahia, at 28s 6d; and one of 16,100 bags Java syrups, at 17s 6d per cwt, ex quay for Liverpool.

Refined.—The market has been firmer but is now quiet, and foreign offering for delivery. Common to fair dry goods are quoted 41s 6d to 43s per cwt.

Molasses.—35 puncheons St. Lucia have sold at 11s 6d, and 120 puncheons Antigua at 13s.

Rum.—There has been a steady demand during the week, but the business was of moderate extent, and chiefly restricted to common kinds of West India. Leewards, 1s 6d to 1s 7½d; Barbice, 1s 8d; Demerara in puncheons, 1s 9d to 1s 9½d; smaller packages, ½d to 1d per gallon more.

Cocoa.—There is a very good demand, owing to the extended consumption. Further purchases has been done in Guayaquil privately at 45s to 54s 6d. At the public sales of Trinidad on Tuesday, 1,187 bags were offd, sold at full prices; grenade to good quality, 60s to 75s; good to fine, 77s to 103s; a very few fine up to 135s. 1,412 bags grenade were offered on 2nd instant, from 40s to 50s for ordinary to middling, and 57s to 71s for good to fine. Two packages St. Lucia sold at 47s to 47s 6d. 65 bags Surinam, 53s to 68s per cwt.

Tea.—Several small private sales were held on Tuesday and the two following days, the total quantity in the aggregate amounting to 10,000 packages. Prices showed less changes for some grades in common, leaving general quotations unaltered. Yesterday [illegible] sold at a decline of ½d per lb being common. In private contract the business is steadily carried on at unchanged rates and quotations. Fine teas have in some instances improved.

Coffee.—The market has continued firmly supplied, but there has been a good demand at full rates, prices and the settlement in France have caused a further increase in the turnover. At the public sale of the Netherlands Trading Company on the 20th inst., 61,000 bags were put through privately, being 1,000 bags less than on the 13th. At the public sale of yesterday, [illegible] 1,377 bags were offered, and kept all behind buyers' limits and would be held. Mid to fine ordinary low [illegible] and 51s to good ordinary and fine [illegible], superior and [illegible] 53s to 60s. Several consignments have been sold at 52s/6d to 55s to 56s. 70 casks 8 barrels fine bags by auction part sold at the above prices, and remainder [illegible]. Of sales of Mocha and bags Abyssinian low and ordinary, 45s to 48s; fine ordinary to good ordinary, 50s to

74s 6d. 355 packages Mocha: short berry fair to good, 93s to 102s; mixed, 84s 6d to 89s; long berry, 90s to 98s. 1,184 bags native East India part sold at 58s. Privately, about 3,000 bags at 56s to 60s. 751 cases by auction chiefly found buyers, including Wynaad, &c., 63s 6d to 68s; bold, 72s 6d to 80s. A few lots of Naidoobatum, 71s 6d to 75s 6d. 1,219 bags Singapore sold: Bontyne, 55s to 60s; other kinds, 47s 6d to 56s. 5,538 bags foreign descriptions nearly all sold: Costa Rica, fine ordinary to middling palish, 59s to 62s; Guatimala, 56s to 62s; superior and colory, 64s to 68s 6d; Santos, 53s to 58s; La Guara, 58s to 63s 6d. 85 bags Manila at 55s. Three floating cargoes of Rio have sold at 49s 6d to 51s. A cargo of Bahia for the Mediterranean at 48s 6d per cwt. The stock according to the latest return was, as compared with the previous season, deficient by 4,836 tons, but does not include the cargoes arrived here.

RICE.—Sales on the spot are limited, being chiefly restricted to white Bengal at 9s 3d to 11s 10½d for broken and low to good middling, and 13s 3d for fine. A cargo of new Rangoon off the coast is sold at 10s per cwt, ex ship. Soft grain descriptions remain dull.

IMPORTS and DELIVERIES of RICE to June 17, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ..... tons	34310	17470	43270	28900
Deliveries	58760	30780	26800	27400
Stock	28670	36150	49120	18100

SAGO.—427 bags were chiefly bought in at higher prices. A few lots fine small grain sold at 17s to 17s 6d per cwt.

TAPIOCA.—947 packages were only partly sold, including pearl at 18s 6d to 19s per cwt for good. The remainder bought in at higher rates. Business has been done in rough Singapore and Penang privately on higher terms.

BLACK PEPPER.—Sales have been effected by private contract at last week's rates to a further slight advance: Singapore, 5½d to 5 9/16d; Penang, 5⅝d to 5 7/16d. At auction yesterday 952 bags of the former were bought in at 5½d to 5⅝d for the sound portion. 245 bags Penang sold at 5⅝d to 5½d. 60 bags Malabar sold at 6¼d for shot kind. The last sales of Penang afloat were at 5⅛d to 5¼d per lb.

WHITE PEPPER.—The market is about ¾d higher, and very firm. Yesterday, 8¾d to 9d per lb was paid for Singapore on the spot. Some business reported for arrival, of which particulars do not transpire.

OTHER SPICES.—At the sales on Wednesday 207 barrels Jamaica ginger went at full rates to some further advance for common sorts. Low to good ordinary, 37s to 47s; the remainder at 48s to 104s, according to quality. 200 cases Cochin sold without material change in value: ordinary rough, 40s, part scraped; rather small to fair, 56s to 63s; superior bold, 91s to 92s per cwt. 130 bales spurious cinnamon and 434 bags low coarse bark withdrawn. Pimento is steady. 1,037 bags by auction sold at 1¾d to 2d. 5 cases mace and 17 cases nutmegs were withdrawn; also 8 cases Amboyna cloves.

SALTPETRE.—The moderate quantity disposed of has been at steady prices. Bengal on the spot, refraction 10½, 26s 6d; 5½, 27s 6d per cwt. No sales reported for arrival.

IMPORTS and DELIVERIES of SALTPETRE to June 17, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ..... tons	5600	5000	3980	2880
Total delivered	5570	7340	4350	5020
Stock	2430	2480	3840	5990

Deliveries last week, 255 tons.

INDIGO.—There are now 10,320 chests declared for the sales commencing on the 10th proximo. Some demand prevails for France.

OTHER DRYSALTERY GOODS.—Cutch is quoted at 21s to 22s for the finest qualities. 287 boxes by auction sold chiefly at 20s 6d. Gambier quiet, but business has been done privately at 15s 10½d to 16s. Turmeric is in demand. Sales of Bengal on the spot and to arrive at 19s to 19s 3d. 1,160 bags by auction part sold: Bengal, 19s to 19s 6d; Madras, 18s to 21s 6d per cwt. Some inquiry prevails for cochineal.

SHELLAC.—The market is very firm, business having been done for France. 174 cases by auction sold as follows:—Second orange, 6*l* 7s 6d to 6*l* 10s; good, 6*l* 17s 6d; native livery orange, 6*l* 2s 6d. A few hundred chests are reported sold for arrival.

METALS.—The markets have in several instances shown farther improvement. Speculative transactions have led to an advance upon foreign tin. Prices are higher in Holland, and Straits likely to be used more freely by manufacturers here. The latter has sold at 131*l* to 131*l* 10s: Banca, 132*l* 10s. English is in moderate supply, and prices tending upward. A steady business has been done in copper. The latest sales include Walaroo and Barra at 76*l* to 76*l* 10s. Chili, &c., 66*l* 5s to 67*l*. English in demand. Lead has been rather quiet. English pig, 18*l* to 18*l* 5s; Spanish soft, 17*l* 10s. Spelter rather dearer. Several sales are reported. Silesian, 18*l* 5s to 18*l* 7s 6d; fine marks up to 18*l* 10s. Business done for arrival at 18*l* 10s to 18*l* 12s 6d. Scotch pig iron, 56s 8d per ton cash, with a steady market.

JUTE.—The state of trade in Dundee being satisfactory, this market continues firm, and very full prices have been paid. Direct shipments to the former restrict transactions here, but several parcels have sold afloat, including some of the new crop, chiefly at prices ranging from 20*l* to 24*l* 15s per ton.

HEMP.—Manila is quiet, but held firmly. 1,643 bales by auction were nearly all bought in. A small quantity of good roping sold at 46*l* to 47*l* 10s. Privately the sales are limited. 250 bales Coconada withdrawn.

LINSEED.—The tone of the market is quiet, few sales being reported afloat. Calcutta quoted 61s 6d summer shipment. Black Sea, to arrive, 61s. Transactions on the spot are also limited. Calcutta, 63s; Bombay, about 64s per quarter.

OILS.—A cargo of Candia off the coast has sold at 43*l* for Hull; one at 45*l* 10s for Russia; one of Bari for the latter at 45*l* 15s; and one of Zante for the continent, c. f. and i. Small sales on the spot at 44*l* and 46*l* for Mogadore and Zante respectively. Fish oils quiet. Sperm, 82*l* per tun. Cocoa-nut remains nominally unchanged for Cochin. Ceylon is dull at 40*l* to 40*l* 10s. The market for palm has been firmer. Fine Lagos, 37*l*. Linseed steady, but rather quiet at 32*l* 10s spot and delivery during the last six months. English brown rape, after declining to 42*l* 10s in all positions, closes at 42*l* 15s to 43*l*. English refined, 44*l* 10s to 45*l*; foreign, 46*l* to 48*l* per ton, and fine quality scarce.

PETROLEUM dull, at 1s 6d on the spot, and 1s 6½d per lb last four months.

TURPENTINE.—American, 39s 3d; French, for arrival, sold at 33s per cwt.

TALLOW.—The deliveries being still very large, prices of foreign have slightly recovered, and the market is decidedly firmer. Petersburg, new, 43s 9d; Oct. to Dec., 45s 9d to 46s per cwt. The sales of Australian to-day will be only about 900 casks.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market continues flat. To-day's sales were chiefly West India, and prices went easier in some cases. Grainy sorts, 36s 6d to 38s 6d. Barbadoes, 30s to 33s. 275 bags Egyptian at 37s 6d to 40s for white crystallised. Sales of West India, 488 casks; for the week, 1,645 casks. A floating cargo of Porto Rico concrete sold yesterday at 23s 3d or 23s 6d for the United Kingdom.

COFFEE.—21 casks 10 barrels 186 bags Jamaica, and 261 casks 31 barrels and bags plantation Ceylon by auction sold upon about former terms. 457 bags native Ceylon at 55s for good ordinary. 836 bags Singapore part sold at 52s to 60s for damaged. 4,582 bags foreign descriptions part sold on former terms. Pale washed Rio, 56s to 58s. Porto Rico bought in at 65s to 68s per cwt.

BLACK PEPPER.—On the spot Singapore sold at 5½d to 5⅝d. Penang afloat, 5¼d per lb to a shade over.

DRYSALTERY GOODS.—833 bales Gambier were taken in at 16s Several parcels of cutch were taken in.

OILS.—300 casks, &c., cocoa-nut by auction chiefly sold: Ceylon, 40*l*; Sydney, 33*l* 10s to 38*l* 10s per ton. 38 casks palm bought in. 95 tuns seal at 31s to 33*l* 10s per tun.

TALLOW.—Town rose to 45s. 917 casks Australian by auction all sold: beef, 37s to 42s 6d; mutton, 41s 6d to 43s per cwt.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that Valencia oranges are depressed in price, but are expected to improve, owing to the scarcity of summer fruits. Sicily lemons scarce. Barcelona nuts sustain their value. More inquiry for Brazil; a cargo of the new crop daily expected. West India pine-apples and cocoa-nuts in demand, the former arriving in better condition.

DRY FRUIT.—A quiet week as far as actual business is concerned. Currants are steadily taken, and stocks gradually lessening at prices in favour of holders rather than to the advantage of buyers. Raisins without alteration in value, but a steady business doing. In other descriptions of dry fruits trade only limited.

ENGLISH WOOL.—Very firm, but not much business doing.

COLONIAL WOOL.—The third series of colonial wool sales opened June 22 with a very large attendance of home and foreign buyers, competition was spirited, prices showed an average advance of from 5 to 10 per cent., chiefly perceptible on medium class and greasy. Arrivals to date—Sydney and Queensland, 57,412 bales; Port Phillip, 68,055; Adelaide, 8,932; Van Diemen's Land, 11,861; New Zealand, 45,912; Swan River, 2,614; Cape: Eastern, 20,315; Western, 2,874; Natal, 2,822; together, 26,011 bales—total, 220,797 bales. About 7,000 bales of the above have been forwarded direct from ship to Yorkshire and the continent.

FLAX.—Market firm.

HEMP.—Market steady for Russian. More business doing in Manila. 50*l* asked for Sorsogaw; a little less paid.

SEEDS.—There has been very little business done in seeds during the past week, and quotations are unaltered.

TOBACCO.—There have been no transactions of importance to note in North American tobacco during the past week. Buyers have operated only for their immediate requirements. Prices continue without alteration, holders being firm for parcels of imports. In other growths there has been a fair business done, and very high rates have been obtained for some descriptions.

LEATHER.—The trade for leather has not been very animated during the past week, and only a moderate amount of business was transacted at Leadenhall on Tuesday. There was a good demand for light English butts, light shoulders, light shaved sides, prime calf skins, and English horse hides, at late prices. The supply of fresh leather was small, with a limited attendance of buyers.

METALS.—There has been a very fair business doing all the week. Copper has been in considerable demand, and more or less business in most kinds has been reported daily. Tin is very firm from continued demand coupled with only moderate supplies. Spelter has become rather dearer. Lead is rather quiet. Tin plates in very good demand.

METROPOLITAN CATTLE MARKET.

MONDAY, June 19.—The total imports of foreign stock into London last week amounted to 14,869 head. In the corresponding week in 1870, we received 8,168; in 1869, 12,488; in 1868, 7,410; and in 1867, 10,779 head.

The cattle trade to-day has been characterised by an increased amount of firmness. A moderate supply of beasts has come to hand from our own grazing districts, in fair condition, and the arrivals from abroad have been good so far as number is concerned. The quality of the Spanish stock has been satisfactory. For all qualities the trade has been firm, and full prices have been realised. The best Scots and crosses have sold at 5s 8d per 8lbs. With sheep the market has been well supplied. A full average business has been transacted, and 2d per 8lbs more money has been obtained. The best Downs and half-breds have been disposed of at 6s to 6s 2d per 8lbs. Lambs have changed

hands quietly at from 6s to 7s per 8 lbs. For calves the demand has been to a moderate extent, at previous quotations. Pigs have been quiet, at former terms.

SUPPLIES ON SALE.

	June 20, 1870.	June 19, 1871.
Beasts	3,920	3,485
Sheep and lambs	28,760	28,785

Veal	5	0	5	4	Small pork	4	0	5	0

Lamb, 6s 6d to 6s 8d.

HOP MARKET.

FRIDAY, June 23.—The bine is still suffering from vermin, which will undoubtedly result in a blight, though the warm temperature and the heavy rains have decidedly enhanced the growth of the plant. This market has been rather less animated, but in all sales effected extreme prices have been obtained. Mid and East Kent, 50s to 147s; Weald of Kent, 50s to 90s; Sussey, 50s to 80s; Farnham and country, 75s to 112s; olds, 20s to 35s per cwt.

POTATO MARKETS.

FRIDAY, June 23.—There have been fair supplies of potatoes on sale. The trade has been quiet at our quotations:—Flukes, old, 55s to 90s; Regents, 45s to 70s; Rocks, 45s to 60s; Jersey, new, 9s to 12s; Kidneys, 11s to 15s per cwt.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 23.—Our market remains but lightly stocked, and anything of an useful character is generally taken up on arrival, if not held over for public sale. On the 30th inst. will be offered at auction 1,000 bales Peru, 750 bales River Plate, and about 2,000 bales Egyptian, Georgian, Turkey, Angora, &c., wool.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, June 23.—There was a fair attendance at this market to-day, and wheat was in active demand at 1d to 2d over Friday's prices. Flour was in good request, without change in value. Barley, 4s 3d; beans, 34s 6d; peas, 41s to 41s 6d; oats, 3s 8d to 3s 11d; oatmeal, 30s to 31s.

WAKEFIELD, Friday, June 23.—The cold weather has given a firmer tone to the market, and the rates of last week are generally maintained. In spring corn there is no material change, another report says that millers have the advantage.

The Gazette.

TUESDAY, June 20.

BANKRUPTS.

Francis William Bennett, Chalcot terrace, Regent's park, lieutenant in the royal navy.

John Edward Dyne, Clarendon villas, Hornsey, builder.

George Bissill, Northampton, brewer.

Bissill and Gutteridge, Birmingham.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or corrugation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 10, 1860.

à Genève—chez MM. P. F. Bonna et C.) au change qui
à Londres—chez MM. Baring Brothers & C.) sera fixé plus tard.
Il sera donné avis plus tard si le paiement pourra avoir lieu à Paris aussi.
LA DIRECTION GENERALE.
Florence, 10 Juin, 1871.

SOCIETE ITALIENNE POUR LES CHEMINS DE FER MERIDIONAUX.
Délibération de l'Assemblée générale ordinaire du 10 Juin, 1871.

On a constaté le dépôt de 71,107 actions donnant droit à 2,100 votes et la présence de 154 Actionnaires représentant 63,282 Actions donnant droit à 1,481 votes.
L'Assemblée, à l'unanimité:
1° Approuve le bilan définitif de 1870 et le bilan de prévision de 1871;
2° Accorde au Conseil d'Administration la faculté de recevoir en dépôt dans les Caisses sociales les Obligations et les autres titres de la Société, avec les garanties et compensations qui seront établies par ce même Conseil;
3° Délibère d'augmenter le Capital social de la somme de trente millions, par la conversion en Actions de 500 livres chacune de trente millions des profits représentés par les dividendes et intérêts relatifs non distribués et par les fonds mis en réserve extraordinaire jusqu'à la fin de 1869.
Ces Actions deviennent propriété des porteurs des 200,000 déjà existantes, entre qui elles seront réparties et à qui elles seront consignées, sauf l'approbation gouvernementale mentionnée par l'article 32 § 2 des Statuts sociaux.
Autorise en outre l'émission d'autant d'Obligations qu'il en faut pour réaliser le double du Capital social représenté par les nouvelles Actions;
4° Délibère:
Que, maintenant le disposé de l'article 52 des Statuts sociaux, la somme à attribuer au Conseil, en commençant par l'exercice 1871, ne doit être, en aucun cas, inférieure à 150 mille livres annuelles, somme qui avait été établie pour le premier Conseil dans les dispositions transitoires des Statuts sociaux;
Puis, à une très-grande majorité, par scrutin secret
5° Pour remplacer les sept conseillers sortant de charge: suivant l'art. 41 des Statuts, confirme comme membres du Conseil d'administration:
MM. le comte Pietro Bastogi—Francesco Onetto—fu Giuseppe—le comm. Domenico Balduino—Pietro Brambilla—le comm. avv. Tito Orsini—le comm. Giacomo Lacaita—le comm. Antonio Allievi.
6° Elit réviseurs du budget:
MM. le chev. Felice Modena—le chev. Giuseppe Fontana—le chev. Antonio Monghini.
Et suppléants:
MM. le chev. Felice Bianchini—le chev. prof. Angelo Vegni.

COMPANY OF THE RAILWAYS OF THE SOUTH OF AUSTRIA AND UPPER ITALY.
NOTICE TO SHAREHOLDERS.

The Company reproduces, with the changes of dates which events have rendered necessary, the advertisement of the General Annual Meeting of the Shareholders of the Railways of the South of Austria and Upper Italy.
Shareholders are informed that they are convoked in general meeting, ordinary and extraordinary, at Paris, on Wednesday, 12th July next, Salle Herz, Rue de la Victoire, 48, at Three o'clock in the afternoon.
As an ordinary meeting to receive the report of the Board of Directors, to approve if found correct the accounts of the year 1870, and to fix the dividend.
And as an extraordinary meeting to ratify the agreement with the Company of the railways of Montferrat, for taking on lease the lines of Cavallermaggiore-Bra-Alessandria and Castagnole-Mortara, as also for participating in the concession of the circular railway at Vienna, and the leasing of different small lines in Austria
The general meeting, ordinary and extraordinary, will be composed of all shareholders possessing at least 10 shares, which must be deposited at the latest four teen days before the meeting as hereafter:—
At Paris—At the Offices of the Company, Rue Laffitte, No. 17.
At London—MM. N. M. de Rothschild and Son;
At Vienna and Turin—At the Offices of the Company;
At Milan—M. C. F. Brot;
At Geneva—MM. Lombard Odier and Co.;
At Berne—MM. Von Graffenreid and Co;
At Lyons—M M. P. Galline and Co. and Widow Morin, Pons, et Morin.
In exchange for the shares deposited, a certificate of deposit will be given, and also a card according the right of admission to the meeting.
The shareholders entitled to take part in the deliberations of the general meeting, ordinary and extraordinary, may be represented by delegates possessing their authorisation, but having themselves the right to be present
The authorisation in question must be written on the back of the certificate of deposit, and must be presented at the latest the 27th June, 1871.
As the resolutions that will be submitted to the general meeting, ordinary and extraordinary, can only be adopted by a meeting comprising at least the fifth of the capital, or 150,000 shares, shareholders are earnestly requested to attend or to have themselves represented.

THE BRITISH AND FOREIGN TRAMWAYS COMPANY (Limited).

Directors.
John M. Dyster, Esq. | Francis Ross, Esq.
H. [illegible] Esq. | William Watkins Esq.
L. [illegible] Esq. | Lieut.-Colonel C. Napier Wyatt, M.P.
William Morris Esq.
Bankers—Messrs. Glyn, Mills, Currie, and Co.
Solicitors.
Messrs Baxter Rose Norton, and Co., 6 Victoria street Westminster.
Messrs Attwood Morrice and Co., 6 Old Jewry.
Secretary (pro tem.)—J. B. Glenn.
Offices—No. 7 Lothbury, E.C.

This Company is prepared to undertake proposals for Tramways either in the London or provincial districts. Applications with full particulars, to the Secretary pro tem., as above.

EXTRACTS FROM THE COMPANY'S PROSPECTUS.

This Company has been formed to carry out Tramway enterprise in connection with the various local authorities throughout the kingdom, and to the extension of Tramways both in towns and less populous districts on the continent, and will therefore bring to the business great practical experience.

The intention of the Company is generally to invest its own capital in the construction and development of the Tramways undertaken by it, and to dispose of the same (when it can to advantage) by the extension of sound working to a better way the public will appreciate efficient, economical and speedy conveyance.

The Company is entirely free from any engagements, and is therefore able to deal with municipalities and will therefore approach them with the greatest facilities on the most favourable terms for each.

The promoters of the Company will receive no remuneration from the proceeds of the undertakings but will look to the profits of the Company for payment of their services.

J. B. GLENN, Secretary (pro tem.).

MR LEWIS AND SON, 113 Strand.—The Royal London system of Mutual Assurance, Incorporated and Established as Tontine for upwards of 50 years by Mr Lewis, the great promoter and first founder of Local Boards, improved and only complete system yet practicable after a few short and interesting years. Premium required to take the benefits now within the inventor's works for self-support as in the wide Institution. 13 Strand.

GRANVILLE COLLEGIATE School, East Cliff, Ramsgate.—The Rev. Dr. Croly has vacancies for nine or two pupils. References kindly permitted to the Rev. John Gilmore, Rector of Trinity, Ramsgate, and to the Rev. A. Stowell Vidal, of Rochester House, Ramsgate, Chaplain to the Queen dowager. There are also vacancies in the Orthodox Preparatory School, which is conducted with strictly distinct forms, for the above.

CONSUMPTION.—DR LOCOCK'S WAFERS.—The father of the young lad who was cured sends the following:—"The Chemist, Pemberton street, Wolverhampton." "Dear Sirs,—Dr. Locock's wafers have done me exceedingly good indeed. I do not think I should have lived had I not taken the wafers. To Mr. J. Norman, 29 South street, Wolverhampton." Sold by Sanger, 150 Oxford street, Wholesale, Retail, and for Exportation. Dr Locock's wafers are sold by all druggists at 1s 1½d and 2s 9d per box.

HOLLOWAY'S OINTMENT AND PILLS.—Bodily and Cutaneous. The experience of [illegible] has proved by these healing remedies for every variety of wounds, sores, and ulcers, including those of a scrofulous character, and whether they be of the limbs or body. MR DUDLEY BAXTER'S WORK ON NATIONAL DEBTS.

Quoted by the Chancellor of the Exchequer in his Speech on National Debts, June 2nd, 1871 (see pages 9 and 15,).

London: Robert John Bush, 32 Charing cross, S.W.

CRACROFT'S BANK DIVIDEND CHART, 1870-71.—Showing the Half-yearly Rates of Dividend declared by over One Hundred and Sixty Joint-Stock Banks—United Kingdom and Colonial; with Nominal and Paid-up Capital, Number and Amount Paid of Shares, Date of Payment of Dividends, Reserve Fund, Liabilities, Market Price of Shares, January, 1871, and Yield per Cent, on Purchase Price.

Price 2s 6d; or, mounted on roller, 10s 6d.

Now ready,

CRACROFT'S CONSOL-DIAGRAM, showing the Highest and Lowest Prices of Three per Cent. Consols each year from the French Revolution of 1789 to the Franco-German War of 1870, with the growth and decline of the National Funded Debt of Great Britain; the Yearly Average of the Bank Rate of Discount, and Tabulated Statement of the principal Events affecting the Prices of Stocks.

Price 2s; or, mounted on roller, 3s 6d.

Will shortly be ready, the Second Edition of

CRACROFT'S INVESTORS' RECORD of PURCHASES and SALES, with CALCULATIONS Adapted to every Investment. An additional portion especially adapted for the Legal Profession, containing Forms of Entry for Freehold and Copyhold Property; Leasehold, Let and Held; Mortgages, Held and Effected; Insurances; Bills and Promissory Notes; Moneys Advanced or Borrowed.

"The object of this Memorandum Book is to enable every Investor to keep a systematic Record, producible in a Court of Law, of every investment transaction entered into. No such record was in existence previous to the first edition."

London: Effingham Wilson, Publisher, Royal Exchange.
Bernard Cracroft, 4 Austinfriars.

INVESTMENTS.—CAPITALISTS desiring to make safe and profitable investments should apply for the INVESTMENT CIRCULAR, published monthly, which contains valuable information regarding every kind of stocks and shares, together with selections of the best securities, returning from 5 to 20 per cent. Post free on application.—Bartlett and Chapman, Stock and Share Dealers, 38 Cornhill, E.C.

TO INVESTORS.
Now ready,

LAVINGTON AND PENNINGTON'S MONTHLY RECORD of INVESTMENTS, containing an exhaustive review of the British and Foreign Stock and Share and Money Markets, &c., with an enumeration of safe investments paying from 10 to 20 per cent. Price 6d per copy, or 5s annually.

G. Lavington and A. Pennington, 44 Threadneedle treet, London, E.C.

INVESTORS IN SEARCH OF GOOD sound Properties, paying 10 to 20 per cent. per annum, should send for Sixth Edition, BRITAIN'S METAL MINES, price 1s, or free per post 1s 1d, a complete Guide to their Laws, Usages, Localities, Statistics, and Share Market.

By JOHN R. PIKE,
Crown chambers, Threadneedle street, London.

LONDON INTERNATIONAL EXHIBITION of 1871.

The GENERAL PUBLIC are admitted EVERY WEEK-DAY EXCEPT WEDNESDAY, from 10 a.m. to 6 p.m., on payment of ONE SHILLING. On WEDNESDAYS the price is HALF-A-CROWN.

LONDON INTERNATIONAL EXHIBITION OF 1871.

Schools and Parties of Workmen from Manufactories, &c., may obtain reductions in taking 100 or more admission tickets at one time, according to the numbers taken.

Application to be made to the Secretary.

PARTNERSHIP.—WANTED, A Gentleman to purchase the share of a retiring Partner, in a first-class Wholesale Business in London, established above 50 years. Capital required about £15,000.—Apply to Y. Z., care of Mr Adam Burn, Solicitor, 33 Carter lane, Doctors' commons.

THE ADVERTISEMENT AGENCY of Rudolf Mosse, in Hamburg, receives advertisements at the cheapest possible rates in all continental newspapers. This advertisement agency has offices in all the principal towns, and can be recommended to all bankers, merchants, and manufacturers in England.—A catalogue of the newspapers, with prices of insertion, will be sent gratis and post free.

IMPORTANT INFORMATION.—Previous to the removal of our Cornhill Plate and Cutlery Warehouse to those new premises now building

OPPOSITE THE MANSION HOUSE,

we are selling on the premises, 71 and 72 Cornhill, London, the whole of our valuable stocks of Silver, Electro-Silver, Dressing Bags, and Fine Cutlery, at a discount of from 25 per cent. to 40 per cent. off our catalogue prices.

MAPPIN AND WEBB,
99 Norfolk street, Sheffield.

DEBENTURES AT 5, 5½, AND 6 PER CENT.

CEYLON COMPANY (LIMITED).

The Directors are prepared to Issue DEBENTURES to replace others falling due, viz., for 1 year at 5 per cent., for 3 years at 5½ per cent., and for 5 years at 6 per cent. per annum, also for longer periods on terms to be ascertained at the office of the Company.

R. A CAMERON, Secretary.
Palmerston buildings Old Broad street, E.C.

COMPTOIR D'ESCOMPTE DE PARIS.

Incorporated by National Decrees of 7th and 8th of March, 1848, and by Imperial Decrees of 20th of July, 1854, and 31st of December, 1866.

Recognised by the International Convention of 30th April, 1862.

	francs.	£
Capital fully paid up	80,000,000	... 3,200,000

Agencies at—

Lyons, Marseilles, and Nantes (France), Alexandria (Egypt), Calcutta, Bombay, Shanghai, Hong Kong, Saigon (Cochin-China), Bourbon (Reunion), and Yokohama (Japan).

LONDON BANKERS.
The Union Bank of London.
LONDON AGENCY—141 Leadenhall street, E.C.
MANAGER—Theod. Dromel.

The London Agency grants Drafts and Letters of Credit, and purchases or collects Bills payable at the above-named places.

The Agency will conduct banking business of every description with the Continent, India, China, &c., &c., &c., upon terms to be ascertained at the Office.

LONDON AND ST KATHARINE'S DOCKS COMPANY.

The Directors are prepared to issue, under the provisions of the Company's Act, a limited amount of FOUR-AND-A-HALF PER CENT. PREFERENTIAL STOCK, to be applied to the reduction of the Debenture debt. The net income of the Company, after payment of all working expenses, exceeds £325,000 per annum, being nearly thrice the amount of the Debenture interest. There is also an accumulating reserve fund, which now exceeds £165,000.—Application to be made at the Dock House, 109 Leadenhall street.

Dock House, 16th May, 1871.

MIDLAND RAILWAY.

MEETING OF THE ROYAL HORTICULTURAL SOCIETY AT NOTTINGHAM, June 27th to July 1st, 1871.

ORDINARY RETURN TICKETS issued to NOTTINGHAM from those Stations on the Midland Railway and Lines in connection where they may usually be obtained, on SATURDAY, June 24th, and intermediate days, will be available for the return journey on any day up to and including MONDAY, July 3rd, 1871.

EXPRESS AND FAST TRAINS leave the St Pancras Station, London, for Nottingham at 8.45, 10.0, and 11.45 a.m., 3.0 and 5.0 p.m., and Nottingham (Midland Station) for St Pancras at 8.40 and 11.35 a.m., 12.35, 3.15, 5.15, 6.40, and 7.10 p.m.

JAMES ALLPORT, General Manager.
Derby, June, 1871.

THE AJAX (BIG INDIAN) SILVER MINING COMPANY (Limited).

Capital, £40,000, in 8,000 shares of £5 each.

First issue, 6,000 shares, of which 4,000 are now offered to the public for subscription.

Deposit, Ten Shillings per share on application, which will be returned in full if no allotment is made, or with a reduction not exceeding One Shilling per share if the report of the engineer, to be sent out by the Company at the expense of the vendor, should not be satisfactory.

Prospectuses, with forms of application and all particulars can be had at the Offices of the Company, No. 2 Gresham buildings, Guildhall, E.C., or of the Broker, Mr H. H. Thompson, 12 Copthall court, Throgmorton street, E.C.

Cheques to be crossed, National Bank.

THE AJAX (BIG INDIAN) SILVER MINING COMPANY (Limited).

The LIST of APPLICATIONS for SHARES in this Company will CLOSE for London on Tuesday, the 27th instant, and for the country on Wednesday, the 28th.—By order, W. C. CRANE, Secretary (pro tem.).

2 Gresham buildings, Guildhall, E.C., June 21, 1871.

THE BEECHLANDS COFFEE ESTATES COMPANY (Limited).

Capital, £75,000, in 7,500 Shares of £10 each.

To be issued when fully paid up as Warrants to Bearer.

First Issue, 3,750 Shares.

Upon which £2 per Share payable on Application.

—	£2	—	— Allotment.
—	£3	—	— Sept. 15, 1871.
—	£3	—	— Dec. 15, 1871.

With option to anticipate the last two payments under discount.

SOLICITORS.
Messrs Halse, Trustram, Philpott, and Co., 61 Cheapside, E.C.
TEMPORARY OFFICES.
7 Great Winchester street buildings, E.C.

ABRIDGED PROSPECTUS.

This Company is being formed with the object, firstly, of working and extending the cultivation of the Beechlands Coffee Estate, situate in the district of Coorg, in the East Indies, and of acquiring the Government grant and the buildings and plant upon the estate; and, secondly, of acquiring, when opportunity offers, and cultivating other Estates in the same or neighbouring districts, the shares of the second issue being reserved for that purpose.

The coffee crop of last year, now about to this country, consists of about 58 tons. The crop of 1869 was about 48 tons, and the consignments to this country have realised in Mincing lane, owing to its generally superior quality, about 8 per cent. above the average price of Coorg coffee.

An estimate for the current year, made upon the basis of the figures and the expenditure of the last year, shows fully 5 per cent. available for dividend next spring, and the dividend will considerably increase from year to year, and is likely to amount to 24 or 25 per cent. on the capital in about four or five years, when the whole of the suitable land can be fully cultivated.

No promotion money will be paid in the formation of the Company, and if no allotment be made, the money deposited on application will be returned in full.

A copy of the memorandum and articles of association may be seen at the Offices of the Company's Solicitors, of whom, as well as of the Bankers and at the Temporary Offices, prospectuses and forms of application for shares may be obtained.

NOTICE.—The List of Applications for shares will be CLOSED on Monday, the 3rd July, for London, and on Tuesday, the 4th, for the Country.

PERRY DAVIS' VEGETABLE **PAIN KILLER.** FOR INTERNAL AND EXTERNAL USE.

DEPOT—17 SOUTHAMPTON ROW, W.C. Price 1s 1½d, 2s 9d, 4s 6d, and 11s per bottle. Inhaler, 2s 6d each.

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for June, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the month in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Railways, Banking, Finance, Insurance, and Miscellaneous Companies, New Companies and New Capital. Prices made up to June 28.

Advertisements for next Number, to be published on July 29, must be sent to ensure insertion on or before July 27.

OFFICE—346 Strand.

THE FRENCH LOAN AND FRENCH FINANCE AS THEY WILL AFFECT US.

THE success of the French loan is due of course partly to the hoarded wealth and partly to the patriotism of the French nation. They are, as is well known, of a most saving, often even of a most parsimonious, disposition, and now they are making their country better for the fruits of it. They have money, and they are ready to lend it to their Government; some persons may say that the mismanagement and the financial errors of M. Thiers' last speech would have alienated subscribers. But in no country do such persons scrutinize very closely what may be called the principle of finance; they have often not the time to do so, and if they have the time they have not the education. They only judge in a vague and general way. And for loose thinkers M. Thiers' statements were probably very useful. Any crafty broker would have said—"See you do not let France down; make some "proposals as to taxes, though it is not very material what; "and be sure to say something about paying off;" and these precepts M. Thiers observed, whether consciously or not. He refused to reduce the expenditure; he implied, if he did not say, that France was hereafter to be as great a country as she had ever been; he made striking, if not sound, suggestions as to taxes; and he said that 8,000,000*l* would be paid off annually, which he ought to have known, if he did not know, to be impossible.

We do not for an instant mean that France could not, under a sound system of finance, raise what is requisite. We believe she could. We believe even that many of the present taxes will yield considerable sums. The following will be approximately the rates on the most important articles of consumption; we say approximately, because some of the duties, those on wine especially, are difficult to calculate:—

		Old Tax.		New Tax.
Wine (in Paris)	per gal	4d	...	no change
— (in Provinces)	„	1⅛d	...	1⅜d
Spirits (in Paris)	„	3/5	...	5/4
— (in Provinces)	„	3/3	...	5/2
Retail licence duties for liquors	each	from 5/ to 13/4	...	doubled
Sugar (best quality)	per cwt	18/	...	24/
Coffee	per lb	4½d	...	6¾d
Tobacco (ordinary), selling price		4/2	...	5/

In Paris there is besides an *octroi* duty of 5d per gallon on wine, making the whole charge 9d, and an octroi on spirits of 1s 10d, making the whole charge 7s. The wine duties, therefore, on the whole are moderate as compared with ours; the spirit duties only half what we pay, and the tobacco duty is nearly the same as ours. The duty on sugar is heavy, and will, if really imposed, be sensibly felt. Still, there is evidently here a clear margin of taxation, out of which much may be gained. Much also may be expected from the stamps and the registration duties, though probably not all the 3,600,000*l* which the estimators set down. On the whole a large sum will be obtained, though it will not probably be enough to meet the deficit; a country in such singular calamities as France, and having on a sudden to add so largely to her expenditure, can scarcely expect to be without a considerable annual deficit for years. Still, enough will be obtained for all necessary purposes; and if there is an annual deficit of some millions to be met by borrowing, it will not be fatal to France. In time things will right themselves.

Two consequences, however, of considerable importance may be expected to occur to England from the present state of things. First, in the money market we can no longer anticipate a rise in the value of money from the French loan; on the contrary, new money which has never been on the market before will be extracted from the French provincial hoards, and this will tend to reduce the rate of interest. And the Germans are using the money to pay off their debt, which takes a security out of the market, and again tends by lessening the demand to augment the value of money.

Secondly,—what is a much more novel subject,—the whole stipulations of our French Treaty, and of the corresponding treaties of France with other countries, are vitally affected by the new proposals.

By the English treaty, the import duty on the most important materials of textile manufacture stands thus:—

	s	d
Flax ..... per cwt	2	1
Jute	Free.	
Cotton (from India)	Free.	
Wool (raw, Australian)	Free.	
Silk (in cocoons, raw or thrown)	Free.	

but now all these articles are to be subject to 20 per cent. The Treaty with England therefore must be modified, and the treaties with other powers likewise. We have a right to require the full twelvemonth's notice before any duty inconsistent with the Treaty is imposed; and no doubt, in justice to our own manufacturers, we shall require full notice, and the delay will prevent many of the taxes on which French financiers are calculating from coming into operation so soon as they appear to estimate.

With respect to a great many of our manufactured goods there will also be a most important change. One rule of the Treaty is as follows:—"It is further "understood that if drawbacks are granted to other articles "of French manufacture, the duties of Customs which are "imposed upon similar articles of British origin in manu- "facture shall be augmented by a surtax equal to the amount "of the drawbacks."—(Supplementary Convention, Nov. 16, 1860, Art. 3.) Consequently if the principle of the Treaty is adhered to (as nominally at least it probably will) our manufacturers will be subjected to a duty equal to a drawback allowed to the French manufacturers. But how difficult it will be to settle what that drawback shall be. Take the case of a silk dress. France has silk of her own. Who is to settle whether the dress has been made of silk which has paid duty or silk which has not paid it? And in the case of mixed fabrics extreme difficulties will arise. As soon as an attempt is made to have a high and complex tariff a hundred unexpected difficulties arise. That attempt France is now making, nor can she escape those difficulties, and we who trade with her shall in a certain degree feel them too.

THE FOREIGN SPEECHES AT THE COBDEN CLUB.

Mr Cobden would not be always particularly well pleased at the speeches which are made in the name of Free-trade at the Cobden Club, but it would, we are sure, have given him the liveliest pleasure to hear the vigorous protest of M. Arles Dufour against the revival of a Protectionist system in France. M. Arles Dufour well understands what we ventured to point out a week ago, that the expedient of raising a vast additional revenue by Customs' duties cannot, at least in the hands of such Protectionists as M. Thiers and M. Pouyer-Quertier, issue in anything but a highly protective system for France. What France needs in her distress—distress both moral and physical—distress arising as much from the restlessness of the political working men as from the exhaustion and suffering of a long and calamitous struggle—is the fullest development for her manufacturing and commercial energies, and this Free-trade alone can ensure her. As it is, M. Thiers appears to be intending to drain her resources at the very time he is throwing new burdens upon these resources—to interpose artificial obstructions to the development of her industries just when he needs to reap the greatest harvest from those industries. If he could not have covered the necessary increase in the interest of the debt by reductions in expenditure,—an attempt which he not only did not choose to make, but even did not wish to seem to make,—M. Thiers should, at least, in common prudence, have striven to impose such new taxes as would not drain the springs of French wealth; and perhaps, in his Protectionist infatuation, this is precisely what he thinks he can do by the liberal increase of Customs' duties. As M. Arles Dufour very justly says, the statesmen at the head of affairs in France seem determined to learn nothing from the most striking lesson France has had. If one lesson has been more striking than another, it is that the policy initiated by the Emperor in the Cobden Treaty, whatever else it did, caused almost incredible additions to the wealth of France, and gave her, as far as mere riches are concerned, the means of meeting the mighty reverses which the political imprudence and folly of the Empire brought upon her. But M. Thiers will not learn either from the folly or the wisdom of the Emperor. The folly he imitates, by preparing for war before he has even paid the penalty of defeat; the wisdom he neglects. If he is so eager to launch France again on the reckless career to which the immediate strengthening of both army and navy point, why not at least adopt M. Arles Dufour's wise recommendation of attempting to raise the bulk of the new taxation from direct imposts? Is he afraid that that would cause a reaction against the military policy? Or does he in his miserable economical blindness really believe that he can add more to the wealth of France by reversing the policy of Free-trade than the Empire added by adopting it? Whatever be the answer to this question, it may at least be safely asserted that M. Arles Dufour is a true pupil of Mr Cobden's,—that however little he may share that eminent man's strangely credulous belief that the self-interest of the world is always stronger than its passions, he knows thoroughly where that self-interest lies, how national resources are best replenished, and how nations are most surely impoverished. Mr Cobden did not convert France either to peace or to Free-trade; but he did at least leave behind him there some who had grasped thoroughly the principles of his teaching, and who can utter a protest against the views now in the ascendant, of which he would not have been ashamed.

If the representative of German economy, M. George von Bunsen, has been correctly reported, we can hardly compliment him on having an equal right to speak as a true member of the Cobden Club, and as having mastered the simple economical principles of the great evangelist of Free-trade. The close of his speech exhibits a singularly distorted conception of what the real meaning of Free-trade as distinguished from Protection is. After stating what no one will be surprised, but everyone will be glad, to hear, that Prince Bismarck is eager for economic progress, he went on to hope that the day might soon come, eventually, he said, it must come, when "America and Europe (that vast empire of Russia, I hope, in- "cluded), on their triumphal march towards no tariff at all, "shall take a firm stand on the first great step towards it, an "equal world-tariff." Now it is impossible to imagine a step which leads more completely out of the way towards "no tariff "at all" than an "equal world-tariff." "No tariff at all" of course means supplying all the wants of Government by direct taxation, and leaving therefore the various natural advantages of various countries to work without obstruction or impediment from Customs duties. We say nothing of this as a practical suggestion. We admit of course that it does realise perfectly the ideal of Free-trade, though we are by no means prepared to admit that the various and great inconveniences involved in raising your whole revenue by other taxation—while nations are no richer than they are—are not more than a set-off to the advantages of such a system. But since M. George von Bunsen must be well aware that "an equal world-tariff" is not only not an advance towards no tariff at all, but in the case of very many countries would be a great retrogression from it, unless indeed he means to propose that wherever any country puts on a customs' duty on any home-product for the sake of conforming to the wishes of the rest of the world—a very difficult sort of thing, one would suppose, to interpret—it should also put on an equal Excise duty to prevent that Customs' duty from "protecting" the home-product. He can hardly mean this, for a more absurd suggestion can hardly be imagined than that countries which import hundreds of thousands of articles free of duty—perhaps manufacturing like articles also at home—should deliberately adopt the clumsy machinery of a Customs' duty, and (wherever like articles are manufactured at home) an equivalent Excise duty in order to meet the views of a majority of other countries which happen to wish to tax those articles. The notion of a World-Congress to determine what articles shall be equally taxed all over the world,—the countries which produce those articles being bound to put on an Excise duty as well as the Customs' duty,—is one of the wildest flights of fancy of which an economist was ever guilty. It is hardly possible to suppose that any man ever deliberately contemplated such a waste of wealth and labour, and such a gratuitous invention of superfluous restrictions as is involved in the conception of equalising the various tariffs all over the world,—in proposing, for instance, that because we must raise money by sugar and tea duties, tea and sugar-producing countries should impose an equal duty, and then impose an Excise on the home culture in order to prevent the duty from acting as a protection against competition. Such a wonderful suggestion as that can hardly have been in M. George von Bunsen's head. Yet

if he did not mean that—he can hardly have meant anything. If the doctrines of Free-trade be true, Customs' duties, while they continue to be raised at all, should not only *not* be equal all over the world but should be different. The teaching of Free-trade is that the natural advantages of various countries should never be interfered with by the tariff. As a rule each country should by preference raise its Customs' revenue by duties on articles which it does *not* produce, in order to avoid any influence which such duties have in protecting the home-product. When, as in the case of the spirit and malt duties in England, this is not possible, an Excise duty should be put on to balance the Customs' duty, and to prevent the producers of the importing country from reaping any advantage by the tax. But this of course implies that quite different articles should be taxed in different countries, those being always selected in preference which the countries do not produce. Farther, economical doctrine teaches that the fewer and simpler your revenue-raising expedients, the less obstruction is there to trade, and the nearer we attain to real freedom of trade. Even pure revenue duties, if they are very numerous and very complex, become a serious obstacle to the exchange of commodities between different lands. If China and England had equal tea-duties, the tea-duties in China would operate to prevent Assam teas coming in to compete with China teas, while the tea-duties in England would have no such effect. But if to prevent this China were to impose an Excise duty on the growth of tea, or cause it to be grown and prepared "in bond," the whole industry would be fearfully hampered, and its development most seriously obstructed. So again, if England and America were to impose equal duties on manufactured cottons, the industries in both countries would be mischievously "protected," and there would be nothing whatever in the equality of the duty to secure that both countries would even be *equally* protected. For in whatever country the conditions of the productive industry are the least advantageous, the protective duty would of course operate with most mischievous effect. England has nothing to fear from American cottons, and the duty therefore at present would not operate protectively as against America, though it would operate protectively as against France. But America has everything to fear from English cottons, and the American duty would therefore operate protectively as against England. In short, it is not easy to conceive how any thinking Free-trader could talk for a moment of an equal world-tariff as a step towards no tariff. If the advantages of all nations for all sorts of products were the same, why then no doubt an equal world-tariff would be a step towards no tariff. But as in fact they are very different, and as the whole drift of the teaching of economy is to teach us how to utilise the difference, how to economise and secure the labour of each by devoting it to what it can do best, and allowing it to exchange its surplus for the surplus of countries which can produce other articles better,—there can hardly be conceived any more ill-judged and oppressive system of tariff than an equal world-tariff, however that may be interpreted. Mr Cobden has still to make posthumous converts to his principles from amongst the members of the Club that bears his name.

THE HALF-YEAR'S RAILWAY TRAFFICS, AND PROBABLE DIVIDENDS.

It is now quite evident that the increase of railway traffic during the present half-year is quite as remarkable as the increase in the two previous half-years, if not more remarkable. We are still without returns of the last week of the half-year in the case of most companies, and of the last five weeks in the case of a few companies which do not close their accounts till the end of July, but the increase already shown places the nature of the current half-year beyond a doubt. The war has left no apparent mark on the growth of our national prosperity. Like the increase of the revenue, the increase of railway traffic tells of nothing but extending business, increasing employment for the masses, and the increasing consumption of common articles. So far as the railway shareholder is concerned, his half-year's increase of traffic is likely to be even more satisfactory than those which have lately done so much to improve the selling value of his property. It is always the last additions which are the most profitable, and this maxim is now especially true as regards railway property, since the depression of previous years had left some traces of injury which it required the first improvements of traffic to remove, and it is only now that some companies will come into the unencumbered enjoyment of their new profit. Another cause of satisfaction to the shareholder is the large part which is due to passenger traffic in the increase which has taken place. A passenger increase is more favourable to the shareholder than a goods increase, as it requires a slighter increase of working expenses to earn it. The two should go together in the most prosperous state of railway property, but a revival is usually commenced by an increase of goods traffic, and the increase of passengers is a sign of an advanced stage of improvement. This portion of the increase has not been so great as was at one time anticipated, the recent weather having been very unfavourable to passenger traffic; but it is still rather more than was the case in previous half-years, when the increase was almost wholly in goods. The increase of traffic is thus a subject for congratulation both by the whole community and by the railway shareholder, and may be viewed with the more satisfaction as likely to be of some duration. The revival of trade which is in progress can hardly in any event meet with a check for some time, and a good harvest this year would insure its long continuance.

We subjoin two tables, which we hope will throw some light on the increase of traffic and the improvement of railway property which it indicates. The first is a statement relating to the increase of traffic, showing the percentage of that increase, first, upon the traffic of the corresponding half-year of 1870, and next, upon the amount available for ordinary dividend in that half-year. The figures of the increase are partly estimated, but we have simply assumed that the average weekly increase to June 17 will be maintained to the end of the half-year, and this will leave but a small margin for error. The second statement carries out the first, and shows the probable effect on the half-year's dividend, making allowances for working expenses in earning the additional capital and for new interest and preference charges. It is difficult to make these estimates exact, but we have endeavoured to underestimate the probable gain to the companies.

The results shown by the first statement are at least unquestionable. The broad fact is that the gross increase of traffic on eighteen lines, including all the principal railways, will be about 1,048,000*l*, or 5¾ per cent. on 18,540,000*l*, the total traffic of the corresponding half-year of 1870. This increase includes no doubt one or two items like that of the Metropolitan District Railway, which are due to the opening of new mileage; but these are too small to affect the aggregate materially. On the other hand, the increase on some of the great lines is very striking indeed—in the North-Eastern, 8 per cent.; in the London and North-Western, 5 per cent.; in the Lancashire and Yorkshire, 9 per cent.; Great Western, 7 per cent.; North British, 6 per cent.; and Caledonian, 5½ per cent. When it is considered that it is the last additions which tell in the matter of profit, there is plainly a large margin for improvement in such figures.

But this is looking to the gross traffic merely. The real comparison, as we have often insisted, has to be made between this increase and the net dividend formerly available for the ordinary shareholder. On the average, the ordinary capital is only about a third of the whole capital of a company; in many cases it is much less. Consequently a sum which is equal to from 5 to 10 per cent. on the gross traffic will be sometimes equal to 50 per cent. or more on the sum available for dividend. Reckoning in this way, we find that the gross increase of traffic looks very large in many cases when compared with the sum divided among the ordinary shareholders for the corresponding last-year of 1870. In one or two cases, such as the Great Eastern, this arises from the smallness of the amount formerly divided; but in cases where the former dividends were respectable, we find that the gross increase of traffic, calculated on the net revenue of the corresponding half of last year, is as follows:—Great Northern, 17 per cent.; Lancashire and Yorkshire, 25; London and North-Western, 20; Caledonian, 8.4; Great Western, 82; and North-Eastern, 29. Of course the whole increase of traffic is never a pure gain, but a very large part of it should be so, and in the present state of most companies is likely to be so.

We come then to the more exact comparison, which is the object of our *second* table, and the results here shown, which we believe to be not very improbable, are equally striking. In many companies it is all but certain that the addition to the dividends will be at least what is stated, and the amounts will probably be exceeded. The influence of the circumstances, which we referred to at the outset, is very conspicuous. The fact that the companies have, to a large extent, got free of old difficulties is shown by the comparatively slight increase of preference and debenture charges. The closing of capital accounts will this year be more felt than ever. Railway companies are also benefiting largely by the continuation of the process of substituting debenture stocks, often at a lower rate of interest, for the debenture loans falling due. The actual gain in a particular half-year may not be much, but it assists other gains, and neutralises the effect on the dividend of a moderate increase of capital, which is all but imperative when companies have a growing business. In one or two cases also, such as the Brighton Railway, there are other old difficulties which are coming to end. For these reasons the margin of profit is very little encroached upon by new preference and debenture charges. As regards working expenses again, it may be assumed, with tolerable certainty, that in the case of some companies the new traffic will not have been earned at the same cost as the whole traffic of the corresponding half-year of 1870, which we have made the basis of our calculations. We calculate in this way in order to make sure of underestimating. In some cases there may be little room for error, the increase of traffic having been in goods, and having been earned perhaps by a keen competition; but in the case of one or two passenger or mixed lines, such as the southern lines out of London, or the Great Western, the allowance for working expenses is probably much too high. Notwithstanding this unfavourable mode of putting the case, however, the probable increase of dividends is most remarkable. If railway property were to progress at this rate for a year or two longer, the ordinary shareholder would in all cases be in a better position than he has ever been.

Assuming that the improvement in the second half of the year will be as great as in the first, we should probably have the following as the *minimum* railway dividends for 1871 :—

ESTIMATED MINIMUM DIVIDENDS FOR 1871.

	Rate per Cent. per Annum.— 1st Half-Year.	2nd Half-Year.	Total for 1871.	Total for 1870.
Bristol and Exeter	4l 8/	5l 18	5l 3/	4½
Caledonian	4½	5½	4½	3½
Glasgow and South-Western	5½	5½	5½	5½
Great Eastern	½	2	1½	½
Great Northern	5½	8½	7½	6½
Do A	5	11½	8½	7½
Great Western	4½	4½	4½	3½
Lancashire and Yorkshire	7½	7½	7½	7
London and North-Western	6½	7½	7½	6½
London and South-Western	4½	5½	5	4½
London and Brighton	½	1½	1	½
Sheffield	½	2	1½	1½
Metropolitan	3½	3½	3½	3½
North-Eastern	8½	9½	9½	7½
South-Eastern	3	4½	3½	3½
Do A	...	2	1	½

These dividends, compared with those of last year, show no small improvement of railway property, and we must again repeat that our mode of calculation rather tends to an under estimate. Thus, in Great Western it is almost certain that the new traffic will be earned not at the old rate of working expenses, but at a very much less rate. If we calculated the new working expenses at 30 per cent. of the new traffic instead of 47 per cent.—as we might fairly do—the dividend for the year would be 5 and not 4½ per cent. Similar remarks would apply to the London and Brighton and South-Eastern lines, with perhaps even more force, the increase in these cases being still more largely in passengers. It would be tolerably safe to calculate that the addition to each half year's dividend would in the case of the Brighton be nearer ½ than ½ per cent., as we have reckoned it above, and in the case of the South-Eastern nearer 1 per cent. than ½ per cent. There are also special circumstances affecting one or two lines which it is difficult to estimate—the Metropolitan, for instance, as we have been informed, having made some progress in diminishing its dead capital by the sale of surplus lands. But, even without reckoning these causes of improvement, the apparent improvement which is taking place this year in English railway property is most striking. And in general the improvement is genuine. There are one or two cases which we need not specify where the lines we fear are not properly equipped, and too little has been deducted for working; but these cases appear to be exceptional.

I.—INCREASE of GROSS TRAFFIC of ENGLISH RAILWAYS.

Gross Revenue, 1st Half-Year, 1870.		Increase of Gross Revenue, 1st Half-Year, 1871. Increase to June 17. Amount.	Estimated Addition in Half-Year. Amount.	%	Net Revenue, 1st Half, 1870. Ordinary Dividend.	Rate of Dividend % p. a.	Percentage of Traffic Increase on Net Revenue.

18,540,000		921,746	1,048,000	5½			

* There was an extra item of 23,000*l* for compensation. † For interest.

II.—ESTIMATED ADDITIONS to DIVIDEND compared with 1st Half of 1870.

	Working Expenses on Increased Traffic. %	Amount.	Increase or Decrease of Preference & Debenture Charges.	Total New Charges.	Probable Addition to Net Revenue. Amount.	Rate % p. a.	Total Estimated Div. 1st Half '71.
		£	£	£	£		
Bristol and Exeter	43	2,150	(−1,300)	850	4,000	¾	4½
Caledonian	48½	26,675	4,000	30,675	25,000	1	4½
Glasgow and South-Western	44	2,992	4,800	7,792	(−1,000)	...	5½
Great Eastern	52	11,960	24,000*	11,960	11,000	¼	¼
Great Northern	52	17,160	(−3,700)	13,460	19,500	¼	5½
Do A	...	...	...	...	...	1	5
Great Western	47	66,740	13,500	80,240	62,000	1¼	4½
Lancashire and Yorkshire	45	50,850	9,000	59,850	53,000	¾	7½
London and North-Western	46	84,180	28,000	112,180	71,000	¼	6½
London and South-Western	54	17,280	10,000	27,280	5,000	¼	4½
London and Brighton	54	17,280	2,500	19,780	12,000†	¼	½
Sheffield	49	9,800	26,000	35,800	(−15800)	−½	½
Metropolitan	43	3,010	11,000	14,010	(−7,010)	...	3½
Midland	47	53,580	44,000	97,580	16,500	¼	6½
North-Eastern	44	77,440	nil.	77,440	99,000	1¼	8½
South-Eastern	46	12,880	(−1,400)	11,480	16,500	¼	3
Do A	...	...	...	...	...	...	...

* We note this increase, but as the Great Eastern is authorised to charge the interest for constructing its Metropolitan Extensions to capital, the amount will not affect this half-year's accounts.

† As it was the extra charge for compensation which caused last year a deficiency of net revenue, we calculate that the difference between the addition to the gross traffic and the addition to the working expenses will now be available for dividend.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending June 24 :—

	Receipts of Week Ending June 24.
	£
Customs	320,000
Excise	360,000
Stamps	161,000
Taxes	17,000
Income tax	31,000
Post Office	60,000
Telegraphs	120,000
Crown lands	nil.
Miscellaneous	48,078
Total	1,117,078

The total receipts of the previous week were 2,282,000*l*.

The Exchequer issues of the week on account of expenditure were 520,000*l*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	nil.
Supply services	520,000
Telegraph services	nil.
	520,000

During the week the cash balances have increased as follows :—

	Bank of England. £	Bank of Ireland. £	Total. £
Balances on June 17	4,853,781	1,083,804	5,937,585
— June 24	5,290,659	1,192,504	6,483,163
Increase	436,878	108,700	545,578

The other receipts to date were 1,300*l*, the other payments were 52,800*l*.

BUSINESS NOTES.

GERMANY AFTER THE WAR.—The following description, extracted from the *Volkszeitung*, of the effect of the late war on German industry cannot but be interesting to our readers. It is only in such descriptions that we can perceive the full loss to Germany from her military system, which in time of war withdraws the strength of the nation from industrial pursuits:—

The war has not only interrupted work, but has destroyed thousands of places of work. The four million thalers, which are to be spent for the assistance of those who have suffered loss, are as a drop on a hot stone which, hissing, drops on to it, and in an instant disappears in smoke. Thousands of men of the Landwehr and Reserve return to their homes crowned with victory and covered with wreaths, but they find their dwellings destitute, their wives in want, their children neglected, their workshops destroyed, their customers dispersed, their credit shaken, and the want of their manufacture lessened. Their rent is still due, which has accumulated for a year. New tools have to be bought, which their wives in time of distress have either pawned or sold. Materials have to be laid in stock, to enable them, in case of an order being given, to begin work. Repairs and clothes are necessary. The bakers, butchers, and retailers have got to be paid. It work is not begun at once the cry of distress will soon be distinctly heard as the case of rye-bread.... All our small trades are founded on the credit allowed them by the great dealers. They never pay ready money but by a Bill of Exchange, which delays the payment until their goods are sold. The unusual supplies of the War year have increased the small bills to enormous sums. As long as the owner of the business was in the field two bills were prolonged. When they return home the bills have to be taken up if they wish to begin work again, and their distress becomes greater as they are obliged to begin again with renewed vigour. The same journal very properly points out that the French indemnity will not compensate the private losses of Germany. The payment of it will impoverish the customers of Germany, and German industry will gain nothing directly, because the money will be largely used in replacing munitions of war, and otherwise assisting warlike operations. The German triumph is thus far from unalloyed, and as France has suffered far more it would be difficult indeed to measure the net suffering of the two belligerents.

THE CALCULATIONS OF FOREIGN DEBTS.—In a note to a second edition of his book on National Debts, Mr R. Dudley Baxter calls attention to a substantial difficulty in reckoning the amount of foreign debts, and in comparing the debts of the same nation at different times. This is the difficulty caused by the existence of a depreciated currency of changing value. Mr E. Plener, he states, had maintained with reference to the Austrian debt that in converting it into English money the rate of exchange on London at 125 should be considered, and that this would show the capital to be 255,000,000*l*, instead of 285,000,000*l*, the sum arrived at taking the florin at 2*s*. Mr Baxter however thinks that the practical difficulties in the way of computing the amounts of foreign debts at anything but the nominal par value, especially when the object is to compare debts at different periods, are so great that the attempt would introduce great confusion and uncertainty. "Their amounts "would vary with every variation of exchange, and be different "according to the place of exchange selected." All this is very true, but great as the difficulties are, we are not sure but that it would be best, where it is possible at all, to make the statements of national debts conform to some less fluctuating standard than that of a depreciated paper currency. The confusion and uncertainty are not caused simply by the attempt to translate the debt into foreign money, but exist in the home statements of the debt. It is only one more of the evils of depreciated paper that it makes the real burden of the debts and taxes change with every fluctuation of the gold premium. But that changes in the indebtedness of a nation are thus effected is a fact which ought to be recognised as well as any other, and whenever accordingly a State has a depreciated currency, it becomes desirable, if possible, to distinguish between the nominal and the actual amounts of its debt. This may very easily be done by allowing for the gold premium at the financial capital of the State, or the rate of the short exchange upon some adjacent country which happens to have a gold standard. Minute accuracy is not necessary, but changes of 10 or 20 per cent. in the premium would always be worth showing. In some cases there would be a peculiar difficulty, owing to a doubt whether the debt is payable in gold or paper, but that doubt, as far as we know, only existed in the case of America, and is a fundamental difficulty as to the amount of the debt itself.

A SHIPMASTER'S DISCRETION.—A case—Evans *v.* M. Le Blanc—has just been tried at the Guildhall by the Lord Chief Justice and a jury, illustrating very well the difficulty of the points about which a master must exercise his discretion, and the serious consequences of mistakes. The defendant, a ship broker, had chartered a ship of the plaintiffs from the Thames to Montevideo for a lump sum of 640*l*, and "the "captain was to receive such freight as the charterers might "have payable abroad." Part of the cargo taken was 80 tons of coals, which lay at the bottom of the vessel, and were to be discharged at the risk and expense of the consignees, and the dispute arose in respect of this part of the cargo. The ship arrived in the middle of January, 1870, at Montevideo, but there was no one to receive the coals, although advertisements were put in the papers; ultimately the captain applied to the Tribunal of Commerce, and received authority to sell the coals for payment of the freight. The freight however was 108*l*, and the coals only realised 30*l*, leaving a balance of 78*l*, which was now claimed from the charterers, besides 372*l* for demurrage at the rate of 4*l* a day, and 75*l* 10*s* for law and other expenses. To this claim part of the defence was that the cause of the delay was the fault of the master, who was not bound to apply to the Tribunal of Commerce, and ought to have acted on his own discretion. In charging the jury the Lord Chief Justice adopted this view. He also ruled in favour of the defendant on the point that the charterers were only bound to pay a lump sum, and held that as the demurrage was the master's own fault, the only charge that could be made for it was 4*l* a day during the fortnight it would have taken to discharge the coals. The items of law expenses were 55*l*, out of the above sum of 72*l* 10*s*.

REASONS FOR WINDING-UP.—The Master of the Rolls has had just before him, in the case of the Ickles Rolling Mill Company, a question as to when an order can be made for winding-up a company on the ground of its being "just and "equitable" so to do. The petition was presented by two out of eleven shareholders, holding 283 shares, including the vendor of the business, about whose right to vote in respect of the fully-paid shares allotted to him for the purchase there was however a dispute, and it was also supported by all the unsecured creditors. On the other hand, it was opposed by the holders of 155 shares. Notwithstanding this support of the petition, the Master of the Rolls held that as the company was not actually insolvent, though it had made losses, nor a bubble company, nor had the members passed a resolution requiring the company to be wound-up, he could not order it to be wound up under the "just and equitable" clause. He could not assume that a company with only two years' experience would not be ultimately successful. His Lordship at the same time refrained from pursuing the usual course of ordering a meeting to be held for the purpose of considering a resolution to wind-up, "as there apparently was a squabble "among the shareholders, which his Lordship could not "decide."

"UNCONSCIONABLE INTEREST."—We regret to see that the Lord Chancellor has affirmed on appeal the decisions of the Vice-Chancellor in the cases of Tyler *v.* Dicker and Tyler *v.* Yates, releasing the estates of Lord Arthur Clinton from the "excessive and unconscionable" interests and discounts included in the loans for which a charge was given upon the estates—holding that the charge was good only for the sum actually advanced, with 5 per cent. interest. We suppose the law must be considered well settled; but its mischief in point of policy is so glaring, so contrary to the recent aim of legislation and judge-made law about the enforcement of clear and distinct contracts, that we can hardly doubt the ruling of the Judges will have to be corrected just as the usury laws had to altered. If the Judges, when a contract for a loan comes before them, are to decide what charge for interest is unconscionable or not, no lending contract is really safe. There is no distinct line to be drawn, and the most innocent bargains may be upset. The Judges are shocked at 60 per cent. now, but there is nothing to hinder them from being shocked at 16 or 6 in future. In truth no contract will be safe, for by the same rule of interpretation, the Judges may object to excessive and unconscionable prices or stipulations. There is no saying what will happen if the simplicity of the rule of enforcing plain contracts between people who are competent to contract is once departed from. It is a different matter where there is

fraud or undue influence, but the charges of fraud in the present case had to be withdrawn. And as to the hardship of dissipating estates and ruining men of good family, we confess we rather think it is good for the community that large property should pass very quickly out of the hands of people who make such contracts as those which the Lord Chancellor has just upset.

DISTINCTIONS WITHOUT A DIFFERENCE.—A good deal of the unpopularity of the income tax undoubtedly arises from the roughness of its assessment. We do not think that this roughness, as a rule, is inexpedient. A tax must before all things be intelligible, and if over refinement were attempted, its value as a means of raising money would disappear. But where obvious injustice is perpetrated by the working of an arbitrary rule, which is not a whit more plain and intelligible than a juster rule would be, there is a clear case for the income tax authorities modifying their procedure. Such a case is apparently shown in the grievance of the officers of the navy in regard to their travelling expenses, which has formed the subject of recent questions by Mr Bentinck to the First Lord of the Admiralty. According to Mr Goschen's replies, income tax is not charged on the amount allowed for the travelling expenses of officers when they state the amount of them in detail; but it is charged when the officers claim the maximum rate allowed, without showing the details. But this is surely a distinction without a difference. The maximum allowance, it is to be assumed, would not be made by the spending department without some computation of the cost, and for all the money the tax on the allowance would bring in it is not worth while putting it on a different footing from the allowance of expenses exhibited in a detailed account. In any case the officers should be allowed to deduct the actual cost of their travelling in such cases from the gross allowance in calculating the addition made by it to their income. Very probably the grievance is a sentimental one—the officers in question probably gaining by taking the gross allowance, even after the deduction of the income tax from it; but it is this sort of grievance nevertheless which is apt to make people angry with the tax. There are many other cases in which the income tax authorities are stingy about deductions with very little cause, and we fancy that somewhat more care would pay. A taxpayer under Schedule D will always be specially annoyed by having to pay on a gross income which he knows to be not really available to him—which, on the contrary, is earned at an expense the authorities will not allow for.

A CENTRAL METROPOLITAN STATION.—There ought to be some provision for printing and distributing in the usual way so-called private bills, which are really of great public interest, along with the report and evidence given before the select committee which inquires into them. Last week it is reported, the select committee had passed the preamble of a Bill for creating a Central Metropolitan Railway Terminus—a measure which has a double interest for the inhabitants of the Metropolis, in one way as increasing or altering their facilities for travelling, and in another as occupying a large part of the business area to which they are confined. Strictly speaking too the whole country has an interest only second to that of the inhabitants of the Metropolis in both these objects, the efficiency of the business arrangements of the metropolis being a matter of concern to everyone. But of this great scheme, just as in the case of similar schemes which have been dealt with in late years, the public hear too little. The usual notices were no doubt given last November to private owners, and the public could gather from them in a general way what property was to be taken and what companies were interested; but this is a different thing from a complete discussion of the nature of the concession required, and the advantages offered to the public. So little is known of these affairs that the short announcement of the proceedings of the select committee, sanctioning the "principle" of a Central Railway Terminus between Holborn Viaduct and Farringdon street Station would probably excite some surprise. It would certainly be most interesting if the select committee would publish their evidence, showing in detail the nature of the proposed junctions, the contemplated expenditure, and the degree of use which would probably be made of the Central Terminus.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, June 29.

The new loan of two *milliards* (80,000,000*l*) in 5 per cent. stock has been brought out more quickly than was expected. A public subscription was opened on Tuesday, the price fixed being 82f 50c, payable 12f down, the rest in sixteen monthly instalments from the 21st of August, 1871, to 21st November, 1872, with 6 per cent. discount on those paid in advance. The subscription, it was intimated, would be closed as soon as the amount required was offered, but in no case would be kept open later than the 30th. In reality, a single day sufficed for it, and early yesterday (Wednesday) morning placards on the walls made known that it was closed. In the afternoon M. Pouyer-Quertier announced to the Assembly at Versailles the complete success of the operation. "The subscription commenced," said he, "at ten o'clock in the morning all over France, in all the offices of tax-gatherers, and in all the banks of Europe; even also in Bombay, Calcutta, and the towns of India." [This mention of India is represented in the Parliamentary report to have caused "prolonged sensation"—it was occasioned by telegrams having been received from the agencies of the Comptoir d'Escompte at Bombay and Calcutta, stating that subscriptions had been made there.] "The success of the loan proves," continued the Minister, "how much abroad as at home immense confidence is felt in our unfortunate country, which successive and unmerited catastrophes have plunged into the most deplorable disasters. The figures, gentlemen, are eloquent in themselves; yesterday, in the space of six hours, we united in the name of France a sum of 4,500,000,000f (180,000,000*l*). Yes, four and a half *milliards*, that is double the sum that we asked for." This drew forth loud expressions of enthusiasm. The Minister then declared that the result had been obtained without the Government "having employed any factitious means, or spent a penny on the Bourse," and that it was owing to the patriotic co-operation of the press, to the all-powerfulness of the credit of France, to the confidence she inspires to all Europe, and to her honesty, known in every part of the globe." At this there was more enthusiastic applause. The Minister then gave these details:—At Paris the subscription amounted to 2,500,000,000f; in the country to more than 1,000,000,000f; foreign countries to a little less than 1,000,000,000f. He remarked with pride that France had "the greater part in the honour of the loan," and declared that the success of it "exceeded the hopes of the Government, and would permit it to fulfil more rapidly than it had expected its engagements to Germany—to, in fact, do so much before the time imposed on it." The Chamber expressed its approbation in a most boisterous manner.

The triumph of the loan is certainly great, but not more so than might have been counted on after the prodigious results obtained by public subscriptions to the borrowings of the Empire. In saying that the Government did not employ factitious means, the Minister was not quite correct, for it not only made newspapers preach up the loan, but communicated to them strings of telegrams from London, Madrid, Vienna, Turin, and other towns, representing that foreign bankers were going wild about it, and that foreign journals vied with each other in vaunting it as the best and most profitable investment ever offered to the world. In stating, too, that in six hours the Government had "united" 4,500,000,000f (the word is *reuni*, and might in this case be translated "collected"), he decidedly exaggerated a good deal. What is true is that 4½ *milliards* were "demanded," which is very different, and moreover the greater part of the sum was asked for without the slightest desire to get it, and without the means to pay for it if granted—with, too, the intention to sell on the Bourse the portions obtained without delay, in order to profit by the premium to which the loan had been driven.

At one time the general expectation was that the greater part of the loan would be subscribed abroad; and strange tales were told of the enormous amounts Rothschild, Baring, Coutts, and other magnates of London had ready to invest—40,000,000*l* sterling by one, 12,000,000*l* by another, and so on; also of incalculable millions that were waiting to come from Berlin and Frankfort. It ought to be gratifying to the French to see that foreign capitalists care less and their own countrymen more for the *affaire* than was stated. In the French subscription the stockbrokers of Paris took a large part—66,000,000f *rente*, not capital it is said. The Société Générale and other credit companies, also the principal assurance companies, and the leading bankers of Paris, likewise liberally aided the Government.

The establishment of a French Financial Commission at London in connection with the loan occasioned some surprise. The surprise was not unmixed with pleasure, for it was said that in paying English holders at a fixed rate, and in English money they would be more favoured than French, if by chance the

Bank of France notes, in which the Government will probably pay dividends, should become depreciated. But in answer to this, it was represented that the commission would perhaps be able to bring the new stock into favour in England, which would be an advantage for all. Apropos to this matter, it would perhaps have been desirable that the French Government should have taken an engagement not to tax the dividends hereafter. From what we have witnessed in Austria and Italy such a promise would be useful.

The Government, for some unexplained reason, was desirous to keep secret for awhile its new plan of taxation, but a journal obtained a copy of it, and printed it. It is one of the most astonishing measures ever presented to a Parliament. Not a new "idea" in it—not even the adoption of the "ideas" that other countries have supplied with success, nothing but the aggravation of what existed previously, though it was radically bad, and the reconstruction of what, being absolutely intolerable and absurd, was put to death years ago. If the statesmen of France are capable of producing nothing better, we really must despair of this country.

Taking in the project what is of special interest to England, we find that the duties on iron and coal are to remain unchanged, but that everything else is to be taxed. "Whilst maintaining the necessity of a great metallurgic industry in France," says the report that precedes the scheme, "we think that the suppression of the abuses of the Customhouse bonds (*acquits à caution*), will be sufficient to maintain prosperity, which, whilst preserving the interests of iron-masters, will protect sufficiently consumers against exaggerated prices." These *acquits à caution* have several times been mentioned in your Paris correspondence: they permit iron to be introduced free of duty on condition of being worked up into machinery and implements, and re-exported. But ironmasters have constantly complained that under cover of these, engine-builders, and others to whom iron is the raw material, have contrived, by skilfully transferring them from one number to another, to lower prices permanently. The remedy the masters saw for this was that the *identical* iron bought in should be exported in the form in which it had been worked up, instead of *an equivalent* quantity which the workers had been allowed to substitute. In undertaking to suppress the "abuses" of the system the Government decides for iron masters against consumers, and the practical result will no doubt be to reduce the import from abroad. The maintenance of the existing duties is therefore not so generous as at first appears. With respect to coal it is said — "Our coal pits remain in the situation in which they previously were, and no aggravation of tariff appears necessary on an article which is of the first necessity to agriculture and manufactures." Perhaps it may not be out of place to note that the Minister of Finance who writes this, M. Pouyer-Quertier, has for many years been one of the principal cotton manufacturers of Rouen, and as such is a great consumer of English coal. He must, we may imagine, have felt great satisfaction at finding that his duty as Minister did not require him to augment the price of an article he has to pay in his private capacity.

Apart from coal and iron, the new project taxes mercilessly. The existing heavy tonnage, "of all kinds and all origins," are to be swamped by three-tenths extra, so as to pay from 15sf to 20sf the 100 kilogs (unbalancing 25f to the £, and 100 kilogs as 2 tons, this makes the 2s. 9d. the ton); petroleum is to pay 4sf and 4·5f, and more if refined. Almost all other articles from the most important to the most insignificant, are compelled to declare at 20 to or 2 per cent. on the value. In the 20 per cent. category are hides, skins, furs, wool, silk, cotton, oleaginous seeds, opium, flax, hemp, jute, hops. There are also in this category undertakers' parasols, sealing wax, and gunpowder. In the 10 per cent. department are rice, dyewoods, madder, tan, zinc, copper, lead, bark for tanning, sulphur, matches, oxidized zinc ink, lead pencil and paste. In addition all cops, whether French or foreign, bringing goods from foreign countries or the French colonies, are to pay 1f the ton on their movement.

Two other points call for special attention in England — "Drawbacks," says the project, "may be accorded on the products made of the raw materials to which the duties apply. . . . *Foreign products, coming to them whilst goods by the drawback, shall pay duties equivalent to the amount of drawback.*" In other words, as cotton, silk, wool, &c., are to pay, articles fabricated of these materials in foreign countries are to be taxed more heavily than they have hitherto been. These enactments are accompanied by the extraordinary stipulation that the said drawback and duties shall be *fixed by the Chief of the Executive Government.*

In domestic taxation the changes are these:—On native sugar the same extra duty as on foreign and colonial, re-establishment of the second *décime* (tenth part of a franc on certain stamp and registration duties, which was abolished at the time of the Empire), and the imposition of new stamp duties on railway receipts, and on receipts given by public officials; the extension to all foreign securities, of whatever kind, bequeathed or given to a Frenchman of the duty heretofore paid only by certain of them, and subjection to legacy duty of foreign securities possessed by foreigners dying in France; a tax on maritime and fire assurance, varying according to the amount thereof, and one on such assurances effected abroad on property in France or belonging to Frenchmen; a tax on unwritten agreements for letting, selling, and exchanging houses and lands; the re-establishment of stamp duty on newspapers as in 1850; an augmentation of the duty on wine, cider, perry, alcohol, beer, and of the licence duty paid by public-house keepers, distillers, brewers, wholesale wine and spirit dealers, makers of playing cards, of sugar, chemical matches, chicory, and paper; **an augmentation of duty on playing cards, and of** the selling price of tobacco (the latter is a Government **monopoly); a tax on chemical matches and chicory; a tax** of from 0f to 25f the 100 kilogs on paper, and the addition of it to the existing duties on the import of foreign paper, but French paper exported to be exempt; postage of letters in towns increased from 10c to 15c, and in the country from 20c to 25c, with increased charges for letters weighing more than 10 grammes, for unpaid and registered letters, and for those containing **articles of value, also for money-orders, samples, prospectuses,** &c. Nor is this all: *export* duties are to be imposed on wines **of 1f the hectolitre, or about 22 gallons, if in casks, 20c the** bottle of champagne, 5c the bottle other sorts; and on **alcohols at the rate of 2f the hectolitre in cask, 20c in bottle, and *liqueurs* 25c the bottle. Eggs, of which the export amounts** to millions annually, are to pay 3f the 100 kilogs; and table **fruits, of which also the export is large, are to pay 2f. Oil-cake, too, which has latterly been in great demand abroad, is to be taxed 2f. Even certain sort of dogs are to pay, and** the duty put on them is 5f per head.

The details of the measure are not yet widely known throughout France, but when they are they will doubtless produce great perturbation. Affecting every branch of commerce and industry, we may expect everyone to cry out against them. Already has the Chamber of Commerce of Havre protested against them generally, and particularly against the power of taxing awarded to the head of the Government. This last power the Chamber regards as arbitrary, and as a violation of the special privilege of the Assembly. The workmen of Roubaix, on their part, have signed an address which, regard being had to the part their class play in politics, is significant just now:—

"We, the undersigned, having learned that the Government intends to tax raw materials, declare that this measure appears to us to be fatal to industry, to commerce, and in particular to labour. The tax on raw materials will make the workman suffer. His days of work will be diminished, and at the same time he will pay dearer for articles of consumption. The poor and laborious classes will be more unequally burdened than any others, particularly as regards clothing. We are of opinion that fortunes ought to be taxed, not the labour which makes the country live and prosper. We think that when a tax is established it ought to be equitable, and not make those who possess the least pay the most."

The Committee of the National Assembly charged to inquire into the purchases of arms, ammunition, and stores made for the army under the Government of National Defence, has reported that gross abuses were committed at New York by M. Piétri, the French Consul-general. Credits, it said, amounting to 34,000,000f were granted to him, and he appropriated on pretext of commission, by overcharges for purchases effected and by falsified accounts sums of 600,000f, 360,000f, and 312,000f; also charged for some carbines and mitrailleuses 45 per cent. more than he paid, and bought 6,000 carbines that were of no use. These revelations, as may be imagined, have created great sensation. Others almost as startling are expected.

The financial situation of the city of Lyons is so embarrassed that one of its deputies a few days ago announced that it would be bankrupt on 30th June. The Municipal Council, has however, re-established the octroi dues, producing about 7,000,000f, which were abolished by the Commune (Lyons had a Commune even before Paris) and the Government has advanced 2,000,000f. By this means it is hoped the town will be able to avoid the disgrace with which it was threatened.

The Prefecture of the Seine, Paris, began paying on Monday the coupon of interest, the bonds drawn, and the lottery prizes that were overdue. The coupons of the 1869 loan will, however, only be paid on paid-up obligations.

The Bank of France announces from the 1st the payment of 30sf per share of which 20f to complete the dividend of the second half of 1870, and 70f for dividend of first half of 1871.

Payment of coupons falling due 1st July is announced by the Orleans, the Southern, the North-East, the Treport, the Hesdin, the Bordeaux to Salve, and the Rouen railway companies.

It is announced that the dividend of the Northern Railway for 1870 is to be 42f, including 8f paid in January as interest.

In the annual meeting of the Madrid to Saragossa and Alicant Railway the gross receipts of 1870 were stated to be 27,042,698f; the working expenses and repairs, 10,737,757f; the interest on debentures, &c., 15,016,983f. The balance was added to the reserve of undistributed profits, and made them 4,823,084f.

The Bank de Credit Italien of Florence, represented at Paris by the Credit Industrial, announces a dividend of 12 *lire* for 1870, half payable at once, the other half on 1st January.

The meeting of the Messageries Maritimes is fixed for the 1st August.

On the Bourse the new loan has given rise to extensive operations. It has already been placed on the official list, and it closed to-day at 84f 90c, which is 2f 40c above the price of issue. Business generally is fast becoming as active as before the war, but foreign securities are not in so much demand as they were. The following are the quotations of the week :—

COMMERCIAL AND MISCELLANEOUS NEWS.

The estimated account of the disbursements of the Government of India in Great Britain, connected with the revenue of India in the financial year 1870-71, shows payments amounting to 12,606,678*l*. Among these are 4,252,718*l* for guaranteed interest on the capital of railway and other companies, 2,506,277*l* for the army, and 2,349,324*l* for [illegible] Stores. The following are among the miscellaneous payments :—[illegible] on account of contracts for the construction of two steam Monitors for Bombay, 68,256*l* contribution towards the expenses of Her Majesty's ships employed in the Indian Seas, 19,336*l* to his Highness Maharajah Duleep Sing, 58,890*l* for the Indian Civil Engineering College—viz., for the purchase of the buildings and for alterations and additions; also 1,406*l* for salary of the president, wages of servants, &c.; 46,102*l* for the Royal India Lunatic Asylum, Ealing, being chiefly for purchase, adaptation, and furniture; 1,600*l* payments on account of scholarships founded by the Government of India to enable natives to complete their education in India; 1,555*l* for passage home and allowances of two officers appointed to attend his Royal Highness the Duke of Edinburgh in India, and balance of sums due for costs and freight of presents; 794,794*l* for superannuation,

retired and compassionate allowances; 12,000*l* for mission to the Court of Persia, and 4,345*l* for special mission of Major-General Goldsmid to Persia; 44,962*l* for Her Majesty's establishments in China. The year's charge for salaries and allowances of the establishment of the Secretary of State in Council for India is stated at 131,819*l*, the number of persons being 447.

In 1861, there was a good demand for money, owing to the preparations for the end of the month, but business continued to be greatly restricted. The Bank of France was causing considerable perturbations in the money market in consequence of their choosing to pay in silver very soon after they had been anxious to pay in gold, instead of raising their rate of interest to meet an outward drain of bullion.

In 1868, the approach of the 4th of the month caused no appreciable difference in the demand for money—the 2 per cent. period continuing. The revenue returns of the quarter were unsatisfactory, but it was pointed out that a falling off was quite to be expected after the bad harvest of 1867. An agreement had just been concluded between the Government and the Telegraph Companies as to the terms of purchase.

In 1869, there had been a great demand for short money just at the end of the half-year, but it had subsided at the close of the week. The expense of a gold coinage was being discussed with reference to suggestions of Mr Lowe for an international coinage.

In 1870, there was an improved trade demand, and the commitments on foreign loans were also large, but there was a large supply of money, and no immediate advance in the rate was looked for. The death of Lord Clarendon had just occurred, and there was no sign of the Hohenzollern incident, in which the war of last year, which was declared on the 15th of July, originated.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 9,309,178*l*; in 1868, an excess of 1,045,631*l*; in 1869, a deficiency of 1,402,483*l*; and in 1870, a deficiency of 5,028,259*l*. In 1871, there is an excess of 2,477,958*l*.

DISCOUNT AND MONEY MARKET.—Owing to the pressure for money customary at the close of the half-year, assisted in some degree by the requirements for the deposits on applications for the new French loan, there has been a very active demand for money during the week until to-day. The Stock Exchange settlement also contributed to the pressure. In consequence, both at the Bank and in the open market, there was a very firm demand, and the minimum open market rate instead of being 2½, as was the case last week, was steady at 2½, the rates for long-dated paper having also risen in proportion. To-day the demand has somewhat slackened at the banks and discount houses, and though the quoted rates are what have been current during the week, it will be understood that for the moment the market is rather unsettled, and the quotations are a little wide, there being numerous exceptional transactions. There is likewise less pressure at the Bank than there has been during the week.

The uncertainty in the market is very natural in consequence of the large subscription for the French loan in France, and the evident disposition of the French public to take up their own securities. If the loan had been principally subscribed abroad the effect on the money market, it is thought, would have been greater than it is now likely to be. The restoration of order in France is apparently bringing out money which has been hoarded during the war, so that if the French loan demands are great there is a large supply of new money to meet them, and less will accordingly be taken from the superabundance in the European money markets. The large accumulation in Lombard street again will be increased in a

few days by the payment of the dividends, while the great prosperity of trade continues a permanent cause of accumulation. The great confidence which the French have so unexpectedly shown in their own Government has thus changed materially one of the principal conditions upon which it was reckoned that the French requirements would cause an important monetary disturbance. For the moment, however, it is possible some movement will be felt, remittances on a considerable scale from London to Paris being already in progress; but, in the face of the large subscriptions in France, this movement will probably not enhance the value of money, except to a most limited extent.

With regard to the return to the money market of France of the money which has lately been hoarded, we are informed that not only has gold been brought out to pay deposits on the loan, but that it is also being used in the payment of taxes, which are being got in with surprising facility. In this giving up of hoarded money, however, there is an element of danger. It may soon be discovered that the recent large addition to the circulation is in excess of the normal requirements of the country, and the inconvertible paper may fall to a discount. There is much good authority in France for the opinion that such an event is not likely to happen; but according to all experience, it is at least possible, and any signs of depreciation should be carefully watched. Of course, should the Bank of France contract its issue so as to avert depreciation and provide for an easy return to cash payments, the addition to the general money supply which is expected from the giving up of hoarded money would not take place.

The changes in the Bank account for the week are principally an increase of 3,844,000*l* in the private securities, and of 3,882,000*l* in the private deposits, the two almost balancing each other, and indicating that the money borrowed has immediately come back to the Bank as deposits. The amount however will probably be drawn upon to some extent on account of the French loan, and to meet bills coming due on the 4th. Bullion has increased 201,000*l*, compared with the preceding return.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—3 months	2½	per cent.
Do 4 months	2¼	per cent.
Do 6 —	2⅝ 3	per cent.
Trade bills—3 months	2¼	per cent.
Do 4 months	2½	per cent.
Do 6 —	3¼	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call	1½	per cent.
Discount houses at call	1¼	per cent.
Do with seven days' notice	1½	per cent.
Do fourteen days'	1⅝	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.

Brussels	2½	4	2½	3½
Madrid	5	5	5	5
Hamburg	...	...	3	3¼
St Petersburg	6	8	6½	6

* Nominal.

THE STOCK MARKETS.—The week has been one of more than the average activity on the Stock Exchange, and the movement is the more noticeable from the dulness and suspense which have now prevailed, more or less, for many months, and at the very last amounted very nearly to a suspension of business. The change is caused by the introduction of the French loan of 80,000,000*l*. The financial arrangements of the French Government for the gradual payment of the instalments, the success of the loan itself, and the extent to which it has been applied for and subscribed in France, have all contributed to impart some degree of cheerfulness to every department. In the actual circumstances, it is believed the disturbance which such a financial operation was likely to cause, will be reduced to a minimum. It appears also that the preparations for the loan by French bankers and others by the sale of other securities in preparation for the loan had been pretty well completed, and their effect on the market felt before the issue. The markets, which remained dull up to the issue, have therefore all at once become buoyant. In the leading departments of English and Foreign Government securities and English railways, the improvement has been very conspicuous.

The week has also been marked by continued applications for subscriptions on behalf of new undertakings—another indication of the remarkable abundance of money in Lombard street and on the Stock Exchange. The Turkish loan has not yet been brought out; but it is now spoken of as imminent, and to all appearance applications from other Powers will be encouraged by the present aspect of the markets.

In the French loan itself, as will be seen from the details which we give below, a great deal of business has been done, and the premium rose rapidly in the dealings on Thursday on the news of the large amount of French subscriptions.

ENGLISH GOVERNMENT SECURITIES.—As we have stated, this department shared in the buoyancy of the week, consequent on the subscription of the French loan. The continuous prosperity of the country and the steady accumulation of money, notwithstanding all the recent demands, have also had some effect, while the anticipations respecting the harvest have once more become sanguine. To all appearance, however, there will now be a rush of new loans and enterprises, which must at an early date absorb the present surplus money, and cause a withdrawal of temporary investments from English stocks. To-day the upward movement has been steady, and the closing price, both for money and the account, is 92⅛ ¼, or ⅜ above last week.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	91⅝	91⅝	91⅞	92⅛	par to 5s pm

FOREIGN GOVERNMENT SECURITIES.—The event of the week, as we have stated, was the issue on Tuesday morning—simultaneously in London and other European cities, as well as Paris—of the new French loan of 80,000,000*l* effective. The interest, as was known beforehand, was 5 per cent., and the price of issue 82½ per cent. The English prospectus was issued by Messrs Baring and Messrs Rothschild, and stated that deposits and subscriptions would be received at the fixed exchange of 25f 30c per £—the deposit on application being, as in Paris, 12 per cent., and the remainder being payable in 16 monthly instalments, with a discount of 6 per cent. for payments in full at once. The loan, as we stated last week, was dealt in at a premium even before its issue, and since the issue the premium has steadily advanced. This is hardly to be wondered at considering the rapidity with which the subscription was filled up. According to the usual practice in France, the loan was to be closed as soon as filled up, but so rapid were the applications that at the closing of the loan on the morning of the second day the offers amounted to 180,000,000*l*—more than twice the amount required. The offer of the combination of bankers, to which we referred last week, was, we are informed, accepted, and 40,000,000*l* of the total at least will thus be in the hands of agents who mean to sell again at a sufficient premium; but such is the success of the loan that it seems doubtful whether this circumstance will retard for any length of time the natural rise in French securities, which may now be looked forward to. On the Stock Exchange here the loan was received with no marked favour, owing to the difference

in the Paris practice as to closing, to which we referred last week: but the applications even on Tuesday morning were understood to be large, and, as we have stated, there has since been a large amount of dealing. To-day the market has continued buoyant, the premium rising rapidly from 2¼ to 2¾ 3, and the closing quotation being 2¼ ⅜.

In almost all descriptions of foreign securities, including French Rentes, and the National Defence loan, there has been a rise, and we note improvements especially in Russian, Turkish, Egyptian, Italian, and Spanish stocks. The improvements in some of these indicate with tolerable certainty the previous completion of the arrangements for taking part in the French loan, and it is even stated that a partial reinvestment has commenced. To-day there was another rise in most of these securities, which show, as will be seen from our usual list, a marked improvement for the week. It is probable that they will continue to advance, and in some quarters even a considerable general advance is talked of; but it may be doubted whether there is room for any great improvement, especially as the new demands will probably be somewhat heavy.

The change in the week in French Rentes is from 52 ⅛ ⅜ to 52 ⅝ ¾; and in the National Defence loan from 95¼ ⅛ to 96¼ ½.

The other new loans have closed as follows:—Costa Rica, 1¾ to 2⅛ prem.; Russian, 1871, 3¼ to 3½ prem.; Spanish Land Certificates, ¼ dis. to ¼ prem.

AMERICAN SECURITIES.—A steady demand has prevailed for United States bonds, and a farther rise of ⅜ has taken place in the value of the 1862 issue. American railways close without much change. A fresh attempt is apparently about to be made to float the New Funding loan in Europe, and according to the New York *Tribune*—"Judge William A. Richardson, assistant-secretary of the Treasury, sailed for Europe yesterday in the Java. He was accompanied by Messrs Bigelow and Prentiss, of the Treasury Department. Judge Richardson's mission is to place the new Government loan upon the market. He is clothed with full power. The party have in charge an iron safe, manufactured expressly for the occasion at the Treasury Department, containing several millions of the new bonds." The vessel has now arrived, and immediate action may be looked for. The following shows the change for the week:—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.

BANKS.—The movements in this department have been favourable on the whole, though not numerous. English and Scottish Chartered and Bank of Australasia have risen 1, and Bank of New Zealand ½. On the other hand, there is a decline of ½ in Agra, and ½ in Chartered Mercantile.

TELEGRAPHS.—A steady demand has prevailed for cable shares, and the upward movement has made farther progress. Anglo-American have risen 3; Great Northern Extension, 1; French Cables, ½; British Indian Extension, ¼; Falmouth and British Indian Submarine, ⅛. Submarine stock is nominally 5 lower. Silver's India Rubber Works shares have risen 4, and Telegraph Construction ½ on the week, but Hooper's have given way ¼.

MINES.—A fair amount of business has been transacted in British mining shares, and the result of the week's operations upon prices have been favourable. North Roskear have advanced 8; Devon Great Consols, 5; West Seton, 3; Tankerville, 2½; Wheal Grenville, 1½; Great Wheal Vor, ½. Wheal Trelawny shares have given way 2½; East Lovell, 2; and Bronflyd, ½. In the foreign market the only changes worth recording are a rise of 1½ in Cape Copper, and 1 in Eberhardts.

The letters of allotment in respect of the recent issue of Debentures for 300,000*l* by the Mineral Hill Silver Mines Company (Limited) were delivered on Thursday. It is stated that the total amount applied for was 1,201,800*l*, or four times the sum required. The debentures are 6½ to 7½ prem.

A prospectus has been issued this evening of the Swansea Smelting and Silver Mining Company (Limited), capital, 60,000*l*, in 20,000 shares of 3*l* each. The object of the company is to purchase and work the Swansea Smelting Works and Silver Mines in Clear Creek County, Colorado, United States, and the following profits are calculated upon:—20,000*l* from mining, 10,000*l* from buying ores, and 10,000*l* from smelting, making 40,000*l* per annum, or 66 per cent. upon the capital. The prospectus states that the purchase has been agreed upon for 35,000*l*—27,000*l* to be paid in fully paid-up shares—but the property will not be transferred unless upon confirmation of the vendors' statements. In the meantime 3s per share only is to be paid on application to supply a fund for the preliminary expenses of inquiry, and it is stated that all applications for shares are to be in a form "making it optional to the applicant to complete on the scrip being called in for registration." This last feature appears to be a novelty in such prospectuses, and if it is found that people can become "optional shareholders" it is likely to be largely imitated.

MISCELLANEOUS.—The shares of the asphalte companies have been in demand, though Val de Travers closed to-day rather lower, at 18 to 18½. Hungarian Land Credit, ¼ dis. to ¼ prem.; Mexican Railway debentures, 1¾ to 1¼ dis.; Submarine Cables Trust, 3 to 2 dis.; and Berlin Cattle Market, 2¼ to 2¾ prem. Among the leading changes are a decline of 1½ in London and ½ in North Metropolitan Tramways; 2 in Liebig's Extract; 1 in Peninsular and Oriental. Foreign and Colonial Trust have risen 1; London Financial and London General Omnibus, ½; Berlin Waterworks, ¼.

A prospectus has been issued of the Kirkstall Brewery Company, Limited (late Benjamin Dawson and Co.), capital, 110,000*l*, in 8,000 ordinary shares of 10*l* each, and 3,000 6 per cent. preference shares also of 10*l* each. The company is formed to purchase and work the Kirkstall Brewery, and the price to be paid is 47,500*l* for plant, machinery, and goodwill—the other assets to be taken at a valuation. An undertaking for the same purpose was brought out last autumn, but was withdrawn on account of the war. Messrs Seymour and Co., who introduce this affair, refer to the success of the brewery companies which they have introduced.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—A slight demand for gold exists to-day, sufficient to absorb the amounts now on hand; it is, however, expected that the sums now on the way, from America and elsewhere, will be more than sufficient to supply all immediate orders. We have received during the week about 245,000*l*, chiefly from New York. The Bank has purchased 134,000*l*, and sovereigns to the value of 60,000*l* have been withdrawn for transmission to the Cape and Brazils.

Silver.—About 80,000*l* has been received from New York and the West Indies. The market remains firm, and the price may be quoted as 60½d to 60 1/16d per oz standard.

Mexican Dollars.—Owing to the scarcity of this coin prices have slightly improved, and may now be quoted as 58⅞d for new, and 60¼d per oz for the old coinage. The receipts from all quarters during the week do not amount to much more than about 40,000*l*. The Candia has has taken 37,000*l* to the Straits and China.

Exchange on India for Banks' drafts at 60 days' sight is 1s 10 3/16d to 1s 10 5/16d per rupee.

India Government Loan Notes are unchanged. We quote the 4 per Cents., 93¼; the 5 per Cents., 100¼ to 100⅜; and the 5½ per Cents., 107¼ to 108¼.

Quotations for Bullion.—Gold—Bar gold, 77s 8⅜d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0⅛d to 5s 0 5/16d per oz std; ditto containing 5 grains gold, 5s 0⅛d to 5s 1d per oz std, last price; Mexican dollars, 4s 10 5/16d to 5s 0⅛d per oz, last price.

The sum of 61,000*l* was withdrawn from the Bank of England to-day.

According to the *Gazette* return, the import of the precious metals during the week ended June 28, were:—Gold, 349,104*l*; silver, 258,630*l*. The exports were:—Gold, 123,526*l*; silver, 88,484*l*.

NOTICES AND REPORTS.

STOCKS.

French National 5 per Cent. Loan for Two Milliards of Francs (80,000,000*l*).—At the nominal price of 82½ per cent., reduced however to below 80 per cent., by instalments being deferred, the whole of this great loan has been eagerly subscribed for. The interest is payable quarterly in France, and the deposit upon application was 12 per cent. Messrs Barings and Messrs Rothschilds received applications here at the exchange of 25.30 francs (1*l* sterling).

North German 5 per Cent. Loan.—The *Times* states:—

A further contribution to the prospective abundance of money is to be found in the fact that the London Joint-Stock Bank have announced that the first five series—numbered 1 to 5—of the North German Confederation 5 per cent. Treasury Bonds, amounting to 51,000,000 thalers, or 7,500,000*l* sterling, will be paid off on the 1st of January, 1872, with interest to that date, after which time all interest thereon will cease. The numbers of the sterling bonds to be so paid are as follows:—100*l* each, Nos. A 1 to 7,170, inclusive; 500*l* each, Nos. B 1 to 2,071, inclusive; 1,000*l* each, Nos. C 1 to 2,000, inclusive. Of this loan 3,000,000*l* was subscribed in London in December last at the price of about 95*l* 8s, reckoning allowances. The bonds were for five years, but with right reserved to the German Government to pay them off at six months' notice.

RAILWAY COMPANIES.

East Indian.—Capital expended, 28,995,210*l*. The gross receipts for the half-year ended December last were 1,193,414*l*, against 1,125,719*l* in the corresponding half of 1869; and the net earnings were 666,136*l*, against 613,841*l* in the corresponding half-year. The gross receipts for the year 1870 were 2,631,469*l*, against 2,475,540*l* for 1869; and the net earnings,

[CONTINUED FROM PAGE 784.]

1,532,910*l.*, against 1,446,322*l.* in 1869. The guaranteed interest for the half-year amounted to 672,200*l.*, and would have been more than provided for by the net earnings but for the large charge of Indian income tax (22,461*l.*). The Indian income tax has now been reduced from 3½*d* to about 1 per cent. The traffic receipts for the first 15 weeks of the current half-year have fallen off 80,313*l.* as compared with the corresponding period of 1870. The agency, notwithstanding, encourage the board to expect a financially good half-year. The gross receipts on the Jubbulpore line for the half-year amounted to 53,000*l.*, against 53,798*l.* in the corresponding period; and the net earnings amounted to 9,036*l.*, against 1,713*l.* The Chord line was opened on the 1st January, which completes the whole undertaking.

Mexican.—The net receipts on the two sections for the year 1870 amounted to 83,244*l.*, and the payments from the Government in respect of their subventions have continued to be made with regularity. With reference to the recent issue of first mortgage bonds by Messrs. Bischoffsheim and Goldschmidt, the directors express a hope that the great object of all their efforts—the completion of the entire line—will be satisfactorily accomplished.

Wellington, Grey, and Bruce Railway—7 per Cent. Sterling Bonds.—Messrs. Field, Wood, and Haynes have received subscriptions for 71,000*l.*, the balance of 118,300*l.* sterling mortgage bond, issued for the Guelph and Harriston section of the above lines the construction of which is considerably advanced. The issue price is 95 per 100*l.* bond, and both interest and principal are payable in London or Canada, the principal **not later than** 1891. But the Great Western Company of Canada, which undertakes to work the line, **has agreed to apply 20 per cent.** of the traffic receipts towards the redemption of the bonds by half-yearly drawings, by which it is expected they will be paid off in fourteen years. The line runs from Guelph to Southampton on Lake Huron.

BANKS.

Chartered.—The reconstruction has been carried out, and the capital will henceforth be 2,000,000*l.*, divided into 8,000 shares of 25*l.* each, and 10*l.* paid, instead of 4,000,000*l.*, divided into 40,000 shares of 10*l.* each, 2*l.* paid. The holder of each old share is entitled to two new ones, nearly the whole of which have been already accepted in exchange. The liability is thus reduced from 75*l.* on the one old share to 30*l.* on the two new ones. The balance of the old paid-up capital—namely, 5*l.* per share—goes to form a reserve fund.

Bank of New South Wales.—The adopted half-yearly report showed as available 56,122*l.*, including a previous balance of 2,470*l.* A dividend was declared at the rate of 10 per cent. per annum. 3,000*l.* was added to the reserve fund, and a balance of 8,122*l.* carried forward.

Bank of South Australia.—At the annual meeting a dividend of 10 per cent., free of income tax, was declared.

ASSURANCE COMPANIES.

Marine Insurance.—At the annual meeting a dividend of 1*l.* per share and a bonus of 6*l.* per share were declared.

MISCELLANEOUS COMPANIES.

Assam Company.—The report estimates the probable net profit for the year 1870 at 43,442*l.*, out of which the directors recommend the payment of a dividend of 10 per cent., making, with the interim dividend already paid, a total distribution of 15 per cent. for the twelve months. The proceeds of the tea sold amounted to 116,854*l.*

Berlin Cattle Market, Limited.—Capital, 400,000*l.*, in 20*l.* shares. The promoters of the new cattle market of Berlin, covering 80 acres, and fitted with slaughter-houses, railway junctions, and all necessary appliances, has been effected by this new company for the sum of 375,000*l.* and 150,000*l.* in debentures. It is described as "one of the most extensive and complete establishments of the kind in Europe," and already possesses virtually the whole of this class of business for the city. Dividends of 10 per cent. are calculated upon, irrespective of profits from the horse fairs and meat markets which are in contemplation. Subscriptions are opened both in London and Berlin.

Canada Company.—At the meeting it was decided to distribute 2 per cent., free of income tax, out of the assets in hand, as well as a further sum of 2*l.* per share, as a sixth instalment towards the repayment of the paid-up capital.

Jamieson, Macgregor, and Co., Limited.—Capital 50,000*l.* The shares of this new company have all been privately taken up. The business acquired is that of Messrs. Jamieson and Macgregor, of Stockport and Liverpool.

Hunter and Brunswick Red Asphalte, Limited.—Capital, 100,000*l.* in 10*l.* shares. This company has been established to purchase the lease for 30 years of the well-known Limmer and Brunswick asphalte quarries which, with the Val-de-Travers, have a monopoly of the supply. The Limmer produce has been found to be most durable, and readily saleable at a good profit. Gold medals were obtained for it at the London exhibitions. Further particulars will be found in our advertisement columns.

Hooper's Telegraph.—Interim dividend declared at the rate of 10 per cent.

Hudson's Bay.—The meeting has been postponed till the 12th of July.

South Australian Company.—Year's profit 30,690*l.* A dividend at the rate of 8 per cent. per annum has been declared.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade at Mark-lane to-day ruled dull and depressed, owing to the more favourable harvest prospects, and to the liberal imports of foreign produce. The tendency of values for wheat and flour was downwards, and very little of either article changed hands. There was more disposition shown to sell, but buyers were very reticent. Spring corn was inactive. Barley, beans, and peas, were drooping in price, while maize and oats sold slowly at the late decline. This week's imports of foreign and colonial cereal produce into London have amounted to 16,580 qrs of wheat, 11,120 barley, 55,460 oats, 3,380 sacks and 720 barrels of flour.

At Liverpool and Wakefield this morning factors were compelled to accept less money to effect sales.

The Liverpool cotton market opened on Friday last with a good demand, and rather higher prices were paid. On Monday till Wednesday the market was quieter, and a decline of ⅛d to ¼d per lb was submitted to. Since then the tone has again become strong, and the decline has been entirely recovered, closing prices being $\frac{1}{16}$d per lb above last Friday's rates. The total sales for the week are 98,010 bales, of which the trade have taken 71,380 bales; speculators and exporters, 26,630 bales. The imports have been 28,358 bales; the actual exports, 18,648 bales; and to-day's stock (official return) is 713,320 bales. To-day, upon the announcement of the actual stock, there was considerable excitement, and an advance of ¼d per lb upon yesterday's prices has been freely paid; sales 20,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended June 29, 1871:—

	Imported.	Exported.
American.....bales	16,233	6,631
Brazilian	7,771	1,823
East Indian	1,388	10,867
Egyptian	2,862	643
Miscellaneous	2,476	1,323
Total.....	30,230	21,287

At New York, on June 29, middling Upland cotton was quoted at 19¼ cents per lb. Bombay telegrams to June 26 report the cotton market quiet at 217 rupees for Dhollerah. The shipments of the week had amounted to 62,625 bales.

In their circular of May 30, Messrs Nicol and Co., of Bombay, observe:—During the two business days which have elapsed since the issue of our last circular no change of importance has taken place in the cotton market. The late favourable winds have brought in increased supplies of Dhollerah, but not more than serve to meet existing contracts, consequently prices remain firm. On the whole, however, the tone of matters is quieter, and if home prices do not show signs of renewed activity shortly, we think it extremely probable that a lower level of quotations will be apparent here during the next fortnight. Shipping operations are progressing rapidly, and we look for heavy clearances before the 10th proximo.

The following report, dated Alexandria, June 17, has been forwarded by the Imperial Ottoman Bank:—A continued active and advancing market throughout the week, with a good demand for both England and the continent. Stock very small, and little or no selection. Prices fully ¼d higher. We quote—Fair open, with staple, 8½d to 8⅝d per lb, f.o.b.; good fair, with staple, 9d to 9¼d ditto; fully good fair, with staple, 9⅝d ditto. Weekly arrivals, from June 10 to June 16, 9,270 crs.; weekly sales, ditto, 7,300 ditto. Shipments from June 9 to June 15—England, 4,394; France, 570; Italy, 153; Austria, 413—total, 5,530 bales.

The colonial produce markets have been well attended throughout the week, and full prices have generally been realised. The stock of sugar in the four chief British ports now shows a reduction of 47,000 tons as compared with last year. The demand for floating cargoes has accordingly been active, but the market on the spot, though firm, has been less animated. The demand for coffee on French account has continued, though there has been little inquiry for cargoes on passage. Prices have been well maintained for all descriptions. Transactions in rice have been much restricted.

The annexed is dated Havana, June 6:—We issued our last review on the 6th ultimo. Since then the sugar market, stimulated by a steady demand from speculators, remained active up to about the middle of the past month, and prices gradually advanced to 11⅛ rs to 11½ rs for No 12. During the last fortnight, however, less encouraging advices from the United States, although counterbalanced in some measure by the advance of prices in London, produced a quieter feeling in the market, which still continues to prevail. Planters and holders remain exceedingly firm in their pretensions, keeping almost entirely aloof, in the expectation of being able to do better later on in the season, and prices are thus firmly sustained at the above-named figures. Bright yellows, Nos. 15 to 18, and Nos. 13 to 14, of common process, and the lower grades, Nos. 8 to 10, of greyish colour and strong grain, are all scarce in the market, commanding a fraction above the current prices. Our general quotations, being based on the last sales effected, must be placed as follows:—Nos. 7 to 10, 9½ rs to 10¾ rs, equal to 26s 5¾d to 29s 3d, at 19½ per cent. premium, f.o.b., per cwt; Nos. 11 to 12, 11 rs to 11½ rs, equal to 29s 9¾d to 30s 11¼d, ditto, ditto; Nos. 13 to 14, 11⅞ rs to 12 rs, equal to 31s 6d to 32s 0¼d, ditto, ditto; Nos. 15 to 17, 12¼ rs to 12¾ rs, equal to 32s 7d to 33s 8¼d, ditto, ditto; Nos. 18 to 20, 13 rs to 14 rs, equal to 36s 5¼d to 40s 10½d, ditto, ditto; whites, inferior to superior, 14 rs to 16 rs, equal to 36s 5¼d to 40s 10½d, ditto, ditto. The stock here and at Matanzas amounts to 480,198 boxes, against 519,622 boxes in 1870. Molasses sugars have been in fair demand for shipment to the United States, at from 8½ rs to 9½ rs for Nos. 8 to 11 in hhds and boxes, equal to 21s 11d to 24s 1¼d in hhds, and 24s 3½d to 26s 5¾d in boxes. Since receipt of unfavourable news from the United States there is less inquiry perceptible for this kind of sugar. Muscovado sugars—The excitement noticed in our last report somewhat abated during the latter part of last month; the demand, however, continues to be fair here as well as at outports, at 10 rs to 10½ rs for fair to good refining grades, equal to 25s 2½d to 26s 3½d. The disposable stock is very small considering the season; at our near outports there is hardly any stock left in first hands. The deficiency of our crop has thus affected this class of sugar to a far greater extent than at first anticipated. The exports from here, Matanzas, Cardenas, and Sagua la Grande during the last month, were distributed as follows:—To the United States, 86,566 boxes 96,576 hhds; Great Britain and a market, 50,879 boxes 897 hhds; Copenhagen, 5,092 boxes; Antwerp, 1,080 boxes; Marseilles, 1,300 boxes; Spain, 34,244 boxes 83 hhds; Helsingfors, 3,100 boxes; South and Central America and other parts, 2,267 boxes 30 hhds—total, 184,528 boxes 97,586 hhds, against 280,253 boxes 58,261 hhds same month last year. And the aggregate of exports from the above-mentioned ports sum up to 566,713 boxes 194,405 hhds, against 924,714 boxes 250,608 hhds in 1870. The rainy season having begun in earnest, the crop must now be considered as finished. It is as yet impossible to give anything like a correct estimate of the deficiency of the yield, which, varying from 10 to 40 per cent. in the various districts of the island, will probably amount to 25 per cent. on the average as compared with last year's crop. The weather continues to be very favourable to the growing cane.

The following report, dated May 27, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—Although we have had a good deal of broken weather, it has been only at intervals that shipping operations were obstructed. A good deal of produce has gone forward, whilst as regards coffee the greater portion of the season's crop is now afloat, showing the distribution as below:—

Plantation Coffee.

	1871. cwts.		1870. cwts.
To Great Britain.....	610,765	.....	587,429
Foreign ports.....	36,868	.....	33,866
Australia and India ...	13,533	.....	10,371
	661,166	.....	631,666

NATIVE COPPER.	1871. cwts.		1870. cwts.
To Great Britain	76,828	.....	56,548
Foreign ports.....	22,564	.....	38,068
Australia and India ...	3,243	.....	2,137
	102,635	.....	96,753

The position of coffee has not undergone any change in our market, the little remaining for sale has consequently found but few offers, and business has languished. The arrivals from the producing districts have fallen to a very low figure, and practically we may say that there is now only the Ouvah coffee to come in. The transactions in clean native have been on a very small scale, at unchanged rates.

The following is dated Akyab, May 23:—In our rice market there has been almost nothing doing. The demand for produce is gradually dying out, as shippers secured all their requirements in the interior, and under these circumstances any quotation would be quite nominal. Of real market rice none is coming in anymore, and the little that arrives now and then consists of contract grain, which stands in equal to 51 rs to 52 rs per 100 baskets, good 3 parts rice, quite ready for shipment. At these figures a quantity of about 1,600 tons, which is offered on the spot, could probably be secured, but the offers that are being made do not come up thereto, and sellers have so far not succeeded to dispose of their stock. There are still about 6,000 tons burthen shipping in port, but the cargoes for this tonnage have been all secured, whilst new arrivals have been very limited of late, and our season is thus fast drawing to its close. The rains have been pretty heavy already, and for several days the weather was altogether boisterous, so we must prepare for an early south-west monsoon. Exports of rice to Europe up to date—1871, 98,960 tons; 1870, [illegible] tons; 1869, 51,700 tons. Tonnage loading—1871, 6,000 tons burthen; 1870, 8,300 tons burthen; 1869, 4,700 tons burthen.

Annexed is Messrs Durant and Co.'s circular:—The periodical public sales of silk have been held. The quantity offered was about 1,600 bales Bengal silk, 1,800 bales China, 700 bales Japan, and 1,300 bales Canton silk. Sundry parcels were withdrawn having been sold by private contract; the residue was allowed to pass as usual without biddings. In the general market we have had very large business since Thursday last, with gradually improving prices; in most classes this may now be quoted 1s per lb. The immediate cause of the movement was the purchasing and forwarding large parcels of various classes to France in anticipation of the contemplated duty on importation; but some little may be attributed to an idea that the European crop is likely to prove less favourable in quantity than was recently expected. These shipments to France have swollen our deliveries to very large figures especially in Canton silk; but this class has not at present shared to the full extent in the advance of prices. In Japan silk, on the other hand, the advance may be quoted 1s to 2s upon the lowest moment. Bengal silk has shared to some extent in the general activity, but the business done has been chiefly confined to the best filatures.

Mr Heinrich Schwartze observes:—The rise established at the colonial wool sales on the opening night has, during the last three or four days, assumed increased proportions, and extends now to all descriptions. A detailed statement of the present prices of the various descriptions, as compared with the rates of the preceding series, will best show the changed aspect of the market. Australian combing greasy, 1½d higher and occasionally 2d; Port Phillip washed fleece, 1d to 1½d higher; Port Phillip scoured, 1½d to 2d, especially in the medium sorts; Sydney washed fleece, 1½d to 2d especially in the medium sorts; Sydney scoured, 1d to 1½d, the best kinds comparatively cheapest; Cape snow-white, 1d to 1½d, the best kinds comparatively cheapest; Cape fleece and greasy, 1d to 1½d. In the average this advance amounts to about 10 per cent, but in some instances, as in Sydney medium fleece or Low Port Phillip scoured, it is still greater, and in Australian combing greasy it fully reaches 15 per cent. Two circumstances account in a certain measure for this rapid rise. First, the presence of a vigorous American competition, felt principally during the last few days, and then the threat in the part of the French buyers of an early impost of a duty on the raw material. Further, and beyond these external and exceptional circumstances is the more enduring cause of an undoubtedly healthy position of the woollen industry, and a return of the confidence which political apprehensions had paralysed for years.

The following is from Messrs William Moran and Co.'s indigo report, dated Calcutta, May 26:—Since the date of our last circular we have experienced very unusual weather; instead of the fierce dry heat that is generally characteristic of this month, scarcely a day has passed without one or more good falls of rain which have been most favourable for the rapid growth of the plant, and the accounts from the various districts of lower Bengal, as well as from Tirhoot, Chumparun, and Chuprah are consequently very good. The plant is everywhere in a more advanced state than it generally is at this date, and if we are fortunate enough to escape any heavy gales or excessive rain, manufacturing will probably commence in another fortnight or three weeks. In Eastern Bengal the rivers are still too low to admit of the factories being at full work, but the yield from the plant has somewhat improved. In the Benares province and the Doab the Khoontees are well reported on, and advantage has been taken of the late falls of rain to sow down a good deal of land that is generally left until the rainy season sets in about the middle of June. Exports of indigo from November 1, 1870, to May 22nd, 1871:—To Great Britain, 16,581 chests; France, 513; Trieste, 2,790; foreign Europe, 250; America, 2,424; Gulfs and Levante, 1,764—total, 24,322 chests.

The annexed is dated New York, June 16:—There has been less activity in dry goods during the past week, although the market has been excited in first hands, and sales have been heavier than is usual so early. The advance in prices checked trade somewhat, but the market has been well cleared of goods, and the agents' quotations in some lines are entirely nominal. Jobbers have already laid in very fair supplies of domestics for the fall trade, and since the advance have held off until their wants required their purchasing more liberally. The retail trade is fair for this season of the year, and retail dealers are purchasing moderate amounts to maintain assortments, but are of course not buying any amounts beyond their actual wants. The demand for commercial paper has not been quite as active as last week, though rates are not quotably higher. Lenders are able to obtain better rates for money in this way than they can obtain on call loans, and the expectation that money will continue easy for some time to come, encourages them in purchasing first-class paper. MEETINGS OF COMPANIES NEXT WEEK

Monday, July 3

Great Western Railway, general, St Petersburg Tavern, Paris.

Reversion to 32, special meeting, 4 Clement street, Strand.

Wednesday, July 5.

Midland Railway, special general, Derby.

Phœnix Gaslight and Coke general.

Thursday, July 6

Colonial Bank general, London Tavern.

East Indian Railway, general, City Terminus Hotel.

SATURDAY, July 7.
Pontgibaud Silver-Lead Mining, general, Paris.

THE COTTON TRADE.

LIVERPOOL.—JUNE 29.

The cotton market was quiet in the early part of this week, and prices generally were slightly lower; yesterday afternoon a firmer tone set in, and to-day the business has been large at advancing prices. For Sea Island there has been again a good demand, chiefly for the better qualities, for which full prices have been paid. American, after giving way nearly ¼d per lb, has rallied, and to-day quotations are advanced $\frac{1}{16}$d per lb in the middling descriptions upon last week's rates. New York advices to the 29th instant quote middling upland 20⅜ cents, costing to sell in Liverpool 10¼d per lb, by steamer. Brazil, after some heaviness, is again firm, and, with a more general demand, the full rates of last Thursday are maintained. In Egyptian during the early part of the week there was less activity, and some decline was submitted to; but yesterday and to-day, with more inquiry, prices have fully recovered. East Indian has been in fair request, and prices, after a partial decline, close rather dearer.

In cotton "to arrive" the transactions were comparatively small in the early part of the week and at easier prices, but to-day have been numerous, the latest quotations being—American, basis of middling, Mobile, not below good ordinary, May shipment, 8$\frac{11}{16}$d from any port, May shipment, 8$\frac{15}{16}$d; New Orleans, August-September delivery, not below good ordinary, 8$\frac{11}{16}$d; at sea, 8$\frac{11}{16}$d; low middling, Texas loading, 8$\frac{5}{8}$d; at sea, 8$\frac{3}{4}$d; due, 8$\frac{5}{8}$d; New Orleans, due 8$\frac{15}{16}$d; June-July shipment, not below strict ordinary, 8$\frac{3}{4}$d; good ordinary, Texas, ship named, 8$\frac{1}{2}$d; Bahia, fair, ship named, mutual allowances, 8$\frac{1}{4}$d; August delivery, 8$\frac{1}{4}$d; Maceio, fair mutual allowances, shipping or shipped, 8$\frac{3}{4}$d; Dharwar, good fair new merchants, June sailing steamer, Canal, 7$\frac{1}{2}$d; steamer, at sea, 7$\frac{15}{16}$d; Broach, steamer named, Canal, fair new merchants, 7$\frac{13}{16}$d; good fair, machine ginned, Cape ship named, 7$\frac{3}{4}$d; Dhollerah, Cape, fair merchants, April sailing, 6$\frac{3}{4}$d; ship named, 6$\frac{7}{8}$d; due, 6$\frac{3}{4}$d; fair new merchants, ship named, mutual allowances, 7d; ship named, 7$\frac{1}{4}$d; good fair new merchants, at sea, 7$\frac{1}{4}$d; Oomrawuttee, Cape, fair new merchants, ship named, 7d, 7$\frac{1}{16}$d; May shipment, 7d; fully fair, ship named, 7$\frac{1}{4}$d; Comptah, fair new merchants, steamer named, Canal, 6$\frac{5}{8}$d per lb.

The sales of the week, including forwarded, amount to 98,010 bales, of which 15,010 are on speculation, and 11,620 declared for export, leaving 71,380 bales to the trade.

JUNE 30.—The sales to-day will probably amount to about 20,000 bales, at fully ¼d per lb advance.

The actual stock of cotton, declared this morning, amounts to 713,320 bales, which proves to be 135,760 bales less than the estimate, showing a decrease of 122,760 American, 23,240 Egyptian, and 12,950 East India, and an increase of 16,690 Brazil, 270 Smyrna, and 6,230 West India.

LONDON.—JUNE 29.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

On Friday there was an active demand, at a farther advance of ¼d per lb; the market then continued steady until Tuesday, when it became dull, and prices slightly gave way, but yesterday there was a revival in the demand, and quotations are ½d to ¼d above those of last week.

NEW YORK.—JUNE 16.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, June 16. From the figures thus obtained it appears that the total receipts for the seven days have reached 24,046 bales, against 28,136 bales last week, 36,402 bales the previous week, and 40,178 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,845,176 bales, against 2,800,478 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,044,698 bales. The exports for the week ending this evening reach a total of 20,070 bales, of which 12,755 were to Great Britain, 5,948 to France, and 2,267 to rest of the continent, while the stocks as made up this evening are now 224,851 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

Week ending June 16.	Exported to		Total this week	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	8,078	6,104	14,182	12,000	59,000	57,000
Mobile	...	...	...	877	1,241	3,047

Savannah	...	...	...	3,481	6,000	2,000
Texas	2,000	2,111	4,111	6,000	10,000	10,000
New York	2,682	...	2,682	6,672	47,000	29,000
Other ports	...	...	...	140	14,000	14,000
Total	12,760	8,215	20,975	30,170	224,851	229,277
Total since Sept. 1	2,178,000	1,750,000	3,928,000	3,823,000		...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 19,362 bales, while the stocks to-night are 4,102 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to June 9, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph :—

Ports.	Receipts since Sept. 1.		Exported since Sept. 1 to				Shipments to Northern Ports	Stock.
	1870.	1869.	Great Britain.	France.	Other Foreign.	Total.		
[illegible]								
[illegible]								
[illegible]					

NEW YORK, June 28.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all ports have been 24,000 bales, ditto, since the 1st September 3,870,000 bales. Shipments to England, 31,000 bales; and to France, 8,000 bales; total since the 1st September, 3,052,000 bales. Stock at all ports, 206,000 bales. Middling Upland, 9⅛d, cost and freight, per steamer.

NEW YORK, June 27.—The receipts of cotton at all United States' ports for the last four days have been 10,000 bales. Shipments to England, 6,000 bales; to France, none; and to the continent, 2,000 bales. Middling Upland, 9⅛d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, June 29.—A dragging business only has been done during the past week, as buyers have not felt inclined to purchase at the advanced prices now asked, as the various large foreign markets have not as yet responded, Prices here seemed to give way a little since Tuesday last; but they are now very strong in sympathy with the tone of the cotton market. In yarns the business has been small. Cop yarns have not had a large sale, but have continued steady. Bundle yarns slightly declined in value, but close very firm. The cloth market is sluggish as regards demand, but prices are now strong, and as manufacturers are still in order they will now only sell at extreme rates. The market closes firm, but little doing.

Messrs Alexander Collie and Co. have received the following telegram from Manchester yesterday:—An advance on Tuesday's rates of fully one farthing per pound on yarns, and cloth is asked to-day. This checks operations, but at Tuesday's prices considerable business could be done.

BRADFORD.—There has been a fair inquiry in most classes of wool, though operations are made with great caution, and solely to cover pressing wants. Staplers are asking higher prices, and though a slight advance upon late rates is obtained in most cases, it is quite impossible to realise the high prices current in the country. Noils and brokes are in good request, at stiff rates. There is a fair amount of business doing in the yarn market. The advancing tendency of the prices of the raw material has caused spinners this morning to advance their quotations. There is little change in the piece market. Prices are very firm.

LEEDS.—The woollen market has been visited by London, Manchester, Bradford, and Glasgow buyers. The demand for tweeds was as strong as ever until checked by the makers showing a determination to raise their prices 1d per yard. In the fancy coating department there were only small sales, but the orders in hand at the mills were numerous.

ROCHDALE.—There has been about an average market for flannels of all descriptions. Buyers are becoming more and more reconciled to the higher prices now certainly established. Hence the purchase of goods has been much larger than on this day week. In the wool market the finer qualities are in good demand at higher rates. The advance in price now applies to the best as well as to the lowest qualities.

NOTTINGHAM.—The lace trade is in a very satisfactory state, and future prospects are cheering. Buyers purchase freely, both for the home market and for shipping. In the silk branch laces are selling, and there is a fair inquiry for sprigged nets. The raw material is firm for superior qualities. The hosiery trade is healthy, and the workpeople are well employed. Hosiery yarns are firm at late rates.

BIRMINGHAM.—The preliminary meeting of the South Staffordshire ironmasters has been held. As had been generally foreseen, no change was made in the official price list, which remains, consequently, as fixed in November, 1869, on the basis of £8 per ton for common marked bars. At the subsequent open meeting in the Exchange there was a numerous and influential attendance, and, in addition to current transactions, negotiations were opened in several instances for the new quarter. The general condition of the trade is quite as good as lately reported. On all sides very favourable anticipations of the new quarter are expressed.

BELFAST.—Flax—In our markets supplies were almost nil during the past week. Prices ruled steady, with a slightly upward tendency. Yarns—The demand during the past week was scarcely so active as that existing during the week preceding. Linens (brown handloom)—Demand steady for almost all descriptions. Power-loom—A fair amount of business has generally been transacted. Bleached and finished linens—Home demand continues very good.

DUNDEE.—Our flax market continues very strong, and the general tendency is still rather upwards. Spot goods are very firmly held, holders being rather disposed to withhold their stocks from the market, in expectation of higher prices later on. Tows continue in moderate demand, and prices are maintained. The jute market continues very firm, with a moderate demand from consumers. The yarn market has continued very firm throughout the week and a business is doing at fully former prices. Tow and jute kinds are in particularly good demand and prices are again slightlyhigher. The linen trade, especially in the lighter fabrics, continues very good, and manufacturers are in many cases largely foresold. Jute goods are also in extensive demand, and prices are now higher than for a considerable time back.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—JUNE 16.

The market the past week has been variable, and closes with a very unsettled tone. Flour has arrived less freely, and in view of this fact, as well as the high cost of production, holders have been very firm, but with a decline of 6d in Liverpool the demand has been limited, both for export and home use, and for two or three days the common brands, including low extras, have had a downward tendency, and prices have given way 5c to 10c per barrel, especially in flour, from spring wheat; that from winter wheat has been comparatively firm, though there has been very little doing. The close was depressed, and prices somewhat nominal. Wheat has been in limited supply, and ocean freights have declined, but the shipments eastward have been materially increased, and the receipts at the western markets have continued to exceed 25,000 quarters, or 200,000 bushels per day, while Liverpool has declined 4d under liberal arrivals from all quarters. The demand in this market from the continent has been materially curtailed, though still continued to some extent. Under these circumstances prices have given way, with sales to-day of No. 2 spring at $1.51 to $1.52½, closing at the lower figure, with amber winter nominal. Corn has been scarce, while the home demand has been large. Shippers have been favoured with a decline in ocean freights, but have been met with a decline in Liverpool. Prices have advanced about 3c. The receipts at Chicago are liberal, but at other western markets the quantity coming forward is comparatively small, so that there is very little more than is required for home use, and if any considerable export is to be kept up, prices must be paid that will bring supplies from the hands of the farmer. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

At length a return of warm weather has set in, accompanied by slight showers, under whose influences the crops have improved considerably. The accounts of the young wheats are more favourable generally, and there is no doubt that much improvement has taken place since we last wrote. The crop however is still backward, having only just passed into bloom. The season has not been unfavourable, and if the present fine weather holds on a fair crop may be looked for. It is not probable that the harvest will fall early, but it cannot apparently be long delayed, though a short postponement would not seriously affect prices in the face of the extensive supplies now coming to hand. There is little of interest to notice in the trade which has been much depressed throughout the past fortnight. At the opening of the week neither factors nor millers seemed disposed to operate, but to-day there was a disposition on the part of sellers to give way.

Notwithstanding the disappointing nature of the hay crop, spring corn has ruled very inactive, and barley, maize, and oats are 1s per quarter lower on the week. The imports of oats have been very heavy, but the Russian corn comes to hand in inferior condition. Beans and peas are again easier to purchase.

Mr George Duncan's circular reports the state of the floating grain and seed trade:—During the last eight days 21 grain and seed laden ships have arrived at ports-of-call, viz.:—7 wheat, 6 maize, 2 rye, 1 beans, 1 beans and canary-seed, 1 linseed, 1 palm-nut kernels, 1 colzaka, and 1 flour. The discharge of grain cargoes has been fair in town, but during the last four days quiet. Wheat at first 1s to 1s 6d dearer, but later the dearness fell off, and the advance was lost. Maize has been in steady demand at prices in buyers' favour. Barley.—Four cargoes would have been sold at late prices. Rye has been in steady demand, and prices tending downwards. The imported stocks are as follows:—Wheat, 10 arrived cargoes, Azoff Marianopoli, 49s 6d per 492 lbs; Odessa, 49s 6d; and Taganrog, 50s; also Novitzoff, 48s 6d; Nicopoli Genitza, 50s per 492 lbs; Sandomirka, 54s; No. 1 spring, 54s 6d; and New York prime No. 1 Milwaukee and Minnesota, at 54s 6d per 480 lbs. Maize.—2 arrived cargoes, Odessa, 34s 6d; Galatz, 34s 9d per 472 lbs. Barley.—3 arrived cargoes, Bulgarian, from Sulina, 27s 6d; also from Kustendje, 28s per 400 lbs. Rye.—2 arrived cargoes at Rotterdam at 32s 6d and 32s 9d per 450 lbs. Cotton seed unaltered in price—quiet.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The business in floating cargoes has again been the leading feature of the week. Rather more demand prevails for West India by the refiners, who have taken moderate supplies at about last Friday's quotations. Sales to yesterday amounted to 2,373 casks. Part of the Barbadoes by auction was bought in. 1,534 bags grainy sold at 30s to 32s 6d for brown and low syrupy yellow. Grainy Berbice sold at 31s to 36s 6d for grey. Most of the cargoes disposed of were for the United Kingdom, and upon former terms. A few parcels of low brown sorts have changed hands. The landings last week were rather heavy, chiefly consisting of West India. According to latest returns the stock in the four ports of the kingdom was about 48,000 tons less than in 1870 at same date. The decrease in this port amounted to 33,000 tons on the 24th instant.

Mauritius.—There have not been any public sales.

Madras.—1,000 bags Jaggery have sold at 20s 9d.

Bengal.—255 bags low brown realised 20s 6d per cwt.

Natal.—281 bags brown sold at 24s 6d to 29s 6d.

Manilla.—3,500 bags Ilo Ilo at 23s to 23s 6d; 4,000 bags clayed, no particulars.

Java.—1,479 baskets by auction were bought in above the value. Privately, 400 baskets grey sold at 31s 9d.

Foreign Cargoes.—The following have sold for the United Kingdom: four of Porto Rico at 28s to 28s 3d; one of Cuba at 27s 9d; one Havana, No. 12½, at 31s; and one Bahia at 22s 9d. For the continent one of Bahia at 22s 9d.

Refined.—The market is rather quiet, but former prices are maintained, with a moderate business.

MOLASSES.—About 570 puncheons West India have sold; Barbice and St Kitts at 10s 6d to 11s 6d; Antigua at 12s 6d per cwt.

RUM.—Sales have been of very moderate extent this week, including Demerara at 1s 8d to 1s 10d proof, in puncheons. Business is reported in Jamaica at 3s 7d to 3s 9d per gallon. The deliveries continue large.

COFFEE.—A firm tone pervades this market, the export clearances being very large, and the demand from the shippers continues good. The Dutch sale on Wednesday went 2 to 1½ cents over calculations, which also has a favourable influence. By private contract several parcels of native Ceylon have sold chiefly at 83s to 85s for good ordinary up to 90s for fine. 1,000 bags by auction were only partly disposed of at 84s 6d for good ordinary, and 87s to 87s 6d rather bold. 1,261 casks 777 barrels and bags pasundan chiefly sold at full prices: grey, 90s to 95s; ordinary, small berry and low mouldering to mouldering, 62s to 71s 6d; good middling to fine, including bold, 74s to 84s 6d. 32 casks 7 barrels Jamaica sold at 65s to 68s for ordinary pale and mixed, and 69s to 76s for low mouldering to middling ordery. 70 bales Mocha were chiefly taken in

596 bags East India found buyers: Coorg, 66s 6d to 73s 6d for middling to bold. Of 465 bags Singapore the damaged portion only sold. 4,641 bags foreign were partly disposed of, including Costa Rica at 56s to 65s 6d; Guatemala, 56s 6d to 65s 6d; Rio, 49s to 56s; ordinary Santos, 52s. A floating cargo of Rio has been sold at 52s for the Mediterranean; four for near ports at 50s to 53s 6d per cwt. There were delivered last week, viz., 3,262 tons, 2,660 tons being for export; and the stock on the 24th instant showed 6,070 tons decrease when compared with the previous season.

COCOA.—There is still a good demand, the business including some parcels of Guayaquil partly for exportation at 49s to 55s. Trinidad supports the late advance. By auction 1,172 bags Trinidad about half-sold: grey to good ordinary mixed, 57s to 63s 6d; middling greyish to fine, 65s to 93s. 66 bags ordinary St Lucia, 47s to 47s 6d. 343 bags Grenada sold at 49s to 57s for low to good. 121 bags Surinam were bought in.

TEA.—The market has been quiet, but there is no change in prices. Speculative demand for common grades of congou has not continued. Indian teas are dull, with large supplies offering. 4,800 packages were printed for sale on Wednesday, but part had sold previously, and at easier rates. The portion by auction was chiefly bought in, and a few parcels since placed.

RICE.—Sales on the spot have been rather limited in extent, and prices generally are favourable to the buyers. Madras, 9s 7½d to 9s 9d; Ballam, 9s 6d to 10s 6d. 1,110 bags Rangoon by auction sold at 9s to 9s 3d for rather common quality. Privately, 250 tons Bengal sold chiefly Raree, at 9s 6d ex quay, and part Askoolee at 10s. 460 tons Java reported to arrive at 13s ex quay. Three cargoes of Rangoon for London at 9s 9½; one Bassein, at the same price.

IMPORTS and DELIVERIES of RICE to June 24, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ..... tons	34470	19000	45200	30150
Deliveries	61490	31800	27450	28250
Stock	26150	36670	50400	18490

Deliveries last week 2,695 tons.

TAPIOCA.—1,283 bags partly sold, at rather higher prices. Penang, 2¼d to 2½d. Privately, several parcels have sold, including some for arrival. 171 bags pearl tapioca were bought in above the value.

BLACK PEPPER.—A continuance of speculative demand has caused a fresh rise of fully ¼d per lb. The latest sales on the spot include Penang at 5⅝d; Singapore, 5⅝d to 5¾d; old Aleppy, 6d cash. Of Penang several sales made afloat at 5½d to 5⅝d, including Trang, Malabar, &c., 5½d. 1,975 bags Singapore by auction sold at 5¾d to 5⅞d for low to fair quality.

WHITE PEPPER.—Sales have been made at advancing prices, closing at 9⅜d to 9½d per lb for Singapore. The stock is gradually decreasing, and the market shows an upward tendency.

OTHER SPICES.—At auction 289 bales Zanzibar cloves sold at 2⅞d to 3d for fair quality. 160 bags pimento were taken in at 1⅞d to 2d. 22 cases wild mace withdrawn. 22 packages West India nutmegs sold at 1s 9d to 2s 5d for brown sorts. 88 bales cinnamon, of mixed and coarse quality, realised prices varying from 5d to 2s 1d. 429 bags chips, 3½d; bark, 1⅝d to 2⅝d per lb. 97 bales cassia vera were taken in at 46s. 216 bags rough Bengal ginger at 28s. 178 cases Cochin sold: ordinary to middling, 40s to 52s; bold, 90s. Jamaica ginger is again rather dearer for common sorts. 375 barrels by auction sold: low to good ordinary, 40s to 48s. Other qualities went easier in some instances: middling to good bold, 50s to 90s per cwt.

SALTPETRE.—The market is rather firmer, and the sales reported to yesterday amounted to about 5,000 bags on the spot: refraction, 4 to 3½, 28s to 28s 6d; 6½ to 5½, 27s to 27s 9d; 17 to 11½, 26s to 26s 3d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to June 24, with STOCKS on hand.

	1871.	1870.	1869.	1868.

Total delivered	5740	7480	4480	5090
Stock	2580	2480	4250	6440

Deliveries last week, 161 tons.

COCHINEAL.—At the public sales on Wednesday 1,407 bags Teneriffe went at full prices: silvers, 2s 3d to 2s 5d; blacks, 2s 3d to 2s 8d; very good to fine, 3s 3d to 3s 5d. 35 bags Mexican silvers at previous rates to 1d less, viz., 2s 2d to 2s 3d. 187 bags Honduras: silver, 2s 2d to 2s 9d being steady prices. Blacks however declined 2d to 3d, selling at 2s 5d to 2s 11d per lb.

DRYSALTERY GOODS.—Gambier continues steady. Fair block has sold at 15s 10½d to 16s. 1,200 packages cubes part sold at 19s 6d. Cutch remains quiet. Fine qualities firm. Turmeric steady. Bengal, 19s 6d per cwt. 63 bales Bengal safflower were bought in at 9l to 12l. China galls part sold at 49s 6d to 52s 6d per cwt.

SHELLAC.—561 cases about two-thirds part sold: native liver, 5l 12s 6d to 5l 17s 6d; reddish orange, 6l 10s to 6l 12s 6d; livery orange, 6l 2s 6d to 6l 5s; garnet, 5l 12s 6d; dark button, 4l 17s 6d to 4l 18s per cwt.

INDIGO.—The quantity of East India for sale on the 10th inst. will be about 10,500 chests. There has not been any change in the market since last week.

METALS.—There has been a steady business, and the advance last quoted is generally maintained. Scotch pig iron has met with a good demand. The last sales were at 57s 3d cash. Rails are without change. English tin is rather dearer, and supplies very moderate, consequently foreign remains firm. Straits, 131l 10s to 132l on the spot and afloat. Banca, 132l 10s to 133l. Soft English lead, 18l to 18l 5s for the best brands, with a quiet market. Most kinds of copper are again rather dearer, the last sales being as follows:—Chili, &c., 67l to 67l 10s; and the finest qualities up to 68l. English in better demand. A large business in Australian at higher prices. Sales have been made in Silesian spelter at last week's rates, but the market is now less firm, 18l 5s per ton about the value.

JUTE.—The market continues strong, the sales of the week being chiefly for arrival, including parcels of the new crop at fully last week's rates, ranging from 18l 7s 6d to 25l 15s. On the spot a limited quantity sold privately. The public sales on Wednesday comprised 6,083 bales, and nearly two-thirds sold at full rates. Low to fine, 19l 5s to 27l per ton.

HEMP.—Manila steady. A few sales are reported, chiefly at 46l per ton for fair roping quality.

HIDES.—At the sales of East India, 172,960 hides, &c., went at previous rates to ¼d per lb advance.

LINSEED.—A good business has been done in Calcutta to arrive at 61s to 61s 6d. Black Sea now loading has been sold at 59s 3d c.f. and i., to a direct continental port. Only small sales on the spot, including Calcutta, at 63s per quarter.

OILS.—Sperm is held at 81l 10s to 82l. Small sales of cod are reported at 35l 10s per tun. Olive is steady in price, but the business is small. Nothing done for arrival. Fine palm is rather scarce, and worth 37l to 37l 10s for Lagos. Cocoa-nut dull. Ceylon, 39l 10s to 40l, and 10s more for arrival.

LINSEED OIL is in fair demand at 32l 10s on the spot, 32l 10s to 32l 15s for delivery last four months. English brown rape advanced at one period to 43l 10s, but now the market rules quiet at 42l 15s to 43l per cwt, both on the spot and for delivery to end of year.

PETROLEUM dull at 1s 5¾d on the spot; 1s 6½d for the last four months. Petroleum spirit 9d per gallon.

TURPENTINE.—American, 40s 6d to 41s; French, 40s 6d. The former to arrive, 37s per cwt, and less for later shipment.

TALLOW.—Quotations of foreign are steady, although supplies of Australian continue large, and the production of home tallow will probably be good. This morning's quotations for Petersburg are 43s 9d to 44s on the spot, and 45s 9d to 46s per cwt for the last three months. The market is firm.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—A good business was done in West India, viz., 1,049 casks, making 3,422 casks for the week. The Barbadoes by auction was chiefly taken in. Crystallised Demerara sold at high prices from 36s 6d to 38s 6d. 1,056 bags Penang soft grey and white, 32s 6d to 36s. 425 bags Natal, 26s 6d to 32s. Privately business has been done in Porto Rico at 34s.

COFFEE.—The public sales of plantation Ceylon went with spirit, 1,653 casks 106 barrels 966 bags being sold at full prices. 339 bags native 317 cases East India went at about former quotations; also part of 189 packages Mocha.

PEPPER firm. Penang on the spot, 5¾d; afloat, 5⅝d to 5¾d.

WHITE PEPPER.—Farther business at 9¾d per lb for Singapore.

SHELLAC.—90 chests sold at about previous quotations: native, 6l to 6l 5s; livery orange, 6l 7s 6d to 6l 10s.

TURMERIC.—1,100 bags Bengal sold at 19s 6d to 20s for fair to very good quality.

TIN.—Straits dearer, 122l to 123l.

OILS.—No material change occurred.

TALLOW.—1,812 casks Australian by auction sold at higher rates: mutton, 42s 6d to 43s 9d; beef, 38s to 43s. 120 casks American sold at 40s to 42s 6d per cwt for mutton. No change in town tallow.

ADDITIONAL NOTICES.

FLAX.—Market very firm.

HEMP.—Market for Russian is steady. More inquiry and business doing in Manila hemp; good quality scarce, and 48l paid for good fair quality.

TOBACCO.—There has been but a quiet market during the past week, although the total sales sum up rather above the preceding. North American tobacco of old import continues in request, with buyers; but the stock is now neglected. Prices continue without alteration. In other growths termed substitutes and segar tobacco there has been but little done. Good useful descriptions are in demand.

LEATHER.—The leather trade has not shown any change during the past week. A good steady demand continues for most descriptions of goods.

METALS.—Some considerable business has been doing daily. Copper is well maintained by demand for all kinds of raw, and moderate inquiry for manufactured. Tin has advanced rather suddenly, about 2l per ton, on announcement of very heavy deliveries of all kinds during the month. Iron is steady. Spelter rather firmer. Lead continues quiet. Tin plates in good request.

METROPOLITAN CATTLE MARKET.

MONDAY, June 26.—The total imports of foreign stock into London last week amounted to 21,226 head. In the corresponding week in 1870, we received 8,376; in 1869, 12,865; in 1868, 6,146; and in 1867, 9,057 head.

The cattle trade to-day has been characterised by firmness. The supplies of beasts from our own grazing districts have been tolerably good. A few Lincolnshire beasts of fair quality have been offered, and Norfolk has also forwarded a good supply; but the receipts from Scotland have been limited. Foreign stock has been well represented so far as number is concerned, but the condition has not been prime. Owing to the high prices demanded business has been restricted. The best Scots and crosses have made 5s 10d to 6s per 8 lbs, being an advance of 4d per 8 lbs. The supply of sheep has been less extensive, but the quality has been good. The inquiry has been firm, and 4d per 8 lbs more money has been obtained. The best Downs and half-breds have changed hands at from 6s 4d to 6s 6d per 8 lbs. For lambs there has been more inquiry, at from 6s to 7s 4d per 8 lbs. Calves have been steady in value and inquiry. Pigs have realised former quotations.

SUPPLIES ON SALE.

	June 27, 1870.	June 26, 1871.
Beasts.....	3,520	4,030
Sheep and lambs.....	25,080	21,550

Prime small ditto	5	4	5	6	Large pork	3	4	4	0
Veal	4	10	5	4	Small pork	4	4	4	10

Lamb, 5s 8d to 6s 8d.

HOP MARKET.

Borough, Friday, June 30.—The unfavourable accounts from the plantations have imparted renewed firmness to this market. Sales have been effected freely, and prices have had an upward tendency. Mid and East Kent, 5os to 147s; Weald of Kent, 5os to 98s; Sussex, 5os to 80s; Farnham and country, 7os to 112s; olds, 2os to 6os per cwt.

POTATO MARKETS.

Borough and Spitalfields, Friday, June 30.—Full average supplies are coming. The trade is quiet, at somewhat late rates. Flukes, old, 5os to 6os per ton; ditto, new, 8os to 9os per ton; rocks, 4os to 5os per ton; kidneys, new, 9s to 12s; Jerseys, 8s to 10s; French, 6s to 7s per cwt.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

Friday, June 30.—The supply continues active, but our market does not [illegible] and only fresh arrivals of current qualities meet with ready sale either by private contract or at auction.

CORN.

(FROM OUR OWN CORRESPONDENT.)

Friday, June 30.—There was only a small attendance, and a quiet market to-day. Wheat was slow, at 4d to 2d reduction. The flour trade was equally dull, at a proportionate reduction. Maize was rather [illegible] taken, at 2d reduction since Tuesday. Beans, 38s 6d to 39s. All [illegible] unchanged.

Manchester, Friday, June 30.—The wheat trade, influenced by the more general weather, was dull at this market to-day, and although [illegible] was made, with a concession in prices, millers confined their purchases to a few [illegible] parcels. In all other articles there was no alteration.

The Gazette.

Tuesday, June 27.

BANKRUPTS.

William Thomas Wheeler, United States, late innkeeper, Cleobury Mortimer, Shropshire.

George Isaac Hazelhurst, Lincolnshire, innkeeper.

John Brooks, Bingley, Lancashire, earthenware dealer.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

COLONIAL BANK.

Subscribed Capital, £2,000,000.

Paid-up Capital, £600,000. Reserved Fund, £53,000.

The Court of Directors of the Colonial Bank hereby give notice, that in pursuance of the provisions of the Charter, a Half-Yearly General Meeting of Proprietors will be held at the London Tavern, Bishopsgate street, on Thursday, July 6, 1871, at Two o'clock precisely, to receive the Report of the proceedings of the Corporation; and for the election of a Director in the room of James Scott, Esq., deceased; and of an Auditor in the room of Joseph Hoare, Esq., resigned.

Joseph Hoare, Esq., offers himself as a candidate for the vacant Directorship, and Charles Andrew Prescott, Esq. offers himself for the vacant Auditorship.

Proprietors are requested to take notice of the following provisions of the Charter, viz.:—

1. Every proprietor intending to become a candidate, or to propose some other Proprietor as a candidate, for the vacant office of Director or Auditor, must, within 10 days of the date hereof, signify by some writing under his or her hand, to be left within the same 10 days at this office, either his own intention to become a candidate, or the name and place of abode of the candidate intended to be proposed by him or her.

2. A list of candidates, with the names of the proprietors (if any) by whom they are proposed, will be exhibited in this Office 14 days prior to the date of election.

3. No proprietor will be entitled to vote at this meeting unless his or her name shall have been registered at least three calendar months prior to the date of election.

The Transfer Books of the Corporation will be Closed on June 26, and reopened on July 13, 1871.—By order of the Court of Directors,

C. A. CALVERT, Secretary.

No. 13 Bishopsgate street Within, June 5, 1871.

ABRIDGED PROSPECTUS.

The Company is formed to purchase and work the Swansea Smelting Works, and certain valuable silver mines in Clear Creek County, Colorado, U.S.A.

Hitherto, owing to the want of facilities for selling and smelting the ores on the spot, those mines alone possessing very rich ores, or having their own smelting works, have been profitably worked by their proprietors.

The functions of the Company are, therefore, intended to be threefold

1st.—To raise ores from their own mines.
